TAX ANTICIPATION NOTES

We carry a good list of short term County and Municipal notes at all times available for banks and investors.
These notes run from sixty days to a year, are payable in New York and carry legal opinion. Income from these notes is totally exempt from the Federal Income Tax and they make a very attractive short term investment in comparison with commercial paper.

Laying the first underground cable at Attleboro, Mass., in 1881.

The first underground wires

THE telephone was scarcely five years old when its sponsors, looking far into the future, essayed the first trial of underground telephony. The first conversation through an underground cable was one-fourth mile in length, in 1881. But it was not until twenty years later that the first long distance underground cable came into actual use.

From 1901, however, progress was rapid. Today, overhead wires have disappeared in many cities. Of its total of 50,000,000 miles of wire, inter-connecting its millions of telephones, the Bell System has 30,000,000 miles underground, representing an investment of $524,000,000 in conduits and cables.

This nation-wide plant, and its nation-wide service underlie Bell System securities.

The stock of the A. T. & T., parent company of the Bell System, can be bought in the open market, to yield a good return. Write for booklet, "Some Financial Facts."

To the Holders of

Bethlehem Steel Company

Fifteen Year Seven Per Cent. Marine Equipment Trust Certificates

Due October 1, 1935

Notice is hereby given as provided in Article V of the Agreement dated October 1, 1920, between Ore Steamship Corporation, Guaranty Trust Company of New York, as Trustee, and Bethlehem Steel Company, that said Bethlehem Steel Company has elected to have redeemed on July 9, 1926, and there will be redeemed on that date at 102½% of their principal amount plus unpaid dividends accrued thereon to that date, all the outstanding Bethlehem Steel Company Fifteen Year Seven Per Cent. Marine Equipment Trust Certificates due October 1, 1935, which have not heretofore been called for redemption.

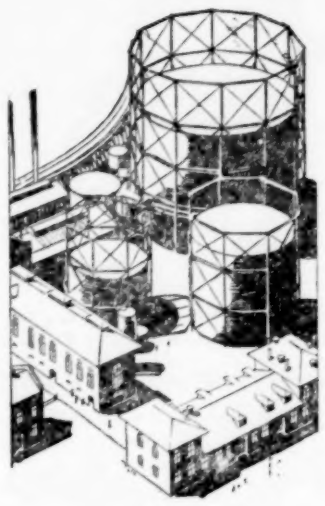
Said Certificates with all dividend warrants due on and after October 1, 1926 attached, should be surrendered for redemption on and after July 9, 1926, at the TRUST DEPARTMENT of Guaranty Trust Company of New York, 140 Broadway, New York City.

On and after July 9, 1926, dividends on said Certificates will cease and the warrants maturing after said date will become null and void.

Guaranty Trust Company of New York

By WILLIAM C. POTTER, *President.*

Dated June 17, 1926.



Referring to the above notice, the undersigned has been authorized by Bethlehem Steel Company to purchase any of the above-mentioned Equipment Trust Certificates on any date prior to July 9, 1926. Accordingly, upon the surrender of any of such Certificates to the undersigned at its above-mentioned Trust Department with all dividend warrants thereto attached which shall mature on and after October 1, 1926, the undersigned will pay 102½% of the principal amount of such Certificates so surrendered plus unpaid dividends accrued thereon to the date of such surrender thereof.

MOFFAT TUNNEL IMPROVEMENT DISTRICT

INCLUDED WITHIN THE DISTRICT ARE THE ENTIRE

CITY AND COUNTY OF DENVER

COUNTIES OF GRAND, MOFFAT, ROUTT AND CERTAIN PORTIONS OF THE COUNTIES OF EAGLE, GILPIN, BOULDER, ADAMS AND JEFFERSON

COLORADO

GOLD BONDS

Assessed Valuation (Real Estate and improvements fixed as of 1921 subject to levy) **$289,427,911**

Denver's portion of this valuation is $260,000,000 or 90%

Total Debt **12,720,000**

Population of District (officially estimated) 330,000

Population City & County of Denver (Estimated 1926) **285,000**

Denver's portion of the District population is 285,000 or 85%

This District has the ideal condition of having within it a large metropolitan city, (Denver), with substantial manufacturing, industrial and distributing interests. The balance of the District abounds in natural resources, and also contains hundreds of thousands of acres of rich farming and grazing lands. The Northwestern portion of the District, comprising the Counties of Routt, Moffat, and Grand, contains many valuable raw products, including numerous precious metals, billions of tons of coal, immense quantities of timber and oil shale which can be converted into gasoline and other by-products. A considerable part of the District is given over to agriculture, the principal crops being wheat, grains, hay and alfalfa, fruits and vegetables. There are many large ranches located in the District. This section is said to be the best cattle country in the West, there being ample areas for grazing and sufficient hay to keep the stock throughout the year.

On January 6, 1926 the Tunnel Commission executed a contract with the Denver and Salt Lake Railway Company for the use of the Railroad Tunnel for a term of fifty years, with an option of an additional term of forty-nine years, by which the Railway agrees to pay 66 2-3% of all interest and principal charges on the $9,220,000 of indebtedness heretofore incurred, and all of the operating and maintenance costs of the Railroad Tunnel. The Tunnel Commission expects to contract in the near future, for the use of the Water Tunnel on the basis of the user paying 33 1-3% of all interest and principal charges on all bonds heretofore issued, thereby relieving the district of any maintenance and operating expenses and providing for the payment, from revenues, of over two-thirds of the total principal and interest charges on the present outstanding indebtedness of the district.

R. M. GRANT & CO.

INCORPORATED

While the above statements are not guaranteed, we believe them to be correct.

Associated Gas and Electric Company

61 Broadway, New York

Dividend—Class A Stock

The Board of Directors of Associated Gas and Electric Company has declared the quarterly dividend payable August 2 on its Class A Stock to holders of record at the close of business June 30, 1926, at the rate of 2½% of one share of Class A Stock for each share held, or 10% per annum.

At this rate the stock dividend is equivalent to about $3.00 cash per share per year based on the present market price of about $30.00.

Stockholders may also purchase or sell sufficient scrip to make full shares at the rate of $1.00 above or below, respectively, the sale price of Class A Stock.

M. C. O'KEEFFE, Secretary.

THE TEXAS COMPANY.
Dividend No. 93.

A dividend of 3% on the par value of al of the outstanding capital stock of this company, for which definitive stock certificates have been issued, has been declared payable June 30, 1926, to stockholders of record June 4, 1926.

C. E. WOODBRIDGE, Treasurer.

May 18, 1926.

Harrisburg Light & Power Company
Preferred Stock Dividend.

The regular quarterly dividend of one and one-half per cent (1½%) on the preferred stock of Harrisburg Light & Power Company has been declared for payment June 30, 1926, to stockholders of record at the close of business June 21, 1926. H. W. STONE, Treasurer.

GENERAL GAS & ELECTRIC CORPORATION

Regular quarterly dividends on the following stocks of this Corporation have been declared, payable on July 1, 1926, to stockholders of record at the close of business on June 15, 1926, said dividends being for the quarter ending June 30, 1926:

$2.00 per share on the $8.00 Cumulative Preferred Stock, Class A.

$1.75 per share on the $7.00 Cumulative Preferred Stock, Class A.

$1.75 per share on the Cumulative Preferred Stock, Class B.

37½c. per share on the Common Stock, Class A.

Holders of Common Stock, Class A, are given the right to subscribe to additional shares of Common Stock, Class A, of this Corporation at the price of $25.00 per share to the extent of the dividends payable to them on July 1, 1926. The Equitable Trust Company of New York, Transfer Agent, will deliver to each of the holders of Common Stock, Class A, entitled to the dividend payable July 1, 1926, Common Stock, Class A, or scrip certificates therefor, equivalent in amount, taken at $25.00 per share, to the number of dollars of dividends to which each such stockholder would be entitled, unless advised by such stockholder on or before June 21, 1926, that such stockholder does not exercise the right of subscription to which he is entitled and requests the payment of the dividend in cash.

O. CLEMENT SWENSON, *Secretary.*

New York, May 26, 1926.

New Issue

$2,500,000

Union Water Service Company

First Lien 5½% Gold Bonds, Series A

Dated May 1, 1926 ***Due May 1, 1951***

Principal and semi-annual interest (May 1 and November 1) payable in New York City. Denominations of $1,000 and $500. Interest payable without deduction of any Federal income tax not in excess of one and one-half per cent. Refund of Pennsylvania, Connecticut, Kansas and California taxes, not to exceed four mills, Maryland taxes not to exceed four and one-half mills, Kentucky and District of Columbia taxes not to exceed five mills, Michigan exemption tax not to exceed five mills, Virginia taxes not to exceed five and one-half mills, and Massachusetts income tax not to exceed six per cent. to resident holders upon timely and proper application. The New York Trust Company, Trustee.

Business: The Union Water Service Company, through its constituent properties, will supply without competition water for domestic and industrial purposes to thirteen communities located in New York, New Jersey, Pennsylvania, and Ohio. The communities served with water at retail include Ocean City, West Paterson, Butler, Little Falls, Bloomingdale, Smith-Mills, New Jersey; Massillon, Ohio; Punxsutawney, Big Run, Pennsylvania. In addition, White Plains, New York, and Pompton Lakes, New Jersey, are served with water at wholesale; and Pompton Lakes in turn serves at wholesale Haskell, Riverdale and Wanaque, New Jersey; and sewer service is rendered in Ocean City, New Jersey. Excluding the large summer population of Ocean City, the total population served is approximately 105,000.

Security: In the opinion of counsel, this issue of First Lien Bonds is a direct obligation of the Company and is secured by a first lien on all the outstanding bonds and capital stock, except directors' qualifying shares, of the present constituent companies. This issue of First Lien Bonds is, therefore, in effect equivalent to first mortgage bonds. The securities so pledged include all of the First Mortgage bonds of present constituent companies, which First Mortgage bonds are equal in principal amount to the principal amount of the First Lien Bonds of this issue. The Trust Indenture will provide that any additional bonds or stocks which may be issued by constituent companies in the future shall likewise be pledged as additional security under the Trust Indenture. The value of the various properties, based on the average cost prices for the past ten years, is estimated to be in excess of $4,780,000.

Earnings: The consolidated earnings of the properties of constituent companies are reported as follows:

	*Year ended June 30, 1926**	*Year ended Dec. 31, 1925*
Gross Revenues	**$524,638.00**	**$490,232.49**
Operating Expenses, Maintenance and Taxes	**231,997.00**	**218,133.90**
Balance	**$292,641.00**	**$272,098.59**
Annual Interest on the Company's entire funded indebtedness (this issue)	**137,500.00**	

* Month of June, 1926, estimated.

The above statements do not reflect the increased earnings which will accrue to the Company during the coming year, due to rate increases recently put into effect.

Public Relations: The operation of the New Jersey, Ohio and Pennsylvania properties is subject to the jurisdiction of the Utility Commissions of these respective States. Counsel advise that the legality of the operating rights of the constituent companies is satisfactory.

Purpose of Issue: The proceeds of the sale of these bonds will be used to retire all funded indebtedness against the properties outstanding in the hands of the public and to partially reimburse the Company for necessary improvements, betterments and extensions to the properties and for other corporate purposes.

These bonds are offered when, as and if issued and received by us and subject to the approval of counsel, Messrs. White & Case.

Price 97½ and Interest to Yield about 5.70%

WOODHAVEN WATER SUPPLY COMPANY

NEW YORK CITY

First Mortgage 5½% Gold Bonds

(Series "A")

To be dated June 1, 1926 — To mature June 1, 1946

Redeemable as a whole or in part at the option of the Company on the first day of any month upon 30 days' notice at 105 up to and including June 1, 1936; at 104 thereafter up to and including June 1, 1941; at 103 thereafter up to and including June 1, 1943; at 102 thereafter up to and including June 1, 1945 and 101 thereafter up to May 1, 1946, plus accrued interest in each case. Interest payable June 1 and December 1 at the Brooklyn Trust Company, New York, without deduction for normal Federal Income Tax not to exceed 2%. Coupon bonds in interchangeable denominations of $1000 and $500 registerable as to principal only. Reimbursement will be made of the Pennsylvania and Connecticut Four Mills Taxes and the Massachusetts Income Tax not in excess of 6% to resident holders upon proper and timely application.

BROOKLYN TRUST COMPANY, NEW YORK, TRUSTEE

Mr. A. J. Cordier, President of the Woodhaven Water Supply Company, summarizes his letter to us as follows:

HISTORY AND BUSINESS: Woodhaven Water Supply Company was incorporated February 28, 1888 under the laws of the State of New York. It serves that section of Greater New York known as "Woodhaven" located in the fourth ward of the Borough of Queens in the City of New York, where it serves 17,398 customers in a rapidly growing section of Greater New York, having a population estimated at 125,000. The Company owns 40 acres of land on which are located 5 pumping stations having a daily capacity of 17,000,000 gallons of water and two reservoirs in order to equalize the maximum draft at times of heavy consumption. The distributing system comprises about 86 miles of mains and supplies over 2½ billion gallons of water annually in this territory. The Company's rates are as low as any other independent Company in the Metropolitan district, using the same frontage measurement scale of rates and the same meter scale of rates as the City of New York. Water is furnished to 1214 hydrants for fire and other purposes.

SECURITY: These bonds, in the opinion of counsel, will be secured by a direct first mortgage on the entire physical properties of the Company, now owned or hereafter acquired, funds to be deposited with the Trustee to retire at maturity the entire outstanding present mortgage debt. Additional bonds (other than for refunding purposes, at par for par) may be issued only to the extent of 75% of the net cost of expenditures made for permanent extensions, enlargements and additions subsequent to June 1, 1926 of and to the properties of the Company, provided net earnings for the 12 consecutive calendar months within the 15 months immediately preceding application therefor shall have been equal to at least twice the annual interest requirements on all first mortgage bonds outstanding and for the issuance of which application is then made.

PURPOSE OF ISSUE: The proceeds from the sale of these bonds will be used for the retirement of $827,000, principal amount of mortgage debt maturing January 1, 1928, and for other corporate purposes.

EARNINGS, as certified by Messrs. Haskins & Sells, Certified Public Accountants, are as follows;

	Years ended December 31st		
	1923	1924	1925
Gross Revenues	$262,162	$285,488	$305,314
Operating Expenses, Maintenance and Taxes (except Federal Income Tax)	106,665	122,698	123,818
Net Earnings	$155,497	$162,790	$181,496
Interest on Total Mortgage Debt			55,000
Balance Available for Depreciation, Federal Income Taxes, etc			$126,496

Net earnings for the calendar year 1925 are equal to over 3¼ times annual interest requirements. Net earnings for the three years ended December 31, 1925 as shown above, have averaged over 3 times annual interest requirements on the total mortgage debt to be presently outstanding. Dividends have been paid regularly on the common stock at increasing rates since the inception of the Company.

Bonds are offered, when, as and if issued and received by us, and subject to the approval of counsel. All legal matters will be passed upon by Messrs. Masten & Nichols. It is anticipated that delivery of bonds in temporary form, or interim receipts therefor, will be made on or about June 30, 1926.

Price 100 and interest to yield 5½%

Love, Macomber & Co.

The above statements, although not guaranteed, have been obtained from sources which we consider reliable.

All these bonds having been sold, this advertisement appears as a matter of record only.

(a) The 5½% Series due 1951 is limited to $5,000,000 and the issuance of the balance of this Series ($500,000) and of additional bonds of other series, is subject to restrictions of the Indenture.
(b) Original issue $1,250,000 and $828,500 have been converted into common stock.

[*The President of the Company, Mr. W. G. Brorein, summarizes as follows:*

The Peninsular Telephone Company owns and operates, without competition, the central station telephone systems in Tampa, St. Petersburg and sixteen surrounding cities and towns, all of which are connected by toll and long distance lines of the Company. The toll and long distance lines also extend to eleven other nearby cities and towns of south Florida. Connections are made with the long distance lines of the American Telephone & Telegraph Company under favorable contract, thus affording nation-wide telephone service. The population served by the Company, including St. Petersburg, is over 400,000, showing an increase of over 300% since 1915. The franchises are satisfactory for the operation of the business.

On December 31, 1914, the Company operated 9,422 telephones and on December 31, 1925, it operated 42,881 telephones, an increase of over 355% in 11 years. Over 4,000 telephones have been installed since December 31, 1925. In the 12 years ended December 31, 1925, the gross revenue increased 545% and the net income 417%.

Earnings for the 12 months ended April 30, 1926, before deducting depreciation:

Gross Revenue	$1,898,175
Operating Expenses, Maintenance and Taxes	1,243,647 (a)
Net Income	$654,528 (b)
Annual Interest on $4,500,000 First Mortgage 5½% Bonds	247,500
Balance	$407,028

(a) Maintenance equals 26% of Gross Revenue. (b) 2.6 times interest on First Mortgage Bonds.

The earnings do not reflect any benefits from very substantial additions and extensions to the properties amounting in total to approximately $1,115,000 which until completed will not begin to earn. Furthermore, on the basis of the new rates granted by the Public Service Commission of the State of Florida, to become effective July 1, 1926, it is estimated that the additional net income, before deducting depreciation, from the new rates with the stations now in service will amount to approximately $30,000 per month.

The proceeds of this issue will be used to pay current indebtedness incurred for additions and extensions to the property made during the year 1926, and will in addition thereto provide some cash for the future extensions and additions to the Company's telephone plant and system.

The value of the Company's property is largely in excess of its First Mortgage Bonds, the equity being represented by Debentures, Preferred and Common Stock, the market value of which, based on present quotations, is in excess of $5,000,000.

The legal details in connection with this issue have been approved by Messrs. Hawkins, Delafield & Longfellow, of New York City.

Price 101½ and Interest to Yield Over 5.40%

The information and statistics contained in this advertisement are not guaranteed, but have been obtained from sources we believe to be reliable.

$3,000,000

American Public Service Company

First Lien 5% Gold Bonds, Series C

Due December 1, 1942

Price 96 and Interest, Yielding over 5.35%

Dated December 1, 1912. Interest payable semi-annually June 1 and December 1 in New York, without deduction for Federal Income Taxes now or hereafter deductible at the source, not in excess of 2%. Coupon bonds in interchangeable denominations of $1,000, $500 and $100.

The following information is summarized from a letter from Mr. Martin J. Insull, President of the Company:

Territory: The American Public Service Company controls through ownership of all the capital stocks (except directors' qualifying shares) and all outstanding funded debt, eleven public utility operating companies. The subsidiary companies supply, without competition, 124 communities with one or more classes of public utility service, 122 with electric service, 58 with ice, 2 with street railway service and 6 with gas. The communities thus served are situated in eastern Oklahoma and central and eastern Texas, and have an estimated combined population of 233,000. The varied resources and industries of the territory served offer excellent opportunities for securing large and profitable increases especially in the power and lighting business.

Security: The First Lien Bonds, in the opinion of counsel, are a direct obligation of the Company and are now secured by a first lien on all the outstanding bonds and capital stocks (except Directors' qualifying shares) of the subsidiary companies, all of which are deposited and pledged with the Trustee under the Mortgage. No additional stocks or bonds may be issued by the subsidiary companies unless deposited as additional security under the First Lien Mortgage.

Earnings: Gross earnings (including other income) for the twelve months period ended April 30, 1926 were $5,033,154. During the same period, net earnings before depreciation amounted to $2,108,908 as compared with annual interest charges on the First Lien Bonds, including the present issue, outstanding in the hands of the public of $973,322.

The following statements for the past eight calendar years clearly indicate the growth of the Company:

Year Ended December 31	Gross Earnings (Incl. Other Income)	Net Earnings (Before Depreciation)	Electric Customers
1918	$1,173,740	$323,917	9,871
1919	1,425,409	470,506	12,002
1920	2,088,065	607,163	14,936
1921	2,665,304	997,801	15,782
1922	2,865,220	1,188,484	19,732
1923	3,487,802	1,401,753	25,135
1924	4,290,347	1,785,117	34,671
1925	4,947,092	1,994,938	42,353

During the above period, gross earnings increased 321%, net earnings 515%, number of electric customers 329%.

Management: The operations of the Company are controlled by the Middle West Utilities Company.

Additional Issue

$3,500,000

The Tennessee Electric Power Company

First and Refunding Mortgage Gold Bonds
5% Series due 1956

Dated June 1, 1926 **Due June 1, 1956**

Interest payable June 1 and December 1, without deduction of the Normal Federal Income Tax up to 2%. Four Mills Tax in Pennsylvania will be reimbursed upon appropriate application. Redeemable as a whole or in part, either at the option of the Company or by the Sinking Fund, on any interest payment date, upon thirty days prior notice, at 105 on or before June 1, 1952, and at 100 thereafter.

THE NATIONAL CITY BANK OF NEW YORK, Trustee

Issuance subject to authorization by the Railroad and Public Utilities Commission of the State of Tennessee

---

For further information regarding these Bonds, we refer to a letter from Mr. B. C. Cobb, President of the Company, which he has summarized as follows:

The Tennessee Electric Power Company serves a large part of the State of Tennessee, including Nashville, Chattanooga and other cities, having a total estimated population of over 500,000. The electric light and power business contributes more than 81% of the aggregate net earnings, the balance being derived principally from railway operations. During the past six calendar years, the hydro-electric stations have supplied over 86% of the total electric output of the Company's system.

EARNINGS

	Twelve Months Ended May 31 1925	1926
Gross Earnings	$10,253,943.91	$11,836,973.71
Operating Expenses, Current Maintenance and Taxes	5,368,844.42	6,646,986.22
Net Earnings	$4,885,099.49	$5,189,987.49
Mortgage Bond Interest Charges	1,902,335.65	2,063,025.51
Balance	$2,982,763.84	$3,126,961.98

The above earnings do not fully reflect benefits which will be obtained because of important additions to the properties to be financed in part with the proceeds from the sale of these Bonds. Annual interest requirements on the $39,724,500 mortgage bonds presently to be outstanding amount to $2,239,815.

First and Refunding Mortgage Bonds ($28,286,500 outstanding, including this issue) are secured by a first mortgage on a 54,000 horsepower hydro-electric station, a new steam station of 54,000 horsepower capacity, and other important property; and by a direct mortgage on the entire remaining physical property of the Company, subject only to the lien of divisional bonds, of which $14,083,000, or about 74% of those outstanding, are pledged under the First and Refunding Mortgage. There are also pledged $4,042,000 bonds and an aggregate of over 98% of the outstanding stocks of the Nashville Railway and Light Company.

Bonds are offered when, as and if issued to and received by us. It is expected that temporary Bonds will be available for delivery on or about July 14, 1926.

$6,000,000

International-Great Northern Railroad Company

First Mortgage 5% Gold Bonds, Series "B"

DUE JULY 1, 1956

Coupon bonds in denomination of $1,000 registerable as to principal, exchangeable for fully registered bonds and re-exchangeable under conditions provided in the mortgage. Interest payable January 1 and July 1.

The entire Series "B", but not part thereof, will be redeemable at the option of the Company on any interest date, on sixty days' previous notice, at 102½% and accrued interest.

The issue and sale of these Bonds are subject to the approval of the Interstate Commeree Commission.

William H. Williams, Esq., Chairman of the Board of the International-Great Northern Railroad Company, in a letter dated June 22, 1926, copies of which may be obtained from the undersigned, writes in part as follows:

"These Bonds will be issued under the First Mortgage of the Company, dated July 1, 1922, and will be secured by a direct First Mortgage on all property now owned or hereafter acquired by the Company, subject as to after acquired property to pre-existing liens and purchase money liens. The property includes 1,106 miles of railroad, and equipment having a book value, as of December 31, 1925, of $6,649,143, after deducting depreciation and equipment obligations then outstanding. The First Mortgage Bonds outstanding, including the present issue, are at the low rate of approximately $21,000 per mile of road owned.

The lines of railroad covered by the Mortgage, of which approximately 90% are main lines, serve most of the principal cities of central and south Texas and, with connecting railways, afford the most direct route from St. Louis to Houston and Galveston, as well as to Austin and San Antonio and to a connection at Laredo with the National Railways of Mexico.

The proceeds of the sale of these bonds are to be applied to the redemption of $2,400,000 principal amount of 6% Secured Notes of the Company and to reimburse the treasury of the Company, in part, for capital expenditures heretofore made.

For the year ended December 31, 1925, the gross income of the Company applicable to the payment of interest on the First Mortgage Bonds amounted to $2,334,187, while annual interest on the outstanding First Mortgage Bonds (including this issue) amounts to only $1,335,000.

The First Mortgage Bonds are followed by $17,000,000 Adjustment Mortgage Bonds, and by $7,500,000 of Common stock, all of which stock (except Directors' qualifying shares) is owned by New Orleans, Texas & Mexico Railway Company. Over 86% of the stock of New Orleans, Texas & Mexico Railway Company is owned by Missouri Pacific Railroad Company.

The total authorized amount of First Mortgage Bonds is limited to $40,000,000, of which there will be outstanding in the hands of the public, upon the completion of this financing, $17,250,000 of Series "A" 6% Bonds and $6,000,000 of Series "B" 5% Bonds. Approximately $2,000,000 additional Series "B" Bonds will be in the Company's treasury, unpledged, and $500,000 Series "A" Bonds are pledged to secure a surety bond. The remainder of the Bonds are issuable from time to time to reimburse, to the extent of 80%, expenditures for the acquisition of new properties or securities representative thereof, or for extensions, equipment, betterments and improvements."

THE UNDERSIGNED OFFER THE ABOVE BONDS, SUBJECT TO PRIOR SALE, AT 95% AND ACCRUED INTEREST TO DATE OF DELIVERY, TO YIELD OVER 5.33% TO MATURITY.

The above bonds are offered if, when and as issued and received by the undersigned and subject to the approval by any public authorities that may be necessary of the issuance of the bonds and their sale to the undersigned and to the approval by their counsel of all legal proceedings in connection therewith. Temporary bonds or interim certificates will be delivered against payment in New York funds for bonds allotted, which temporary bonds or interim certificates will be exchangeable for definitive bonds when prepared.

Application will be made in due course to list these bonds on the New York Stock Exchange.

KUHN, LOEB & CO.

New York, June 24, 1926.

GENERAL MORTGAGE 4½% GOLD BONDS, SERIES D

Dated July 1, 1926 — *Due July 1, 1976*

Interest payable January 1 and July 1 in New York City

These bonds are not redeemable by the Company before maturity.

Coupon Bonds in denomination of $1,000, registerable as to principal. Fully registered Bonds in denominations of $1,000 and authorized multiples thereof. Coupon and registered Bonds interchangeable.

The issuance of these Bonds is subject to authorization by the Interstate Commerce Commission

---

THE FIRST NATIONAL BANK OF THE CITY OF NEW YORK, Trustee.

Ralph Budd, Esq., President of the Great Northern Railway Company, has summarized as follows his letter to us describing this issue:

The total mileage covered (directly or collaterally) by the General Mortgage is 7,644 miles, constituting approximately 97% of the total mileage of the Great Northern system. No more underlying mortgage bonds may be issued. Stock representing approximately one-half of the ownership of the Chicago, Burlington & Quincy Railroad Company is pledged, free from prior lien, under the General Mortgage.

The Company's gross operating revenues, income, total charges and net income after charges during the past four years have been as follows:

Year Ended Dec. 31st	Gross Operating Revenues	Income Available for Charges	Total Charges	Net Income after Charges
1922	$103,452,937	$27,763,604	$16,897,932	$10,865,672
1923	120,077,772	35,045,252	16,977,305	18,067,947
1924	110,243,104	35,855,165	17,913,564	17,941,600
1925	114,924,960	39,704,431	18,269,034	21,435,396

In the above four years, income available for charges averaged approximately twice the amount required. The Company's net railway operating income for the first four months of 1926 amounted to $3,328,300, as compared with $3,114,367 in the corresponding period of 1925.

Since July 1, 1901, the Great Northern has invested more than $491,000,000 in road, equipment and other capital assets: whereas during the same period, the Company's net funded debt has increased by $223,000,000, an amount less than 46 per cent. of the amount added to assets. Of the amount added to assets, more than $126,000,000 was derived from surplus earnings and reserves, and approximately $142,000,000 from stock sold at not less than par.

THE ABOVE BONDS ARE OFFERED, SUBJECT TO DUE AUTHORIZATION, TO ISSUE AS PLANNED, TO PRIOR SALE, AND TO APPROVAL BY COUNSEL, AT 94% AND ACCRUED INTEREST TO YIELD OVER 4.80%

The right is reserved to reject any and all applications, and also, in any case, to award a smaller amount than applied for. The amount due on allotments will be payable at the office of J. P. Morgan & Co., in New York funds, on or about July 1, 1926, against delivery of temporary Bonds exchangeable for definitive Bonds when prepared.

Principal and interest payable in United States gold coin of the present standard of weight and fineness in New York City at the office of Dillon, Read & Co. or, at the holder's option, in London in Sterling at par of exchange at the office of Messrs. N. M. Rothschild & Sons, free of all Brazilian taxes, present or future. Non-callable except for the Sinking Fund. The National City Bank of New York, Countersigning Agent.

The total issue is redeemable by maturity through the operation of an accumulative sinking fund which will call bonds by lot, semi-annually, for redemption at par and accrued interest

The Brazilian Government has agreed to make application in due course to list these bonds on the New York Stock Exchange

---

The following information is contained in a statement furnished by His Excellency Dr. Annibal Freire, Minister of Finance:

These bonds will be the direct obligation of the United States of Brazil, and are issued under authority of Law No. 4625 of December 31, 1922, and Law No. 4984 of December 31, 1925. The total issue of bonds will be specifically secured, in the opinion of counsel, by a first charge on the receipts of the Government from Income Taxes and Taxes on Invoices (Contas Assignadas Duplicatas), by a charge on the Consumption Taxes subject to the charge of the 8% Loan of 1921, and by a charge on Import Duties subject to the charges of the 5% Sterling Loans of 1898 and 1914 and the 8% Loan of 1921. The total revenue derived by the Government from the above sources in 1924 was $117,000,000, and in 1925 $148,373,000. After deducting the indicated prior charges upon a portion of this revenue, which amount to approximately $11,798,400 per annum, there would have remained from the above sources in 1925 the sum of $136,574,600. The service of the issue of $60,000,000 bonds for both interest and sinking fund calls for $4,500,000 per annum.

SINKING FUND

An accumulative sinking fund of 1% per annum, payable semi-annually, will be applied to the redemption of bonds by call by lot at par and accrued interest. The sinking fund will be increased by amounts equal to interest on bonds previously redeemed. This sinking fund is calculated to retire all of the bonds of this issue by maturity.

NATIONAL DEBT

The national funded debt of Brazil on December 31, 1925, was approximately $936,000,000, of which $626,000,000 was external. This represents a per capita debt of approximately $30, as against which the per capita national wealth is estimated at approximately $530. The Government has undertaken to resume in 1927 the sinking funds, on certain Sterling Loans, which have been in suspense under the terms of the Funding Agreement of 1914 The proceeds of the bonds are to be applied in reduction of Treasury obligations including floating debt.

(All conversions above of paper milreis into dollars are at the rate of 14.50 cents per milreis. Other conversions are at par)

The statements quoted above, received partly by cable, have been accepted by us as accurate but are in no event to be construed as representations by us

We offer these bonds for delivery when, as and if issued and accepted by us and subject to the approval of all legal matters by our counsel, Messrs. Cotton & Franklin, New York, and Dr. Alfredo Bernardes da Silva, of Rio de Janeiro. It is expected that Temporary Bonds, or Interim Receipts of Dillon, Read & Co., will be ready for delivery on or about July 8, 1926

Price 90½ and Interest. To Yield over 7.25% to maturity

The above is subject to a circular, containing further information, which may be obtained upon request.

New Issue June 21, 1926.

$9,635,000

The Ohio Power Company

First and Refunding Mortgage 4½% Gold Bonds

To be dated June 1, 1926 **SERIES D** **Due June 1, 1956**

Outstanding: Series A 7% Bonds $9,702,000; Series B 5% Bonds $13,794,500; Series C 6% Bonds $10,000,000 (not including $18,000 held by the company); Series D 4½% Bonds (this issue) $9,635,000. Coupon bonds of $1,000 and $500 denominations with provision for registration as to principal. Coupon bonds in denomination of $1,000 and fully registered bonds interchangeable. Principal and interest payable in New York City. Interest payable June 1 and December 1. Redeemable as a whole, or in part by lot, on any interest date on four weeks' notice at 103 to and including June 1 1931; at 102½ thereafter to and including June 1, 1936; at 102 thereafter to and including June 1 1941; at 101½ thereafter to and including June 1, 1946; at 101 thereafter to and including June 1, 1951; at 100½ thereafter to and including June 1, 1954 and at 100 thereafter to maturity; in each case accrued interest being added to the price named. The company agrees to pay interest without deduction for the Normal Federal Income Tax up to 2% per annum and upon proper application to refund the Pennsylvania 4-Mill Tax. Central Union Trust Company of New York, Trustee.

The following information has been summarized from a letter to us from Mr. Geo. N. Tidd, Vice-President of The Ohio Power Company and President of American Gas and Electric Company:

THE COMPANY

The Ohio Power Company owns and operates large electric power and light generating plants and transmission and distributing systems in important manufacturing and mining sections of Ohio. Transmission and distributing lines owned, including properties about to be acquired, aggregate 3,468 miles, and supply electric power and light to 225 communities in a prosperous territory in Ohio, serving an estimated population of 719,000. The company's main power stations are located at Philo, Ohio, and Power (formerly Windsor), West Virginia. All the electric power and light properties owned (including those about to be acquired) by the company are interconnected by high voltage transmission lines, and this system in the State of Ohio is connected with the high voltage lines of other subsidiaries of American Gas and Electric Company. These interconnected high voltage lines extending into six states constitute one of the largest super-power systems in the world.

SECURITY

The First and Refunding Mortgage Bonds (of which $43,131,500 will be outstanding upon completion of the present financing) are secured by direct mortgage lien on the plants and properties of the company, valued at over $63,000,000, based on an appraisal made by Messrs. Ford, Bacon & Davis in 1921, with subsequent additions at cost. The mortgage is a first lien on the greater part of the company's property; on the remainder it is subject to $2,731,000 divisional bonds outstanding under closed mortgages. All these divisional lien bonds must be paid at maturity and not extended.

PURPOSE OF ISSUE

The proceeds of these Series D Bonds will be used to provide funds in connection with the purchase of important electric power and light properties in Ohio, to reimburse the company in part for capital expenditures already made under the terms of the mortgage, and for other corporate purposes.

EARNINGS

Gross and net revenues have steadily increased. During the three-year period ended April 30, 1926, as shown below, annual gross earnings of all properties owned, including those about to be acquired, increased $1,857,205, or over 14%, and total annual net revenue available for bond interest, after taxes, maintenance and depreciation charges, increased $1,048,552, or over 21%.

Twelve Months ended April 30	Gross Earnings	Total Net Revenue
1924	$12,646,083	$4,825,873
1925	13,267,280	5,203,385
1926	14,503,288	5,874,425

Annual interest charges on the First and Refunding Mortgage Bonds to be outstanding on completion of the present financing, including this issue of Series D Bonds, and on all underlying divisional bonds, amount to $2,539,480. The average of the annual net revenue, as shown above for the three years ended April 30, 1926, was equal to more than twice the amount of such interest charges.

CONTROL BY AMERICAN GAS AND ELECTRIC COMPANY

The entire common stock of The Ohio Power Company is owned by American Gas and Electric Company, which has paid dividends on its preferred and common stock without interruption for more than 15 years. The aggregate market value of the stock of American Gas and Electric Company is about $130,000,000 at current quotations.

The statements quoted above have been accepted by us as accurate but are in no event to be construed as representations by us.

We offer these bonds for delivery if, when and as issued and accepted by us, subject to approval of legal matters by counsel, and to approval of issue of the bonds by Public Utilities Commission of Ohio. It is expected that delivery in the form of temproary bonds of the cmpany or interim receipts of Dillon, Read & Co. will be made on or about July 7, 1926.

Price 93 and accrued Interest. To yield 4.95%

The above is subject to a circular, containing further information, which may be obtained upon request

Joint Stock Land Banks

Serving the Agricultural Industry
Under Strict United States Government Supervision

The regulatory rulings promulgated from time to time by the Federal Farm Loan Board governing the activities of Joint Stock Land Banks tend to safeguard funds invested in the Bonds and Stocks of these institutions.

The uninterrupted payments of regular dividends by the Joint Stock Land Banks in which we are interested, indicate the continuity of earnings of these institutions, even in face of recent agricultural depression in certain sections.

Agricultural reports from practically all over the country show an improvement in that industry which is being reflected in the improved position of the Joint Stock Land Banks.

Joint Stock Bond and Share Company was organized by us primarily as a Holding Company of Capital Stocks of Joint Stock Land Banks. The Class "A" Common Capital Stock of this Company offers a diversity in Joint Stock Land Bank Stocks supported by junior equities. The Class "B" Stock, junior to Class "A" both as to assets and earnings, is issued in ratio of 13 shares of Class "B" to each 100 shares of Class "A" (both $100 par value). The Class "B" Stock is purchased by us as issued at par for cash and is intended to increase the security behind the Class "A" Stock.

We have been continuously interested in Joint Stock Land Banks since their inception and have been instrumental in effecting various mergers and consolidations of Joint Stock Land Banks.

As originators and wholesalers of this type of security, we invite inquiries from investment houses, banks and financial institutions.

SPECIAL FEATURES
OF OUR
STATE AND MUNICIPAL COMPENDIUM

In the semi-annual number of the above publication, a copy of which goes to every one of our subscribers, there are several special articles which have a wide degree of interest.

(1) Our customary annual analysis of the municipal bond sales for the preceding calendar year, this time 1925.

(2) ***Something never attempted before by any publication,*** a study of the amounts of the municipal bonds redeemed or retired, the totals of which now run up into the hundreds of millions annually.

(3) An elaborate tabular statement, comparing the totals of the municipal sales, under leading heads, for the past 25 years.

The Financial Situation.

Perhaps the most significant event of the week just closing, at least in its possible bearing upon the security markets of the world, has been the appointment of a new French Ministry with M. Briand at its head, and Caillaux as the Finance Minister. The event has been given very little front page attention by American newspapers, and perhaps justly so, as this may mean but another combination in the endless juggling of French Cabinets, each without any real political power. However, in view of the personal versatility of M. Caillaux and his assumption of office only on condition that he be given practically complete power to deal with the situation, there is at least a shadow of hope that France at last may be preparing to take steps which in the opinion of economists throughout the world must be taken in the near future to prevent a financial catastrophe of the first order.

It may be appropriate at this time, when France is filled with American tourists and is affording them evidence on every hand of great prosperity, in contrast not only with the condition of France's neighbors, but with her own past, to re-state the simple principles involved in the nation's precarious financial situation. First of all it must be understood that the highly prosperous condition of French business is not conclusive evidence as to the real situation. In 1922 German business was in many of its phases riotously prosperous, but in 1923 Germany went through a period of financial chaos not previously experienced by any western European nation. For many years the franc has been declining, prices in France have been advancing, and French business has been stimulated into a condition of boom by these advancing prices. It is this that gives the misleading evidence of great prosperity accompanied by universal employment and activity in undertakings of all kinds; but back of this there are other situations in France of a distressingly different character. To understand these it is necessary to keep the following points in mind:

1. The depreciation of the currency is accompanied in the long run by a corresponding rise in prices. This has been happening most of the time in France since 1914, but as yet prices have not risen as much as the currency has declined, and are not likely to do so until the franc is finally stabilized and the element of fear is out of the French situation. Eventually it is certain that French prices will stabilize at a world basis or a gold basis, barring, of course, minor differences brought about by tariffs, freights, local customs, etc.

2. It follows from this that the lower the franc goes the lower taxes will be in France. For example, assume that the French internal debt is 400,000,000,000 francs. At par for the franc, 19.3 cents, the French internal debt would have a gold value equivalent to approximately $77,000,000,000. At 5 cents for the franc, the value would be approximately $20,000,000,000 and at the present level, around 2.75c., approximately $11,000,000,000. If it is assumed that eventually interest and sinking funds on this internal debt will not exceed 5%, these charges would have a gold value of $3,850,000,000 annually, with the franc at par; $1,000,000,000 with the franc at 5 cents, and $550,000,000 with the franc at 2.75 cents. In other words, French taxation for

payment of interest and sinking funds on the internal debt alone would amount to $100 per capita with the franc at 19.3 cents, or $26 and $14, respectively, with the franc at 5 cents or 2.75 cents.

3. It follows also, from the advance in prices accompanying the depreciation of the currency, that holders of internal French bonds become poorer and poorer with the decline of the franc, as their income, expressed on a gold basis with the franc at par, would amount to $3,850,000,000, or $1,000,000,000 with the franc at 5 cents, or $550,000,000 with the franc at the present level.

The decline of the franc has now proceeded to a point where it should be an entirely practical proposition from a political point of view to stabilize at the present level. The taxation burden for payment of interest and sinking funds would be only about one-third of what it actually is in Great Britain, and not much greater per capita than in the United States. The holders of French bonds, insurance policies, savings deposits, and other fixed obligations, expressed in francs, have been the real losers in this situation. They are the ones on whom the cost of the war has been forced by the nature of circumstances and the allowing of the financial situation to drift. Their losses have already been appalling, and will be complete if the franc is allowed to disappear as did the mark in 1923.

It is greatly to be hoped that the situation will not be allowed to drift further, but that the necessary steps will be taken at this time. It must be evident to all that even French business interests will benefit by stabilization. For after all, business finds its best conditions in stable prices. What is necessary now is the firm adoption of a complete program, involving the adoption of a new par value for the franc, taxations that will actually balance the budget, adequate measures for the funding of floating debt, and approval of the funding of the French debt due to the United States. The adoption of such a program will require real courage, and will bring about many temporary hardships, but the fixing of the French tax load at the point measured by the 2.75 franc will not place upon French business and the French taxpayers an unendurable burden, but rather a comparatively light one.

The adoption of such a program will be made far easier from a political point of view if those announcing it will make it clear to the nation that the stabilization of the franc will eventually result in an advance in French prices above the present level, as these prices adjust themselves upward to the world gold level. This would necessitate an adjustment of salaries and wages upward, and will eventually make the tax burden less than it would appear to be when a program is first adopted.

A stabilized franc and a settled fiscal policy in France would remove from the world's markets one of the most detrimental factors that has been operative in recent years. Nothing in immediate prospects would be more beneficial to the world's business situation.

Bond prices the present week have been at or near the high levels established on Saturday, June 12, when the Dow-Jones average for 40 bonds reached 95.52. The $60,000,000 Federal Land Bank 4¼s, 1956, which were offered on June 14 at 101, yielding 4.18%, and which were immediately taken, have been selling at a slight premium. On Thursday morning a Dillon, Read & Co. syndicate offered $25,000,000 Brazilian Government 6½s, 1957, at 90½, yielding 7.25%. This issue also was immediately subscribed for. The offering of Brazilian bonds with a 6½% coupon rather than the familiar 7%, 7½% and 8%, is significant of rising confidence in the situation of Brazil, and also of a new phase in the security markets of the world, a phase characterized by curernt offerings of public utility issues with 4½% coupons and a large percentage of the high grade 5% bonds, selling at prices above par.

The Brazilian offering is interesting, inasmuch as the original plan was to divide this offering between the London and New York markets. The British portion was to have been handled through the Rothschild banking firm of London. With the announcement of the withdrawal of Brazil from the League of Nations, arrangements between the Rothschild firm and the Brazilian Government were annulled, whether at the instance of the Government or the bankers has not been announced.

Simultaneously news has come that an offering of $60,000,000 of United Steel Works Corporation (Germany) will be made by Dillon, Read & Co. in this country. It is pointed out that this constitutes the largest foreign industrial loan so far arranged in the United States.

Stock prices in New York, after the sharp drive against the market on Friday, the 18th, were again strong, with active trading over Saturday, Monday and Tuesday, with another sharp attack on Wednesday and a resumption of strength on Thursday, with weakness on Friday, the net result for the week being a gain of about two points for railroad stocks and a decline of one point for industrials. There is apparently as yet a large short interest in the market which has not been stampeded by strength during the past six weeks. The market continues to have the advantage of this steadying influence.

In the meantime, the slowing down of business is very slight and the prospect of business depression becomes more and more remote. The Irving Fisher index of wholesale prices reported for the week ended June 18 at 152.3 was off 1.3 from the previous week, but at practically the level prevailing for the two previous months. Car loadings reported for the week ending June 12 were again record-breaking, being 1,060,214, a gain of 14,250 over the previous week and 70,314 over the corresponding week of a year ago. Along with these favorable developments has come the news of an increase in brokers' loans last week of $43,235,000, indicating that current strength in the stock market is not based wholly upon investment buying, but is to some extent speculative.

France finally has a Cabinet again. It would not be surprising if it proved short-lived like the rest. Aristide Briand, after surmounting many political obstacles, and after being disappointed over the refusal of former President Poincare to accept the Ministry of Finance, was able on Wednesday (June 23), to announce that he had filled all the places in his tenth Cabinet. It was presented to President Doumergue late that evening. M. Briand is Foreign Minister as well as Premier. Joseph Caillaux is the new Finance Minister and also Vice-President of the Council. It will be recalled that he held the portfolio of Finance Minister in the Cabinet when

the first negotiations were conducted with the United States for a settlement of the war debt of France to this country. Senator Doumer, as well as former President Poincare declined to accept the Finance portfolio. The Paris correspondent of the New York "Evening Post" cabled on June 23 that they declined "to take the portfolio because they were unable to accept the Berenger debt-funding agreement with the United States." Continuing to outline the situation, the correspondent said: "The acquisition of M. Caillaux can mean little more than a temporary respite to tide the Government over until the adjournment of the Chamber of Deputies, at best. It does not appear possible that in this short time the new Cabinet will be able to develop a strong financial policy. M. Briand, whose sudden jump from Right to Left has caused the greatest surprise in the lobbies of Parliament, has before him many obstacles, chief of which is the hostility the appointment of M. Caillaux has engendered among the Conservative deputies. This will, of course, be offset to some extent by the more solid backing he will receive from the Left, but it is doubtful if he can obtain as large a majority with the present combination as he could have with M. Poincare and M. Doumer in the Government."

With regard to the personnel of the Cabinet and the circumstances surrounding its formation finally, the Paris representative of the New York "Times" said in a dispatch late in the evening of June 23: "Aristide Briand has formed his tenth Government. It is not the Government he set out to make eight days ago, when Raoul Peret's resignation brought about the resignation of the whole Cabinet. It is not even the Government of Republican concentration, with tried leaders at its head, which he has twice this week attempted to form. But it has this for strength—Joseph Caillaux has accepted the Finance Ministry and M. Caillaux knows his business and has already a definite program of economy and reform. For the rest, the new Cabinet which was presented to the President of the Republic at 11 o'clock this evening, is most remarkable for the dropping of Paul Painleve from the Ministry of War and of Senator Anatole de Monzie, whose association with certain banking interests made his presence in the Cabinet formed by M. Caillaux a complete impossibility. For War Minister, General Guillaumat has been named, with the Nationalist Deputy Colonel Picot, the President of the Association of 'Geules Casses,' or men wounded in the face during the war, as Under Secretary. In the new combination former President Raymond Poincare has no place, and neither has Senator Paul Doumer. This somewhat tame result of all these past days of feverish negotiation and mysterious program-drafting came to-day as a surprise to all but the innermost circles." The New York "Herald Tribune" representative added that "it was learned just before the Elysee Palace meeting that it was extremely unlikely that ratification of the Mellon-Berenger debt accord can be accomplished here before autumn. Though Caillaux favors speedy ratification, strong political opposition developed to-day against this. The belief in Ministerial circles late to-night, therefore, was that the Chamber would be asked to approve the American and British debt accords simultaneously, after the latter agreement has been reached. As the Cabinet does not appear before the Chamber before Tuesday, it is also deemed impossible to ask the United States Senate to wait for French action before it adjourns for the summer." He also said that "three features of the new Ministry stand out: One, that contrary to the demand for national economy, it consists of thirteen Ministers and nine Under Secretaries; two, that contrary to all precedent, the Minister of Justice ceases to rank as Vice-President of the Cabinet, and Caillaux assumes this position; three, that only six out of the twenty-two Ministers and Under Secretaries are technical and financial experts. The new Ministry, of course, has yet to test the strength in the Chamber. This trial will come possibly by the end of the week. The vote will be in the strict sense not so much a question of confidence in the new Briand Ministry as upon the issue of Joseph Caillaux. The Chamber must decide whether Caillaux, supported by a General as Minister of War and a close personal friend as Minister of Justice, shall be given permission to impose drastic economies on the country with the backing of the former and prosecute probably men in high places for speculation with the aid of the latter."

The impressions of French political leaders and the principal developments on Thursday were outlined in part as follows in a special dispatch to the New York "Evening Post" from Paris that evening: "The plans of Joseph Caillaux, Finance Minister in the new Briand Cabinet, call for eventual stabilization of the franc at a considerably lower figure than quoted to the dollar to-day. To arguments regarding the dangers which would ensue from this plan in the consequent reduction of salaries and wages, M. Caillaux demanded what virtually was a dictatorship within the Cabinet. This Premier Briand refused, but a compromise was effected. Many observers see significance in the appointment of General Guillaumat as War Minister in view of the strikes and troubles likely to result from Caillaux's policy. Guillaumat was conspicuous in the Ruhr occupation. Premier Briand declared measures of rigid economy would be necessary. A new attitude on the Mellon-Berenger agreement for settlement of France's debt to the United States is expected from Caillaux. No enthusiasm is expressed over the new Cabinet, the impression being that it is only a poor stop-gap."

The more important policies, and likewise activities, of the new Cabinet during the next few days were outlined and forecast in part as follows by the Associated Press representative in Paris in a dispatch, also on Thursday evening: "Aristide Briand, after the formality of presenting the members of his new Cabinet to President Doumergue, declared last night that he had decided to aid Joseph Caillaux, his Minister of Finance, most energetically in instituting 'a policy of economy and compression and thereby bring order out of the financial chaos in France.' M. Caillaux indicates that he will take his time to prepare a financial program, and the Government is not likely to face the Senate and Chamber before next Tuesday. Then it will demand that Parliament shall vote it extended powers so as to enable it to push through bills essential to its fiscal program. The Cabinet will meet tomorrow night in M. Briand's office and again on Saturday morning at the Elysee Palace in Ministerial Souncil."

In a later dispatch the same evening, the New York "Times" representative said that "Joseph Caillaux's first action as Finance Minister has been to send a circular letter to his colleagues, reminding them that, according to the decree framed by himself in 1912 and incorporated in the finance law, they must restrict to a minimum the number of their assistants and aids. Thus without wasting a minute he has begun his economy campaign and has at the same time given an initial indication to his colleagues that as master of the purse he is also master within the Cabinet. Toward his inclusion in the Cabinet and the Cabinet itself as a whole there is a certain reserve in the press and among the Deputies. Every one is waiting to see what he will produce. As was to be expected, the Socialists will on Tuesday, when the Chamber resumes and the Government presents its statement of policy, demand further, immediate explanations. These interpellations will probably afford M. Caillaux an opportunity to make public something of his program in a more precise form than he has yet stated it."

Edouard Herriot failed to form a French Cabinet, as had been true of the earlier efforts of former Premier Aristide Briand, who, with the rest of his Cabinet, had resigned a few days before, following the giving up by Raoul Peret of his portfolio as Finance Minister. Herriot apparently blocked Briand in the latter's efforts to form his tenth Cabinet, and, according to Paris cable advices, the veteran statesman turned the tables on his adversary and made it impossible for him to get together a Ministry. Herriot's efforts to form one were outlined in part as follows by the Paris representative of the New York "Herald Tribune" in a dispatch under date of June 18: "To-night Edouard Herriot, President of the Chamber, Mayor of Lyons and chief of the Radical Socialist Party, has assumed the task of giving France a new Government. Herriot's offer to Briand of the portfolio of Minister of Foreign Affairs in his projected Government was declined by the former Premier, who is bitter at the intervention of the Radical Socialist Party, which brought his Cabinet-making to an end at noon. This action was led by a band of the younger Radical Socialist Deputies, known as 'Young Turks,' who threatened Herriot's leadership of the party if he accepted a post under Briand in a Ministry which was to have included Raymond Poincare as Minister of Finance." Continuing, the correspondent said: "Late to-night Herriot announced that his Ministry would be a union of Left Wing Republicans, with about 310 votes in the Chamber, and proceeding well toward the Right. He made plain that he will not attempt to resurrect the old Cartel des Gauches, in which the Socialists were able to dictate their policies to his last Ministry upon the threat of withdrawing their support and overthrowing the Government. Herriot informed the press that he would attempt to form a Ministry along the lines adopted by the congress of the Radical Socialist Party—the necessity for a Republican union of the Left in order to realize a financial recovery through sincerely democratic measures."

That M. Herriot found it increasingly difficult to form a Cabinet was made clear and emphasized in Paris dispatches, even on the day following that on which he undertook the task. In the afternoon of June 19 the Associated Press representative in Paris cabled that "Edouard Herriot, leader of the Radical party, apparently is finding it almost as difficult to form a new Cabinet as did M. Briand. This morning it seemed unlikely that he would be ready to bring a new Ministry into the Chamber of Deputies next Tuesday. Doubt was even expressed in political circles that M. Herriot would succeed in his effort, it being argued that while a Ministry such as he aims at forming is not too unfavorably viewed in the Chamber of Deputies it is frowned upon by the Senate—even by many Radical Senators." He added that, "taking a leaf out of the book of M. Briand, M. Herriot has decided he must have a program before he can recruit the personnel of a Cabinet. He sat up until past midnight last night conferring with Albert Sarraut, Louis Malvy, Anatole de Monzie and Joseph Caillaux. With the last two he talked especially on financial questions."

Going a step further, the correspondent suggested that "many political observers profess to believe that even if M. Herriot manages to form a Cabinet it will be short-lived. Some of them go so far as to attribute to him a desire to try the experiment of Cabinetizing with the object of convincing his party that the only chance of rehabilitating French finances lies in the formation of a Government based on the widest possible coalition of the parties such as their opposition alone prevented M. Briand from building."

Commenting upon the result of M. Herriot's efforts when he was President of France, the New York "Times" representative in the French capital, in a wireless message late in the evening of June 19, said: "M. Herriot assures all listeners he has the best intentions in the world. Despite this there remains the fact that the efforts of the factions under M. Herriot, when he was President, to govern France during the past two years have repeatedly and consistently failed. Under their regime so much capital flowed from France that her financial veins are bled white. That is now one of M. Herriot's chief difficulties, which is not lessened by the fact that his Administration is now famous over the issue of Bank of France notes for the Government's account."

Definite announcement was made in cable dispatches sent from Paris Sunday evening that Edouard Herriot had failed to form a Ministry and that Aristide Briand had taken up the task, apparently where he had dropped it two days before, but seemingly with some distinct advantages. The chief of them appeared to be the elimination of Herriot as a direct trouble maker. The Paris correspondent of the New York "Times" described the latest turns in the political wheel in part as follows: "The ever-recurring Briand has come up smiling again and is now engaged in forming his tenth Government. In his most beautiful political play since he put M. Doumeregue into the Elysee the veteran French politician has scalped M. Herriot, who two days ago blocked his effort to form a coalition Cabinet. Probably the public will never know all the details of the past thirty-six hours, but it now seems pretty certain that when, on Friday afternoon, the President of the Republic asked M. Herriot to form a Cabinet, the Radical leader, in accepting, stuck his head into the noose M. Briand had carefully knot-

ted. For M. Herriot has been rendered hors du combat by the same medicine he tried to apply to M. Briand. M. Briand is now constructing the Cabinet that M. Herriot forbade two days ago, and M. Herriot will not be in it. M. Briand said to-night that he would have no announcements to make until to-morrow, but it is generally believed that he will form a Centre Cabinet, resting widely on both sides of the Chamber. On the Right there will probably be M. Poincare; in the Centre, M. Briand himself, and on the Left, M. Painleve. Upon this foundation the whole Government will be built. It is expected that M. Briand will be able to announce his Cabinet to-morrow afternoon."

The swing back to Briand as leader seems to have been well received in Paris. At any rate, the "Times" representative added that "the French capital, the majority of which viewed with disfavor the prospect of a Herriot Government, is chuckling to-night over this new exhibition of M. Briand's consummate skill in politics."

Commenting upon the failure of Herriot and the taking up of the task again by M. Briand, the Paris representative of the New York "Herald Tribune" said in a cable message Sunday evening (June 20): "The kaleidoscopic trend of French politics again changed to-day when Edouard Herriot failed miserably in his effort to form a Ministry depending for its support on the Cartel des Gauches, and so notified President Doumergue. The Executive thereupon called M. Briand, who immediately accepted and is again at work toward the formation of a Government which will include prominent leaders, such as Raymond Poincare, capable of restoring confidence in the country's ability to pull itself out from the present financial difficulties."

The veteran statesman and head of nine Cabinets was soon doomed to disappointment again. After having thought that he had secured ex-President Poincare to serve as Finance Minister he learned that he had not accepted. The Paris representative of the New York "Times" cabled Monday evening that "Premier Briand's plan for a wide coalition Cabinet received a heavy blow to-night when ex-President Poincare failed to accept the Ministry of Finance. Before going to bed at 11 o'clock M. Briand said he refused to take Raymond Poincare's refusal as final and expected to see him in the morning, when he would once again urge the former President of the Republic to make a sacrifice for the good of the country. M. Poincare's attitude came as a general surprise and, indeed, a surprise to Premier Briand, who early in the evening had told his friends that he expected to announce a Cabinet at 10 o'clock with M. Poincare as head of the Treasury. The afternoon papers had announced all but the definite composition of the new French Cabinet headed by M. Briand and leaning on M. Poincare to the Right and on Paul Painleve to the Left. Soon after 9 o'clock M. Poincare called on Premier Briand with the disappointing news that he had not seen his way clear to accept the post offered to him. He said his sense of duty to the country left him willing to accept any other post in the Cabinet, but he said he could not go so far as to shoulder the task for which France was really seeking the biggest man available." The correspondent added that "if M. Poincare persists in his refusal it is expected that the Premier will ask the former Finance Minister, Paul Doumer, to accept the position. The reasons for M. Poincare's refusal may never be fully known, but it is said that two very important factors entered into the situation. One was that his examination of the Treasury records showed that the new Finance Minister would be obliged either to resort to further inflation or to effect a moratorium. In the second place he made it plain to Premier Briand that he opposed ratification of the Berenger debt accord, and in face of that opposition M. Briand said he could not go back on the authorization he gave to M. Berenger to sign the agreement."

The portfolio of Finance Minister was offered to Senator Doumer on Monday evening, according to a later Paris cable dispatch to the New York "Herald Tribune." It was added in that dispatch that "Poincare has assured Briand that he will co-operate with the Ministry, but desires to serve in the medium either of the Ministry of Justice or in a special portfolio dealing with the Alsace-Lorraine autonomy problem. He insists that the Alsatians should be calmed down in their aspirations by some one in whom they have confidence, as they are not ready for incorporation in the French State, while autonomy is unthinkable." It was further stated that "M. Doumer is a close friend of M. Poincare, and after the latter told M. Briand he could not accept the Finance post he suggested Doumer, once Minister of Finance in the former Poincare and Painleve Ministries. He is known throughout France as a patriot and as being courageous enough to insist on the heroic measures which must be taken to save the French Treasury."

In later dispatches it was made clear that little real progress was made on Tuesday in the selection of a Cabinet. The New York "Times" correspondent in Paris cabled June 22 that "the making of a Government that will have real authority in the country, a sound backing in the Chamber and a definite and realizable financial program, which shall offer some hope of relief from the present muddle, is proving the hardest task that Aristide Briand ever undertook. All to-day has been passed in conferences without final result, though that result is promised by Premier Briand for noon to-morrow." The New York "Herald Tribune" correspondent reported the situation in part as follows June 22: "The great problem of forming a new French Government, which had been in a state of utter confusion all day, became only a trifle clearer at midnight, when Premier Briand told the 'Herald Tribune' that he hoped to-morrow would see the end of the Ministerial crisis, now a week old. This was after the acting Premier had received the refusals of both Raymond Poincare and Paul Doumer to urge the ratification of the Washington debt agreement if either took the Finance portfolio. It was also after Briand had called in Joseph Caillaux and found that the 'Man of Mamers' offered such conditions for his services that his candidacy was out of the question."

As noted in an earlier paragraph, M. Briand succeeded in forming a Cabinet on June 23 with Joseph Caillaux as Finance Minister. The Cabinet was presented to President Doumergue late that evening.

That the Diet, or Parliament, of Poland may be without real power during the regime of Marshal Pilsudski was indicated when the Lower House met on June 22. This was forecast in a special wireless message from Warsaw to the New York "Times" on June 21. The correspondent said in part that "Parliamentary Government as practiced in Poland will make its last stand to-morrow when the Sejm, the Polish Lower House, meets. If it holds its own the country will either slide back to the old unworkable system of government, rendering the revolution of May 12 all in vain, or there will be a fresh military force brought into quick play. If, on the other hand, changes now proposed by Marshal Pilsudski are accepted, the Marshal's supporters confidently believe that France, Germany, Belgium and other countries will follow the Polish example promptly and that there will be a reformation of political usages that will permit Europe to rise above its financial and economic troubles." It was added that "the Diet will occupy itself for the first day or two with the budget and other pressing matters before the crucial discussion of administrative reforms, so that in case of an upheaval the country will be able to continue functioning. Several contracts with American firms were closed last week, the Government contracting officials assuring the Americans that full ratification of the contract is now assured."

The proceedings on the first day, June 22, were briefly outlined as follows in an Associated Press dispatch from Warsaw the next day. It stated that "Parliamentary protests against the recent coup d'etat by the Pilsudski forces and against the Government's desire to rule without control will be useless, it was indicated at the first session of the Polish Diet since the revolution. All the members of the Cabinet attended the session except Marshal Pilsudski, who continues to demonstrate his neglect of Parliament. The Government presented its budget though M. Klarner, Minister of Finance, who said it showed a deficit of $10,000,000. The Government, he added, would liquidate the deficit by increasing certain returns, like those from the spirit monopoly and customs, and by decreasing administrative expenses. In no case would the Government have recourse to inflation, he declared. In view of the Government's desire for quick debate in the Chamber, the Speaker Maciej Rataj, decided only members of the larger factions would be allowed to take part in the discussions. This provoked the Communist members, who number six. They became so boisterous the Speaker was obliged to order their forcible expulsion after the press and public galleries had been emptied."

According to a wireless dispatch from Warsaw to the New York "Times" later the same evening the Polish Parliament gave up without accomplishing anything of importance. In part he said: "Amid scenes of the wildest tumult the Polish Parliament gave way last night to the threatening figure of Marshal Pilsudski and agreed to pass out of existence until a new body completely dominated by the Dictator can come into being with semblance of legal authority. Behind closed doors barred to the public and to newspapermen by strong-arm men and soldiers, the Sejm completed its riotous sitting after the warring factions failed even to agree on the necessary budgetary measures, to say nothing of the proposed changes in the Constitution. After newspapermen and spectators had been expelled from the Chamber disheveled members of the Sejm told correspondents still lurking outside the building in the friendly shadows of the trees that the furor had increased to such proportions that all business had come to a halt." He added that "it was not clear among the members whether the budget bill had passed, but this morning strictly censored papers declared that the meeting was one of the dullest on record and that, owing to the serious thought which must be given to the questions discussed during the past three weeks, the Diet will not be called again until Friday morning."

Considerable excitement attended the referendum held last Sunday, June 20, on "Expropriation of Germany's deposed rulers." Keen interest appears to have been taken in the event in advance. On June 18 the Berlin representative of the New York "Times" sent a wireless dispatch in which he outlined the situation at that time in part as follows: "For the first time in history a large nation will attempt the settlement of a national question by popular referendum. The German polls will be opened Sunday morning for those wishing to cast their vote for or against the expropriation of the State property of Germany's deposed rulers, in accordance with the joint demand of the Socialists and Communists. Should about 20,000,000 votes, or 50% of the registry list, be cast, and a majority of which wants the formal royal houses cut off without a penny's worth of their once kingly domains, the expropriation proposal becomes law despite the fact that President von Hindenburg and his Government, headed by Dr. Marx, are unanimously against such a measure. If that ratio of votes be not cast, then Germany's first referendum falls by the wayside, another form of settling the claims of the Hohenzollerns, the Wittlesbachs and others will have to be found. To-night, just thirty-six hours before the voting places are opened, Berlin is pulsating with the fever of an election campaign. Processions, both of radicals and reactionaries, throng the streets, with banners proclaiming their views. In public squares thousands and tens of thousands of Germans gather to hear prominent men declaim on the virtues or the crimes of expropriation. Billboards and electric light signs flame with Sunday's issue. The present fever heat has not been reached in any political campaign in Germany since the revolution, not even in the days when Marshal von Hindenburg was a Presidential candidate."

He explained that "the prizes involved include 350 of Germany's picturesque castles, every hall of which echoes to the history of Central Europe. There are also great estates recalling the days of the land barons, when villages, churches, mills, factories, schools and all within a domain were ruled over by a feudal lord. Besides these there are museums filled with priceless paintings, sculpture, tapestries, porcelains and other objects of art. Some of them resulted from the collecting hobbies of rich monarchs. Others were given to them by financial lords as an expression of their gratitude for concessions, titles or other favors. All except three States already have reached agreements with their ex-rulers, arriving at compromises outside the courts in most cases. Prussia has not settled with the Hohenzollerns nor have the affairs of Mecklenburg-Strelitz or of Gotha been settled."

In a message the following evening he continued his outline of the progress of the campaign in part as follows: "The most vicious and virulent political campaign of which history probably has record has continued late into the night on the eve of the referendum regarding the proposed appropriation without compensation of all property belonging to the former German rulers. For the first time in the existence of the German Republic party line-ups have been so shattered that the best informed observers are utterly in the dark as to the outlook and refuse to prophesy. Only a few days ago it appeared that the advocates of confiscation had no chance of securing the necessary votes, but to-day, while it still appears likely that they will fall short of the number required, it is by no means impossible that they may succeed. The Communists and Socialists are solidly for confiscation. The People's Party, the Nationalists and other parties of the Right are against it. The Centre also is allegedly against confiscation, but the attitude of the party leaders has become half-hearted and timid since the important defections reported from the adherents of the so-called Left Wing Party, mainly miners of the Westphalian district who have flatly disregarded the Catholic Bishop's warnings and have come out openly for expropriation. This evening's edition of 'Germania,' the Centre Party's chief organ, significantly refrains from giving a single word of advice to its members. The Democratic Party officially refused to take any attitude, but virtually the entire Democratic press in Prussia has been publishing daily attacks on the former rulers in almost as violent a tone as that of the Communist and Socialist organs. These papers also urge their party members to go to the polls, even if they desire to vote against expropriation."

The proposal was defeated. In a special wireless message to the New York "Times" on June 20 it was stated that "the national referendum to-day on the proposal to confiscate the property of the former royal families has resulted in the defeat of the plan, urged by the radical elements of Germany. Only 15,431,000 ballots were cast by electors and thus the proposition is beaten, because, under the Constitution, a majority of the qualified voters must cast ballots in order to make a decision valid. The total is about 5,000,000 short of the required number. Abstention of the opponents of the proposal caused its defeat. Only 542,000 were cast against the expropriation as against 14,889,000 in favor of it." It was explained that "many of the titles that were involved go back two centuries or more. If the measure had passed it would have applied only in Prussia, Mecklenburg-Strelitz and Gotha, since the other States have all reached agreements with their former rulers." According to a later Berlin dispatch from the Associated Press correspondent, "final returns in the referendum give an affirmative vote of 14,889,703. The negative vote cast was 542,311. The total vote rolled up in favor of complete confiscation was only about 2,500,000 in excess of that polled by the Socialists and Communists in the initial balloting last March on the question of whether a referendum should be held. The Radicals therefore failed to recruit sufficient newcomers to make up the deficit of 7,500,000." He added that "an early analysis of the vote shows that the confiscation proposal was chiefly supported by the big cities in the industrial sectors, as in the Ruhr and Saxony, where participation in the voting exceeded 50%. In the flat country, National strongholds, such as Bavaria, the issue was rejected through abstentions or restricted turnout of voters."

A new feature was introduced into the situation the very next day, according to a United Press dispatch from Berlin on June 21. It stated that, "even though the failure of the anti-monarchist expropriation bill frustrates the confiscation of the former dynasties' treasure, estimated at half a billion dollars, it is by no means a foregone conclusion that these immense riches will be returned intact to their previous owners. The Government is still confronted by a powerful opposition, which could only be disregarded at the risk of provoking serious political consequences and perhaps even violent outbreaks. Following Sunday's referendum, in which the move to confiscate the treasure was defeated, the Government to-day announced that it would immediately push a compromise bill through the Reichstag whereby the State retains part of this valuable property, while the remainder is returned to the overthrown monarchs and their families."

The attitude of the various political groups was further outlined as follows in a later special Berlin dispatch to the New York "Herald Tribune" the same evening: "The Nationalists are against it because they consider that it robs the former Kaiser and the other ex-rulers of much of their wealth. The Socialists, on the other hand, are against it because they think it robs the State by handing out undeserved gifts to these royalists. The Government formerly was rather inclined to agree with the Nationalists, and for fear that it might become a law too easily, declared that it would modify the German constitution and hence require a two-thirds vote in the Reichstag. But now that 14,500,000 Germans voted for complete expropriation of the various dynasties' properties, the Government is alarmed and is eager to get the bill passed for fear another more drastic one will be proposed. The Government is beginning to think that perhaps, after all, it would not modify the Constitution, in which case it would need only a bare majority. Under the threat of another referendum, the Nationalists, too, are not so hostile to the compromise bill as they were to the first one, although it is still uncertain whether they will vote for it. The Government threatens to resign if it is not passed before the summer holidays, so that its fate or the fate of the Government will be deecided soon."

According to a special wireless message from Berlin the same evening (June 22), "although the leading political parties were confident yesterday that the compromise bill for settling claims of the ex-German ruling houses would soon become a law, knotty problems were encountered to-day which threaten to lead to a dissolution of the Reichstag, and the situation to-night is considered critical. The Goverenment, in order to avoid possible future legal squabbles, decided that their proposed compromise must be supported by a two-thirds vote in the Reichstag, since the Supreme Court might judge the law an alteration of the Constitution."

On the whole Germany's trade position appears to be satisfactory. It was outlined in part as follows in a special wireless message from Berlin to the New York "Times" on June 22: "Although Ger-

many's export trade dropped 49,000,000 marks during May, according to official Government figures published to-day, the month's business leaves a favorable balance for the Reich of 27,000,000 marks. This is less than half of last month's excess of exports over imports, however. In addition to the foreign trade reports, which show that the country's business is healthy, the number of bankruptcies dropped by 20%, and last month were only slightly higher than the pre-war figures, 1,046 declarations of bankruptcy being declared during May. This is regarded in business circles as indicating a return to normal conditions. It was predicted by prominent business men that the number of business failures after the currency was stabilized would run high, until the weaker concerns were weeded out. That Germany has no cause for too much optimism is the opinion of J. C. Roberts, Vice-President of the National City Bank of New York, who is now in Berlin. 'The present industrial crisis is the necessary result of inflation and will continue for some time,' Mr. Roberts said. 'The World War destroyed not only the industrial organization, but also the world markets, so that they are not ready to absorb as rapidly as the factories are able to produce.' Mr. Roberts was amazed at the rapid strides toward recovery made by Germany, and after seeing the country believes that the Dawes plan can be carried through without difficulty."

While little or nothing has been said in London cable dispatches relative to Lord Oxford and Asquith, it has been emphasized frequently that Lloyd George has no idea of being read out of the Liberal Party, or even its leadership. In a special wireless message to the New York "Times" on June 23 the former Premier's position was outlined in a speech that he made before the National Liberal Club. In part the correspondent said: "People here and elsewhere say that David Lloyd George is politically dead, but David Lloyd George does not agree with them." Lloyd George was quoted directly as saying: "'I do not want to be rude to anybody, and I certain do not want to ruffle anybody's feathers,' said Mr. Lloyd George after he had been introduced, amid loud cheers, by the Chairman. 'But I want to say quite firmly that I am not going to allow myself to be driven out of the Liberal Party. I have been elected by the same constituency as a Liberal member for thirty-six years. I have taken a leading, and I think I may say a decisive, part in placing some of the most notable and most far-reaching Liberal measures on the statute book of this realm—Home Rule, the enfranchisement of women, national health insurance. Liberalism is the building creed, the one that is constructing, thinking out problems, not in phrases, not in denunciations, not in catchwords, but in actual inquiries into the facts of each case and attempting to arrive at practical conclusions which will reconstruct this country and make it a happier, more powerful and a wealthier land. Do not let us fling bricks at each other. There are twelve people who cannot work with me, but there are 3,000,000 Liberals who can. I do not seek leadership, but I do want service. I like work, I like hard work. I like to get things done and, though I have had quarrels in my life, I hate them all. I like people to like me. Do not worry about these quarrels. All parties have them. If we go on taking no notice of quarrels you will find in another two or three years 6,000,000 Liberals marching together to victory.'"

In British Government circles at least there seems to have been greater hope of an early ending of the coal strike. Two bills have been proposed by the Government for the handling of the coal industry in the future. On June 22 the London correspondent of the New York "Herald Tribune" cabled that "the possibility that the coal strike may end July 1 is being discussed in both Government and labor circles to-night following the issuance to-day of the text of the Government bills for the future of the coal industry." He explained that "the Administration measures are divided into two parts. One legalizes for the next five years an eight-hour instead of a seven-hour day in the coal mines. The other makes provisions for facilitating the reorganization of the coal industry by the absorption and amalgamation of collieries, regulates future recruitment of miners and establishes a 5% levy on coal royalties for the miners' welfare fund."

The attitude of organized labor toward the measures was outlined in part as follows: "The Labor 'Daily Herald' will charge to-morrow that the Government hopes to make both bills law by a week from to-day and that an effort will be made by the mine owners to stampede the miners back to work by July 1 by posting wage schedules which are not less than the existing scales, but which will be based on the theory that an extra hour daily will be worked. Labor quarters are not alone, however, in considering an early ending of the coal dispute, as the 'Herald Tribune' was informed by leading industrialists that the reserve stocks of coal are running short and importations from abroad are insufficient to meet the country's needs. Labor is maintaining an intransigeant attitude and at a meeting to-day the Parliamentary Labor Party decided to move for a rejection of the eight-hour bill next Monday. Also, the miners' international executive, when it meets in London to-morrow, will be asked to consider the question of declaring an embargo on the exportation of foreign coal to Great Britain or alternatively a strike of Continental miners to prevent coal from being shipped here."

That the Government, if necessary, will take a determined stand against Labor, was indicated in a speech by the Earl of Birkenhead on the evening of June 22. According to an Associated Press dispatch from London on that date, "the Earl of Birkenhead, Secretary of State for India, in a speech in London to-night attacked A. J. Cook, Secretary of the Miners' Federation, whom he accused of pursuing a policy aimed to destroy the coal mining industry, so that nationalization could be achieved and the mines bought at a 'knockout price.' 'I am plainly determined and my colleagues are equally determined,' said Lord Birkenhead, 'that if we are driven to the necessity by this attempt to blackmail society by men who declare they have a stranglehold on the vital cords of industry we shall once again sorrowfully, but resolutely, gird ourselves for a great struggle—we shall not permit the nation to be destroyed.'"

In a special London cablegram to the New York "Times" on the evening of June 23 a little more hope was held out that the strike might be ended by

a general conference around a table, as all big questions are settled finally. It was stated that "the mining industry bill introduced by the Government to carry out some of the minor provisions of the Coal Commission's report secured a second reading in the House of Commons to-night after a Labor amendment proposing unification of the coal industry under public ownership had been rejected by a majority of 189. A feature of the debate was a powerful speech by Vernon Hartshorn, Labor member and the miners' leader, who suggested a round-table conference composed of members of Parliament to represent the Government, mine owners and miners. He did not say, however, how such a conference, if it succeeded in reaching an agreement, would be able to secure adoption of its proposals by the miners and mine owners. The labor movement leaders are searching anxiously for a way to end the coal dispute, but have been unable to carry the miners' executive with them, the miners being totally unwilling to enter any negotiations in which an immediate reduction of wages or increase of working hours would be discussed. They had threatened to turn the conference of trade union executives, called for Friday, into a court for the trial of the General Council of the Trade Union Congress on a charge of unwarrantably abandoning the general strike and deserting the miners."

According to a dispatch from the New York "Herald Tribune" correspondent the same evening, "the Trades Union Congress Conference called for next Wednesday to consider the Council's policy during the general strike has been postponed until after the coal strike is settled. In labor circles it was felt that a Trades Union Congress meeting could only result in recriminations between the miners' leaders and the executives of other big unions and that such a breach could only be harmful to the cause of labor at the present critical moment. Labor solidarity also probably will be needed to resist the Government's attack on trade union privileges which Lord Birkenhead foreshadowed yesterday as coming. Lord Birkenhead hinted that the trade union law will be amended so as to make unions liable for damages committed by their members during a strike, the present right of peaceful picketing would be restricted and strike ballots in future would be conducted secretly under Government auspices. In political circles this evening, however, it is said that the Government will not undertake to legislate on these changes until the next session of Parliament, when they probably will be made a prominent part of the King's speech."

Official bank rates continue to be quoted at 7½% in Austria; 7% in Belgium and Italy; 6½% in Berlin; 6% in Paris; 5½% in Denmark and Norway; 5% in London and Madrid; 4½% in Sweden, and 3½% in Holland and Switzerland. In London open market discounts have not been changed from 4¼@4 5-16% for three months' bills, but short bills closed a trifle higher at 4½@4¾%. Money on call in London was firmer and finished at 3⅝%, as compared with 3½% a week ago. In Paris and Switzerland open market discount rates continue to be quoted at 5½% and 2¼%, the same as the previous week.

The Bank of England continues to add to its stock of gold and this week reported a further increase of £291,668. Note circulation, however, expanded £381,000, so that the reserve of gold and notes in the banking department fell £89,000. On the other hand, the Bank showed another advance in the proportion of reserve to liabilities, this time to 24.75, thereby establishing again a new high peak for the year, and comparing with 24.71% last week and 24% a year ago. In the corresponding week of 1924 the ratio stood at 16¼%. Sharp changes in deposits continue to figure in these weekly returns. In public deposits there was this time an expansion of £4,367,000, while "other" deposits fell off £4,944,000. The Bank's temporary loans to the Government declined £755,000, but loans on other securities increased £324,000. Gold holdings amount to £150,085,001, which compares with £157,183,840 a year ago and £128,261,164 a year earlier (before the transfer to the Bank of England of the £27,000,000 gold formerly held by the Redemption Account of the Currency Note Issue). Reserve aggregates £29,446,000, as against £31,663,380 in 1925 and £21,501,964 the year before that. Note circulation is now £140,389,000. This compares with £145,270,460 the previous year and £126,509,200 in 1924, while loans total £67,261,000, in comparison with £79,023,183 and £81,092,286 one and two years ago, respectively. The Bank of England's official discount rate has not been changed from 5%, notwithstanding the prevalence of rumors to the effect that a lowering is imminent. Clearings through the London banks for the week totaled £654,023,000, which compares with £759,069,000 a week ago and £703,037,000 last year. We append herewith comparisons of the different items of the Bank of England return for a series of years:

a Includes, beginning with April 29 1925, £27,000,000 gold coin and bullion previously held as security for currency note issues and which was transferred to the Bank of England on the British Government's decision to return to gold standard.
b Beginning with the statement for April 29 1925, includes £27,000,000 of Bank of England notes issued in return for the same amount of gold coin and bullion held up to that time in redemption account of currency note issue.

The Bank of France in its weekly return for the week ended June 23 reported an expansion of 40,527,000 francs in note circulation, which contrasts with the decreases reported the two previous weeks. Total notes outstanding now aggregate 53,073,190,740 francs, which compares with 43,000,139,735 francs for the corresponding date in 1925 and with 39,664,662,255 francs in 1924. A further increase in gold occurred, the gain the present week amounting to 22,100 francs. Gold holdings now stand at 5,548,572,800 francs as against 5,546,682,128 francs for the same time in 1925 and 5,543,133,728 francs for the year previous. Last week the Government's indebtedness to the Bank of France remained unchanged, but through additional borrowing of 200,000,000 francs during the week now under review, the total indebtedness to the Bank now amounts to 36,600,000,000 francs, which compares with 25,650,000,000 francs for the same time in 1925 and with 23,000,000,000 francs in 1924. Changes in the other items of the Bank's report were: Silver gained

1,228,000 francs, bills discounted increased 261,086,000 francs, treasury deposits rose 2,171,000 francs, and general deposits moved up 138,839,000 francs. On the other hand, trade advances fell off 43,417,000 francs. Comparison of the various items in this week's return with the figures of last week and with corresponding dates in both 1925 and 1924 are as follows:

BANK OF FRANCE'S COMPARATIVE STATEMENT.

Important changes were shown in the statement of the German Reichsbank, issued under date of June 15. Chief among these was a contraction in note circulation of 182,080,000 marks, at the same time that other maturing obligations expanded 115,656,000 marks and other liabilities increased 39,274,000 marks. As to assets, increases of 42,784,000 marks and 199,000 marks, respectively, were noted in holdings of bills of exchange and checks, and advances. Silver and other coins expanded—7,756,000 marks, and notes on other banks 8,251,000 marks. On the other hand, reserve in foreign currencies was reduced 150,595,000 marks, while investments declined 2,000 marks. Other assets registered a gain of 64,195,000 marks. The Bank again added to its gold reserve (162,000 marks), thus bringing total gold holdings up to 1,492,161,000 marks, which compares with 1,040,194,000 marks last year and 448,003,000 marks in 1924. Note circulation now outstanding aggregates 2,612,839,000 marks, as against 2,362,933,000 marks a year earlier.

Moderate additions to gold reserves and a material increase in rediscounting and open market operations, constituted the principal features of interest in the weekly statements of the Federal Reserve banks that were issued at the close of business on Thursday. For the System as a whole a gain in gold of $10,000,000 was shown, while rediscounts of all classes of paper expanded approximately $85,800,000; the result was to bring total bills discounted up to $479,158,000, which compares with $455,445,000 a year ago. Holdings of bills bought in the open market increased $14,100,000. Holdings of Government securities declined $99,100,000, due to the paying off by the Government of the $41,500,000 of temporary certificates issued to the Federal Reserve banks the previous week, pending the collection of the quarterly installment of income taxes. Total bills and securities (earning assets) remained practically stationary—declining $34,000, while deposits fell $32,600,000. Federal Reserve notes in actual circulation decreased $5,400,000 and member bank reserve accounts dropped $35,500,000. The report of the New York Bank indicated an increase in gold holdings of $38,100,000. Rediscounting of Government secured paper expanded $20,000,000, and of "other" bills $5,200,000. The net result for the week, therefore, was an increase in total bills discounted of $25,200,000, to $92,265,000; although this is still below last year's total of $120,885,000. Open market purchases gained $17,300,000. Here, also, total bills and securities showed shrinkage, namely, $38,800,000, while deposits fell off $28,600,000. The amount of Federal Reserve notes in actual circulation declined $3,200,000, while member bank reserve accounts decreased $33,000,000. Contraction in deposits, coupled with larger gold holdings, naturally resulted in an advance in the ratio of reserve. This was especially marked at New York, which reported an increase of no less than 4.8%, to 84.4%. For the banks as a group, the gain was smaller, namely, 1.0%, to 76.0%.

The New York Clearing House banks and trust companies in their statement of last Saturday showed restoration of a substantial surplus reserve. Loans fell off $25,179,000. Net demand deposits declined $5,386,000, to $4,376,397,000, which is exclusive of Government deposits to the amount of $27,868,000. Time deposits, on the other hand, expanded $10,480,000, to $575,915,000. There was a contraction in cash in own vaults of members of the Federal Reserve Bank of $2,404,000, to $44,412,000, although this is not counted as reserve. Reserves of State banks and trust companies in own vaults increased $54,000, while the reserve of these same institutions kept with other depositories ran up $757,000. Member banks added the sum of $25,954,000 to their reserves in the Federal institution, a factor which was mainly responsible for the addition to surplus of $27,170,410, thus wiping out last week's deficit in reserve of $7,411,520, and leaving an excess reserve of $19,758,890. The above figures for surplus are on the basis of legal reserve requirements of 13% against demand deposits for member banks of the Federal Reserve System, but not including $44,412,000 cash in vault held by these member institutions on Saturday last.

While at mid-week a slightly firmer tone developed in the time money market, conditions in the market as a whole were easy. This was true in spite of the continued activity in the stock market. The transactions, while still considerably in excess of a million shares a day, fell off materially, and rather steadily, from the figures for a week ago yesterday, which were in excess of 2,300,000 shares. That brokers' loans, however, have been on the increase again was further shown by the Federal Reserve Board figures for the week ended June 16. They disclosed an increase of $43,245,000 over the preceding week. The aggregate loans on June 16 were given as $2,517,410,000, which compared with the peak for this year so far of $3,141,125,000 on Jan. 6. The strong financial position of the Federal Government, notwithstanding substantial reductions in tax rates, was shown by President Coolidge in an address on June 21 before the eleventh regular meeting of the Business Organization of the Government. The New York "Times" representative in Washington said that "he surprised his listeners by giving the estimated surplus for this fiscal year as about $390,000,000 and the gross debt reduction as $836,193,888, but painted a dark picture as to conditions in 1928 and the increasing expenditures of local Governments." That the business of the country as a whole is keeping up was shown by the car loadings for the week ended June 12. They totaled 1,060,214 cars, or 70,341 more than

for the corresponding week last year and 157,622 larger than for the like week in 1924. According to the "Iron Age," new buying of steel products is keeping up also. Many of the large automobile companies are shutting down to take inventory. Crop advices are encouraging. Money is likely to be a little firmer next week, before the 1st of July payments are made, but otherwise no special change is expected.

As to specific rates for money, call loans have ranged between 4 and 4½% during the week just closed, as against 3½@4% last week. As a matter of fact, however, the call market was all but motionless. On Monday the high was 4½%, the low 4% and 4% also for renewals. On each of the succeeding days for the remainder of the week, Tuesday, Wednesday, Thursday and Friday, there was no range, all loans on call being negotiated at 4¼%.

For fixed date maturities the market was dull and featureless, with quotations at 4⅛@4¼% for sixty and ninety days, and 4¼% for four, five and six months, as against 4⅛@4¼% for all periods a week ago. No large individual trades were reported. The former differential between all-industrial money and regular mixed collateral has long since been dropped.

Commercial paper was moderately active, with both city and country institutions in the market as buyers. Offerings, however, are still light, so that the volume of business passing was not large. Four to six months' names of choice character have not been changed from 3¾@4%, while names less well known require 4¼%. New England mill paper and the shorter choice names are still passing at 3¾%.

Banks' and bankers' acceptances remain at the levels previously current. Trading was not active, owing partly to restricted supplies of prime bills. Out-of-town banks were the principal buyers. For call loans against bankers' acceptances, the posted rate of the American Acceptance Council remains at 3½%. The Acceptance Council makes the discount rate on prime bankers' acceptances eligible for purchase by the Federal Reserve banks 3¼% bid and 3⅛% asked for bills running 30 days, 3⅜% bid and 3¼% asked for 60 days, 3½% bid and 3⅜% asked for 90 and 120 days, 3⅝% bid and 3½% asked for 150 days, and 3¾% bid and 3⅝% asked for 180 days. Open market quotations are as follows:

SPOT DELIVERY.

	90 Days.	60 Days.	30 Days.
Prime eligible bills	3⅛a3⅜	3⅛a3¼	3⅛a3¼

FOR DELIVERY WITHIN THIRTY DAYS.

Prime eligible bills	3⅛ bid
Eligible non-member banks	3⅜ bid

There have been no changes this week in Federal Reserve Bank rates. The following is the schedule of rates now in effect for the various classes of paper at the different Reserve banks:

DISCOUNT RATES OF FEDERAL RESERVE BANKS IN EFFECT JUNE 25 1926.

* Including bankers' acceptances drawn for an agricultural purpore and secured by warehouse receipts, &c.

The sterling exchange market gave a good account of itself this week, and notwithstanding the fact that little or no increase in activity made itself felt, the range of quotations moved up another fraction, so that demand bills ruled at 4 86 7-16 the greater part of the time, with the extremes 4 86¼ and 4 86⅜. Dealers are apparently maintaining an attitude of indifference to the movements in sterling, although it is understood that the situation is in reality being carefully watched. Banking interests in close touch with British affairs are, it would seem, not unduly concerned over the outcome of the coal tie-up, and are in an optimistic frame of mind. It is nevertheless conceded that the prolonged failure to arrive at a satisfactory basis for an amicable and equitable settlement of the coal strike is proving a serious handicap to normal trade activities throughout the United Kingdom and one which of course will inevitably prove more and more of a menace to business progress as time goes on. As was the case last week, however, trades were made on a number of occasions at or above par and the unvarying steadiness of England's currency at a time when business conditions are surrounded with so many uncertainties remains a source of satisfaction. The explanation most generally credited for the firmness in sterling values is the softening in money at New York, which has led to rumors of the possibility of a further cut in the Federal Reserve rediscount rate, to be followed by transfers of funds from here to London for investment at the higher levels prevailing there.

As to quotations in greater detail, sterling exchange on Saturday last was dull but steady with demand at 4 86 5-16 (one rate), cable transfers at 4 86 11-16 and sixty days at 4 83 1-16. Monday there was very little doing marketwise and rates were not changed from 4 86 5-16 for demand, 4 86 11-16 for cable transfers and 4 83 1-16 for sixty days. Notwithstanding continued inactivity, sterling on Tuesday was a shade firmer and demand ranged at 4 86 5-16 @4 86⅜, cable transfers at 4 86 11-16@4 86¾ and sixty days at 4 83 1-16@4 83⅛. On Wednesday an easier tendency developed, resulting in a fractional decline to 4 86¼@4 86 5-16 for demand, 4 86⅝@ 4 86 11-16 for cable transfers and 4 83@4 83 1-16 for sixty days; trading was quiet and featureless. Dulness was the chief characteristic of Thursday's dealings, though, and rates were a shade firmer at 4 86 5-16@4 86⅜ for demand, 4 86 11-16@4 86¾ for cable transfers and 4 83 1-16@4 83⅛ for sixty days. Friday increased strength caused demand bills to advance slightly, though trading was still dull, and the quotation rose to 4 86⅜@4 86 7-16; cable transfers ruled at 4 86¾@4 86 13-16 and sixty days at 4 83⅛@4 83 3-16. Closing quotations were 4 83 3-16 for sixty days, 4 86 7-16 for demand and 4 86 13-16 for cable transfers. Commercial sight bills finished at 4 86 5-16, 60 days at 4 82 11-16, 90 days at 4 81 316, documents for payment (sixty days) at 4 82 15-16 and seven-day grain bills at 4 85 3-16. Cotton and grain for payment closed the week at 4 86 5-16.

No gold is being engaged for either export or import to this country. The Bank of England continues to report a considerable degree of activity in this direction. Exports for the week were approximately £100,000 in sovereigns to Spain, £18,000 to Holland, £7,000 to Uruguay and £20,000 to Argentina. The Bank also purchased £128,000 in gold bars and imported £250,000 sovereigns from South Africa.

Rate fluctuations in Continental exchange were less spectacular than in recent weeks, and, generally speaking, there has been a marked absence of the violent up and down movements that have so often characterized foreign exchange dealings of late. French francs responded measurably to the improvement in the political situation and the quotation after opening at 2.77, advanced to 2.94½. The forward movement naturally led to short covering which aided the rise.

Later on, realizing sales, as well as less favorable advices from the French capital, were responsible for a reaction to 2.78½, though the close was above this figure, viz., 2.88¼. Support, said to be either of an official character or to come from sources very close to the Government, was a factor in steadying the French unit. It still remains true, however, that francs at no time during the week were able to reach or pass the 3-cent mark and that very few seemingly have any confidence in the maintenance of higher levels, no matter what sort of ministry is in office, in the absence of adjustment of France's financial affairs. Talk is heard in many quarters of the urgent need of a dictator of some kind to take the reins and lead the French nation out of its present morass. Premier Briand's utterances to the effect that politics were now of secondary importance and the financial situation the paramount consideration created a good impression and caused a small though temporary recovery. At the close reports of the resignation of the Governor of the Bank of France had a depressing effect. Most of the activity in francs emanated from Paris, local dealers taking very little part in the proceedings. Belgian francs have dropped to the levels of the Paris franc and ruled all week at or near 2.88, moving usually in sympathy with the variations in the latter currency, and advancing to 2.91¼ before the close. Lire showed a tendency towards recovery and the range of quotations was 3.59½@3.62½, or slightly above last week's price levels. German exchange remains unaffected by the gyrations in neighboring currencies, and the same is true of Austrian exchange. In the minor Central European group, trading was exceptionally dull and rate movements were unimportant, except in Rumanian lei, which advanced about 5 points on a better demand. Greek exchange was steady at or near 1.24.

The London check rate on Paris closed at 166.85, which compares with 175.04 last week. In New York sight bills on the French centre finished at 2.88¼, against 2.77½; cable transfers at 2.89¼, against 2.78½; commercial sight at 2.87¼, against 2.76½, and commercial sixty days at 2.82¾, against 2.72 a week ago. Final quotations on Antwerp francs were 2.84½ for checks and 2.85½ for cable transfers, which contrasts with 2.83½ and 2.84½ a week earlier. Reichsmarks closed the week at 23.81 (one rate) for both checks and cable transfers, the same as heretofore, while Austrian schillings continue to be quoted nominally at 14⅛, unchanged. Lire finished at 3.62½ for bankers' sight bills and at 3.63½ for cable transfers. A week ago the close was 3.59¼ and 3.60¼. Exchange on Czechoslovakia closed at 2.96⅜ (unchanged); on Bucharest at 0.45½, against 0.42⅝; on Finland at 2.52½ (unchanged), and on Poland at 9.00 (unchanged). Greek drachmae finished at 1.23 for checks and at 1.23½ for cable remittances (unchanged).

As to the former neutral exchanges, trading has been moderately active, but rate changes were confined to a few points in either direction, with the single exception of Spanish pesetas, which, after a sharp spurt of strength in the early part of the week that carried the quotation up to 16.42, turned weak and gradually slumped off until 16.08 had been reached. Day-to-day fluctuations in this currency averaged 10 to 15 points as a result of speculative maneuvering. Economic and financial conditions in Spain, although improving, are reported as not warranting anything like the present high level of the peseta. Dutch guilders continue to hover around 40.15. Swiss francs ruled firm at or near 19.35. In the Scandinavian group, prices were very firm and Danish, Norwegian and Swedish remittances all remained either or slightly above last week's high levels. A falling off in activity, however, was noted.

Bankers' sight on Amsterdam closed at 40.18, against 40.14¼; cable transfers at 40.15, against 40.16; commercial sight bills at 40.08, against 40.06¼, and commercial sixty days at 39.72, against 39.70¼ last week Closing rates on Swiss francs were 19.35½ for bankers' sight bills and 19.36½ for cable transfers, which compares with 19.35 and 19.36 a week ago. Copenhagen checks finished at 26.47½ and cable transfers at 26.51½, against 26.47 and 26.51. Checks on Sweden closed at 26.82 and cable transfers at 26.86, against 26.80 and 26.84, while checks on Norway finished at 21.90 and cable transfers at 21.94, against 22.09½ and 22.13½ the previous week. Spanish pesetas closed the week at 16.08 for checks and at 16.10 for cable transfers. This compares with 16.24 and 16.26 the week before.

Uruguay, peso	1.0178	1.0180	1.0156	1.0130	1.0161	1.0123

As regards South American exchange, what little activity there was centred around Brazilian milreis, which ruled strong on the negotiation of another Brazilian loan in this country and moved up to a new high record of 15.90 for checks, though closing at 15.85, with cable transfers 15.90, against 15.45 and 15.50 a week ago. Argentine pesos were fairly

steady, though after ruling around 40.45, finished easier at 40.20 for checks and at 40.25 for cable transfers, against 40.40 and 40.45 last week. Chilean exchange ruled firm and closed at 12.05, against 12.00 a week ago. Peruvian exchange tended downward and finished at 3.65, against 3.68 a week earlier.

Far Eastern exchange came in for a fair share of activity and ruled strong, especially the Chinese currencies, which were influenced by the rise in silver. Toward the close, however, some of the gains were lost. Hong Kong after advancing to 55.80, reacted and closed at 55.67@55.80, against 55.80@55.92; Shanghai finished easier at 72¾@73, against 73 7-16@73½; Yokohama at 46.95@47.00, against 46.85@47.00; Manila at 49½@49⅝ (unchanged); Singapore at 56½@56⅞ (unchanged); Bombay at 36⅜@36½ (unchanged), and Calcutta at 36⅜@36½ (unchanged).

The New York Clearing House banks, in their operations with interior banking institutions, have gained $5,641,359 net in cash as a result of the currency movements for the week ended June 24. Their receipts from the interior have aggregated $6,527,159, while the shipments have reached $885,800, as per the following table:

CURRENCY RECEIPTS AND SHIPMENTS BY NEW YORK BANKING INSTITUTIONS.

Week Ended June 24.	Into Banks.	Out of Banks.	Gain or Loss to Banks.
Banks' interior movement	$6,527,159	$885,800	Gain $5,641,359

As the Sub-Treasury was taken over by the Federal Reserve Bank on Dec. 6 1920, it is no longer possible to show the effect of Government operations on the Clearing House institutions. The Federal Reserve Bank of New York was creditor at the Clearing House each day as follows:

DAILY CREDIT BALANCES OF NEW YORK FEDERAL RESERVE BANK AT CLEARING HOUSE.

Saturday, June 19.	Monday, June 21.	Tuesday, June 22.	Wednesd'y, June 23.	Thursday, June 24.	Friday, June 25.	Aggregate for Week.
$	$	$	$	$	$	$
102,000,000	99,000,000	80,000,000	88,000,000	90,000,000	93,000,000	Cr. 552,000,000

Note.—The foregoing heavy credits reflect the huge mass of checks which come to the New York Reserve Bank from all parts of the country in the operation of the Federal Reserve System's par collection scheme. These large credit balances, however, reflect only a part of the Reserve Bank's operations with the Clearing House institutions, as only the items payable in New York City are represented in the daily balances. The large volume of checks on institutions located outside of New York are not accounted for in arriving at these balances, as such checks do not pass through the Clearing House but are deposited with the Federal Reserve Bank for collection for the account of the local Clearing House banks.

The following table indicates the amount of bullion in the principal European banks:

Banks of—	June 24 1926.			June 25 1925.

The New Briand Ministry.

For the tenth time France has a Briand Government. The ninth Briand Cabinet, which resigned on June 15, was reconstructed on Wednesday, after eight days of negotiations, with M. Briand once more occupying the two posts of President of the Council, or Premier, and Minister of Foreign Affairs. Associated with him is Joseph Caillaux, who for the fifth time becomes Minister of Finances, and, in addition, Vice-President of the Council, a position hitherto held by the Minister of Justice. Other changes of most significance are the substitution of General Guillaumat, endeared to the French public as one of the heroes of Verdun and the Marne, as Minister of War in place of Paul Painleve, and the selection of Pierre Laval, a close friend of M. Caillaux, as Minister of Justice. The failure of the attempt to form a union Government in which conservatives, moderates and radicals should all find place, with M. Poincare holding the crucial portfolio of Finance, has resulted in the formation of a Ministry which leans somewhat to the Left, but M. Briand himself has changed sides too often in his long career, and has acquired too much of a reputation as a skillful political compromiser, to make the composition of the new Cabinet a matter of surprise. In the present state of French politics, no Ministry that does not cater to the Left has much chance of surviving, and in the make-up of the reorganized Briand Government the question of including members whom the Chambers would probably accept appears to have been quite as determining a factor as the question of the particular policies for which the Government should stand.

The inclusion of M. Caillaux in the Government as Minister of Finances is by all odds the most important element in the situation. It is not too much to say that upon M. Caillaux's financial policy, rather than upon anything that M. Briand may say or do, the new Ministry is likely to stand or fall. Months of discussion in press and Parliament have brought no remedy for the financial crisis, and in the meantime the franc has continued its ominous decline. What M. Caillaux may now have in mind as a means of solving the financial problem must be a matter of conjecture until his plans have been submitted, but enough is known of his general attitude to suggest that his proposals will be drastic. M. Peret, his predecessor in office, felt compelled to resign, and in so doing precipitated the fall of the Cabinet, because of lack of support for a plan which would have replaced the national defense bonds, as they fell due, with bank notes, thereby apparently putting the floating bonded debt on the same basis of security as the depreciating paper currency. It will be recalled that M. Caillaux, when he was last Finance Minister, proposed to meet the problem of the floating debt in part by the issuance of additional bank notes, and in part by an issue of refunding bonds whose value was to be maintained on a gold basis. The public subscriptions to this convertible loan, however, limited as they were to holders of the existing bonds, aggregated only about a fourth or a fifth of the amount desired, and the Treasury was left in the unfortunate position of having to pay, on the small amount of conversion bonds issued, a considerably higher rate of interest than on the original debt, because of the steady decline in the value of the franc.

Whether, in view of the rejection of the Peret proposal, M. Caillaux will now think it well to return to his former program, or to bring forward any other program involving some measure of inflation, remains to be seen. Aside from the questions of debt and currency, however, he is well known to

favor a drastic economy in public expenditure, and the composition of the new Ministry suggests that he may have secured the co-operation of M. Briand in advance in putting such a policy into effect. M. Poincare, to whom the Finance portfolio was offered, is reported to have declined it because M. Briand was unwilling to grant him virtually dictatorial powers in financial matters, which means, under the French system, authority to enforce financial policies by Ministerial decree without previous Parliamentary sanction. Whether or not M. Caillaux has now been granted the authority which was refused to M. Poincare has not been stated, but the fact that he becomes Vice-President of the Council as well as Minister of Finances, that the new Minister of Justice is a personal friend, and that the new Minister of War is a General of the army, give color to the report that M. Caillaux is to have an exceptionally free hand. If such is the case, any steps looking to the imposition of new taxes or a more rigorous collection of existing ones may be expected to have the cordial support of the Department of Justice, and a distinguished General will be the Minister to deal with disorder if it occurs.

Hardly less important is the question of the debt settlements with the United States and Great Britain. M. Caillaux has been counted among the opponents of the debt settlement with this country recently negotiated by Ambassador Berenger, and not yet acted upon by the French Parliament, but the failure of his own negotiations at Washington and his subsequent repudiation as Finance Minister put him at a disadvantage in opposing the Berenger agreement. M. Briand, moreover, has appeared to favor the Berenger agreement, and the Ministerial statement of policy which is expected to be read to the Chambers early next week cannot well omit a declaration on the subject. It is intimated that, since Parliament usually adjourns in July for a recess of several months, the matter may be temporarily disposed of by deferring final action on the American agreement until the debt settlement with Great Britain has been arranged, meantime allowing M. Caillaux to test the sentiment of the country by putting into operation such other financial policies as he may have.

On the surface the new Government does not appear to be a strong one, but its compromise character may nevertheless work to its advantage. Its outstanding figure is M. Caillaux, but while his financial abilities are widely recognized, the unhappy ending of his previous experience as Finance Minister, joined to the political hostility which the mere mention of his name still arouses in certain influential quarters, constitute elements of uncertainty as far as his share in the burden of government is concerned. The refusal of M. Herriot, the outstanding figure in the radical party groups, to undertake the formation of a Ministry may have the effect of making his followers wary, and temper their opposition to a Government which they know very well they could not easily replace with one of their own, but the Socialist demand for a capital levy is not dead, and as long as the radical Socialist group holds the balance of votes in the Chamber of Deputies, any Government must live by sufferance of the Left, however much support it may receive on occasion from the Centre or Right. M. Poincare's refusal of the Finance portfolio, whatever the reason may have been, is no loss to France, for financial questions are not M. Poincare's *forte*, but his reactionary leadership is still a force to be reckoned with, and his personal hostility to M. Caillaux is well known. Until M. Briand presents the new Ministry in the Chambers and submits his declaration of policy for debate, the most that can be hoped for is that the reconstructed Government may turn out to represent a sincere disposition on the part of the warring factions to sink their differences and animosities and unite in support of a national program whose sole aim is the welfare of France.

Some Aspects of the Pennsylvania Primary Debauch.

In view of the vast abyss of the approaching campaign's opposing political principles (leading issues) it may be idle at this time to dwell upon outstanding episodes that seem to furnish ready-made planks for platforms designed to "get in on." But the huge sums expended in the recent Pennsylvania primaries is a matter of serious import to the country regardless of parties; and is receiving a merited and very general comment. However, it is well to beware of over-exaggeration. One swallow does not make a summer, nor does one State make a Union. Senatorial "investigations" have not proved the most efficient means for party overturn. If we mistake not, the oil "investigations," through the amplifiers of political hustings debates, were pointed to as evidence of the wholesale corruption of a party in power. The people were not so impressed. An overwhelming majority said so. And to make an "issue" now of the sums spent for "watchers" in the primaries of this one State and for "other expenses" may be partisan political wisdom—we feel sure the voters next fall will determine whether it is or not. However, to spend a couple of millions, more or less, to *try* to nominate a single Senatorial candidate, and then lose, is an alarming circumstance—to those who spent the money.

Of course the usual comment centres about the primary versus the convention plan of selecting candidates for high office. This is not the question of electing Senators by direct vote, now a part of the fundamental law. That will go on until, shall we say, a time when we seriously consider the repeal of some of our constitutional amendments, hastily and emotionally adopted. This law and the primary laws of the States stand together on the plea that they give the people, the voters individually, a chance to express their choice. And we shall never answer this rightly until we consider the people in their relation to a "representative" form of republican government. We suspect that under the decision that Congress cannot interfere with the conduct of State primaries this political episode, as we are pleased to call it, will lose much of its force when the Senate comes to consider, under its right to control the qualifications of its members, the claims of the successful contestant to be seated should this nominee be elected. And many commentators are saying, therefore, that it is "up" to Pennsylvania to "clean house."

It is noted that the highest expenditures were made in behalf of the man generally regarded over the country as the "best man" for the place. And while it is an inconclusive statement it *might* be said that this proves that you cannot *buy* an election with the largest "corruption fund," allowing

that this is the right name for it. Extraordinarily large sums were spent on two other candidates, one of whom was nominated. A nominee for Governor was also selected at the same primary. And here, as nearly as we can judge from the complicated situation, the largest "roll" was more effective. But through the whole thing runs the thought that one "fund" compels another; and that the part of the people amenable to the giving and receiving of these funds is responsible for the divagations and uncertainties of the result. Reform that will go to the root of the evil must as a consequence go deeper than the law of the method and reach the heart of an aroused citizenry that will refuse to be affected by a malign influence.

Pennsylvania is so strongly a Republican State that it is unlikely soon to elect a Democrat a United States Senator. Yet it is conceivable it could follow in the footsteps of Iowa and by the election of a hybrid Republican (if that ensues) do worse. In fact, Iowa has a Democratic Senator, and thereby, perhaps, in a moment of awakening, is to be found the key to the nomination of Mr. Brookhart, who is now busy denying some alleged statements as to capital and labor, made, if made at all, in the exuberance of success. These things show that in the currents of opinion the people may be blown from their political principles in the tempests of a primary, and that almost anything may happen. And as so often currently pointed out, while "rings" and "funds" are not unknown to the convention system, there is so much of dignity and responsibility to a party convention that it is forced to regard the better sentiment of the electorate and (though by corrupt means) nominate "good" men for office. This did not happen in the free-for-all, undignified and irresponsible Pennsylvania primary. The statement is not to be taken as an exact exposition, but as a suggestive one.

The fault of any popular government, aside from its necessary constructive imperfections, lies in the people—in their observance of its privileges, duties and responsibilities. It is estimated that only about half the citizens take the trouble to vote. This may not be the ratio in Pennsylvania—but a large part of the trouble there must be ascribed to the percentage that is indifferent to this duty. It will do little good to amend these primary laws while this condition continues. Relief lies in a higher sense of responsibility. Senator Reed of Missouri lately contrasted the millions of words in the United States Statutes and those in the Ten Commandments. Not more laws governing the procedure in voting, but more consecration in the exercise of the duty, is wanted. Why should there be an army of "watchers" at the polls, admitted to be paid hirelings expected to vote as paid? It is an admission of inefficiency in popular government. The statute itself permitting this is a confession of guilt. In the State of Pennsylvania there is a tremendous industrial interest. Testimony shows that this affected the primary in question. At the same time admissions of witnesses before the committee point to the sources of funds as lying in this same interest. Yet as far as the nomination for Senator was concerned the use of this money, admitting it to be in a semi-lawful way, only resulted in failure. What would become of a possible corruptible vote if there was no money to be obtained? This method of fighting the devil with fire only feeds the flames. What would become of the ignorant vote if it was met at the polls by the intelligent vote?

Occasionally we hear the suggestion that there are the seeds of revolution in the political discontent of the masses. But if one element can be influenced by the maledictions of the professional political reformers, must the disgusted but intelligent element of voters stay at home and give the alleged revolutionists a clear field, to be whipped any way but the right one in a *popular* primary? A convention system, even if open to manipulation, concentrates the best thought with the worst. The arena of contest is lessened so that argument can be made more effective. There is some chance to point out in a concise way the needs of occasion. Candidates may be pitted against each other in their relation to good government. Their qualities for office can be lifted above the clamor of the crowd. And as we have already said, the convention has an entity and an existence of its own and must come to feel its responsibility to the best traditions of the party it represents. When we localize self-government, the voter's knowledge of needs and instrumentalities can be brought close to the individual. But when he attempts to express only individual judgments and preferences, as in a primary on United States Senator, he relies on himself, on his own estimate of needs and qualifications that are not near enough to teach him. In a convention he surrenders to the common judgment of those delegated for their fitness. This by no means always follows, but of two evils, in the absence of perfection is it not better always to choose the least?

It is too early to even speculate upon issues. But this much may be said—any attempt to link a party with "big business" in an adverse way, *at a time when for the most part the country is prosperous,* when manufacture, transportation, and agriculture in the large way, are doing well, when there is little unemployment, gradually falling commodity prices, though labor wages are still at a disproportionate level, is not only poor political policy, but tends to bring on a depression that will do nobody any good. There are great questions, such as bureaucracy, State's Rights, the necessity of buying in foreign markets, as well as selling, and the need of a sane view of the ever-recurring money question, about which there is always blowing a cloud of chaff with the golden grain, that will furnish meat for honest discussion and opinion by the two "old parties." But let us have no more campaigns based on investigation of isolated incidents that are sure to prove boomerangs.

The Two-Thirds Rule in Democratic National Conventions.

Political national conventions are of grave public importance. Intensely partisan, they are of interest from a non-partisan standpoint. An indubitable part of our two-party system of political representation, they reflect, as in a glass, the attitude of our two oldest parties, practically our only parties, on all public questions. Or, should do so. Their well-known derelictions in party platform declarations we shall not now discuss. In the Republican convention the majority rule in nominations prevails. In the Democratic, it is now proposed to change the two-thirds to a majority rule. This change is of vital interest to the people regardless of party preference. The present Republican Party is not as old

as the present Democratic Party. Names, going back along the line of growth in each, have changed, as have principles advocated. As a consequence, the two-thirds rule in the Democratic National Convention in its inception had a meaning different from that of to-day.

In the first place a national convention of a party is a spectacle of embattled hosts peacefully seeking power to administer the Government of the United States. It has long been considered an honor to be a member of it. Young men in both parties are trained to regard memberships as an evidence of faithful work for and adherence to principles deemed of great moment to the conduct and perpetuation of the Republic. Following our State representation in Congress, a Delegate-at-Large, chosen by a State, is perhaps the highest party honor that can be conferred upon a citizen. National conventions promulgate platforms of principles upon which they appeal to the public for support. These too often fall short, but we pass that. The nominee for President by a political convention, national in scope, stands out in the public eye and mind, not only as the standard-bearer and leader of a great party, but as the embodiment of its highest and most sacred principles. Therefore, a national convention should be orderly, deliberative, devoted, earnest, harmonious and consecrated to the interests of the party and through these to the welfare of the nation.

In early days, when the two-thirds rule was adopted, which appears in various ways in our political system, it was thought to make for deliberation, harmony and success. The idea was to have in this candidate as exponent an expression of a *large* majority that there might be no room for dissent. It has not altogether worked out that way. What are known as Favorite Sons, men preferred by single States, have been able, under a two-thirds majority rule, coupled with the unit rule of voting by States, to block a Presidential nomination for scores of ballots, until, amid intense partisanship prevailing among leading candidates, a "new deal" has had to be made, a new candidate invoked, usually a "dark horse," when, amid dire confusion, a nomination is made without deliberation, without real harmony, and one not representative of the chief contenders or their principles. This it is now proposed to avoid by changing from a two-thirds to a majority rule. But there are several matters to be taken into consideration before the change is made. In some States delegates to the Democratic National Convention are chosen by direct primary, are, naturally, not specifically instructed, and cannot be held by the unit rule of voting. Herein is exposed the anomaly of a majority vote in a State instructing, or it may be not instructing, its delegates, chosen by convention, controlling the whole delegation. Further, a majority vote in a Democratic National Convention has, with a few exceptions (the case of Champ Clark is the most notable) almost invariably resulted in the yielding of the minority on subsequent ballots, and a nomination.

So that the fact that there is now a manifest desire for change from two-thirds is not so much in the interest of mere "majority rule," and thereby of harmony, as it is in behalf of contentions which hamstring the party in its campaign, and are therefore a reflection upon it. And it is perhaps a merited criticism upon the Democratic Party that its conventions have become the increasing scene of turmoil. The last one held in New York City, where for three weeks there was a "deadlock" between McAdoo and Smith, with a minority refusing to yield and Favorite Sons holding the key, is well known to everyone. That the party should somehow mend its ways is generally believed. But to abrogate the two-thirds rule and the unit rule with it, is going to be difficult, and is freighted with public as well as party importance. For, with the unit and two-thirds rule broken, the cities of the country will have increased power in naming a candidate for President. And the delegations of large cities unless more carefully selected than heretofore—we think the statement is not seriously to be denied—have more of the temporizing, not to say trading, quality, than those from the country districts. More than this, under city domination, if such should be, the "center of population" would swing toward the East, and there might be an entire change of party principles as finally declared.

If a party is to appeal to the independent vote, which is growing larger all the time, it must be through men and principles. It cannot obtain either by yielding to a scramble for office. If it is to do its part in getting the indifferent, in and out of parties, to vote, it must not disgust them by the manner in which it conducts its conventions. If it is to hold its own members in line, go to the country with confidence and enthusiasm, it must avoid nominations that, to use a mild term, are unexpected; and it must promulgate principles that are earnest rather than evasive, sound rather than subtle. Delegates to any national convention should remember as Senators and Representatives in Congress must, that they are chosen by States to act for the nation. It matters not what State or section a Presidential nominee comes from, if he is known by all for his advocacy of principles that affect all the people.

It may be that abrogation of the two-thirds rule and the unit rule, for they seem to go together, would work well in the Democratic convention. But that is for the party to determine in the light of fitness to an expression of its purposes, policies, practices and principles. The majority rule has worked well, it is conceded, in the Republican National Convention, for there is no disposition to change. But it is in the emotional aspect of conduct that hope is to be placed. Democrats are noted for being fighters to the last ditch. Their partisanship is more of an obsession than with the Republicans; or perhaps we might say the latter are more calculating and cold-blooded. But whatever is said, it is demonstrated that the New York convention sent the Democrats into the last campaign under a handicap. Most of all—no extraneous questions should be allowed to split a national convention.

And now we come to the feature of the question that is above all others. A mere change in procedure will be of little avail without a change of heart. Majorities and minorities must learn first conciliation. To nominate men so radical, to advocate principles so violent, that they instantly repel, is not the way to a success in a campaign, is not the way to a tolerant and acceptable administration of the affairs of Government. Delegates much reach that exalted position where, dedicating the party to the public welfare, nominations are made without regard to section, or rewards for previous good official conduct (save that it is required of every man), without blind adherence to any *single* principle,

or law, or policy of reform, without the zest of contest for a political hero, or favorite—but solely in a deliberative choice of the best man for the highest office (all things considered) in the gift of the people, and for *all* the people.

Henry A. E. Chandler of National Bank of Commerce Finds Outlook for Continued Improvement in World Buying Power Good.

Discussing "Underlying Economic Factors in the Business Outlook," Henry A. E. Chandler, economist of the National Bank of Commerce in New York, before Illinois Bankers Association at Springfield, Ill., on June 17 expressed the view that, "all in all, the outlook for the continued improvement in world buying power is good." Mr. Chandler said:

In reviewing the larger factors in the outlook for business for the next two or three years, the most interesting question is whether the improvement in foreign trade and in the purchasing power of the farmer will occur in sufficient volume and sufficiently early to dovetail in with the decline in that part of the new purchasing power which arises from the making good of accumulated shortages in construction. While no one can forecast when and how rapidly this temporary buying capacity will decline, we ought not to be surprised, I think, if this decline occurs more rapidly than the improvement in foreign trade and in the buying power of the farmer. In any case it would be wise to be prepared for a decline of the volume of business below the present high level, which is clearly above normal. In view of our strong credit position and our improved productive and consuming capacity this decline, when it comes, ought to proceed in an orderly fashion. Whether or not this will occur will depend upon the psychology of the business community. If the psychology of the business community is sufficiently influenced by the underlying economic situation, the period of the recession should not be long, for inherent in our new economic and financial organization are the elements of strength that will sooner or later lead us once more to a new level of national productivity.

In addition, Mr. Chandler also had the following to say:

To obtain a correct view of the present business situation in relation to the fundamental economic factors we must consider this situation in connection with the entire period of the business recovery since 1921, of which it is but the latest aspect. This period has been characterized by the absence of two factors formerly associated with good business, namely, a large buying power on the part of the farmer and large foreign trade and by the presence of two or three sources of new buying power. The new buying power has resulted principally from three factors:

a. The accumulation of large shortages in important branches of our fixed capital equipment, governmental, public utility and private, including business and industrial, construction and housing.

b. The increase in the standard of living and of real wages, and hence the increased effective demand of millions of people.

c. The revolution in our capital and credit position which has supplied not only an abundance of funds for all normal needs of production and consumption, but also an excess of credit, making possible much speculative enterprise. The answer to the question why such a notable business recovery has been possible in the absence of good buying capacity on the part of two of our best sources of business is to be found in the extraordinary force of the new buying power.

In looking to the future, therefore, two questions arise:

1. Is the new buying power of a sufficiently permanent nature to assure us of a continuation of the present volume of business?
2. If not, what is the outlook for the full recovery of the buying power of the farmer and of our foreign customers?

There is no doubt that part of this new buying power has resulted from the broader distribution of income incident to the war and post-war developments and to the remarkable advances that have been made in technical efficiency and in the efficiency of our industrial organization and management and to improvement in our transportation facilities. To the extent that this new buying power has arisen from these accomplishments it constitutes a permanent asset, which, I think, we may confidently depend upon in the future.

Part of this new buying power, however, has arisen from high wages and large profits incident to the making good of the accumulated shortages. Now it has for some time appeared probable that, when these shortages should be completely made good, we must expect a reduction in this new buying capacity unless some new business of equal magnitude were developed.

When will the new temporary buying power begin to decline in volume? As to this point there has existed much disagreement during the last two years, and certain it is that the continuance of it in such volume has proved the incorrectness of earlier forecasts.

The chief evidence of the continuation of the volume of our buying power is to be found in several well-known indices, namely, the volume of construction, steel output, automobile production, car loading, &c. Construction activity is still continuing at a very high level and contracts awarded for the first five months of this year exceed those of the corresponding period of 1925. Again, although new business in the steel industry has not kept up with production, the volume of iron and steel output has remained high. Production in the motor industry is at as high a level as it has reached during the same period of any of the previous years. Car loadings are exceeding the figures for the corresponding period of the last three years. Moreover, the general volume of business, as indicated by other more inclusive indices, although showing a decline in the last two months, is being maintained at high levels. So far as the volume figures are concerned, therefore, we have as yet no conclusive evidence that buying capacity in the aggregate is being markedly reduced. Our examination of the trend of buying capacity, however, must take into consideration the economic factors underlying the entire movement of the last four years. While from a review of these factors we cannot determine when the volume of the temporary buying capacity will decline or how rapidly, it appears clear that we must expect such a decline in the near future.

Particular importance, therefore, is now attached to the outlook for the farmer and for foreign trade. Although a substantial improvement in the position of the farmer has occurred since 1925, the recent decline in some agricultural prices is not reassuring. It is too early to express any confident opinion as to the immediate outlook for the farmer. There are factors in the situation, however, that appear to point to a general trend upward, although they by no means indicate a full recovery of the farmer's buying capacity in the immediate future.

Our export trade, although below normal for the larger part of the last four years, has during this period continuously improved. 1925 was our best year since the post-war slump. This improvement, however, was greatly aided by the extraordinary flow of funds to Europe, particularly in 1924 and 1925, and part of this European trade is to be accounted for by some replenishment of depleted stocks, particularly in Germany. Thus far this year our exports to Europe are substantially below the corresponding period of 1925, and this reduction has not been offset by increased trade with the rest of the world. We cannot feel sure that exports for 1926 to Europe or to the world at large will equal those of 1925.

However, the outlook for our export trade for the next several years is certainly not strongly unfavorable. Our largest interest in the foreign situation is in Europe, which still absorbs more than half of our exports. Notwithstanding some recent unfavorable developments in Europe, including the difficult political situation in several countries, the recent instability of the French and Belgian francs and of the Italian lire, the Polish situation, &c., there exists unmistakable evidence that the trend of Europe's buying capacity is upward. A long series of accomplishments during the last three years in the fields of currency stabilization, public finance, agriculture and industry clearly point to this conclusion. On the whole the political situation is better, the productive capacity is increasing, credit is improved and savings are growing in many countries.

Of particular importance in this connection is the disposition for the time being of one of the big problems that has beclouded the outlook for our foreign trade and that has exercised such a tremendous psychological influence upon the entire world situation, namely, the Allied debt problem. The funding of these debts upon a basis which virtually cancels or postpones to the distant future an important part of these debts has for the next several years at least largely eliminated whatever obstructing factor existed in this problem. With the exception of the British debt, payments upon which have been made regularly since its funding several years ago, and therefore which constitutes no new problem in our foreign trade, the present annual payments on the principal debts, including the proposed French payments, amount to about $50,000,000, or an amount equal to about 1% of our export trade in 1925. The combined payments, including those of Great Britain, will not for the present amount to more than between 4 or 5% of our 1925 export trade. These payments for the time being may easily be more than offset by our increasing investment abroad.

While the growing strength of Europea and the increased efficiency in its industries points to keen competition between Europe and ourselves in the neutral markets, our trade with these countries is on the general upward trend and our increased efficiency should enable us to hold our own in these markets.

The outlook for an early settlement of the chief remaining problems in western Europe is not unfavorable. All in all, the outlook for the continued improvement in world buying power is good.

The New Capital Flotations in May and Since January 1

As pointed out a month ago, new capital issues on the American markets run pretty regularly now at the rate of 600 to 700 million dollars a month. If there is a falling off under one head or main division, there is certain to be an extra large item under one of the other heads or main divisions. An excellent illustration of the truth of this statement is furnished by the figures for the month of May, which we are now reviewing, where an offering of $154,000,000 new stock by the American Telephone & Telegraph Co. served to swell the grand aggregate for the month to that extent, which otherwise would have dropped below the recent high level.

As already stated, our compilation this time covers the month of May and the tabulations, as always, include the stock, bond and note issues by corporations and by States and municipalities, foreign and domestic, and also Farm Loan emissions. The grand total of the offerings of new securities under these various heads during May was $660,747,562. This compares with $635,614,548 in April; with $650,595,075 in March; with $607,708,461 in February, which was a short month; with $731,844,584 in January; with $728,179,163 in December; with $589,119,381 in November; with $506,180,910 in October; with $492,022,119 in September; with $404,015,397 in August, when the total was the smallest of any month since March 1924; with $695,094,335 in July, and with $673,930,001 in June.

It is worth noting, at the very outset, that nearly the whole of the $660,747,562 total of new issues brought out during May represents new capital, as the amount applied to refunding was only $13,495,000. On the other hand, the new money represented by the $154,000,000 of additional stock to be issued by the American Tel. & Tel. Co. does not have to be supplied immediately, as payments for the new stock will be spread over a period of several months—$20

per share being payable Aug. 2 1926; $40 per share Dec. 1 1926, and the final $40 not until April 1 1927. In May 1925 the grand aggregate of new capital issues of all kinds was $532,900,581.

With such a big amount contributed to the total by the American Tel. & Tel., the aggregate of the corporate offerings for the month was, of course, very large, reaching $453,868,380. In May last year the amount of the corporate offerings was only $295,871,945. The total of the municipal issues was larger than the ordinary, being $132,339,182, several offerings of more than ordinary size having come upon the market—Detroit having placed $22,088,000, Baltimore $18,822,000 and Westchester County, N. Y., $10,082,000. Last year, however, in May the aggregate of the municipal issues coming on the market was still larger, reaching no less than $190,585,636, or the largest on record for any month of this class of obligations. due to the fact that New York City then was a borrower for $60,000,000, represented by an award of that amount of 4¼s.

Analyzing the corporate offerings, it is found that public utility issues, by reason of the $154,000,000 new stock of American Tel. & Tel. Co., again dominated the month's business. They totaled no less than $274,824,340, or well over half the corporate total of $453,868,380, and furthermore, showed a substantial increase over the previous month's aggregate of $216,932,000. Industrial issues at $161,119,040 during May showed a slight decrease from the April total of $163,729,750. Railroad offerings totaled only $17,925,000, whereas in April they amounted to $61,924,000.

Total corporate offerings in May were, as already stated, $453,868,380, and of this amount $227,892,500 comprised long-term issues, $29,552,500 were short-term and $196,423,380 consisted of stock issues. The portion devoted to refunding operations was unusually small, being but $12,237,000, or less than 3%. In April no less than $111,069,770, or slightly over 25%, was for refunding. In March the amount was $37,168,000, or only about 7¾%; in February $33,095,000, or slightly over 8%, while in January the amount was $68,706,575, or in excess of 11% of the total. In May of last year $34,947,015, or nearly 12%, was for refunding purposes.

The $12,237,000 raised for refunding comprised $7,212,000 new long-term issues to refund existing long-term issues, $2,700,000 new long-term to refund existing short-term, and $2,325,000 new short-term to refund existing short-term issues.

Foreign corporate issues sold in this market during May amounted to $26,348,040 and comprised the following: 800,002 no par value shares of Cuban Dominican Sugar Corp. common stock, offered at $20 per share, involving $16,000,040; $3,500,000 International Rys. of Central America 1st mtge. coll. 6s, 1941, offered at 96, yielding about 6.40%; $3,000,000 Mansfield Mining & Smelting Co. (Germany) 15-year (closed) mtge. 7s, 1941, offered at 93½, to yield 7.75%; $3,000,000 Agricultural Mortgage Bank (Rep. of Colombia, S. A.) 20-year 7s, 1946, sold at 94, to yield about 7.55%, and lire 21,000,000 ($848,000, based on approximate exchange rate on day of offering), Crespi Cotton Works (Milan, Italy) 1st mtge. 7s, 1956, offered at 100, yielding 7.00%.

The largest single corporate offering of the month was, of course, the $154,000,000 new stock of the American Tel. & Tel. Shareholders of record June 8, when the stock sold ex-rights at 143½, were given the privilege to subscribe to the new stock at par, and payments may extend over a period of eight months from Aug. 2 1926 to April 1 1927. Other important issues on behalf of public utilities were: $40,000,000 New England Tel. & Tel. Co. 1st mtge. 4½s "B," 1961, offered at 94½, yielding about 4.80%; $10,000,000 Indianapolis Power & Light Corp. 1st coll. tr. 6s "A," 1936, placed at 98, to yield about 6.25%; $8,500,000 Northern Ohio Power & Light Co. gen. & ref. mtge. 5½s, 1951, brought out at 92½, to yield about 6.09%; $6,300,000 General Public Utilities Co. 1st mtge. & coll. tr. 6½s "A." 1956, offered at 98, to yield about 6.65%, and $6,000,000 Utica Gas & Electric Co. gen. mtge. 5s "D," 1956, sold at par.

Industrial issues were featured by the following: $15,000,000 Indiana Limestone Co. 1st (closed) mtge. 6s, 1941, offered at 99, to yield about 6.10%, and $5,000,000 of 10-year 7% debs. of the same company, offering of which was made at 99, yielding about 7.12%; $8,250,000 Dodge Bros., Inc., purchase money 5% notes, 1927-29, placed privately at prices ranging from 100 to 98½, yielding 5.00% to 5.50%; $8,000,000 The Kresge Foundation 10-year coll. tr. 6s, 1936, placed at par, and $7,500,000 Pickering Lumber Co. 1st mtge. 6s "A," 1946, offered at par.

Railroad issues worthy of special mention were $7,475,000 The Baltimore & Ohio RR. equip. tr. 4½s "D," 1929-41, offered at prices ranging from 100 to 98.93, and yielding from 4.50% to 4.60%, and $6,000,000 Norfolk & Western Ry. Co. divisional 1st lien gen. mtge. 4s, 1944, sold at 93¾, yielding about 4.50%.

Three foreign Government loans were floated in this country during May for a grand total of $42,000,000. The loans offered were: $35,000,000 United States of Brazil external 6½s, due 1957, offered at 90, to yield about 7.30%; $5,000,000 Province of Styria (Austria) external 7s, 1946, offered at 92½, yielding about 7.75%, and $2,000,000 Free State of Anhalt (Germany) external 7s, 1927-46, offered at prices to yield from 6.00% to 7.60%.

Farm loan issues were again extremely light, three issues being offered during the month for a total of only $3,500,000. The bonds in each case were offered at 103, to yield about 4.62%.

Offerings of various securities during the month which did not represent new financing by the company whose securities were offered and which therefore are not included in our totals, comprised the following: $1,135,000 Boss Manufacturing Co. (Kewanee, Ill.) 7% cum. pref., offered at 99½, yielding 7.04%, and $1,114,200 common stock of the same company, offered at $152½ per share; $2,500,000 Strawbridge & Clothier 7% cum. pref., offered at par ($100); $1,850,000 Bush Terminal Co. 7% cum. deb. stock, offered at 92½, yielding about 7.52%; $1,400,000 North American Light & Power Co. 7% cum. pref., offered at 99, yielding about 7.07%, and $500,000 New Orleans Public Service, Inc., 6% mtge. income bonds "A," 1949, offered at 95½, to yield about 6.65%.

The following is a complete summary of the new financing—corporate, State and city, foreign Government, as well as Farm Loan issues—for May and the five months ending with May. It should be noted that in the case of the corporate offerings we subdivide the figures so as to show the long-term and the short-term issues separately, and we also separate common stock from preferred stock, and likewise show by themselves the Canadian corporate issues, as well as the other foreign corporate flotations.

Henry Ford Finds Credit Dearest Thing We Sell—Looks for Jolt to Bring People Back to Cash Basis.

Henry Ford describes the whole money system as wrong, and in his opinion it "only tends to further encourage the system of credits and indebtedness." Mr. Ford finds that "the thing that is troubling this country most just now is the amount of debt piled up by the credit system and installment plan of buying." The following account of his views is from a Detroit dispatch to the New York "Times" June 19:

Declaring "the American people no longer buy—they are backed into a corner and are 'sold' "—Henry Ford to-day deplored the debts represented by credit system and installment plan buying. "Debt has become a national industry," was one of his phrases in a discussion of general business conditions.

Nevertheless, he believed the debt situation would "provide the jolt" to bring trading back to a cash basis, and in his opinion the world business situation is so sound that even the sudden cancelling of all its debts would not "make a particle of difference."

Views on Business Outlook.

"I am optimistic, because I believe people generally know what is wrong," said Mr. Ford. "The thing that is troubling this country most just now is the amount of debt piled up by the credit system and installment plan of buying. The American people no longer buy. They are backed into a corner and are 'sold'.

"Credit is the dearest thing we sell in this country. Debt has become a national industry. That is bad business for the debtor and bad business for the creditor also. The debtors are paying for a dead horse and the dead horse is in no man's land, for the goods are no longer in the possession of the manufacturer, who sells to the dealer on credit, and the dealer has lost possession of fresh goods, and the buyers do not yet own them.

Expects Return to Cash.

"I believe this debt situation will provide thej olt which will bring people back to a cash basis, where they already know they should be.

"The Ford business, as far as it affects the Ford Motor Co., has always been on a cash basis. The result is that millions of cars have been sold at a minimum of risk to the makers and dealers and a minimum of outlay to the buyers. We propose to stick to that policy, which is the only sound policy for any business.

"As to general business conditions, the world is so sound, in my judgment, that it would not make a particle of difference to industry if all the debts in the world were suddenly cancelled. For example, the United States would not feel any serious loss if it were to cancel all foreign debts. The only reason it cannot do it is that the effect on the debtors would be bad. They would probably plunge into deeper debt as the result of such a process. The same would be true of individuals. Treat any man on the basis of charity and you not only hurt his attitude toward life but you lose him as a friend.

"What the real purchasing power of the people is, whether greate r less than formerly, I do not know, nor do I think any one can say until the people get out of debt. The whole money system is wrong, in my opinion, and only tends to further encourage the system of credits and indebtedness. To dig some kind of metal out of the ground and make that the measure of the world's wealth and buying power seems to me a ridiculous proposition.

"The brokers of the country can't see that, of course, for they are parasites thriving on the present system. and they wi lcontinue it as long as they can. You can't argue with a parasite."

No Faith in Haugen Bill.

Mr. Ford does not believe that adoption of the Haugen bill would aid farmers in the long run.

"I do not believe intelligent farmers are for the bill anyhow," he said. "What they need are improved methods of labor and marketing, and to learn to make economic use of any surplus. It is possible to turn surplus corn, grains and potatoes into alcohol, to be converted into power. There is an enormous waste on farms that is needless. There is hardly any product of the soil which cannot be turned into some sort of economic use."

He remarked that he had little interest in variations in the stock market and would not venture to interpret them.

"The only stock I take any stock in is the stock in the stock room," he said. "I am sure of this, however—the high-water mark in stocks means that some one will soon reach the low-water mark in pocket. The gears of a slot machine are figured out so that in the long run the machine wins. The stock market is like that.

"But general business is all right. Everybody knows what is wrong, but American business never has corrected itself voluntarily—it has always waited until it got the big bump. But there is an optimistic side to that, too. When the big bump comes, they know what to do. They know now, but they won't do it. Do you see any of them trying to reduce the mountain of credit?"

States His Own Policy.

Commenting on his own plans under the conditions he had outlined, Mr. Ford said:

"What the Ford Motor Company will do to increase production and sales is to stick to the policy of cutting prices and improving the porduct. There is no way to cut prices except by increasing accuracy and simplicity of construction. A price cut that reduces quality of material or workmanship is poor management, poor engineering and poor business. When you reduce prices, you must go further and improve quality."

Asked if the development of the automobile might not reach a point of quality of material, accuracy of workmanship and simplicity of design which would be the limit of further improvement in construction, Mr. Ford replied in the negative.

"No, there is nothing permanent in this world except change," he said. "The time will never come when improvements are impossible, and with every improvement there is possible a cut in price. But the improvement comes first, then the price cut."

The Indications of Cotton Acreage in June 1926

In view of the further large decline the past eight months in the market price of cotton—a decline roughly of 5 cents a pound—it is rather surprising to have to record that the planting the present season shows no indications, speaking of the Cotton Belt as a whole, of any reduction in the area devoted to this important staple. Our investigations indicate that the area in cotton is about 60,000 acres larger than the planting at the opening of the season in 1925, bringing the grand total up to an aggregate of 48,158,000 acres, taking as a basis the final figures for 1925 announced by the Department of Agriculture at Washington on May 15 the present year. While the further increase is only fourteen one-hundredths of one per cent, what gives significance to it is the fact, familiar to everyone in the cotton trade, that last year's total acreage was by far the largest on record. It is not out of place, either, to point out that the 1925 figures had to be repeatedly revised upward with the progress of the season. In our acreage report a year ago, issued on June 20 1925, we estimated the total acreage at 45,381,000 acres, an increase over 1924 of 6%, and expressed the opinion that the total was probably above that figure, but we wished to err, if at all, on the side of being too conservative. Even as it was, our estimate was higher than the generality of private estimates and it was criticised on that account. When, however, the report of the Department of Agriculture came on July 2 the total was given as still larger, or 46,448,000 acres, and in the final revision the aggregate was brought up to no less than 48,090,000 acres, the figure we now accept for that season.

While the further increase last year, as it now appears, went far beyond early expectations, the acreage devoted to cotton has been steadily rising in all recent years—and quite in a remarkable degree—so that in that sense there is nothing strange in the further slight addition to acreage the present season, except that it occurs after the market price of cotton has declined another 5 cents a pound. Before proceeding further with our analysis, and to emphasize the point we have just made, we introduce the following table, showing the area planted and the area picked, as reported by the Department of Agriculture in its final estimates for each of the 16 years from 1910 to 1925 inclusive, along with our present estimate for 1926, and giving also the production each year according to the Census ginning returns and the yield of lint cotton per acre based on these ginning returns, when applied to the Department's estimates of the acreage harvested or "picked."

ACREAGE AND PRODUCTION OF COTTON IN UNITED STATES, 1910-1925.

	Acreage		Avg. Yield	Production
Year—	Planted. (Acres)	Picked. (Acres)	per Acre (Pounds)	(Census) 500-lb. bales
1910	33,418,000	32,403,000	170.7	11,608,616
1911	36,681,000	36,045,000	207.7	15,692,701
1912	34,766,000	34,283,000	190.9	13,703,421
1913	37,458,000	37,089,000	182.0	14,156,486
1914	37,406,000	36,832,000	209.2	16,134,930
1915	32,107,000	31,412,000	170.3	11,191,820
1916	36,052,000	34,985,000	156.6	11,449,930
1917	34,925,000	33,841,000	159.7	11,302,375
1918	37,217,000	36,008,000	159.6	12,040,532
1919	35,133,000	33,566,000	161.5	11,420,763
1920	37,043,000	35,878,000	178.4	13,439,603
1921	31,678,000	30,509,000	124.5	7,953,641
1922	34,016,000	33,036,000	141.5	9,762,069
1923	38,709,000	37,420,000	130.6	10,139,671
1924	42,641,000	41,360,000	157.4	13,627,936
1925	48,090,000	46,053,000	167.2	16,085,905
1926	48,158,000	?	?	?

The record here is a remarkable one. As against 31,678,000 acres planted in 1921 the area devoted to cotton in 1925 was 48,090,000 acres, and now is estimated by us for 1926 at 48,158,000 acres. The addition in the brief space of five years has been more than 50%. Of course, in comparing with 1921 we are comparing with a year when the acreage was sharply reduced as a result of a concerted effort on the part of the planters, who wished thereby to bring about a recovery in price, which at that time had dropped to inordinately low levels—far below the prices prevailing the present year even after the recent big decline. In their efforts to raise prices at that time, Southern farmers succeeded beyond their fondest expectations, general crop disaster having come along with the big reduction in acreage, with the result that the 1921 crop proved the smallest in over a quarter of a century. But even if we compare with the area in cotton in 1920, namely 37,043,000 acres, before the big drop in 1921, when the acreage was close to the largest in the history of the country, we find an increase since then of over 11,000,000 acres, or an addition of fully 30%. Obviously, if cotton raisers in Egypt or India, the two largest cotton producing countries in the world next to the United States, imagine that our South is going out of the business of producing cotton, or going to be forced out, by reason of the depredations of the boll weevil or the other mishaps which the cotton farmers have encountered in recent years, such a record as is here disclosed ought to undeceive them on that point.

The five-cent drop in price which has come since last September has followed as the natural sequence

of the great increase in acreage and last year's big crop, which was next to the largest on record, and the probability, in fact almost certainty, of an equally large acreage the present season, which our investigation now confirms. And here it should not be forgotten that the lower level of values—not the extraordinary low figures prevailing in 1921—has certain compensating advantages which it would be a mistake to ignore. The collapse of cotton values in 1921 was followed by an upward reaction to extremely high prices owing to the crop disaster which came that year. These high prices had the effect of stimulating cotton production all over the world, a movement which was aided by the growing desire on the part of British cotton manufacturers not to be so overwhelmingly dependent upon America for cotton supplies as in the past.

The efforts to extend cotton culture in other parts of the world will certainly be lessened now that it has become apparent that ample supplies are again to be available in the United States at normal levels of value. Experience shows that outside supplies increase only when prices rule very high, and this applies to India and Egypt as well as to the smaller contributors. At normal levels of values—and this does not necessarily mean a return, as already stated, to the prices prevailing prior to 1914—it is exceedingly difficult for other cotton producing countries to compete with the United States. The chances are that shipments from India and Egypt will fall off even the coming season, creating to that extent a void for cotton from this country to fill. Besides this, lower prices are a stimulus to larger consumption, and at present prices the world is certain to use a great deal more cotton than at the prices prevailing last year or the year before. Substitutes have been supplanting cotton in recent years. Now the indications are that cotton is once more coming into its own. The Southern planter should not allow himself to be disturbed by suggestions that should there be another crop of the size of the last one, all value to cotton may disappear. In the way already indicated, and especially through an enlarged demand for and consumption of the staple, the equilibrium is certain to be restored without the slightest approach to disaster—barring, of course, any such contingency as happened in 1914, when the sudden outbreak of the World War cut the United States off from the markets of the world. It is yet to be proved that too much cotton can be produced for the needs of the world.

Based on mere extent of acreage, which, however, it should be remembered, is only one factor in the problem, the indications certainly point to another large crop. And this conclusion is strongly emphasized if we bear in mind that though in the aggregate 48,090,000 acres of land were brought under cultivation at the beginning of the season in 1925, only 46,053,000 remained to be picked at the end of the season, the abandonment having been unusually large, reaching over 2,000,000 acres—far in excess of that, in quantity, in any other recent year and probably the very largest in the annals of cotton production. There seems at this stage of the season little probability of a similar large abandonment the present year—leaving out of the calculation, of course, future weather conditions of a catastrophic kind. This view finds strong support in the circumstance that three-fourths of the entire 2,000,000 acres abandoned in 1925, or 1,531,000 acres, is found in the State of Texas. The probability of the repetition of any such extreme loss in that State the current year is extremely remote—so remote, indeed, that it may be left altogether out of the reckoning in the ordinary course of events. The reason why such a vast area had to be given up in 1925 is, of course, well known. It was the result of a prolonged drought of a disastrous kind. The present year there is in that State a complete absence of drought conditions. On the contrary, there is adequate and abundant moisture virtually throughout the whole State. Especially is there saturation of the subsoil, there having been good rains all through the season, up to date, easy for the cotton plant with its long tap root to reach and fortifying the plant against much damage in the event of exceedingly dry weather later in the season. It should not be forgotten that the experience last year of Texas, which is more than ordinarily subject to drought, was quite unusual. The drought was not broken by general rains until September 1925, after having lasted fully eleven months, and early killing frosts in the northern portion of the State, near the close of October, prevented the maturity of late planted cotton in numerous areas in that portion of the State.

According to the present outlook, taking the Cotton Belt as a whole, the chances are that abandonment of acreage in 1926 will be less than the average, rather than approach anywhere near that of 1925. This is so, not only because of the changed situation in Texas, where the area is 40% of that of the entire Belt, but because in other parts of the Belt none of the conditions have been present this spring which so often in the past have served to lead to considerable abandonment of area. We have reference to the absence of floods and of overflows of the rivers and streams resulting from excessive rains or freshets. There was nothing of the kind last year, but it was an important factor in all the years immediately preceding, the water in the inundated sections having failed to subside until it was too late to permit planting. In 1924 wet weather was experienced everywhere, and proved a serious mishap, while in 1923 and 1922 the situation in that particular was even more disturbing. In our acreage report issued in 1922 we said that the weather had been everywhere adverse and to a degree and extent to which it would be hard to find a parallel. In ordinary circumstances there would be drought in one section, excessive rainfall in another, and perhaps entirely normal conditions in still another. Not so at that time. From one end of the Belt to the other, and all over it, almost without exception, there had been too much rain, either early in the season, or in May, or for the whole of the year right up to June, with the usual train of attendant circumstances, namely floods and washouts, which not only seriously interfered with farm work, but in not a few instances rendered such work out of the question. These were the difficulties under which the cotton grower labored in 1922 and it was also typical of the trials and hardships that fell to his lot in 1923, only in greatly aggravated form, barring, however, the big State of Texas, which was blessed in 1923 with a crop situation that left little to be desired.

As already stated, none of these drawbacks and handicaps existed in 1925 and the Southern planter has enjoyed similar exemption the present year. As to the probability that the cotton grower may have to abandon acreage on account of drought, that is a development that depends on future meteorological conditions, but the visitation of exceedingly dry weather in the summer ordinarily proves severely destructive only when sumer drought succeeds spring drought and the present time drought is a serious feature only in north Georgia and parts of North Carolina and South Carolina.

But if there is small probability of any extensive abandonment of acreage, the same as happened from one cause or another in the years immediately preceding, and especially in 1925, it still remains true, as already stated, that the extent of the area planted is, after all, only one element bearing upon the probable size of the crop. The crop the present year starts at least under one serious disadvantage, a disability the importance of which it remains for the future to determine. It is everywhere from one to three weeks late, though least late in the big State of Texas with its huge cotton area. This may or may not prove a serious matter as the season progresses, but it cannot by any means be ignored. Should the cotton planter experience good growing weather henceforth lost time would be quickly made up. Substantial progress in that direction has already been made under the influence of the favorable weather enjoyed during the current month of June. The crop was a late one in all the years immediately preceding 1925, as already pointed out, but it was extremely early last year and that, as it happened, proved the year with the biggest crop. In other words, in respect to maturity the situation of the crop this year at the present stage of the season is in sharp contrast with the situation that existed in that regard twelve months ago. In commenting on the outlook in our acreage report for June 1925, we pointed out that the happy conjunction existed of a big acreage and a favorable start for the new crop—a combination of favorable circumstances which had not prevailed for some years past. It has already been made plain in our remarks that no such exceptional conjunction of favorable events is being enjoyed the present season.

However, the early start in 1925, combined with the large acreage, was not the only factor in that year's big cotton production. In addition there was the further advantage, perhaps even more important than the early start, of a

long open season extremely favorable for the maturity and picking of cotton, and for the first time in some years a substantial top crop was raised in many different parts of the South, which last accounted as more than an offset to the lessened production in Texas. Whether there are to be the same favoring conditions the present year, with similar immunity from boll weevil damage on an extensive scale, only the event can determine. On the other hand, in considering these uncertainties bearing on the future, the fact should not be overlooked that by reason of the disappointing results in Texas, and in Oklahoma as well, and from much the same cause, the yield of lint cotton per acre last year for the South as a whole, while showing further improvement over the extremely poor yield two years before, was nevertheless only 167.2 lbs., as against 178.4 in 1920 and no less than 209.2 acres in 1914, when the crop was a trifle larger even than that of 1925, being 16,134,930 bales, against 16,085,905 bales, the area picked in 1914 having been only 36,832,000 acres, against 46,063,000 acres in 1925. Should future weather conditions this year admit of the attaining an average yield per acre approaching anywhere near the 1914 product per acre, the crop would mount to gigantic size, not only equaling the large crop of 1925, but running far in excess of it. But this is mere speculation as to the possible outcome. The fact remains, nevertheless, that the tendency has been towards steady improvement in the product per acre ever since the low point of 1923, due, no doubt, to the subduing of that ravenous pest, the boll weevil.

This review, as in all previous years, deals entirely with the extent of the acreage, and does not undertake to show the present condition of the crop as expressed in percentages of the normal. And yet any statement of the acreage would be meaningless and valueless that did not attempt to indicate whether the crop, in point of maturity, is early or late, or failed to disclose the attendant circumstances bearing upon the possible or the probable outcome. We have already shown that the crop is decidedly late, in sharp contrast with that of last year in that respect, and that other advantages accrued in 1925 as the season progressed. On the point whether the same advantages are to accrue the present season, thus offsetting to that extent the handicap of a late start, one man's guess is as good as another's, and we venture no prediction. Aside from the late start, however, it may be affirmed very positively that the outlook at this date is eminently satisfactory. The delay in maturity, common to the whole Cotton Belt, is due also to a common cause, namely the cold weather and, in particular, the extremely cold nights. Temperatures have been inordinately low, and far under the average virtually everywhere. This retarded germination of the seed, and in not a few cases absolutely prevented germination at all, making replanting necessary to a larger extent than usual, though not universally so. The remark applies both to the Southwest, in States like Texas and Oklahoma, where the rainfall in 1926 has been heavier than usual, though not necessarily excessive, and also to the dry sections along the Atlantic Coast. In the one case it has been too wet and too cold and in the other case it has been too dry and too cold. In between the two extremes there is a large area where conditions have been about normal, and yet where the spring has been much too cold. Since the advent of June, conditions have been almost ideal, almost all over the South, and as a result of good growing weather much lost ground has been recovered, though perhaps it is still a little too cool in the coast sections of North and South Carolina.

It cannot be said that any substantial harm has been done by the repeated heavy rainfalls in Texas and some other parts of the Southwest, and as a matter of fact Texas has recently been in enjoyment of high temperatures, just the kind of weather needed to bring a heavy fruitage in cotton at a time when the subsoil is abundantly saturated with moisture. In the sections where drought has prevailed, principally North and South Carolina and northern Georgia, relief has not been absolutely complete, but fairly generous rains since the latter part of May have completely altered the aspect and made the outlook normal over the greater part even of these sections, leaving, nevertheless, a limited area where drought is still a matter of complaint. In portions of North Carolina the drought has been altogether beyond precedent. At Raleigh and many other stations it has been the longest on record for this time of the rear, according to the meteorologist of the United States Weather Bureau at that point. But during June beneficial rains have brought relief; and most of the eastern part of the State and portions of the northern part have had relief, and only some interior sections would still seem to be lacking moisture. In South Carolina the drought has been pronounced mainly in the northern and northwestern portions of the State. And here limited areas are yet in need of relief. The same is true of north Georgia, the only portion of that State which had to contend with an absence of needed rain; some districts are still badly in need of moisture, but the area affected is not large. Outside of the limited territory we have here outlined, the situation is generally satisfactory and full of promise. The fields nearly everywhere are clean and free from grass and weeds—more generally so, taking the Cotton Belt as a whole, than we can recall has ever been the case in the past. In the districts where drought has been encountered the absence of moisture has, of course, prevented the growth of grass, but elsewhere also our accounts speak of the fields being in a high state of cultivation.

These are all favoring circumstances—some of them extremely so. But in the end everything will depend upon the weather in July and August, which are the really trying months for the cotton plant, and the fact that the crop is so generally late may have an important bearing upon the influence to be exerted by adverse weather during those months, should it unfortunately eventuate. As indicating the part that the character of the weather may play in affecting the outcome, we cannot do better than to cite the notation made by one of our correspondents in Hale County, Texas, who is engaged in cotton raising on a large scale. After pointing out that while the county in 1924, when conditions were average, produced 30,000 bales of cotton and in 1925, when they were bad, produced only 19,500 bales, he expresses the opinion that the 1926 crop will be about 19,000 bales with unfavorable conditions ahead, 30,000 bales with average conditions ahead, and 41,000 bales with excellent conditions ahead.

What harm the boll weevil may do is, of course, problematical, though present indications are that their activities will be no greater than they were last season, when they were less than for many years past. None of our correspondents complain of the presence of the weevil, which is different from the past. In part this may be due to the fact that it is impossible to say anything definite about them, especially as the crop is late, but unquestionably also it may be ascribed to the fact that fear of possible damage in that way seems to be gradually growing less. Dry weather, of course, is unfavorable to them, and last season the weather was dry nearly everywhere. The present season the heavy rains in Texas might give them renewed vitality, but as a matter of fact complaints from that State are even more scarce than in other States, possibly because the drought of last season disposed of most of them. But while last year's drought was without doubt the principal factor in the lessened activities of the weevil, the fact that cotton growers have come to learn how to deal with them and have applied poisons more freely has contributed to the same end. This is especially true in the case of States in the northern tier of the Cotton Belt like North Carolina, South Carolina, Georgia and Mississippi, where their depredations became extensive and serious only within recent years. It seems pertinent to ask whether it may not be possible before long to dismiss them altogether as a serious influence threatening the destruction of the crop. They originated in Mexico, crossed the Rio Grande and then moved in swarms up through Louisiana, Mississippi, Georgia, South Carolina and finally North Carolina, the extreme northern limit. May that not mark the culmination of the movement, and their decline now follow, much in the same way that the grasshopper plague which a generation ago worked such havoc in the grain-raising States west of the Mississippi for successive seasons and threatened the complete ruin of the farmer, has long since completely disappeared and become a thing of the past?

Going now into the details of our acreage figures, the remark already made with reference to the acreage as a whole applies almost without exception to all the leading parts of the Cotton Belt and all the different sections. Nowhere is there the slightest trace of a general tendency to diminish acreage, or even a very narrow and partial attempt to cut down the area devoted to cotton. On the contrary, in several States there have been substantial additions to acreage. In Georgia and Alabama the acreage is unquestionably larger and based on our returns we make the increase 8% for each State. In Mississippi, Louisiana

and North Carolina the increase is small and ranges from 1 to 2%. In the other States, excepting alone Texas and Oklahoma, the acreage is about the same as last year. In Texas and Oklahoma the tendency to restrict the cotton area is as completely absent as in other parts of the South, but one special circumstance applicable to both States has caused a slight falling off in those two States. We make the decrease for Texas 2% and for Oklahoma 5%. We have strong doubts whether any decrease at all has occurred in Texas, in view of the large areas of new land that are constantly being brought under cultivation in that State. However, the Texas Commissioner of Agriculture in a report issued under date of June 2 put the 1926 acreage of the State at 98% of that planted in 1925, a reduction of 2%, and we accept this estimate to be on the safe side, though the Texas Commissioner is very prone to put the area too low. We might add here parenthetically as an indication of the outlook for the crop in that State that the Commissioner, while reporting the acreage 2% smaller than a year ago, puts the condition at 79%, which compares with 67%, the condition given in his report for the corresponding date in 1925. During the current month of June the condition must have further improved.

The special circumstance to which we refer as having been responsible for the elimination of some cotton area the present season, is the fact that last year the winter wheat crop proved almost a complete failure in Texas and in lesser degree also in Oklahoma, and the abandoned acreage was then plowed over and put in cotton. There has been no repetition of that experience the present year. Both States are this time blessed with exceptionally large wheat crops with abandoned acreage down to a minimum. The U. S. Department of Agriculture in its grain crop report issued May 8 last year reported that in Texas no less than 62% of the winter wheat area planted the previous autumn had been abandoned, leaving only 692,000 acres in that State to be harvested. The present year the story with reference to the wheat crop of Texas is that only 2% of the area sown to wheat had to be abandoned, leaving 1,744,000 acres to be harvested. In Oklahoma this year's abandonment of wheat acreage is only 1%, leaving 4,500,000 acres to be harvested; in 1925 the abandonment of wheat area was 17%, leaving only 3,037,000 acres to be harvested.

Without further comment we now present our estimate or approximation of the planting in the different States and for the country as a whole. In giving the figures, we wish to reiterate what we have said in previous years, namely that we make no pretense to exactness, that there are always many uncertainties involved in the collection and compilation of the returns and that precautions against imperfections and deficiencies, based on long experience, often prove futile; furthermore, that the present year, no less so than in preceding years—in fact even more so, as explained at length above—special factors have operated to increase the uncertainties and to augment the difficulty of the undertaking. In the circumstances our figures and statements cannot be considered anything more than estimates and approximations—approximations, to be sure, as close as it is possible to make them by calling to our aid every source of information at command, but subject, nevertheless, to greater or smaller modification as the uncertainties referred to are resolved into actual facts, thereby removing the elements of conjecture and doubt.

STATES—	*Acreage Planted, 1925— Dept. of Agriculture.*	*Estimate for 1926— Increase or Decrease.*	*Probable Acreage 1926.*
Virginia	101,000	Unchanged	101,000
North Carolina	2,037,000	Increase 1%	2,057,000
South Carolina	2,708,000	Unchanged	2,708,000
Georgia	3,662,000	Increase 8%	3,955,000
Florida	103,000	Unchanged	103,000
Alabama	3,539,000	Increase 8%	3,822,000
Mississippi	3,501,000	Increase 2%	3,571,000
Louisiana	1,903,000	Increase 2%	1,941,000
Texas	19,139,000	Decrease 2%	18,756,000
Arkansas	3,814,000	Unchanged	3,814,000
Tennessee	1,191,000	Unchanged	1,191,000
Missouri	542,000	Increase 3%	558,000
Oklahoma	5,320,000	Decrease 5%	5,045,000
California	a171,000	Unchanged	171,000
Arizona	162,000	Increase 2%	165,000
New Mexico	138,000	Increase 2%	141,000
All other	59,000	Unchanged	59,000
Total	48,090,000	Increase 0.14%	48,158,000

a Does not include 150,000 acres planted in Lower California (Old Mexico).

It seems proper to say that in applying our percentages of increase or decrease in the foregoing we have again followed the practice of using the latest revised figures of acreage for the previous season as put out by the Department of Agriculture at Washington. As explained by us in previous Reviews, there seems no reason why these revised figures of the Agricultural Department should not be regarded as absolutely correct, considering the pains taken to make them so, and it is our understanding, furthermore, that the Department always acts in collaboration with the Census authorities.

As we have referred above to the big further decline in the market prices of the staple, as having been without influence in curtailing the area sown to cotton, it seems desirable to print figures showing the exact extent of the decline in market values. We give first the price of middling upland spot cotton on the New York Cotton Exchange for each month for a long series of years back as follows:

PRICE OF MIDDLING UPLAND COTTON IN NEW YORK ON DATES GIVEN AND AVERAGE FOR SEASON.

	1925-1926.	1924-1925.	1923-1924.	1922-1923.	1921-1922.	1920-1921.	1919-1920.	1918-1919.	1917-1918.	1916-1917.	1915-1916.	1914-1915.
Aug. 1	24.65	30.95	23.65	22.55	12.90	40.00	35.70	29.70	25.65	13.25	9.30	12.50
Sept. 1	22.35	25.65	25.95	22.25	17.50	30.25	32.05	36.50	23.30	16.30	9.75	----
Oct. 1	23.55	25.90	29.50	20.45	21.10	25.00	32.25	34.30	25.25	16.00	11.09	----
Nov. 1	19.90	23.60	31.25	24.45	18.75	22.50	38.65	29.05	28.75	18.75	11.95	----
Dec. 1	20.75	23.15	37.65	25.30	17.55	16.65	39.75	28.10	30.90	20.35	12.55	7.65
Jan. 1	20.85	24.20	35.40	26.45	18.65	14.75	39.25	32.60	31.75	17.25	12.40	7.80
Feb. 1	20.75	24.50	34.00	27.40	17.20	14.15	39.00	26.75	31.20	14.75	11.95	8.50
Mar. 1	19.45	26.05	28.25	30.40	18.70	11.65	40.25	26.10	32.70	17.00	11.45	8.25
April 1	19.35	24.90	28.50	28.55	18.10	12.00	41.75	28.60	34.95	19.20	12.00	9.80
May 1	18.95	24.40	30.30	27.50	18.95	12.90	41.25	29.40	28.70	20.70	12.30	10.40
June 1	18.85	23.65	32.75	27.55	21.00	12.90	40.00	33.15	29.00	22.65	12.70	9.55
July 1	----	24.70	30.90	27.85	22.05	12.00	39.25	34.15	31.90	27.25	12.90	9.60
Average, season	----	25.14	31.11	26.30	18.92	17.89	38.25	31.04	29.65	19.12	11.98	8.97

It will be observed that the quotation on May 1 the present year was only 18.95c., and on June 1 only 18.85c., against 24.40c. and 23.65c., respectively in 1925 and 30.30c. and 32.75c. in 1924, but that the price, even after this decline, rules very much higher than at the period of the great depression in 1921, when the quotation was only 12.90c. on both May 1 and June 1. The story is the same when we take the average price on the farm as our criterion, only the contrast in that case is more vivid and more striking. In the following we show the farm price for each month of every year back to the beginning of the season of 1914. These farm prices, it should be stated, are those of the Agricultural Department at Washington and as to the methods employed in arriving at the averages, the Department explains that the prices are "averages of reports of county crop reporters, weighted according to relative importance of county and State."

AVERAGE PRICE OF COTTON ON THE FARM.

	1925-1926.	1924-1925.	1923-1924.	1922-1923.	1921-1922.	1920-1921.	1919-1920.	1918-1919.	1917-1918.	1916-1917.	1915-1916.	1914-1915.
Aug. 15	23.4	27.8	23.8	20.9	11.2	34.0	31.4	30.0	23.8	13.6	8.3	10.4
Sept. 15	22.5	22.2	25.6	20.6	16.2	28.3	30.8	32.0	23.4	15.0	9.8	8.2
Oct. 15	21.5	23.1	28.0	21.2	18.8	22.4	33.9	30.6	25.3	16.8	11.4	7.0
Nov. 15	18.1	22.6	29.9	23.1	17.0	16.6	36.0	28.4	27.5	18.8	11.4	6.6
Dec. 15	17.4	22.0	32.1	24.2	16.2	12.7	35.8	28.2	28.3	18.4	11.4	6.7
Jan. 15	17.2	22.7	32.5	25.2	15.9	11.6	36.0	26.8	29.3	17.0	11.4	7.0
Feb. 15	17.7	23.0	31.4	26.8	15.7	11.0	36.2	24.4	30.0	16.4	11.3	7.4
Mar. 15	16.5	24.5	27.7	28.0	16.0	9.8	36.8	24.2	31.0	17.0	11.3	7.8
April 15	16.6	23.7	28.7	27.6	16.0	9.4	37.5	25.2	30.2	18.4	11.5	8.6
May 15	----	23.0	28.1	26.2	17.3	9.6	37.4	27.8	28.0	19.6	11.8	8.8
June 15	----	23.0	27.8	25.9	19.6	9.7	37.3	30.3	28.0	22.4	12.4	8.6
July 15	----	23.4	27.3	24.9	20.6	9.7	37.1	31.8	28.2	24.5	12.6	8.4

In this case it is not possible to bring the prices down to quite as late a date, but on April 15 this year the average farm price was only 16.6c., and May 15 ____c., against 23.7c. on April 15 1924 and 23.0c. on May 15, and 28.7c. and 28.1c., respectively in 1924, but comparing with only 9.4 and 9.6 at the period of extreme depression in 1921.

It only remains to add that the present season the crop will have about the same aid to full yield from the use of commercial fertilizers as was the case last year. The practice of applying fertilizing material to increase the fertility of the soil has been growing rapidly of late, but the figures the present year show no increase in the total quantity consumed, though in six of the eleven reporting States the amounts for the present season are slightly larger than last year. For our figures we are again indebted to the kindness of S. D. Crenshaw of the Virginia-Carolina Chemical Corporation. They show the quantity of fertilizers consumed, as indicated by the tax tag sales reported by the Commissioners of Agriculture of the different States, for the six months ending May 31 1926, in comparison with the corresponding six months of the preceding season. In the case of Florida, Louisiana, South Carolina, Texas and Vir-

ginia the figures include cotton seed meal used as a fertilizer. The details are as follows:

FERTILIZER SALES IN SOUTHERN STATES.

	Dec. 1 1925 to May 31 1926.	*Dec. 1 1924 to May 31 1925.*
Alabama	619,959	584,250
Arkansas	124,975	123,305
Florida*	231,574	242,448
Georgia	712,582	772,139
Louisiana*	101,895	98,505
Mississippi	275,320	252,728
North Carolina	1,147,889	1,166,734
South Carolina*	818,814	842,426
Tennessee	123,550	113,067
Texas*	118,059	97,283
Virginia*	331,486	347,236
Totals	4,606,103	4,640,121

*Cottonseed meal used as a fertilizer included.

It will be seen from the foregoing that the aggregate of the fertilizer sales in 1926 has been 4,606,103 tons, as against 4,640,121 tons in 1925, and that the changes for the different States between the two years is relatively small, five of the States showing decreases and six increases, as already stated. It will, of course, be understood that not by any means all of the fertilizer tonnage here shown is for application to cotton alone. In such States as Virginia and Florida the consumption of fertilizer for cotton is small in comparison with the consumption for other crops, on a percentage basis. Much fertilizer is used on tobacco in Virginia, South Carolina and Georgia and on truck crops in the same States along with North Carolina and on corn in almost all States and also, of course, on other crops, more or less. There is no way of differentiating the amount used on cotton alone, though much the largest proportion, it is believed, was used on that crop in strictly cotton growing States.

We now present in detail our summaries for the different States:

VIRGINIA.—This is one of the smaller cotton producing States and its yearly contribution to the cotton crop of the United States is relatively unimportant. It lies in the extreme northern fringe of the Cotton Belt. Yet in a small way the acreage is steadily increasing, and under favorable conditions the product per acre is high, even if the aggregate yield is not large. The United States Department of Agriculture in its final report for 1925, issued on May 15 (1926) made the area in cultivation last year at the beginning of the season 101,000 acres and the area remaining to be picked at the end of the season 100,000 acres. Applying to this the ginnings reported to the United States Census the yield was found to be 250 lbs. per acre, and the total crop of the State 52,380 bales of 500 lbs. gross. It will be seen this was an average of half a bale an acre, which is a high rate, equalled or exceeded only in States where intensive methods of cotton cultivation are pursued. Weather conditions, however, play an important part as affecting the final outcome. This is evident from the fact that in the previous season (1924) the yield was only 180 lbs. of lint cotton per acre and the entire crop of the State no more than 38,746 bales of 500 lbs. gross, though the area then picked was slightly larger than in 1925, being 102,000 acres. It is also evident, on the other hand, from the fact that in 1923, when the area picked was no more than 74,000 acres, the crop of the State was 50,581 bales, or almost as large as the 1925 crop of 52,380 bales, notwithstanding the 1925 acreage, as already shown, was over one-third larger than that of 1923, being 100,000 acres. The difference is accounted for by the fact that the yield per acre in 1923 was as high as 325 lbs., as against 250 lbs. in 1925. This is important as showing that while the yield in 1925 was good as compared with that obtained in most other States and far above Virginia's extremely poor yield of 1924, it fell considerably below the State's previous best record. Still, a production of 50,000 bales, more or less, obviously cuts a small figure in a total crop for the whole country of 16,000,000 bales and for that reason it is not worth while devoting much space to comments on the present season's acreage and outlook in that State. As elsewhere in most of the Atlantic tier of States, weather conditions in Virginia the present season up to date have not been what could be desired and considerably less satisfactory than in 1925. Temperatures have been altogether too low, with the nights cold, though a change for the better has occurred since June 1. It has also been too dry, in which respect the situation has not been greatly relieved until within the last two weeks. Planting began about May 1 and extended to June 1. The seed came up poorly, the cold and dry weather having delayed germination. *Acreage* estimates in a State of such limited area in cotton are difficult, since the action of a few individual planters in cutting down or enlarging their land devoted to cotton, is likely very materially to affect the total. From the general tenor of our advices, we should judge that the State's acreage in cotton would be about the same as in 1925 and possibly a little larger, though a few of our returns speak of the probability of a "slight" decrease. *Stands* are reported as only fair. On the other hand, fields appear to be clear of weeds and grass. The season is about ten days late. Cotton lands in Virginia are fertilized to a high degree, but our correspondents seem to think that slightly less commercial *fertilizer* has been applied the present season. This view finds apparent confirmation in the tax tag sales returns of the Commissioner of Agriculture, which show 323,130 tons of fertilizer sold in the five months from Jan. 1 to May 31 in 1926, as against 342,386 tons in the same five months of 1925 and 339,193 tons in the corresponding five months of 1924, though, of course, these figures are pertinent only as showing the *trend* in the use of fertilizer since the bulk of the whole was doubtless for account of truck farmers and others, with only a relatively slight portion consumed on cotton plantations. There has been little change in the use of home-made manures.

VIRGINIA.	*Area in Cultivation.*	*Area Picked.*	*Yield of Lint Cotton per Acre.*	*Production, 500-lb. Gross Bales.*
Crop Year—	*Acres.*	*Acres.*	*Pounds.*	*Bales.*
1925	101,000	100,000	250	52,380
1924	107,000	102,000	180	38,746
1923	74,000	74,000	325	50,581

1914	45,000	45,000	265	25,222

NORTH CAROLINA.—This State has an enviable record. According to the Census ginning returns it raised a crop of cotton in 1925 of 1,101,090 bales of 500 lbs. gross, the largest in its history. This was on an area of 2,037,000 bales under cultivation and 2,017,000 bales picked, giving a yield of 261 lbs. of lint cotton per acre, or in excess of half a bale an acre. No such exceptional crop seemed in prospect at the beginning of the season, though the start was under much more favorable conditions than in 1924, and yet was far from ideal. It happened, too, that during the early summer months the crop did not progress as could be desired, but appeared to be retrograding. It is well to bear that circumstance in mind the present year when the crop at this stage is unquestionably in a backward condition. Prognostications in the early summer of 1925 were unfavorably colored by recollection of the experience which planters had just gone through with the crop of 1924, when the production fell to 825,324 bales, on an area also somewhat above 2,000,000 acres, being only 196 lbs. per acre, following a yield of no less than 290 lbs. per acre in 1923, or a total production of 1,020,139 bales in that year on an acreage of but 1,679,000 acres. Fertilizers have always played an important part in the North Carolina crop, but the experience of 1924 showed that fertilizers alone are not sufficient to insure a crop of exceptional proportions, lacking favorable weather conditions and with the crop handicapped as it was in 1924 by a late start and with the boll weevil active and inflicting more than the usual damage. What added so greatly to the size of the crop in 1925, increasing it far beyond early expectation, was that weather conditions were extremely favorable in the autumn, allowing the maturing of a top crop of more than the ordinary proportions and further—and what was perhaps of even greater importance—that comparatively little damage was inflicted by the boll weevil. The diminution of the activities of the weevil had a two-fold cause, namely, the fact that dry weather, which was so pronounced a feature during the summer of 1925 in all but the Coastal Plain and the lower Piedmont Section, was unfavorable to their operations, and secondly, that planters had learned how to deal with the evil. The previous season their invasion was largely a new development and planters had not yet become familiar with the application of poisons and other methods for cutting short their depredations. It would seem that the present season the same advantages will exist, and that is a circumstance not to be treated lightly in estimating future probabilities. The distinctive features in the situation of the crop in North Carolina at this date is the prolonged drought which the State has suffered. In severity this drought is quite beyond

parallel. But obviously there is nothing to prevent the needed relief should adequate rains come in July or August, which are the really trying months for the cotton plant, and as a matter of fact, a large measure of relief has already been experienced through showers since the beginning of June.

The meteorologist of the United States Weather Bureau in his weekly return on May 26 stated that "the drought is now the longest on record at Raleigh and many other stations for this time of the year in a period covering 40 years or more." This, of course, is a circumstance to be reckoned with unless future rains shall happen to change it, for obviously a full crop can never be raised without sufficient moisture, and the plants would burn up if there were no moisture at all. In the return of the meteorologist of the same date, however, it was stated that rain had improved crops along the coast and for two or three counties inland, though elsewhere, except in some small areas, the lack of sufficient rainfall had greatly retarded germination of seed and the general crop situation was such that rain was urgently needed over a large portion of the State, and especially in the central district. In the report for the week ending June 1 it was stated that there had been further light scattered showers over the State during that week, though temperatures on May 29 and May 30 had been about as low, or slightly lower, than previous records for that time of the year at a number of stations in the eastern portions of the State. This last discloses another particular in which conditions have been unfavorable the present year—that is the low temperatures and cool weather. The weather reports during June, as already stated, have been much more favorable, beneficial rains having fallen in the eastern part of the State and portions of the northern part, though some interior sections were still complaining of the lack of moisture. Latterly, also, temperatures have been rising and the crop as a whole has been regaining lost ground. Planting in this State the present season began about April 20 and finished about May 25. Germination was delayed, not only in the dry areas, but also by hard or "baked" crust of soil in some portions in the southwestern part of the State, where heavy rain occurred in the middle of May. For the State as a whole, however, replanting does not seem to have been necessary to an unusual extent, say only about 10 to 15%. All our reports agree in asserting that the fields are clear of weeds and grass. *Stands* were rather poor or only medium until quite lately, when a change for the better occurred. The crop is 10 to 15 days late. *Acreage.* We can discover no tendency to decrease acreage in this State. Only two of our returns speak of a possible decrease, the great majority reporting the acreage the same as last year. Some, however, say an increase has occurred, and we accordingly credit the State as a whole with an addition of 1%. *Fertilizers* are very extensively used in this State, as already noted, and are an essential factor in the large product per acre obtained. This makes it important to note that many of our correspondents, though by no means all, express the opinion that the use of commercial fertilizers has apparently diminished the present year. One return says much less soda has been applied, it being too dry to put it out. For the State as a whole and for all purposes sales of fertilizers in the six months from Dec. 1 1925 to June 1 1926 reached 1,147,889 tons, as against 1,166,734 tons in the corresponding period of the previous season, North Carolina consuming more commercial fertilizers than any other State in the South. Home-made manures appear to have been used in larger amounts in a few instances, though the general practice of farmers seems to be to use the manure in truck farming, which is carried on in a very extensive way in North Carolina, and in the garden. It is too early for making definite statements regarding the boll weevil, but, as far as surface indications go, they do not seem likely to cause any greater destruction than in 1925, when their activities, as set out above, were at a minimum.

NORTH CAROLINA.	*Area in Cultivation.*	*Area Picked.*	*Yield of Lint Cotton per Acre.*	*Production, 500-lb. Gross Bales.*
Crop Year—	*Acres.*	*Acres.*	*Pounds.*	*Bales.*
1925	2,037,000	2,017,000	261	1,101,090
1924	2,099,000	2,005,000	198	825,324
1923	1,687,000	1,579,000	290	1,020,159
1922	1,654,000	1,625,000	250	851,837
1921	1,417,000	1,403,000	264	776,222
1920	1,603,000	1,587,000	275	924,761
1919	1,525,000	1,490,000	266	830,293
1918	1,615,000	1,600,000	268	897,761
1917	1,562,000	1,515,000	194	617,989
1916	1,450,000	1,451,000	215	654,603
1915	1,300,000	1,282,000	260	699,494
1914	1,550,000	1,527,000	290	930,831

SOUTH CAROLINA.—This State has been doing rather poorly in recent years. It produced a crop last season of only 888,241 bales on an area of 2,708,000 acres put in cultivation and 2,654,000 acres picked, while North Carolina, as we have already seen, had a crop of 1,101,090 bales on an acreage but slightly in excess of 2,000,000 acres. The reason was that South Carolina had a product of only 160 lbs. of lint cotton per acre, whereas the yield in North Carolina was 261 lbs. per acre. Yet only five years before, in 1920, South Carolina had a yield of 260 lbs. per acre and produced a crop of no less than 1,623,076 bales on an area picked of 2,964,000 acres. There is in these figures the possibility of a great improvement in yield the present season even though the 1926 crop in South Carolina, as in so many other parts of the Cotton Belt starts under unfavorable auspices. The principal influence in the small yield of 1923 and 1924 was apparently the havoc done by the boll weevil, while in 1925, on the other hand, the yield was held down by "the most widespread and disastrous drought in the history of South Carolina," according to the records kept by the Weather Bureau. This drought prevailed from the close of January to November, with only temporary relief at long intervals in most sections. During this period the deficiency of rainfall was 18.23 inches and during the chief growing months, when timely rains were most needed, the deficiency was 12.41 inches. The situation was aggravated (still quoting the Weather Bureau) by record-breaking and persistent heat in September, culminating on Sept. 4 and Sept. 8 in maximum temperatures that overtopped the previous highest section record for all months of 110 degrees at Chester on July 18 1887. The present season there has also been somewhat of a drought up to the present time, but it has hardly been a circumstance to experience in that respect in 1925. This year's drought has been pronounced mainly in the northern and northwestern portions of the State. Elsewhere the situation has been modified greatly for the better during the current month of June, generous rains having fallen in the coastal counties and in sections of the central counties, and proved very beneficial. Whatever damage, therefore, may follow from the existing drought, should it not be effectually relieved as the season progresses, can hardly be worse than the loss suffered in that way the last season. As to the probability of harm from the weevil, it is not possible to express any opinion at this stage of the season, since, as the Commissioner of Agriculture expresses the matter, the plant is not yet large enough to be damaged by the weevil or, as another correspondent expresses it, since there is no cotton yet for the weevil to work on. This much, of course, can be affirmed, namely, that prolonged dry weather is not favorable for the development of the pest. There has, however, been a further drawback the present season in the generally cool weather and late spring. While last year at this time the season was well advanced, the present year it is far from being so, and the crop is accordingly ten days to two weeks late. Planting started about March 15 in the extreme southern part of the State and about April 10 in the northern part of the State, but owing to drought in the central and northern portions of the State was not completed until towards the close of May. In the southern part of the State the seed came up early, but a goodly percentage of the plants was killed, it is claimed, by cold, making replanting necessary. In these latter instances, the seed has only recently come up. Germination was everywhere retarded by low temperatures and cold nights. *Stands* in the north and northwest are poor, but elsewhere there has latterly been great improvement under the influence of more favorable weather conditions. In this State, also, the fields are clear of weeds and grass, lack of moisture having prevented the growth of grass. *Acreage* for the State as a whole is about the same as a year ago. There does not appear to have been any intention to reduce anywhere, but the backwardness of the season prevented full planting in a few instances. Losses in this way, however, may be regarded as having been offset by other instances where a slightly larger acreage was put under cultivation in cotton. Accordingly, we take the acreage at the figure reported by the Agricultural Department at Washington in its final revision for the season. *Fertilizers* have become an important aid to cotton raising in this State in recent years, but the present season a good many of our returns say that there has been a falling off in the use of these aids to fertility. South Carolina now ranks second only to North Carolina in the quantity of commercial fertilizers consumed, though, of course, only a part of this is devoted

to cotton growing. It appears from the tax tag sales that the consumption of fertilizers, including cotton seed meal used for that purpose within the State, was 818,814 tons in the six months to May 31 1926, against 842,426 tons in the corresponding six months of the preceding season. Application of home-made composts also seems to have fallen off somewhat, though this is never a large item, a smaller amount having been available on account of feed shortage.

SOUTH CAROLINA	Area in Cultivation.	Area Picked.	Yield of Lint Cotton per Acre.	Production, 500-lb. Gross Bales.
Crop Year—	Acres.	Acres.	Pounds.	Bales.
1925	2,708,000	2,654,000	160	888,241
1924	2,491,000	2,404,000	160	806,594
1923	2,005,000	1,965,000	187	770,165
1922	1,951,000	1,912,000	123	492,400
1921	2,623,000	2,571,000	140	754,560
1920	3,000,000	2,964,000	260	1,623,076
1919	2,900,000	2,835,000	240	1,426,146
1918	3,040,000	3,001,000	250	1,569,918
1917	2,880,000	2,837,000	208	1,236,871
1916	2,950,000	2,780,000	160	931,830
1915	2,555,000	2,516,000	215	1,133,919
1914	2,890,000	2,861,000	255	1,533,810

GEORGIA.—In this State a sharp distinction must be made between the northern part and the rest of the State. The northern part has suffered from the drought condition experienced in North Carolina and South Carolina, the drought area having taken north Georgia in its embrace. In the remainder of Georgia the situation has been quite favorable except that a late spring has been encountered, here as well as elsewhere, and that temperatures everywhere have been too low and the nights unseasonably cold. Whatever drawbacks may now exist are due to this last circumstance. However, the outlook for the State in its entirety is better than on the average—barring only the backwardness of the season, which makes the crop from ten to twelve days late. Georgia has been doing poorly with its cotton crop in recent years, even though there was in 1925 a recovery from the extreme low point reached in 1923. Its yield in 1925 was only 155 lbs. of lint cotton per acre, giving a crop of 1,163,902 bales on an area of 3,589,000 acres picked. Back in 1914 it had a product of 239 lbs. per acre and had 5,433,000 acres to be picked, giving a crop of no less than 2,718,037 bales—which shows how striking is the contrast between the immediate present and the remoter past, and what a wide gulf exists for improvement. It is worth noting that the size of the crop in 1925, as compared with 10 and 11 years ago, shows a shrinkage both by reason of a diminution in acreage and a reduced yield per acre. The shrinkage in acreage is in process of being remedied. The low point in acreage was reached in 1924 when 3,099,000 acres were planted in cotton and 3,046,000 acres picked. From this there was an increase in 1925 to 3,662,000 acres planted and 3,589,000 acres picked. There is going to be a further substantial increase in *acreage* the present season. Our returns attest the fact with an unanimity that is quite out of the ordinary. The increases, too, are in most cases far from being small, while decreases are almost entirely lacking, though a few of our correspondents estimate the acreage at the same figure as a year ago. The increases as compared with 1925 run all the way from 5% to 15 and 20%. In view of the fact just mentioned, that the State's total area devoted to cotton was only about 3,600,000 acres in 1925, after the recovery from 1924, while in the six years from 1914 to 1919, inclusive, the acreage each year without exception was well above 5,000,000 acres, it does not seem strange that there should now be a quite common tendency to get back to somewhere near the old figures. With the general tenor of our advices so strongly in the one direction, it seems to us quite conservative to enlarge last year's acreage by 8%, which still leaves the State's area in cotton somewhat below 4,000,000 acres. In the northern part of the State, the planting began about April 1 and was finished about May 15. Here much replanting was found necessary, which in some cases extended to the 1st of June. In the southern part of the State planting began about March 15 and was completed about May 1. Accounts regarding the status of the crop in the north are quite generally unfavorable, this being the section affected by the drought, but even here increases in acreage are reported running as high as 20%. In that section of the State *stands* are reported as either poor or only fair. Quite in contrast with this, stands in the lower half of the State are reported almost uniformly good. In southern Georgia rainfall was as a rule sufficient, but some of our correspondents in the southwestern part of the State report weather conditions as having been unfavorable, saying it was too cold and too windy, so that the moisture dried out before germination could take place. These correspondents also say that very early planted cotton on light soil had to be planted over, due to heavy rains having formed a crust, and they add that all cotton required more than the usual amount of replanting. The crop is everywhere from 10 to 15 days late. From all parts of the State the reports are that cultivation has been satisfactorily carried on and that the fields are clear of weeds and grass. Since the beginning of June very satisfactory progress has been made nearly everywhere except in the north, though the crop remains late and rains in the central northern counties, where drought prevailed, have been irregularly distributed. As for *fertilizers*, somewhat less seems to have been used for the State as a whole, though a few places report increases. The tag returns show sales of 761,282 tons in the five months to May 31 1926, against 770,479 tons in the five months of 1925, but comparing with only 668,137 tons in the corresponding period of 1924. It must, of course, be borne in mind that this is the consumption for all crops combined, and not for cotton alone. Home-made manures seem to have been applied to about the usual extent. As to activities of the weevil, there has been comparatively little evidence of them thus far. One correspondent in the southwestern part of the State says: "Weevils are late in showing up—less this year than when cotton has been the same size in other years, making weevils two weeks late if they are coming out at all." It is always well, in seeking to judge the future, to know the conditions that prevailed the previous season and therefore we note here that according to the United States Weather Bureau, the characteristic features of the calendar year 1925 were "the heavy rains and floods in January, the long and severe drought that followed, and the unusual heat wave of summer and early autumn. The rainfall for January was extremely heavy and resulted in floods in the rivers of central and southern Georgia, which were the most destructive ever known. A severe drought followed, which was not relieved until October. During the period of eight months from February to September, inclusive, the deficiency in precipitation for the State was 19 inches. The drought was especially severe during the latter part of July, August and September and the rivers at many places reached the lowest stages ever known." There is nothing to add to this by way of comment except to say that no such severe conditions have been experienced in Georgia thus far in 1926, nor does it seem likely that they will be.

GEORGIA.	Area in Cultivation.	Area Picked.	Yield of Lint Cotton per Acre.	Production 500-lb. Gross Bales.
Crop Year—	Acres.	Acres.	Pounds.	Bales.
1925	3,662,000	3,589,000	155	1,163,902
1924	3,099,000	3,046,000	157	1,003,770
1923	3,844,000	3,421,000	82	588,236
1922	3,636,000	3,418,000	100	714,998
1921	4,346,000	4,172,000	90	787,084
1920	5,000,000	4,900,000	138	1,415,129
1919	5,404,000	5,220,000	152	1,659,529
1918	5,425,000	5,341,000	190	2,122,405
1917	5,274,000	5,195,000	173	1,883,911
1916	5,450,000	5,277,000	165	1,820,939
1915	4,925,000	4,825,000	189	1,908,673
1914	5,510,000	5,433,000	239	2,718,037

FLORIDA.—This State does not raise much cotton. It had last season only 103,000 acres under cultivation in cotton (of which 101,000 acres were picked), or less than one-half of the area in cotton eleven years before in 1914. According to the Census ginning returns the yield last year was only 38,168 bales, or an average yield of lint cotton per acre of 180 pounds. The present year the *acreage* seems to be about the same as in 1925, and conditions appear to be on the whole quite favorable. Planting began about March 15 and was finished April 10, though in the western part of the State the dates seem to have been somewhat later, extending from April 1 to April 30. In all parts of the State the seed came up well and little replanting was required. Good *stands* have been procured practically everywhere, and the fields are free of weeds and grass. There are virtually no complaints of any kind, though there is some mention of its having been rather cold and an occasional reference to weevil just having come out with the explanation, however, that little damage from that source is expected unless the season should prove wet. Commercial *fertilizers* have been applied to about the usual extent. For the State as a whole, and for all crops combined, the consumption of fertilizers, according to the returns of the Florida Department of Agriculture, has been 195,173 tons in the first five months of 1926, against 195,548 tons in the corresponding five months of 1925 and 154,190 tons in the same period of 1924. In maturity the crop is about as far ad-

vanced as on the average, and certainly is not more than a few days late.

ALABAMA.—This State last year redeemed its record. After several years of very poor crops, it raised in 1925 1,356,088 bales of cotton on 3,539,000 acres planted and 3,504,000 acres picked. The yield of lint cotton per acre was 185 lbs., as against but 91 lbs. two years before, in 1923. Yet conditions during 1925 were not altogether favorable, though there were certain distinct points of advantage. The season was rather dry, but it was of unusual length. There were some generous rains during May last year, but the remainder of the season continued more or less dry, except in certain favored sections. The drought reached its climax during September and early October, when the rivers dropped to the lowest stages ever recorded. August was the dryest since the beginning of State-wide records. Numerous high temperature records were established, only to be broken repeatedly in September. This last was the hottest month since the beginning of State-wide records in 1884. The Weather Bureau also says it was probably the longest summer ever known, at least for several generations. The heat was effective in preventing much damage by the weevil, and this along with the long open season accounts for the satisfactory yield obtained, and most of the crop was picked before the arrival of the fall rains. The present season there has been a deficiency in temperature everywhere throughout the State, and rainfall has also been below the normal, though not reaching the dimensions of a drought, besides which, opportune rains latterly have been very beneficial. The crop is unquestionably late, say about ten days on the average, but otherwise conditions are favorable—more than ordinarily so in many parts. *Stands* nearly everywhere are satisfactory—in fact, many of our returns say they are fine. In addition, the fields are very clean. In the northern part of the State planting began about April 15 and was finished about May 15. The very best accounts some from this part of the State, though they are good everywhere. In the southern portion of the State planting began earlier, say about March 15, and was completed by the beginning of May. In the north hardly any adverse developments are noted except the low temperatures; and an absence of any indications of the presence of the weevil is noted, while it is added that last year the damage from that cause was very slight. In the lower portion of the State some of our returns speak of its having been too wet as well as too cold most of the spring. Considerable replanting seems to have been necessary on bottom land, because early planted seed failed to germinate on account of the cold, wet weather. Later planted seed, however, came up well. Reports of increases in *acreage* are general, the amount of increase running from 5% to 15%. None of the returns suggest any decrease, though in a few sections the acreage is put the same as a year ago. For the State as a whole the indications as a whole point to an increase of about 8%. Commercial *fertilizers* apparently have been applied to a greatly increased extent. The Commissioner of Agriculture reports fertilizer sales for the five months ending May 31 1926 580,150 tons, as against 565,200 tons in the first five months of 1925 and only 444,900 tons in the five months of 1924, though, of course, not the whole of this tonnage is applied on cotton plantations. Home-made manures are not used to any great extent.

MISSISSIPPI.—This State in 1925 distinguished itself beyond all others. It greatly enlarged its acreage and at the same time enormously increased its yield per acre to the best figure apparently ever attained and a figure at which it was outranked by no other State in 1925 excepting only the irrigated areas of New Mexico, Arizona and California. The yield of lint cotton was 275 lbs. per acre, against no more than 91 lbs. two years before, in 1923, and the total crop, the largest in the history of the State, 1,979,065 bales, against 1,098,634 bales in 1924 and but 603,808 bales in 1923. The acreage was 3,501,000 acres planted and 3,466,000 acres picked. What were the weather conditions that made these very striking results possible? The meteorologist of the United States Weather Bureau notes among the causes that contributed to bring about the large yield the early planting of cotton, with the emergence of relatively few boll weevil, followed by mostly dry, hot weather. September had the highest mean monthly temperature of record for the State. Of course, the great increase in the area planted in cotton was also an important factor in swelling the size of the crop. It should be noted, however, that the prevalence of heavy and continuous rain in October and November lowered the grade and materially lessened the value of the cotton, some of which remained in the fields at the close of the year. The present year the complaint is the common one of deficient temperature, and rainfall also seems to have been below the normal, but this has reference to the State as a whole. From points in south Mississippi not a few of the returns say that the precipitation has been excessive. At several points in southern Mississippi the report is that it has been both too wet and too cold. In fact, one correspondent asserts that it has been the wettest and coldest season ever known in his vicinity, at least through March and April . Generally speaking, on account of the backwardness of the season, the crop is about 15 days late, though the statement is by no means of uniform application, and in more than one instance comment is to the effect that the plants are normal in maturity and that the crop on the average is to be regarded as neither early nor late. Farmers in Mississippi usually begin planting April 10 to April 15, but the present year the start was later on account of cold and also in some instances on account of its being wet. A goodly portion of the acreage planted in April had to be replanted and in some cases planting continued up to the end of May. Still, accounts are far from gloomy, except in isolated instances. The general status of the crop in Mississippi might be summed up by saying that growth was somewhat retarded by the extremely cold nights, but that on the whole plants are doing well. Better weather recently has greatly helped the situation. *Stands* are reported satisfactory as a rule, but one or two correspondents say that the situation is "spotted" and one report, from the district where excessive rain had been experienced, says that stands are only 85% entirely satisfactory. Fields are clean as a rule, with some few exceptions in the case of districts where there has been a superabundance of rain. *Acreage* is slightly larger—we should say about 2%. No emphasis is laid in any of the returns on the possibility of damage from the boll weevil, the general tenor of the accounts being that it is too early to judge, owing to the lateness of the crop. Commercial *fertilizers* are being used in Mississippi to a gradually increasing extent. The tax tag sales indicate a consumption of 268,760 tons in the period from Jan. 1 to May 31 in 1926, against 246,128 tons in the same period of 1925 and only 191,581 tons in the corresponding period of 1924. Home-made composts do not cut much of a figure as aids to cotton cultivation.

LOUISIANA.—This State, like other Gulf States, has been extending its cotton area in recent years and greatly improving its yield. The crop last year got near the million mark, being 909,755 bales. This was a great change from only two years before, when the production was no more than 367,882 bales. The yield per acre was 232 lbs. in 1925,

against 125 lbs. in 1923. But acreage has also been rising rapidly, the area planted the past season having been 1,903,000 acres and the area picked 1,874,000 acres. There was a marked deficiency of rainfall in this State last season for the months from February to August, inclusive, with an especially marked shortage in April. In January, and after August, in 1925, the precipitation was above the normal, except for a moderate deficiency in December. The activities of the weevil were checked by the dry midsummer heat, the cotton ripened unusually early and the larger part of it was picked and ginned in good condition. Rainy weather in September and October caused a lowering of grade on a part of the crop. The present year temperatures were below the normal everywhere, unseasonably cool weather having prevailed, more particularly in March and April. Rainfall has varied widely between the northern part and the southern part of the State. In March rains were exceedingly heavy in virtually all parts of the State, but in April the fall was above the normal only in the South, reaching 6 to 10 inches, and mostly deficient in the north, where the fall was only 2 to 5 inches. The cool weather and the excess of rain in the southern part of Louisiana were unfavorable, not only for cotton, but for other crops as well. Conditions improved, however, with better weather during the latter half of April, and cotton cultivation has made excellent progress since then. Planting in the northern part of the State began early in April and was finished the last of May. The heavy rains in March, along with the cold weather, made considerable replanting necessary, but the subsequent dry weather has been favorable for the development of the crop, though some of the accounts speak of the dryness having become too pronounced. In the southern part of the State the rainfall until quite recently was altogether too heavy, with the result that low level ground was flooded, washing out the seed. However, since the latter part of May the situation has changed very decidedly for the better, needed rains having fallen in many northern localities and warmer weather having relieved the situation in southern localities. The result is that the progress of cotton has been good everywhere. The plants are reported small but thrifty and the *stands* a good average. The crop is late, probably about two weeks, taking the State as a whole, but lost time is now gradually being made up. Considerable grass is reported in the wet areas of the South, but elsewhere the fields are clean as a rule. *Acreage* may be somewhat smaller in the flooded districts, but is moderately larger elsewhere throughout the State. For the State as a whole there is probably an addition of 2%. Indications of the appearance of the boll weevil are reported in one or two instances, but generally the statement is that the plant is too young to admit of any expression of opinion on the matter, though no anxiety regarding much damage in that way seems to be entertained after the exemption experienced in 1925. Commercial *fertilizers* are not much used in Louisiana and the present year the dry weather in the north has been unfavorable to their use. Nevertheless, some of our returns speak of a tendency to enlarge the application of these aids to fertility. According to the Commissioner of Agriculture, the consumption of fertilizers in the first five months of 1926 in Louisiana was 97,070 tons, against 92,551 tons in the five months of 1925 and 110,562 tons in the five months of 1924. Scarcely any home-made manure is used on cotton.

TEXAS.—The situation in Texas is well known. The State constitutes an empire in itself and has been extending its area in cotton with great rapidity, so that even in seasons of unfavorable conditions it produces more cotton than any two other of the largest cotton producing States combined and three to four times as much as the States with moderately large-sized crops. In 1925 conditions in Texas were markedly unfavorable. The State suffered from extreme and very prolonged drought, beginning several months back in the previous year. The drought lasted all through the last three months of 1924 and the first eight months of 1925. It was broken by general rains in September 1925, with the rainfall excessive in October over much of the eastern half of the State. In the first week of November general rains occurred, effectually relieving the droughty situation. These timely rains were of great benefit to all late crops and added considerably to the size of the Texas cotton crop, but lowered its grade. Early killing frosts, however, in the northern portion of the State near the close of October stopped the growth of cotton in the late-maturing sections and greatly lowered both the yield and the grade. Nevertheless and notwithstanding all these drawbacks, Texas for 1925 has a crop to its credit, according to the Census ginning returns, of 4,164,569 bales. This was the result, too, on a yield of lint cotton per acre of only 113 lbs., or lower than the product per acre last season in any other State, and comparing with a yield in Mississippi of as high as 275 lbs. per acre. No less than 19,139,000 acres were planted in cotton in Texas in 1925 at the beginning of the season and 17,608,000 acres remained to be picked after an abandonment of over 1½ million acres. Only four years before, in 1921, the area harvested was no more than 10,745,000 acres, showing an addition to area in the short space of four years of almost seven million acres. It is easy to perceive from these figures the possibility of a perfectly enormous yield in the event of conditions entirely propitious. One important drawback to a full yield which existed in 1925 is entirely absent the present season. We refer to the lack of moisture. In that respect the situation at the present time is in sharp contrast with that prevailing in 1925. Owing to eleven months' continued drought, subsoil moisture in 1925 was entirely lacking. There is no lack of moisture anywhere in Texas at this time and that is a consideration of the highest importance. Rains have been abundant thus far and even if a dry period should now intervene the Texas crop by reason of the present abundance of subsoil moisture would be well fortified against any great amount of harm from that source. The cotton plant has a tap root which extends deep down into the soil and with this subsoil adequately saturated, as it is now, it can stand almost any amount of heat, accompanied by extremely high temperatures. The greatest danger is in the possibility of continued heavy rains and low temperatures, conditions which would allow the boll weevil to thrive. On that point all that can be said at this time is that thus far there is nothing to show that the weevil are going to be more destructive or more numerous than they were last year when their activity was at a minimum because of the long prevailing drought, though, of course, it is too early to venture on positive prediction at this early stage of the season, especially as the crop is somewhat backward. Furthermore, from the western part of the State, where there is much virgin soil recently given over to cotton, there come to us very positive statements saying that absolutely no boll weevil have been encountered in the history of cotton raising in those sections.

Texas is a State of such vast extent that in order to obtain any accurate idea of conditions it is necessary to take up each of the different sections of the State by themselves according to the points of the compass. In the northeast the complaint is that the weather has been too cold and too wet and that much replanting was found necessary. Here planting extended through April and May. In east Texas the report is that much of the earlier planting had to be replanted because the spring was cold and wet, but that since the rains ceased the weather has been ideal. From southeast Texas, on the Gulf Coast, there is also complaint that the early spring was too cold and too wet, necessitating much replanting. Here planting operations extended through March and April and present condition is reported as good. In southwest Texas planting began March 20 and was completed May 15. On account of the cold nights early planted seed showed poor germination and wet weather was an additional drawback, but late planted cotton and also replantings look well. Since the latter part of May the weather has been entirely favorable. In south Texas and on the Rio Grande planting began as early as Jan. 15 and cotton there is already nearing maturity, the first bale from Hidalgo County having been received at Houston on June 19. In central Texas planting began Mar. 20, but because of bad weather some replanting was being done towards the end of May. Still, one of our correspondents in Brenham, Texas, points out that his county made 11,000 bales of cotton last season, but says the present season conditions are vastly different from what they were twelve months ago and "we ought to make 25,000 bales at the least." In west Texas planting lasted from May 1 to May 31 and here also there is complaint of the weather having been too wet and too cold. Hard rains packed the earth and prevented germination and yet not to a very large degree. More recently the weather has been good and fine for growing. From parts of western Texas the statement comes that the weather has been unusually favorable for cotton. In northwest Texas, where planting began the last week of April and was completed the last week in May, germination was at first a little slow because the ground was cold, but has been good from the middle of May on. One return says that many farmers were afraid of their seed so were liberal in the quantity put in the ground. At one station where the normal precipitation is 1.72 inches, the rainfall in May reached 5.14 inches; this interfered somewhat with work. The same return, however, says that continued rains as a whole helped in bringing up the seed. While the weather up to May 15 was too cold it has since then been ideal.

As indicating what a vast change in yield weather conditions may make, a correspondent in Hale County, after pointing out that while the county in 1924, when conditions were average, produced 30,000 bales of cotton and in 1925, when they were bad, produced only 19,500 bales, says the 1926 crop will be about 19,000 bales with unfavorable conditions ahead, 30,000 bales with average conditions ahead and 41,000 bales with excellent conditions ahead.

Another correspondent in the northwestern part of Texas reports conditions there as a whole the best in five years.

Virtually everywhere in Texas conditions have been highly favorable thus far in June. *Stands*, too, nearly everywhere are reported good—in many cases, in fact, excellent. Fields as a rule are clear of weeds and grass, but not entirely so, however. This is quite noteworthy because of the wet weather, which gave grass and weeds a big start. But cultivation has been actively in progress and in the few cases where weeds were still present when our returns were being forwarded it is added that the fields could be easily cleaned and that the work would be completed within a few days.

The extent of the change in *acreage* from a year ago is difficult to estimate in the case of a State of such vast size. While here and there throughout the State some decrease in acreage is noted by our returns, these come mainly from farmers who suffered disaster with their wheat crop in 1925 and then planted the abandoned acreage in cotton. Not much abandonment of wheat acreage occurred the present season. In its return for May 1 1925 the United States Department of Agriculture reported that no less than 62% of the winter wheat area planted in Texas the previous autumn had to be abandoned, leaving only 692,000 acres in that State to be harvested. This was last year. In its return for May 1 1926 the Department reported that no more than 2% of the acreage planted had been abandoned, leaving 1,744,000 acres to be harvested. Aside from reductions growing out of this change in the wheat situation, it can be affirmed with great positiveness that there has been no tendency to decrease acreage in any section of the State. On the other hand, many increases are reported and many of these are of huge dimensions, at least in ratio—25%, 50%, 100% and in one instance even 200%. The extremely high ratios of addition of course are found mainly in central and western Texas and represent virgin land being brought under cultivation. Obviously these extreme percentages of increase apply only to limited areas. What relation they bear to the State's big aggregate of cotton acreage it is extremely difficult to say. From the investigations we have found it possible to make we are inclined to think that the additions of new land will more than offset the scattered decreases reported. As already pointed out, the total cotton area of Texas has been mounting with surprising rapidity. The additions have seemed almost incredible and the Department of Agriculture at Washington has found it necessary to revise its estimates upwards repeatedly. In its preliminary estimate as of June 25 1925 the Department put the State's acreage at 18,237,000 acres. In its final estimate, issued on May 15 of the present year, the area in cultivation on June 25 1925 was raised to 19,139,000 acres. This, as already indicated, was by far the largest acreage ever planted.

Accepting this final figure as correct, we can find no reason for thinking the acreage planted the present season is any smaller. However, under date of June 2 1926, George B. Terrell, Commissioner of Agriculture for the State of Texas, gave out a preliminary report on the different crops of the State and in this the acreage of cotton planted in 1926 is estimated at 98% of that planted in 1925, a reduction of 2%, and we will be erring on the safe side if we accept this estimate of a 2% decrease. In order not to mislead, however, it seems desirable to add that Mr. Terrell is prone to underestimate. It is worth noting that Mr. Terrell places the condition of the crop in Texas as of May 25 at 79%, which compares with 67% on the same date in 1925. This affords perhaps the best evidence that could be adduced to show how much more favorable the outlook for cotton in that great State is the present year than it was twelve months ago.

As to *fertilizers*, that is not a large item in Texas. However, in a small way their use is increasing. Including cotton seed meal, the consumption for the five months ending May 31 1926 is reported at 127,800 tons, as against 92,733 tons in the corresponding five months of 1925 and 117,291 tons in the five months of 1924. The crop is perhaps one to two weeks late. The statement, however, is not by any means true of all parts of the State. In some large sections in the western part of the State the crop is fully up to the average in maturity and in two or three counties it is actually in advance of the average—in one county, according to our reports, it is earlier by ten to twelve days. Some slight activity on the part of the weevil is noted only at three or four points in southeastern and central Texas. On the other hand, there are sporadic reports of grasshoppers and worms in a few other parts of Texas.

ARKANSAS.—Arkansas is another State that gave an exceptionally good account of itself last season, raising a crop, according to the Census ginning returns, of 1,603,227 bales, against 1,097,985 bales in 1924, and only 627,535 bales in 1923. The acreage was by far the largest in the history of the State, 3,814,000 acres having been planted and 3,738,000 acres picked. The product per acre reached 205 lbs., against 169 lbs. in 1924 and but 98 lbs. in 1923. The season in Arkansas last year was unusually early, the same as nearly everywhere else in the country. Rainfall during the first six months of 1925 was very deficient, the average precipitation for the State being only 14.32 inches, or 11.87 inches below the normal and approximately 3 inches less than ever previously measured during the same months. The situation in this particular, however, was relieved in the second half of the year, though September was marked by unusually high day temperatures. The cotton crop did not suffer from the dry weather of the spring and early summer. In fact, according to the Weather Bureau, it kept grass from growing as rapidly as it usually does and farmers were able to keep fields clean and well cultivated, at much less expense than is required during a spring and summer of average rainfall. The hot, dry weather also held the boll weevil in check and damage from the weevil and from worms was not large in 1925. The present season the cool weather was unfavorable to the germination of the seed and rainfall was below the normal. A distinction must, however, be made in this latter particular between the northern part of the State and the southern. In the northern part it was very dry, in the southern part much too wet. In the north planting began about April 25 and was finished about the end of May. In the southern part it began somewhat earlier, say April 15 and was completed about May 15. Some replanting was necessary both in the north and in the south. Early planted cotton required more or less replanting in all parts of the State, the cool weather and low temperatures having retarded germination. The crop is five days to two weeks late nearly everywhere, but since the latter part of May good progress has been made, due to local showers, though it is still too dry in some north central portions where *stands* are poor or only fair. Elsewhere stands are very good and the fields clean and well cultivated, with chopping virtually completed. *Acreage* apparently is about the same as in 1925, when it was larger than ever before; decreases at certain points have been offset by increases at others. There are no complaints regarding the weevil and it is really too early to know much about them. In *fertilizers* there has been an increase in central and southwestern Arkansas and a decrease elsewhere. Fertilizer shipments into Arkansas for the five months ending May 31 in 1926 were only 103,812 tons, against 122,329 tons in the corresponding five months of 1925.

OKLAHOMA.—This State disappointed expectations last season, since the crop turned out only a little larger than in 1924, being 1,690,748 bales, against 1,510,570 bales, notwithstanding that the acreage picked was 5,214,000 acres in 1925, against 3,861,000 acres in 1924. In the case of both years, however, the crop was over double that of the years immediately preceding. Many parts of the State last season suffered from severe drought the same as Texas. Relief came in September, but apparently too late to do much good. The present season the rainfall has been irregularly distributed, there being a general and quite marked deficiency over the eastern portion of the State, while rainfall has been generally excessive in the western portion of the State. Latterly the situation has been reversed and there have ben moderately heavy general rains in east and central Oklahoma, but only light showers in the west. Planting began about April 20 and was completed about May 25, though in some cases not before the 1st of June. The weather has been too cold everywhere in the State, the cold nights being an especial drawback, but of late temperatures have been quite seasonable and the crop has made good progress. *Stands* are spotted, being as a rule good, though only fair in some instances. The fields are generally clean and well cultivated. The *acreage* seems to be about 5% smaller than in 1925, due, however, almost entirely to a single special circumstance, namely the fact that last year the winter wheat crop in Oklahoma, like that of Texas, met with disaster and a good part of the abandoned acreage was replanted in cotton, while the present year there was no occasion for anything of the kind. The United States Department of Agriculture a year ago reported that 17% of the winter wheat acreage in Oklahoma had been abandoned, leaving only 3,037,000 acres for harvest, while

the present year the report is that only 1% has had to be abandoned, leaving 4,500,000 acres to be harvested. Little or no mention is made of weevil and in the few cases where there is any reference to them it is to the effect that their activities promise to be lighter than usual, though it is admitted that it is much too early for definite judgment in that regard. Only a small quantity of *fertilizers* is used as yet in Oklahoma, but there has been a slight increase the present year and the same remark applies to home-made manures.

TENNESSEE.—This State suffered from deficient moisture last year, the rainfall during the crop-growing months of May, June, July and August averaging only 56% of the normal, and this drawback was accentuated in early September by one of the hottest periods ever known in the State. Nevertheless it raised over half a million bales of cotton—in exact figures 517,162 bales—on a planted area of 1,191,000 acres and a picked area of 1,173,000 acres. The average yield of lint cotton per acre was 210 lbs., as against only 170 lbs. per acre in 1924 and but 92 lbs. in 1923. The present year there is again deficient moisture. The deficiency extended all through the months of February, March and April. In June thus far the rainfall also has been only moderate, but has been large enough to be beneficial. As elsewhere in the South, the weather was rather cold during the early spring, but has been entirely favorable since the 1st of June. The remark applies both to temperature and moisture. Planting began about April 25 and was completed about May 20. On account of the low temperatures and also because some of the seed was bad and there was lack of moisture, replanting was found necessary to the extent of about 10%. *Stands* are not uniformly good; in those fields, however, where they have been unsatisfactory, this defect is now being remedied under greatly improved weather conditions. The crop almost without exception is in a good state of cultivation, with the fields free from grass and weeds. The dry weather has, of course, been contributory to this. The presence of the weevil has not been noted up to the present time. In maturity the crop is about normal in certain parts of the State, but as a whole about ten days late. As to *acreage*, small increases are reported by some of our correspondents and slight decreases by others. For the State as a whole the acreage would appear to be approximately the same as a year ago and we leave it unchanged at last year's figures as reported by the United States Agricultural Department in its final revision. The use of commercial *fertilizers* is steadily growing in this State, the tax tag sales showing 124,360 tons taken in the five months ending May 31 the present year, against 110,867 tons in the five months of 1925 and 91,953 tons in the same period of 1924. So far as this has been applied to cotton, it will serve to maintain the State's high yield per acre, which for 1925, as already noted, was 210 lbs. per acre.

1914	935,000	915,000	200	383,517

MISSOURI.—This State does not raise a large amount of cotton, but the production is steadily increasing from year to year, both as a result of additions to acreage and a larger yield per acre. The total product in 1925 was 294,441 bales on an area of 520,000 acres and a yield of 275 lbs. of lint cotton per acre, which compares with only 185 lbs. in 1924 and 171 lbs. in 1923, but with 360 lbs. in 1922, when the acreage was only about one-fifth of that of 1925. The present year there seems to have been a small further increase in the *acreage*—say about 3%. *Stands* appear to be only fair, but the fields are reported cleaner than usual. Planting began the latter part of April and was completed about May 25. The early plantings came up poorly, but the late plantings did well. Considerable replanting was found necessary because of the cool and dry weather, and also because of the poor seed used. Since the 1st of June the weather has been entirely favorable. The boll weevil has never been present to any great extent in Missouri. The crop is some ten to fifteen days later than in 1925, when, however, it was unusually early. As compared with the average season, it is probably only a few days behind in maturity. *Fertilizers* are not used to any great extent in counties of heavy production, but some are used in the upland section, comprising about 8% of the crop of the State, and here there has been a slight increase in the quantity applied the present season.

CALIFORNIA AND ARIZONA.—*Acreage* in California appears to be about the same as in 1925, but in Arizona and New Mexico there is apparently a slight increase, say about 2%, in each State. In California planting began about April 10 and was completed about May 20. The seed came up fairly well, but replanting was necessary to the extent of about 5%, due to crusting of soil following heavy April rains. Since then conditions have been favorable, with the weather generally hot and dry. In California the crop is about of average date in point of maturity, but in Arizona it is ten days late. In Arizona planting began March 10 and was finished May 10. Here the weather was both too cold and too wet early in the season. In both California and Arizona good *stands* have been secured, with the plants in healthy condition. In both States, too, cultivation has been thorough, leaving little to be desired, while chopping has been completed. Boll weevil are not present in California, but a small number of wild weevil abound in eastern Arizona, though they do little actual damage as a rule. Comparatively little *fertilizers* of any kind are used in this territory.

The foregoing tables of rainfall and thermometer, covering as they do—and necessarily so on account of lack of space—only a very few stations in the cotton belt, give only a very partial idea of the meteorological conditions that have prevailed this spring at the South. The following compilation, however, which covers the official averages of rainfall and the departure from normal in each State for each month from January to May, both inclusive, for the last eight years, and the highest, lowest and average thermometer for the like periods, furnishes data that should not only be of considerable interest but of aid to the reader in drawing conclusions.

	RAINFALL.										TEMPERATURE.													
	January.		February.		March.		April.		May.		January.			February.			March.			April.			May.

Indications of Business Activity

THE STATE OF TRADE—COMMERCIAL EPITOME.

Friday Night, June 25 1926.

There is no increase in wholesale trade, though retail business is better than a year ago under the spur of reduced prices at big special sales. Rains have been beneficial to the grain and cotton crops. Grain prices have declined partly for this reason and partly because the Haugen or so-called farm relief bill was defeated in the United States Senate on the 24th inst. by a vote of 45 to 39. The expose of its defects by Secretary of the Treasury Mellon last week proved to be fatal to its chances of passage. Prices of corn, which it was claimed, were to be raised by the enactment of the bill have declined, however thus far only 1 to 2 cents. And the drop in prices was partly due to the favorable weather for the growing crop and the dulness of the cash trade. The Corn Belt needs warmer weather, but is doing very well. Wheat is 3 to 7 cents lower than a week ago, owing partly to disappointment over the defeat of the Haugen bill. Yet, as a matter of fact, it would have had in the end a pernicious effect on the wheat growing industry, putting it on stilts, and thus in an unnatural position. It is better for the farmer to keep his feet on terra firma and face realities, diversify his crops and reckon with the stern verities of the market at home and abroad. Coddling him with special legislation, designed to nullify natural law, could only end in his discomfiture. The Kansas crop is turning out better than expected and the Canadian crop may approximate 500,000,000 bushels. Spring wheat looks better. It appears that rye has declined sharply, partly because of the failure of the Haugen bill and partly because of the dulness of the export trade. The floods in Germany may stimulate it sooner or later if they have done serious damage. Cotton has been irregular, advancing on the near months and declining slightly on the more distant. The outlook for the cotton crop at the present time is on the whole very favorable on an acreage differing but little from that of last year. That, it is well known, was the largest on record. A period of dry, hot weather, concededly, would be beneficial over most sections of the Belt in order to promote germination and keep down the weevil. Perhaps the Carolinas would be the better for more rain. Exports of cotton this week are smaller than last week, but a little larger than for this week last year. And the total thus far this season shows a decrease much less than half what it did at one time in April.

Textile trades have been quiet, although printers are doing a rather better business in Fall River. Print cloths here, however, have declined ⅛ to ¼c. on most lines, without stimulating business. Wool has been a little more active and about steady. The Australian sales have been at irregular prices. The better grades have been relatively firm, while others have been in some cases somewhat lower. The woolen goods industry is still quiet. Only a fair business has been done in broad silk. Sales of silk fabrics do not increase much. Raw silk has been dull, but on the whole comparatively steady. Rayon prices are to be reduced on July 1 for the first time in two years. Foreign competition, it seems, makes that necessary. Shoe manufacturing is quiet. So also is the furniture trade. Recently sales of pig iron were reported as rather large, but of late they have fallen off and prices are none too steady. Some increase in steel orders is reported here and there, but in the main the steel industry is not at all active and the tendency is towards curtailment of output. It is now about 75 to 80%. Coffee has advanced, owing partly, it appears, to Brazilian and European buying and higher Brazilian markets, as well as local covering. There is a scarcity here of No. 7 Rio and this is naturally a sustaining factor. The tendency has been to oversell coffee on the idea that supplies are so large that Brazilians would have to lower quotations. On the contrary, the so-called Defense Committee in Brazil is to all appearances sustaining prices successfully, at least for the time being. Sugar has declined somewhat, with high record transactions at the Exchange. On the whole the heavy liquidation was well taken. The period is near at hand when consumption of sugar normally increases very noticeably. The output of automobiles is being reduced for the time being while taking inventories. Copper and zinc have declined. Lead, tin and antimony have advanced. Hog products showed some slight decline for the week, but hogs are still at $15, and this suggests that the consumption of corn this year for feeding purposes may be unusually large. The weather has been more favorable for building, although still too cool in some parts of the country, even in some sections of the South.

On the whole there has recently been some falling off in building, and lumber has latterly been dull. But with more seasonable weather it is natural to suppose that building and lumber markets will both be stimulated. Rubber has latterly been lower here and in London, as stocks gradually increase and consumers manifest no great eagerness to buy, even at present reduced prices. The stock market has been irregular, and to-day there was some decline here and there, with less activity in the trading. But railroad shares have been well maintained, even when industrial stocks have fallen. Money on call has been steady of late at 4¼%. Bonds have been in good demand, both for railroad and industrials, including foreign issues. Brazilian exchange has been at the highest point since 1920. Another Brazilian loan has been negotiated in this country. Sterling has been firm at the peak rate for 1926. French francs have been alternately firmer and weaker, and ended to-day at some decline. Spanish and Uruguayan exchange was depressed. The tendency of Japanese yen has been upward, and this is expected to have a beneficial effect on Japanese buying of American commodities like cotton, especially as Japanese textile industries are very prosperous and the East Indian cotton crop seems to be threatened by deficient monsoon rains. M. Briand has formed a new Ministry in France with M. Caillaux as Finance Minister. It is hoped that a way out will soon be found, but it will not be found unless the French people face realities and submit to taxation commensurate with that accepted by other nations. It would appear that the capital levy which was threatened by M. Herrot's possible accession to power, is no longer to be feared, or at least not for the time being. London has been quiet, and it appears that popular subscriptions to the Commonwealth bond issue are not satisfactory, amounting, it seems, to not much more than 60%. It is significant as indicating increased caution among the financial public of Great Britain.

Car loadings for the week ending June 12 were 1,060,214, an increaes of 114,250 over the preceding week and 70,341 over the corresponding week of 1925.

Boston wired that the Pacific mills will close down the print works at Lawrence substantially in full from June 25 to July 6 for stock taking, and the cotton and worsted departments will be closed down from June 30 to July 6. Another dispatch from Boston stated that the Arlington mills will reduce the quarterly dividend to $1 50, thus breaking the annual rate of $8 which had been paid since Oct. 1 1917, in addition to a stock dividend of 50% in April 1920. At Lowell, Mass., the local Chamber of Commerce is making a strenuous effort to keep the Lawrence Manufacturing Co. from passing out of existence, with no success, it is said. The liquidation steps are being continued. At one time this company employed well over 4,000 operatives, manufacturing hosiery and underwear, and was said to be the largest plant of its kind in the world. If the mills really go under, as it now seems inevitable, the loss to Lowell will be most severe. On the other hand, regarding the local textile situation, it is stated that business with the Merrimac and Booth mills is good. Under its new management the Tremont and Suffolk mills are also starting to show signs of activity. At New Bedford, Mass., mill curtailment was reported to be steadily increasing. One mill has stopped the night shift and another plant will run only four days a week. In the New Bedford, Mass., district, it is estimated that fully 25,000 looms are standing idle in the mills. This amount of curtailment has rarely been equaled.

At Adams, Mass., on July 21, a strike of 1,800 of the 2,000 employees at the Berkshire Cotton Co., the largest industry in Adams, stopped work. The Polish Weavers' Union voted for a strike after the discharge of 40 spreader tenders, who quit work as a protest against operating three machines instead of two. After the men had walked out they were

informed that their places would be filled by other workers. The plant has been running on a five-days-a-week schedule and the strike is the first that has occurred there in a number of years. The only trouble is that the owners of the mill seem to want to manage their own property.

At Ipswich, Mass., the Ipswich mills, manufacturers of hosiery, are very busy and are operating night shifts in certain departments and are said to be short of certain classes of help. At Enfield, N. H., the Baltic mills, owned by the American Woolen Co., will start its mills on full time June 28. There will also be a night shift. A large order for goods has been received that will assure work for a long period of time. The mills have been running on a five-day-week and night work was suspended about a year ago. At Lewiston, Me., the Bates Manufacturing Co. will be closed down during the week of July 5 to 10.

At Jewell City, Conn., the directors of the Briggs Manufacturing Co., which operates cotton mills there and at Voluntown, have voted to liquidate and discontinue manufacturing. The directors operated two mills in both towns, employing 250 hands. The assessed valuation of the properties is about $200,000. At Charlotte, N. C., cotton yarn production last week, it is stated, was at the low point for the year and the stock situation is declared to be favorable. The convention of the Cotton Manufacturers' Association of North Carolina opened at Asheville, N. C., to-day. The Alexander Mills, Inc., of South Carolina, are operating full time day and night and shipping on an average of four full cargoes of bed sheeting and pillow cases daily. Cotton mills of the Greenville, S. C., section are likely to enjoy better times after July 1, according to T. M. Norris, President of the Norris cotton mill. He says there does not appear to be any large supply of cotton goods on hand and therefore looks for fall buying to begin early in July.

Governor Thomas C. McLeod has issued a proclamation calling upon the people of South Carolina to observe the week beginning June 28 as "Cotton Goods Week," according to a dispatch from Columbia, S. C. At Philmont, N. Y., the High Rock knitting mills, large manufacturers of fleece-lined underwear as well as other types of underwear, announced this week that they will close down their plant for two weeks, beginning June 30, for the purpose of making repairs and allowing employees a vacation. Advices from Milan, Italy, say that the Italian cotton spinning industry has agreed to reduce production one-sixth for a month because of the sagging yarn prices.

It was warm here early in the week and on the 23d inst. came rains amounting to 1.33 inches. The thermometer early in the week was up to 76. On the 23d it was 65 to 69 here, 60 to 70 in Chicago, 58 to 76 in Cleveland, 60 to 80 in Cincinnati, 54 to 64 in Milwaukee and 48 to 78 in Minneapolis and St. Paul. Heavy rains occurred in the far Southwest and also in parts of the Eastern Gulf States. The drought was broken in the Carolinas and Georgia. The nights were unaccountably cool over much of the cotton States, though the days were seasonably warm. Light frosts occurred in North Dakota. Here to-day it was 80 degrees at 3 p. m., as against 64 at 8 a. m. The tendency in eastern United States is to continue fair and warmer, but in New York the forecast is for partly cloudy or occasional showers to-night and Saturday.

Real Estate Market Shows Recession of Ten Points.

Real estate market activity for May showed a recession from the preceding month, according to the index of market activity compiled by the National Association of Real Estate Boards from official records of transfers and conveyances recorded in 41 typical cities. The Board's advices, under date of June 17, also says:

The index for May stood at 163. This is ten points lower than the index for April of this year, and five points lower than was registered for May of 1925. It is 13 points higher than the index figure for May of 1924.

The index figure of 163 means that the average number of transfers and conveyances recorded in the cities studied during the month was 63% greater than the average number recorded during the same month in the period 1916-1923, which is the period whose record is taken as the norm of the Association's calculations.

February marked the peak reached up to the present point in real estate activity during the present year, according to the Association's index. The figure for that month was 185, the highest point attained in any month during the years 1916-1926 covered by the Association's study.

Large Volume of Ordinary Life Insurance Sold in May—5% Increase for the Five-Month Period.

The sales of ordinary life insurance in the United States during the month of May totaled $735,724,000, according to a report just published by the Life Insurance Sales Research Bureau of Hartford, Conn. The Bureau says:

This figure includes the sales of new paid-for ordinary insurance as reported by 81 companies having in force 88% of the total life insurance outstanding in the United States legal reserve companies. The amount of insurance sold during the month is practically identical with that sold in May 1925 when the sales were 16% ahead of the previous May. The record of May this year has been exceeded only in four previous months, namely, in May and December of 1925 and in March and April of this year.

The largest sectional increase in sales this month over a year ago is 9% in the Mountain States. This section comprises Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah and Nevada.

State Increases.

The best increases in the States are 48% in Delaware and 29% in Florida. Sales in Florida during the month of May totaled $11,775,000, as compared to $9,108,000 in May 1925.

The amount of insurance purchased during the first five months of this year aggregated $3,483,442,000, an increase of $155,459,000, or 5%, over the same months of 1925. Every section of the country shares in the general gain for the first five months The South Atlantic States lead in the year-to-date gain with an 11% increase. Practically all the States show increases for the first five months of 1925. Florida leads in the cumulative comparison with a gain of 60%.

The increase in the twelve months ended May 31 1925 over the preceding twelve months is 12%. All sections share in the general gain. The increases range from 6% in the West South Central States to 18% in the South Atlantic States.

May Life Insurance Sales in Canada 10% Higher than Last Year.

Canadian purchases of ordinary life insurance during the month of May are 10% ahead of the corresponding period of last year, according to figures just issued by the Life Insurance Sales Research Bureau of Hartford, Conn. During the month $37,703,000 of new business was paid for by the reporting companies, which have in force 84% of the outstanding business in Canada, says the Bureau, which, continuing, states:

This is three million more than was paid for in May of last year. Sales have reached this height only in three other months since 1921, namely, in December and June 1925 and in March of this year.

All the Provinces in the Dominion, with the exception of Alberta and Ontario, show improved conditions. Saskatchewan and British Columbia lead with gains of 36% and 27%, respectively. The increases range from 6% in Manitoba to the record gain of 36% in Saskatchewan. Both New Brunswick and Newfoundland show increases of 26%.

Among the cities improvement is most noticeable in Montreal and Vancouver, each with gains of 19%. Quebec follows with a 10% increase.

In the first five months of the year sales are $19,397,000 ahead of the sales in the corresponding period of last year, or a 12% increase. Every Province shows a gain for the first five months. Saskatchewan leads in the year-to-date gain with a 31% gain. Ontario and Quebec, the two most important Provinces, show increases of 9% and 13%, respectively.

The gain in the twelve months ended May 31 1926 over the preceding twelve months is 13%. Every Province with the exception of New Brunswick shares in the gain.

Industrial Conditions in Illinois in May—Analysis by Cities.

Supplementing its general review of the industrial situation in Illinois during May, to which we referred last week (page 3275) the Illinois Department of Labor (through its Bureau of Industrial Accident and Labor Research) made public on June 14 as follows its analysis of the situation by cities:

Aurora.—With only two exceptions the 17 reporting factories in this city had reductions in employment during May. Plants in the metals and textiles industries showed the most marked decreases. The aggregate loss amounted to 4.6%. This was the first adverse trend in factory employment since last September—the seven months beginning with October and ending with April showing increases which ranged from 2-10 of 1% in January to 3.5% in February. In spite of the slowing down of manufacturing operations, the general employment situation in Aurora remained relatively good. This is shown by the ratio of 110 applicants at the State free employment office for each 100 job opportunities. This ratio, the same as that in April, is evidence of great improvement since February, when there were 175 applicants for each 100 jobs, and also indicates substantial betterment over a year ago, when the ratio was 129. The May ratios in 1924 and 1923 were, respectively, 132 and 99. New buildings authorized showed substantial increases in estimated cost over April and May a year ago. The May 1926 total amounted to $501,219—nearly $100,000 greater than the figure for the previous month and $160,000 more than the total a year ago.

Bloomington.—Reporting factories in this city added 1.6% to the number of the workers on their payrolls, thus reversing the downward employment trend which was shown during the two months previous. Increases prevailed at the metals and machinery plants, while food products factories, with the exception of canneries, reported decreases. Superintendent Jones of the State free employmnt office reported that the foundries are working a five-day week and candy factories are on a full-time schedule but with cut forces. He also reported large lay-offs by the railroad shops. During May the free employment office ratio reflected the substantial improvement which has resulted from increased hirings on the part of farmers and the large volume of building activity. The most recent ratio showed 115 registrations for each 100 jobs open, compared with an April ratio of 131 and one of 137 in May 1925. Although there was a considerable demand in May for help in connection with work on new construction, both road construction and building being involved, the local supply of labor was adequate to meet the demand. Authorization for new building jumped in value from $68,250, the April total, to $227,000 in May. However, May this year was $157,000 behind the figure a year ago.

Chicago.—A slight gain in aggregate factory employment during May was shown by the reports from 593 Chicago firms. The gain amounted to 2-10 of 1%, exactly the same percentage of decrease which took place in the previous month. In May of each of the two years preceding, Chicago

factories have reported aggregate reductions in employment of between 1 and 2%. This year the main reason for the relatively good showing was that employment in the metals and machinery plants held up well with the exception of those producing iron and steel. Men's clothing continued to report reductions, although some firms had small accessions to the number of their workers. The Chicago offices of the State Free Employment Service placed 8,392 workers, a gain of 637 over April and 2,821 more than in May last year. There were 122 registrations for each 100 jobs available, the same as the ratio for the entire State. That the general employment situation was the best for May since 1923 is shown by the following ratios: 1925, 145; 1924, 163; 1923, 99. The value of the 3,711 new buildings authorized was $32,912,295. There was a decrease of $8,180,440 from the April valuation, in spite of 1,496 more buildings being authorized. In May a year ago permits were issued for buildings valued at $42,051,450.

Cicero.—The loss of employment in manufacturing for this city amounted to 1.3%, reports from eight representative firms indicate. Most significant in causing a decline in employment were reductions in the metals and machinery group of industries—though losses did not prevail at all of the plants in this group. There was continued betterment in the general employment situation, the report from the State free employment office revealed. While the ratio of 141 applicants for each 100 jobs available, compared with 147 in April still showed a large surplus of labor, the number of placements was 755, the largest total for any month during the history of the office. A factor contributing to the good placement showing in May was the opening of several new factories. Building is booming and the erection of new structures promises to be on a still more extensive scale. This is shown by the most recent figures; the 121 new buildings authorized were at an estimated cost of $801,400, nearly $255,000 more than the April figure. The value placed upon new construction in May 1925 was $557,879.

Danville.—A decided upward trend was shown by the reports from 18 manufacturing establishments in this city. The gain amounted to 10.7% and was well distributed among the different industries. Seasonal increases at the brick kilns were most marked, but betterment was reported by firms engaged in making food products as well as by those in other lines of industry. While several firms reported the same number of employees on their payrolls as in April, only one showed a decrease. In spite of the improvement in factory employment and an active demand for farm hands and for common labor in building construction, the ratio of applicants to jobs open at the State free employment office showed more unemployment than in April. The reason for this was decreasing employment in the coal mines. The most recent ratio at the free employment office was 152, compared to a ratio of 141 in April. May of this year was much better than in 1925, when there were 418 registrations for each 100 jobs open or in 1924, when the ratio was 394. But in 1923 the ratio was 100. Permits were let for new building estimated to cost $71,500—an increase of $6,500 over April.

Decatur.—Employers of factory labor added 2-10 of 1% to the number of workers on their payrolls in May. An upward employment trend was reported at most of the metal plants and also at those making food products. Clothing factories and paper goods plants showed reductions. Most plants were operating on a normal basis, but some of them, because of the volume of their orders have been compelled to operate at night. Superintendent Metts of the State free employment office reported that the volume of construction work, including public improvements, is gradually absorbing the surplus of common labor. At the end of the month there was still considerable demand for farm labor. The ratio of registrations to help wanted at the free employment office was practically the same for May as for April—the May ratio was 128, while that for April was 129. Placements, however, increased from 527 to 780. Last year there were 147 registrations for each 100 jobs available. The number of new buildings authorized decreased from 180, the April figure, to 165, but their estimated cost of $617,925 was $207,650 greater, and far ahead of last year's May total of $136,725.

East St. Louis.—There was an aggregate reduction in employment in the 25 reporting factories of this city of 2.6%. With the exception of food products firms, which reported additional employees, reductions were rather general. The principal factor in the downward trend was marked decreases at several of the metals plants. Reports from the State free employment office indicate further improvement in the direction of reducing unemployment. There were 160 applicants for each 100 jobs open, compared with 171 in April, 197 in March and 251 in February. The May ratio a year ago was 221, while in 1924 it was 212 and in 1923 92. The estimated cost of new buildings the construction of which was authorized in May amounted to $1,278,485—nearly a million dollars ahead of the April total. The increase was due to the inclusion in the May figure of a large hotel.

Joliet.—Twenty-nine manufacturing concerns in this city reported an aggregate increase in employment of 2.2%. Gains were well distributed, but applied especially to plants producing stone and clay products and metals and machinery. At the State free employment office there were 115 applicants for each 100 job opportunities. There has been steady improvement in general employment since January, when there were 220 applicants for each 100 jobs open. The April ratio was 137, while the ratio a year ago was 129 and that for May 1924 132. Placements this year in May numbered 936, compared with 559 a year ago and 535 in May 1924. Superintendent Rogers of the free employment office stated that placements in the men's division exceeded those for any month since war-time. He ascribed this to the heavy demand for workers in out-of-door industries, especially in the construction industries. All building trade workers in Joliet were reported to be busy, although contractors appeared to be well supplied with help. At the end of the month there was a shortage of about 50 experienced farm hands.

Moline-Rock Island.—The employment trend was mixed among the 21 manufacturing concerns in Moline which reported to the Illinois Department of Labor. The net decrease in the number of workers was 3.6%. Agricultural implement factories were most responsible for the decline, due in part to the taking of inventory by such factories. Among the other metals and machinery plants a number reported substantial employment gains. Factory employment in Rock Island, taken as a whole, showed little change from April, the gain amounting to 6-10 of 1%. Placements by the State free employment office numbered 787—106 more than in April. There were 119 persons to register for each 100 requests from employers. The ratio of registrations to requests a month earlier was 127 and in May 1925 120. Superintendent Campbell at the end of the month reported that there had been many requests for farm hands and that his office was unable to meet the demand. Building has been active, especially in residential construction. In Moline the gain in cost over April amounted to only $11,500, but the total of $133,594 was nearly double the May 1925 figure. Permits were let in Rock Island for $102,509 worth of new building—an increase of $54,558 over April and over $14,000 more than a year ago.

Peoria.—Thirty-seven firms reported an aggregate gain in factory employment of 1.3%. This was the sixth successive month during which increasing employment has been reported in this city. The most substantial increase was in April, when an addition of 4% was made to the number of jobs. The May report shows slight increases for most of the industries represented, although there were reductions at the plants manufacturing chemicals. The report from the State free employment office showed that a surplus of labor still existed. However, the ratio of 146 registrations for 100 jobs available indicated marked betterment over April, when the ratio was 185. In comparison also with a year ago there was less unemployment, for the ratio at that time was 168. Placements in May this year numbered 1,066, while a year ago 752 workers were placed. New buildings authorized in May were valued at $569,310, an increase of $206,000 over April, but nearly $200,000 behind the total for May of last year.

Quincy.—In spite of reduced employment at nearly half of the 17 reporting factories, an aggregate increase of 1.5% took place in the number of workers with jobs. Increases were most substantial at plants in the shoe and metals industries. The State free employment office reported that during May there were 144 registrations for each 100 jobs open, thus indicating an adverse change in employment from April, when the ratio was 137. There were 75 more workers placed in jobs during May than in April. May of this year was the best since 1923: the ratio of registrations to help wanted for May of the three preceding years was as follows: 1925, 166; 1924, 163; 1923, 57. Authorizations for new construction amounted to $100,475. This was $48,300 less than the April figure, but about $10,000 ahead of a year ago.

Rockford.—There was a drop of 4.1% in the number of workers on the payrolls of 60 reporting factories. Chiefly contributory to the loss were important reductions at most of the furniture plants and also at those making metals and machinery. Many of the factories of Rockford during May were operating on a short day and a five-day week. Although factory employment was on the downgrade, heavy demands for help from farmers and for workers in the construction industries brought about an increase in the number of placements by the State free employment office. The number of workers placed in jobs during May was 1,712 in comparison with 1,291 in April. The ratio of registrations to job opportunities continued to be quite favorable: there were 90 registrations in May for each 100 jobs open, while the ratio in April was 83. The ratio in May a year ago was 87 and in 1924 it was 89. Permits were issued during May for 243 buildings, estimated to cost $835,930. This was $207,640 more than the value placed on the 227 buildings authorized in April and nearly $250,000 greater than the total in May 1925.

Springfield.—A reduction of 2.8% in factory employment was revealed by reports from 10 firms in this city. Seasonal lay-offs at plants making agricultural machinery were the principal factors. During the six months preceding May, firms in Springfield have each month reported gains in employment over the preceding 30-day period. Although reductions at the coal mines added to the number of those without jobs, the State free employment office records show a slight improvement in the general employment situation. This was due to the demand for workers in out-of-door industries. There were 109 registrations for each 100 jobs open, compared with 113 in April. The free employment office ratio in May of the two preceding years was 118, while in 1923 it was 100. New building valued at $625,965 was authorized in May—nearly $300,000 more than in April and about $223,000 more than last year's May total.

Lumber Industry Steady.

Telegraphic reports received by the National Lumber Manufacturers' Association from 391 of the larger softwood and 149 of the chief hardwood mills of the country show apparently no noteworthy change in the lumber industry's activities. The 377 comparably reporting softwood mills show small decreases in production, shipments and new business when compared with reports received last week, when, however, 13 more mills reported. In comparison with reports from 361 mills a year ago, increases in all three items were noted, particularly heavy in production and new business.

The hardwood operations, when compared with reports from 151 mills a week earlier, show production and shipments about the same, and a marked decrease in new business.

Unfilled Orders.

The unfilled orders of 224 Southern Pine and West Coast mills at the end of last week amounted to 656,429,072 feet, as against 660,860,647 feet for 228 mills the previous week. The 120 identical Southern Pine mills in the group showed unfilled orders of 243,706,995 feet last week, as against 247,644,810 feet for the week before. For the 104 West Coast mills the unfilled orders were 412,722,077 feet, as against 413,215,837 feet for 108 mills a week earlier.

Altogether, the 377 comparably reporting softwood mills had shipments 93% and orders 97% of actual production. For the Southern Pine mills these percentages were respectively 106 and 100 and for the West Coast mills 92 and 104.

Of the reporting mills, the 339 with an established normal production fo the week of 218,969,096 feet, gave actual production 106%, shipments 101% and orders 106% thereof.

The following table compares the national softwood lumber movement as reflected by the reporting mills of eight regional associations for the three weeks indicated:

	Past Week.	*Corresponding Week 1925.*	*Preceding Week 1926 (Revised).*
Mills	377	361	390
Production	277,757,769	257,330,072	284,033,584
Shipments	258,630,546	249,986,521	281,561,430
Orders (new business)	268,729,642	244,044,508	276,334,329

The following revised figures compare the softwood lumber movement of the same eight regional associations for the first 24 weeks of 1926, with the same period of 1925:

	Production.	*Shipments.*	*Orders.*
1926	6,210,503,706	6,393,187,791	6,379,842,538
1925	5,992,198,105	6,053,203,649	5,906,149,641

The Southern Cypress Manufacturers' Association of New Orleans (omitted from above tables because only recently reporting) for the week ended June 16 reported from 14 mills a production of 4,776,916 feet, shipments 3,140,000 and orders 3,400,000. In comparison with reports for the previous week, this association showed some increase in production, a material decrease in shipments, and a slight decrease in new business.

West Coast Movement.

The West Coast Lumbermen's Association wires from Seattle that new business for the 104 mills reporting for the week ended June 19 was 4%

above production, and shipments were 8% below production. Of all new business taken during the week, 45% was for future water delivery, amounting to 51,132,978 feet, of which 34,127,850 feet was for domestic cargo delivery and 17,005,128 feet export. New business by rail amounted to 57,969,505 feet, or 50% of the week's new business. Forty per cent of the week's shipments moved by water, amounting to 40,866,455 feet, of which 23,851,664 feet moved coastwise and intercoastal, and 17,014,791 feet export. Rail shipments totaled 54,858,662 feet, or 54% of the week's shipments, and local deliveries 5,680,700 feet. Unshipped domestic cargo orders totaled 138,313,615 feet, foreign 123,513,262 feet, and rail trade 150,894,800.

Labor.

The Douglas fir lumber industry is experiencing the lowest labor turnover it has known since last fall, according to the Four L Employment Service. Both logging camps and sawmill crews are unusually steady. Fire hazards have prevailed in a number of districts, while other camps are preparing for the July shutdown period. Lumber manufacturing is holding at approximately the same level as for the past month. Light labor turnover is also reported east of the Cascades from all districts, and especially from the pine logging and lumbering industry. Two night shifts were added to pine sawmills, while at another plant a second shift was closed down. There has been no further extension or curtilment of woods operation.

Southern Pine Reports.

The Southern Pine Association reports from New Orleans that for 120 mills reporting, shipments were 5.72% above production and orders 0.24% below production, and 5.64% below shipments. New business taken during the week amounted to 65,921,940 feet, shipments 69,859,755 feet, and production 66,077,817 feet. The normal production of these mills is 72,707,238 feet. Of the 114 mills reporting running time, 79 operated full time, 22 of the latter overtime. One mill was shut down, and the rest operated from three to five and one-half days.

The Western Pine Manufacturers' Association of Portland, Ore., with one more mill reporting, showed a slight decrease in production, and small increases in shipments and new business.

The California White and Sugar Pine Manufacturers' Association of San Francisco, Calif., with five more mills reporting, showed considerable increases in production (71% of total cut of California pine region) and shipments, and new business well in advance of that reported the week earlier.

The California Redwood Association of San Francisco, Calif., reported some decrease in production and heavy decreases in shipments and new business.

The North Carolina Pine Association of Norfolk, Va., with six more mills reporting, showed a marked increase in production, a nominal increase in shipments and a big gain in new business.

The Northern Pine Manufacturers' Association of Minneapolis, Minn., reported a slight increase in production, a substantial increase in shipments, and new business well ahead of that reported the previous week.

The Northern Hemlock (and Hardwood Manufacturers' Association of Oshkosh, Wisc. (in its softwood production), with two fewer mills reporting, showed production about the same, a nominal decrease in shipments, and an exceptionally heavy decline in new business.

Hardwood Reports.

The hardwood mills of the Northern Hemlock and Hardwood Manufacturers' Associaion reported from 19 mills production as 4,221,000 feet, shipments 3,695,000, and orders 1,814,000.

The Hardwood Manufacturers' Institute of Memphis, Tenn., reported from 130 units, production as 21,491,213 feet, shipments 18,460,426, and orders 1,814,000. The nominal production of these units is 22,769,000 feet.

For the past 24 weeks all hardwood mills reporting to the National Lumber Manufacturers' Association gave production 690,869,712 feet, shipments 650,509,266, and orders 663,913,635.

West Coast Lumbermen's Association.

One hundred and eight mills reporting to West Coast Lumbermen's Association for the week ending June 12 manufactured 116,147,029 feet of lumber, sold 118,162,904 feet and shipped 122,077,569. New business was almost 2% above production. Shipments were around 5% above production.

COMPARATIVE TABLE SHOWING PRODUCTION, NEW BUSINESS, SHIPMENTS AND UNFILLED ORDERS.

Week Ending—	*June* 12.	*June* 5.	*May* 29.	*May* 22.
Number of mills reporting	108	107	106	109
Production (feet)	116,147,029	109,032,816	114,141,620	115,012,279

Price Reductions and New Automobile Models.

The Ford Motor Co. on June 19 announced a reduction of from $15 to $45 on all models effective at once. When it is considered that the new prices include self-starter on all models and balloon tires on all passenger cars and front-wheel balloon tires on trucks, it is seen that the reductions actually range from $35 to $67 50. The new prices are the lowest ever quoted for Ford cars and compare as follows: (Cost of corresponding "additional equipment" being added to old price.)

Models (f.o.b. Detroit)—	*New Prices.*	*Old Prices.*	*Reduction.*
Runabout	$360	$400	$40
Touring	380	420	40
Coupe	485	525	40
Tudor Sedan	495	545	50
Fordor Sedan	545	590	45
Chassis	300	335	35
Truck chassis	375	442.50	67.50

The customary differential between Canadian and American Ford prices will be maintained, as on June 22, the Ford Motor Co. of Canada reduced all models by from $40 to $65. Balloon tires are now part of the standard equipment, as is the self-starter on touring and runabouts, in addition to all closed models. The new price list reads as follows:

Model—	*New.*	*Old.*	*Reduction.*
Runabout	$460	$475	$50
Touring	480	495	50
Sports roadster	555	595	40
Coupe	610	625	50
Tudor	625	650	60
Fordor	690	710	55
Chassis passenger	350	375	40
Light Del Truck	470	495	60
Light Del Van	525	540	50
Truck without starter	395	445	50
Truck with starter	460	525	65

An entirely new type of 4-cylinder car was introduced on June 21 by Willys-Overland, Inc. Of an European type, this car is low and light, weighing slightly over 2,000 pounds. The price list for the Overland Whippet, as the new model has been named, is $695 for the touring, $735 for the two-door sedan and $695 for the two-passenger coupe, f.o.b. factory. The company's announcement regarding the new model says in part:

The sedan will travel 58 miles an hour and is equipped with a 4-cylinder motor. It will accelerate from 5 to 25 miles an hour in 10 seconds and will cover 28 to 30 miles on a gallon of fuel. It is equipped with four-wheel brakes.

The motor develops 23% more power, per cubic inch of piston displacement, than any other light 4-cyliner motor built in America this is one of the results of utilizing the European type of high speed motor design. It develops greater brake horsepower than any other light 4-cyliner car in this country and weighs a little over 2,000 pounds. The power plant turns over 2,800 revolutions a minute and gives a developed power of 30.5 h.p. from an S.A.E. rating of 15.6 h.p. The total piston displacement is 134.2 cubic inches, somewhat larger than that of the average European light car, but less than any other American built 4-cylinder car.

The roof of this new type car is only 5 feet 8 inches from the ground yet the room inside the body is greater than in any other light car now on the market. Its first appearances is striking in the extreme. A man of average height can stand alongside it at the curb and rest his arms on the top and look over it. But a 6-footer can sit in it with all the room he wants. In this respect it is thoroughly American and bears no relationship to its diminutively dimensioned European cousins.

A new sport touring car has just been added to the Dodge Bros., Inc., line. Special equipment includes one-piece windshield with automatic cleaner, robe rail, front and rear bumpers, bullet shaped head lamps and cowl lamps, rear view mirror and scuff plates. The car's wheelbase is 116 inches.

Increase in May in Canadian Exports of Pulp and Paper.

The Montreal "Gazette" of June 21 states that Canadian exports of pulp and paper in May showed a considerable increase over the previous month, according to the report issued by the Canadian Pulp and Paper Association. Total exports for the month were valued at $13,143,410, as compared with $10,994,458 in April and with $12,451,667 in May 1925. Exports of woodpulp in May were valued at $3,756,685 and exports of paper at $9,386,725, compared with totals of $3,163,773 and $7,830,685 respectively in the month of April. We also take from the "Gazette" the following table showing the details for May 1926 and May 1925:

	——*May* 1926——		——*May* 1925——	
Pulp—	*Tons.*	$	*Tons.*	$
Mechanical	20,652	593,845	24,701	663,279
Sulphite—Bleached	14,407	1,133,950	14,917	1,135,693
Unbleached	21,451	1,224,524	20,620	1,051,699
Sulphate	12,756	804,366	11,537	717,493
	69,266	3,756,685	71,775	3,568,164
Paper—				
Newsprint	135,251	8,870,192	115,766	8,205,266
Wrapping	1,301	153,226	2,564	327,458
Book (cwts.)	7,830	62,595	1,098	12,929
Writing (cwts.)	1,707	11,273	476	4,052
All other	----	289,439	----	333,798
		9,386,725		8,883,503

Pulp and paper exports for the first five months of the year were valued at $68,179,870, as against $60,758,651 in the corresponding five months of 1925, which is an increase for the current year of $7,421,219, or over 12%. Woodpulp exports in this period amounted to $20,422,028 and exports of paper to $47,757,842, in each case showing a substantial increase over last year's figures.

Details for the period are as follows:

	—5 *Months* 1926—		—5 *Months* 1925—	
	Tons.	$	*Tons.*	$
Mechanical	117,250	3,405,710	107,792	3,111,524
Sulphite—Bleached	79,767	6,251,425	76,559	5,648,545
Unbleached	113,684	6,452,054	98,979	5,234,292
Sulphate	69,256	4,312,839	59,510	3,667,678
	379,957	20,422,028	342,840	17,662,039
Paper—				
Newsprint	676,214	44,559,989	562,570	39,882,114
Wrapping	8,098	1,038,822	8,992	1,236,271
Book (cwts.)	20,178	175,455	13,056	120,857
Writing (cwts.)	6,709	51,427	4,716	41,937
All other	----	1,932,149	----	1,815,433
		47,757,842		43,096,612

The "Gazette" also says:

In the five months' period the exports of woodpulp amounted to 379,957 tons, which was an increase of 37,117 tons, or nearly 11%, over the 1925

figures for the same period. All grades of pulp shared in this increase, the greatest gain being shown in unbleached sulphite, in which there was an increase of 16%.

Increases in the exports of paper were also appreciable in most grades. Newsprint shipments were 676,214 tons, as against 562,570 tons in the five months of 1925, a gain of 113,644 tons, or 20%. Book and writing papers also showed substantial increases.

Exports of pulpwood, the raw material of the industry, have been smaller this year than for the last two years, the total amount exported during the first five months being 497,318 cords, valued at $4,564,553, compared with 634,926 cords, valued at $5,972,198, in 1925, and 562,917 cords, valued at $5,399,314, in 1924.

Automobile Production in May Continued Large.

May production of motor vehicles was again large; as reported to the Department of Commerce, it consisted of 394,781 passenger cars and 51,374 trucks, of which 371,595 passenger cars and 48,082 trucks were made in the United States, and 23,186 passenger cars and 3,292 trucks were produced in Canada. This was a little less than the output for April, but well above the output for May last year.

The table below is based on figures received from 173 manufacturers for recent months, 65 making passenger cars and 125 making trucks (17 making both passenger cars and trucks). Data for earlier months include 75 additional manufacturers now out of business, while May data for 15 small firms, mostly truck manufacturers, were not received in time for inclusion in this report. Figures on truck production also include fire apparatus, street sweepers and buses.

AUTOMOBILE PRODUCTION—NUMBER OF MACHINES.

Crude Oil and Gasoline Prices Fairly Steady.

Little change occurred in the prices listed for crude oil and wholesale gasoline throughout the week. At the end of the week the price of U. S. motor grade gasoline is 11½c. a gallon flat, against 11½ to 11¾c. previously. Kerosene, 41-43 water white, on June 19 was reduced ¼ cent a gallon to 7¾@8c. and on June 22 showed a further loss of ¼c. a gallon, falling to from 7½ to 7¾c. This grade of kerosene continued to decline, being quoted on June 22 at 7¼ and 7½c. a gallon; on June 23 at 6¾@7¼c. a gallon, the minimum price since last April, and on June 25 at 6½ to 6¾c. a gallon.

Meanwhile the U. S. motor grade gasoline kept at the level of 11½c. per gallon.

The Humble Oil & Refining Co. on June 21 made its first price posting on Panhandle crude oil, meeting the former postings to a high point of 39 gravity and adding 5 new grades, each 5c. higher, making the top grade 44 and above $2 15, and the low grade 28 degrees at $1 35. On June 24 the Texas Co. announced a new schedule of prices for Caddo crude oil effective June 23. The previous schedule was $1 85 a barrel for all crude below 32 gravity. While the new schedule does not affect the price above 32 gravity there is a rather substantial reduction in the lower grades. The new schedule is as follows: 26 to 28.9 gravity, $1 55; 29 to 31.9 gravity, $1 70; 32 to 34.9 gravity, $2 25; 35 to 37.9 gravity, $2 35; 38 gravity and above, $2 45. A dispatch from Houston on that day states that the new schedule of prices listed by the Texas Co. for Caddo oil resulted from the fact that this crude contains little if any gasoline and it is mostly for the fuel oil market.

No changes were announced by the retail gasoline companies beyond the reduction of 1 cent a gallon in Chicago tank wagon and service station price on 60-62 gravity gasoline by the Texas Co.

Output of Crude Oil Decreases Slightly.

The production of crude oil remains at substantially the same level despite a falling off in the daily average of 2,550 barrels during the week ended June 19. According to the American Petroleum Institute the estimated daily average gross crude oil production in the United States for the week ended June 19 was 2,011,600 barrels, as compared with 2,014,150 barrels for the preceding week. The daily avearge production east of California was 1,402,100 barrels, as compared with 1,410,450 barrels, a decrease of 8,350 barrels. The following are estimates of daily average gross production by districts for the weeks given:

DAILY AVERAGE PRODUCTION.

(In Barrels)—	*June 19'26.*	*June 12'26.*	*June 5'26.*	*June 20'25.*
Oklahoma	458,900	458,400	455,850	451,700
Kansas	107,750	107,200	107,450	103,750
North Texas	133,500	123,950	121,750	88,900
East-central Texas	51,750	52,150	54,100	113,300
West-central Texas	82,200	87,450	86,100	96,600
Southwest Texas	38,300	38,450	36,800	49,600
North Louisiana	59,250	60,700	61,450	51,250
Arkansas	165,200	170,550	173,350	302,250
Gulf Coast	86,150	91,000	90,850	104,350
Eastern	106,500	106,500	106,500	104,500
Wyoming	71,950	73,900	70,950	79,600
Montana	28,000	28,000	28,000	12,200
Colorado	8,250	7,750	7,450	1,450
New Mexico	4,400	4,450	4,350	2,500
California	609,500	603,700	604,500	635,500
Total	2,011,600	2,014,150	2,009,450	2,197,450

The estimated daily average gross production of the Mid-Continent field, including Oklahoma, Kansas, north, east-central, west-central and southwest Texas, north Louisiana and Arkansas, for the week ended June 19 was 1,096,850 barrels, as compared with 1,098,850 barrels for the preceding week, a decrease of 2,000 barrels. The Mid-Continent production, excluding Smackover, Arkansas, heavy oil, was 970,850 barrels, as compared with 967,350 barrels, an increase of 3,500 barrels.

In Oklahoma, production of South Braman is reported at 10,600 barrels, against 10,950 barrels; Thomas, 2,600 barrels, against 2,550 barrels; Tonkawa, 36,450 barrels, against 34,800 barrels; Garber, 37,250 barrels, against 39,600 barrels; Burbank, 45,550 barrels, against 45,650 barrels; Davenport, 10,300 barrels, no change; Bristow-Slick, 29,650 barrels, against 29,700 barrels; Cromwell, 17,500 barrels, against 17,200 barrels; Papoose, 10,850 barrels, no change; and Wewoka, 29,600 barrels, against 28,200 barrels.

In north Texas, the Panhandle District is reported at 49,000 barrels, against 39,750 barrels, and Archer County, 32,700 barrels, against 32,900 barrels. In east-central Texas, Mexia, 12,250 barrels, against 12,400 barrels; Corsicana-Powell, 29,450 barrels, against 29,650 barrels; Wortham, 7,650 barrels, no change; Reagan County, west-central Texas, 30,300 barrels, against 32,700 barrels, and in the southwest Texas field, Luling, 21,600 abrrels, against 21,900 barrels; Lytton Springs, 4,650 barrels, against 4,900 barrels. In north Louisiana, Haynesville is reported at 10,000 barrels, no change; Cotton Valley, 8,500 barrels, against 8,700 barrels; Urania, 15,650 barrels, against 16,400 barrels, and in Arkansas, Smackover light, 17,000 barrels, against 16,800 barrels; heavy, 126,000 barrels, against 131,500 barrels, and Lisbon, 10,350 barrels, against 10,500 barrels. In the Gulf Coast field, Hull is reported at 17,550 barrels, against 18,650 barrels; West Columbia, 8,650 barrels, against 8,450 barrels; Spindletop, 4,300 barrels, against 4,250 barrels; Orange County, 8,300 barrels, against 10,900 barrels; South Liberty, 5,200 barrels, against 4,750 barrels, and Boling, 2,300 barrels, against 3,200 barrels.

In Wyoming, Salt Creek is reported at 50,000 barrels, against 53,150 barrels, and Sunburst, Mont., 25,000 barrels, no change.

In California, Santa Fe Springs is reported at 48,500 barrels, no change; Long Beach, 107,000 barrels, against 108,500 barrels; Huntington Beach, 43,500 barrels, no change; Torrance, 29,500 barrels, no change; Dominguez, 21,000 barrels, no change; Rosecrans, 17,000 barrels, no change; Inglewood, 49,000 barrels, no change; Midway-Sunset, 94,500 barrels, no change; and Venture Avenue, 42,000 barrels, against 34,700 barrels.

Steel Orders Increase—Prices Somewhat Higher—Pig Iron Active.

Steel orders are holding up to the better rate that began to be noticed in late May, and there is a more confident attitude toward the market on the part of both consumers and producers, observes the June 24 "Iron Age" in reviewing conditions in the market during the week.

On the one hand buyers are carrying somewhat larger stocks of steel and are less on the qui vive for price changes. At the same time sellers are better maintaining their rate of operations and their prices than seemed likely 60 days ago, continues the "Age," adding the following details:

New business entered in June on the books of the steel mills has been exceeding the rate for May. At the same time, production has shown a moderate decrease, the operating percentage for the month being estimated between 75 and 80. These conditions maintained to the end of the month will make a better showing than that of May, at least to the extent of a smaller reduction in unfilled orders.

Operations in July will show some let-down from the rate in June. Two steel works blast furnaces in the Pittsburgh district are about to go out. Rail mill rollings next month will show a falling off.

Bars, as the form of finished steel in largest use, have been a centre of activity. At Chicago bar specifications in the past three weeks are put at more than 90% of those of an equal period in May. Pittsburgh mills also have received heavy specifications against 1.90c. bar contracts.

In the sheet market the stabilizing effort of some mills is reported, and the low prices of the past fortnight have been less general.

An interesting development in connection with the effort of sheet mills to get lower-priced steel is the naming of $36, Cleveland, for third-quarter sheet bars. So far as Cleveland is concerned this is a concession from the second-quarter price, which has been $36, but with Pittsburgh and Youngstown basing.

Shipments of sheets for the first five months of the year have averaged close to 95% of capacity, judged by the records of the independent producers. For the like period of 1925 the figure was 86. Production balanced

shipments this year but last year outran them. On June 1 the industry had the same backlog of orders as on that date last year.

In respect to bars, plates and shapes, the Pennsylvania RR. lettings of next week are expected to show to what extent recent advances will figure in future business. The Norfolk & Western, Seaboard Air Line and Chesapeake & Ohio are inquiring for their usual quarterly requirements, amounting to several thousand tons.

At Chicago track accessories are in fresh demand, inquiries including 8,000 tons of tie plates and 5,000 tons of angle bars.

Pipe line work is still an important factor. A Youngstown mill has just taken a contract for 100 miles, or 12,000 tons, for the Upham Gas Co. lines in Texas.

Shipments of tin plate in the first half of the year are making another record, exceeding the 20,000,000 boxes of the first six months of 1925.

Bookings of fabricated structural steel for five months covered 1,024,800 tons, compared with 1,000,400 tons and 1,006,330 for the same periods of 1925 and 1924, respectively.

Pig iron sales of the week make the present buying movement the largest since that of November 1924. Cleveland has added 75,000 tons to its previous large total, and in the Cincinnati District 150,000 tons has been closed in two weeks, one steel company taking 100,000 tons for the second half. Low prices led consumers to contract farther ahead than in months. Eastern buying has increased also, Buffalo and Eastern blast furnaces competing sharply, after the recent manner of Lake Erie and southern Ohio producers.

Reports of foundry operations are not uniform. In some districts the rate holds up, but the Ohio foundries which furnish statistics ran at 76% in May, as against 86% in April.

Steel melting scrap has been more active at Chicago, but there is little movement elsewhere, and consumers have shown less interest than dealers.

German iron and steel products continue to come in at regular duties. The Treasury Department has suspended its order, effective June 20, imposing countervailing duties, and meanwhile the German Ambassador will argue for an indefinite suspension.

Rolled steel imports are growing. For April and May the average was 34,000 tons, against 21,000 tons in the first quarter of the year. All iron and steel imports in May were 108,731 tons, the largest since January 1923, when pig iron was pouring in and only 9,000 tons out of a total of 120,000 tons was rolled steel. Last month pig iron was 57,211 tons, and rolled steel 32,543 tons, of which bars were 12,386 tons.

Exports of iron and steel products from the United States in May were 173,418 tons; for the five months, 869,077 tons, or 23% more than in 1925. Steel pipe formed the largest item in May.

An advance in steel beams places the "Iron Age" finished steel composite price at 2.431c. per pound, in place of 2.417c. last week. Pig iron remains at $19 79 for the third week, no change having occurred in any of the four components making up the composite. The table follows:

Finished Steel, June 22 1926, 2.431c. per Pound.

Based on prices of steel bars, beams, tank plates, plain wire, open-hearth rails, black pipe and black sheets, constituting 88% of the U. S. output	One week ago	2.417c.
	One month ago	2.403c.
	One year ago	2.424c.
	10-year pre-war average	1.689c.

Pig Iron, June 22 1926, $19 79 per Gross Ton.

Based on average of basic and foundry irons, the basic being Valley quotation, the foundry an average of Chicago, Philadelphia and Birmingham	One week ago	$19 79
	One month ago	20 04
	One year ago	19 13
	10-year pre-war average	15.72

	Finished Steel—High.		Finished Steel—Low.		Pig Iron—High.		Pig Iron—Low.	
1926	2.453c.	Jan. 5	2.403c.	May 18	$21 54	Jan. 5	$19.79	June 8

Further progress is apparent in the general trend toward greater firmness and stability in iron and steel conditions, declares the June 24 "Iron Trade Review." Forward buying is spreading, prices have become more settled and new requirements have shown that consumption is holding up in places where it was expected to recede considerably. Producers express their surprise at the volume of buying and the general vitality of the market at this Summer period, especially following the heavy shipments of the earlier months. Adds the "Review," giving further facts of interest as follows:

Users of merchant bars are contracting liberally. Pipe is closely pressing steel bars as the market leader, with mills running 85 to 90%. Tin plate demand is unusual for this season.

The industry at large is able to keep production well pegged around 80%, which compares with about 65% at this date last year. Railroad buying this week is marked by 55,000 tons of rails placed by the Norfolk & Western. The Southern closed 10,000 tons. Building steel activity is high. May awards of 234,850 tons or 77% of shop capacity, were well ahead of May, 1925. Awards this week were 39,631 tons.

Steelmaking grades have come to the front the past week in the active buying movement in pig iron. This has been carried to an estimated total of 500,000 tons or more during the last three weeks. American mills are profiting from the tieup of British steel capacity through the receipt of orders for tin plate and sheets from European destinations. More British blast furnaces have been put out. Only two stacks now are active in Scotland.

The Treasury Dept. has acceded the request of the German government to suspend the enforcement of the countervailing duty recently enforced on imports of such German iron and steel products as are believed to receive bounties, until a more complete investigation is made. Pig iron imports in May of 57,211 tons, largely from Germany, made up most of the 108,731 tons of iron and steel received. Exports were lower with 173,418 tons. The "Iron Trade Review's" composite price on 14 leading iron and steel products this week is $37.58. This compares with $37.60 last week and $37.68 the previous week.

Rogers Brown & Crocker Bros., Inc. in their report of the pig iron market speak very encouragingly saying:

We have just gone through another very active week in Pig Iron. The volume of orders is rolling up rapidly, and already in the Central West a number of furnaces have called a halt and firmly advanced prices 50c. per ton. The buying wave was ten days to two weeks late in reaching the Eastern district and it is reasonable to assume that here also a similar stiffening in prices will soon be brought about by the heavy bookings. It does not seem likely that Eastern furnaces will be satisfied to sell their entire last half output at present low prices. The volume of inquiry before the trade s still large and the first sign of advancing prices in the East will probably bring out additional inquiry for those who have overstayed their market. The steel works also report more activity.

Coke and Ferro alloys have been put in the background by the pig iron buying and their prices are unchanged.

Steel and Iron Foundry Operations in Philadelphia Federal Reserve District in May.

According to the Department of Statistics and Research of the Federal Reserve Bank of Philadelphia, reports from steel foundries show that operations during May, as measured by the volume of output, shipments and unfilled orders, were considerably slower than that in April. Compared with a year ago, production of castings was 23.7% smaller, whereas unfilled orders were 38.6% greater and shipments 1.7% larger. Stocks of pig iron at the end of May were substantially lighter than on the same date a month previous and last year. The following table gives comparative data:

STEEL FOUNDRY OPERATIONS—THIRD FED. RESERVE DIST.

	May 1926.	—Per Cent Change— Month Ago.	Yr. Ago.
Capacity, tons	11,940	0	0
Production, tons	7,655	—7.7	—23.7
Shipments, tons	4,990	—11.7	+1.7
Value	$768,127	—4.6	—21.1
Unfilled orders, tons*	8,142	—13.8	+38.6
Value*	$1,310,579	—12.7	+42.3
Raw stock—			
Pig iron, tons	1,450	—42.6	—48.7
Scrap, tons	8,930	+6.0	—1.2
Coke	1,344	—20.4	+10.9

* Figures of one plant omitted.

Regarding the iron foundry operations the bank says:

Compared with the volume in April, unfilled orders during May were 17.3% greater. The output of iron castings also increased in May 1.8% over that in the previous month. The physical volume of shipments, however, dropped 3.3%. Stocks of pig and scrap iron at the end of May were lower than at the same time a month earlier, but supplies of coke were 3.8% heavier. Details of operations are given in the table below:

IRON FOUNDRY OPERATIONS—THIRD FED. RESERVE DIST.

	May 1926.	—Per Cent Change— Month Ago.	Yr. Ago.
Capacity, tons	12,267	0	0

Activity in the Cotton Spinning Industry for May 1926.

The Department of Commerce announced on June 21 that according to preliminary figures compiled by the Bureau of the Census 37,700,136 cotton spinning spindles were in place in the United States on May 31 1926, of which 32,267,410 were operated at some time during the month, compared with 32,893,042 for April, 33,233,382 for March, 33,023,966 for February, 32,803,156 for January, 33,000,874 for December and 33,136,926 for May 1925. The aggregate number of active spindle hours reported for the month was 7,505,896,215. During May the normal time of operation was 25½ days (allowance being made for the observance of Memo-

rial Day in some localities), compared with 25 2-3 for April, 27 for March, 23 2-3 for February, 25½ for January, 25 for December. Based on an activity of 8.78 hours per day, the average number of spindles operated during May was 33,524,928, or at 88.9% capacity on a single shift basis. This percentage compares with 98.2 for April, 102.1 for March, 102.8 for February, 98.7 for January, 99.5 for December and 93.8 for May 1925. The average number of active spindle hours per spindle in place for the month was 199. The total number of cotton spinning spindles in place, the number active, the number of active spindle hours and the average spindle hours per spindle in place, by States, are shown in the following statement:

State.	Spinning Spindles.		Active Spindle Hours for May.	
	In Place May 31.	Active during May.	Total.	Average per Spindle in Place
United States	37,700,136	32,267,410	7,505,896,215	199

Domestic Exports of Grains and Grain Products Smaller.

The Department of Commerce at Washington, June 24, gave out its monthly report on the exports of principal grains and grain products for May and the eleven months ending with May, as compared with the corresponding periods in the previous year. As in other previous months, exports decreased heavily as compared with the same month of 1925. The value of the shipments was only $27,099,000 in May 1926, against $36,640,000 in the corresponding month of the previous year, and for the eleven months ending with May 1926 the value was no more than $240,123,000 as against $509,530,000 in the same eleven months a year ago. The barley exports in May 1926 were only 996,000 bushels, as against 1,608,000 bushels in May 1925; oats exports but 2,781 bushels, against 3,449,000 bushels, rye exports no more than 3,184,000 bushels, against 5,756,000 bushels, and rice exports only 1,976,000 pounds against 2,217,000 pounds. Wheat, however, went out in somewhat larger quantity, 9,368,000 bushels having been shipped in May 1926 compared with 8,970,000 bushels in May 1925. On the other hand, the exports of wheat flour were somewhat smaller, being 679,000 barrels, against 690,000 barrels. Corn also went out in increased quantities. The details are as follows:

DOMESTIC EXPORTS OF PRINCIPAL GRAINS AND GRAIN PRODUCTS.

	May		11 Mos. Ended May	
	1925.	1926.	1925.	1926.
Barley, bushels	1,608,000	996,000	22,986,000	25,829,000
Value	$1,524,000	$711,000	$25,304,000	$22,733,000
Malt, bushels	550,000	334,000	4,872,000	3,230,000
Corn, bushels	764,000	1,706,000	7,578,000	21,415,000
Value	$967,000	$1,437,000	$9,503,000	$19,839,000
Cornmeal & flour, barrels	20,000	40,000	312,000	384,000
Hominy and grits, pounds	1,114,000	3,175,000	14,920,000	24,859,000
Oats, bushels	3,449,000	2,781,000	8,942,000	29,158,000

Country's Foreign Trade in May—Imports and Exports.

The Bureau of Statistics of the Department of Commerce at Washington on June 15 issued its statement on the foreign trade of the United States for May and the eleven months ending with May. The value of merchandise exported in May 1926 was $356,000,000, as compared with $370,945,110 in May 1925. The imports of merchandise are provisionally computed at $318,000,000 in May 1926, as against $327,518,721 in May the previous year, leaving a trade balance in favor of the United States on the merchandise movement for the month of May 1926 of $38,000,000. Last year in May the favorable trade balance on the merchandise movement was $43,426,389. Imports for the eleven months of 1925-26 have been $4,126,752,722, as against $3,498,912,640 for the corresponding eleven months of 1924-25. The merchandise exports for the eleven months of 1925-26 have been $4,414,901,173, against $4,541,233,389, giving a favorable trade balance of $288,148,451 in 1925-26, against $1,042,320,749 in 1924-25. Gold imports totaled only $2,934,665 in May 1926, against $11,392,837 in the corresponding month the previous year, and for the eleven months they were $191,846,399, as against $129,719,001. Gold exports in May 1926 were $9,342,927, against $13,389,967 in May 1925. For the eleven months of 1925-26 the exports of the metal foot up $110,092,931, against $242,017,218 in the eleven months of 1924-25. Silver imports for the eleven months of 1925-26 have been $63,751,776, as against $66,689,297 in 1924-25, and silver exports $90,003,806, as against $100,306,235. Some comments on the figures were given in the article on "The Financial Situation" in our issue of June 19, page 3378. Follow the co fficial report:

Coal Production Recovers from Holiday Slump—Coke Output at Same Level.

With a gain of 940,000 net tons of bituminous coal and of 405,000 net tons of anthracite reported for the week ended June 12 in comparison with the preceding week, coal mining shows recovery from the Memorial Day holiday, according to data supplied by the United States Bureau of Mines, which also reports that during the same period the output of coke remained at about the same level as during the previous three weeks. Further information we take from the Bureau of Mines statement as follows:

Production of bituminous coal during the week ended June 12, as indicated by the 167,041 cars loaded for shipment, amounted to 9,600,000 net tons. This represents a recovery from the holiday depression in the week preceding, but is less by approximately 80,000 tons than in the final week in May.

Estimated U. S. Production of Bituminous Coal (Net Tons) a*—Including Coal Coked.*

	1926		1925	
	Week.	Cal. Yr. to Date.	Week.	Cal. Yr. to Date. b

June 12 d	9,600,000	243,004,000	8,622,000	212,592,000
Daily average	1,600,000	1,757,000	1,437,000	1,538,000

a Original estimates corrected for usual error, which in past has averaged 2%. b Minus one day's production first week in January to equalize number of days in the two years. c Revised since last report. d Subject to revision.

Total production of bituminous coal during the calendar year 1926 to June 12 (approximately 138 working days) amounts to 243,004,000 net tons. Figures for similar periods in other recent years are given below:

1920 ..... 234,054,000 net tons
1921 ..... 177,515,000 net tons
1922 ..... 177,167,000 net tons
1923 ..... 252,529,000 net tons
1924 ..... 212,915,000 net tons
1925 ..... 212,592,000 net tons

ANTHRACITE.

Recovering from the holiday loss in the preceding week, anthracite production in the week ended June 12 again passed the 2-million-ton mark. Total output, with due allowance for local sales and coal consumed at the mines, is estimated at 2,083,000 net tons, a gain of 405,000 tons over the revised figure for June 5.

Estimated United States Production of Anthracite (Net Tons).

	1926		1925	
Week Ended—	Week.	Cal. Yr. to Date.	Week.	Cal. Yr. to Date. a
May 29	2,089,000	27,302,000	1,681,000	36,247,000
June 5 b	1,678,000	28,980,000	1,634,000	37,881,000
June 12	2,083,000	31,063,000	1,825,000	39,706,000

a Minus one day's production first week in January to equalize number of days in the two years. b Revised.

Total output during 1926 to June 12 amounts to 31,063,000 tons—less by 8,643,000 tons, or 21.8%, than in 1925. Figures for corresponding periods in recent years are given below:

1922 ..... 22,265,000 net tons
1923 ..... 44,649,000 net tons
1924 ..... 39,960,000 net tons
1925 ..... 39,706,000 net tons

BEEHIVE COKE.

The rate of production of beehive coke appears to have found a level during the past three weeks at approximately 196,000 net tons. The only outstanding change during the week ended June 12 was a gain of 8,000 tons in Pennsylvania, which was offset by the loss of 7,000 tons in the Southern group.

Total production of beehive during the year 1926 to June 12 amounts to 6,169,000 tons, as against 4,931,000 tons in 1925.

Estimated Production of Beehive Coke (Net Tons).

Stronger Demand for Bituminous Coal Traced to Effect of British Strike—Anthracite Dull.

The development of a stronger demand for West Virginia high-volatile coal was the outstanding feature in the bituminous markets of the country the past week. That this demand is directly attributable to the British strike and marks the first time that the cessation of British production has left a visible impress upon the market, is the opinion of the "Coal Age," as expressed in its market review. At the outset of that strike there was brief flurry, which disappeared as quickly as it came. Since then there has been some quiet, intermittent buying, but the volume did not become noticeable until a few days ago, continues the "Age" on June 24, when it published additional details of events in the markets as follows:

During the past week there were about 60 vessels waiting for cargoes at the Southern loading piers. A number of boats also cleared from Baltimore. It was reported that British interests were in the market for 1,000,000 tons to be used on the railroads and in the gas plants of the United Kingdom. As a result of this demand, pier prices on pools 5, 6 and 7 increased 45 to 50c. per gross ton. Inland prices, while firmer, advanced only a fraction of that range.

These increases, however, had little effect upon the general level of spot prices throughout the country. Pool prices at Baltimore were slightly higher. Boston prices also were higher. The general run of pool quotations at New York and Philadelphia were unchanged. Inland prices, other than those directly in the sweep of the buying movement, either remained stationary or declined. The "Coal Age" index of spot bituminous prices as of June 21 stood at 158 and the corresponding price was $1 92. This was an increase of two points and 3c. over the preceding week.

The Lake trade is one of the strongest sources of support for present production. During the week ended June 20 Lake dumpings totaled 998,341 tons of cargo and 46,718 tons of vessel fuel. This brings the total for the season to date to 8,299,150 tons, as compared with 7,113,347 tons for the corresponding period a year ago, 5,687,865 tons in 1924 and 9,096,840 tons in 1923.

The recovery in anthracite production during the week ended June 12, when output was estimated at 2,083,000 net tons, hardly reflects the market situation. As a matter of fact, the principal consuming centres report a

diminishing demand for domestic sizes. In sympathy with this decline several of the independent producers have adopted a policy of voluntary suspension of operations for two days a week. In no other way does it seem possible to check the downward movement of spot prices on independent domestic tonnage and the collapse of quotations on steam sizes.

The Connellsville coke market is a humdrum affair. Prices have shown no change because the spot demand has been so light. Production, however, is declining and there is little surplus tonnage offered—so little in fact, that substantial orders probably would mean an advance in furnace quotations. Third quarter contracting is backward.

Current Events and Discussions

The Week with the Federal Reserve Banks.

The consolidated statement of condition of the Federal Reserve banks on June 23, made public by the Federal Reserve Board, and which deals with the results for the twelve Federal Reserve banks combined, shows a decline for the week of $35,500,000 in member bank reserve deposits and of $5,400,000 in Federal Reserve note circulation and an increase of $11,200,000 in cash reserves, with practically no change in total holdings of bills and securities. Increases of $85,800,000 in holdings of discounted bills and of $14,100,000 in acceptances purchased in open market were offset by a reduction of $99,100,000 in Government securities, holdings of which last week included $141,500,000 of temporary certificates issued by the Treasury to the Federal Reserve banks pending the collection of the quarterly installment of taxes. After noting these facts, the Federal Reserve Board proceeds as follows:

Discount holdings increased at all of the Federal Reserve banks except Minneapolis and Kansas City, which show a total reduction of $1,000,000. The principal increases in discount holdings during the week were: New York $25,200,000, Chicago $24,600,000, St. Louis $7,900,000, Philadelphia $6,600,000, Boston $5,300,000, and Atlanta $5,200,000. The New York Reserve Bank reports an increase of $17,300,000 in open-market acceptance holdings, and the Atlanta bank a decrease of $4,400,000. Treasury notes on hand amounted to $205,400,000, an increase of $38,500,000 for the week, while holdings of U. S. bonds declined $600,000 and holdings of Treasury certificates $137,000,000, the redemption of $141,500,000 of temporary certificates held by the Federal Reserve banks the week before being partly offset by purchases in the market.

Relatively little change is shown in the Federal Reserve note circulation at any of the Federal Reserve banks.

The statement in full, in comparison with the preceding week and with the corresponding date last year, will be found on subsequent pages—namely, pages 3577 and 3578. A summary of changes in the principal assets and liabilities of the Reserve banks during the week and the year ending June 23 1926 is as follows:

	Increase (+) or Decrease (—) During	
	Week.	*Year.*
Total reserves	+$11,200,000	+$36,700,000
Gold reserves	+10,000,000	+35,900,000
Total bills and securities	--------	+84,900,000
Bills discounted, total	+85,800,000	+23,700,000
Secured by U. S. Govt. obligations	+46,500,000	—24,100,000
Other bills discounted	+39,300,000	+47,800,000
Bills bought in open market	+14,100,000	+5,600,000
U. S. Government securities, total	—99,100,000	+58,500,000
Bonds	—600,000	+36,300,000
Treasury notes	+38,500,000	—20,700,000
Certificates of indebtedness	—137,000,000	+42,900,000
Federal Reserve notes in circulation	—5,400,000	+48,500,000
Total deposits	—32,700,000	+47,800,000
Members' reserve deposits	—35,500,000	+85,500,000
Government deposits	+5,700,000	—34,400,000

The Member Banks of the Federal Reserve System—Reports for Preceding Week—Brokers' Loans in New York City.

It is not possible for the Federal Reserve Board to issue the weekly returns of the member banks as promptly as the returns of the Federal Reserve banks themselves. Both cover the week ending with Wednesday's business, and the returns of the Federal Reserve banks are always given out after the close of business the next day (Thursday). The statement of the member banks, however, including as it does over 700 separate institutions, cannot be tabulated until several days later. Prior to the statement for the week ending May 19, it was the practice to have them ready on Thursday of the *following* week and to give them out concurrently with the report of the Reserve banks for the new week. The Reserve authorities have now succeeded in expediting the time of the appearance of the figures, and they are made public the following week on Mondays instead of on Thursdays. Under this arrangement the report for the week ending June 16 was given out after the close of business on Monday of the present week.

The Federal Reserve Board's weekly condition statement of 703 reporting member banks in leading cities as of June 16 shows an increase of $151,000,000 in loans and discounts and a decrease of $41,000,000 in investments. These changes were accompanied by an increase of $150,000,000 in net demand deposits and a reduction of $55,000,000 in borrowings from the Federal Reserve banks. Member banks in New York City reported an increase of $105,000,000 in loans and discounts and a decline of $15,000,000 in investments, together with an increase of $32,000,000 in net demand deposits and a reduction of $39,000,000 in borrowings from the Federal Reserve bank. As already noted, the figures for these member banks are always a week behind those for the Reserve banks themselves.

Loans on stocks and bonds, including United States Government obligations, increased $44,000,000, of which $17,000,000 was in the New York district and $27,000,000 in the Chicago district, slight changes in other distrcts offsetting each other. "All other" loans and discounts were $107,000,000 above last week's total at all reporting banks and $90,000,000 above at banks in the New York district. Total loans to brokers and dealers, secured by stocks and bonds, made by reporting banks in New York City were $43,000,000 above the June 9 total, loans for their own account having increased $28,000,000, loans for account of out-of-town banks $13,000,000 and loans for others $2,000,000. Further comment regarding the changes shown by these member banks is as follows:

Holdings of United States securities were $37,000,000 less than on June 9, declines being reported for all districts except Atlanta and Dallas. Holdings of other bonds, stocks and securities declined $4,000,000.

Net demand deposits were $150,000,000 above the previous week's total, the principal increases being $67,000,000 in the New York district, $50,000,000 in the Chicago district and $16,000,000 in the Kansas City district. Time deposits increased $18,000,000, principally in the Boston and New York districts.

Borrowings from Federal Reserve banks declined $55,000,000 at all reporting members and $45,000,000 at reporting banks in the New York district.

On a subsequent page—that is, on page 3578—we give the figures in full contained in this latest weekly return of the member banks of the Reserve System. In the following is furnished a summary of the changes in the principal items as compared with a week ago and with last year:

	Increase (+) or Decrease (—) During	
	Week.	*Year.*
Loans and discounts, total	+$151,000,000	+$855,000,000
Secured by U. S. Govt. obligations	—3,000,000	—22,000,000
Secured by stocks and bonds	+47,000,000	+346,000,000
All other	+107,000,000	+531,000,000
Investments, total	—41,000,000	+143,000,000
U. S. securities	—37,000,000	—53,000,000
Other bonds, stocks and securities	—4,000,000	+196,000,000
Reserve balances with F. R. banks	+28,000,000	+20,000,000
Cash in vault	—13,000,000	—4,000,000
Net demand deposits	+150,000,000	+264,000,000
Time deposits	+18,000,000	+416,000,000
Government deposits	----------	+71,000,000
Total borrowings from F. R. banks	—55,000,000	—75,000,000

Summary of Conditions in World's Markets According to Cablegrams and Other Reports to the Department of Commerce.

The Department of Commerce at Washington releases for publication to-day (June 26) the following summary of conditions abroad, based on advices by cable and other means of communication:

CANADA.

Wholesale and retail trade is good in most parts of Canada. The opening of navigation into the Yukon has stimulated wholesale trade in British Columbia. A new chain store company has acquired 20 department stores in Ontario. Manufacturers of agricultural implements are enjoying increased business and western sales are well ahead of last year. Wheat crop prospects in western Canada are generally satisfactory, present conditions being very good in Saskatchewan, good in Alberta and fair in Manitoba

THE NETHERLANDS.

Commerce and industry in The Netherlands have become slightly less active during the past month after the filling of spring orders. Trade with the Dutch East Indies continues slack, but a recent partial revival of activity foreshadows improved business. Government revenues continued favorable in April. Private as well as public financial conditions are excellent. Money continues easy. Both wholesale and retail prices are several points lower than at this time last year. Unemployment at the end of May showed a reduction from the April figure.

BELGIUM.

The oscillations of franc exchange during the past month have severely disturbed industry and trade in Belgium. National bank statements show a gradually advancing inflation, reflected in greatly increased bank clearings as compared with last year. Stock market activity continues, with a rise

in quotations in industrial shares. Railway operation is making a satisfactory showing with receipts higher and expenditures lower than last year. In the metallurgical industry production is active. Coal demand is greater than production. Wholesale and retail prices are much higher than at this time last year and are steadily rising.

FRANCE.

The statement of the Bank of France for the week ended June 16 shows a decline in note circulation amounting to 320,827,000 francs, but no further repayments of advances previously made to the State have been recorded. Circulation now reaches 53,389,500,000 francs, while advances to the State stand at 36,400,000,000 francs. Tax collections during May showed a considerable decline as compared with previous months of the year. French foreign trade in May for the first time this year attained a favorable balance, though for the five months' period there is still a considerable import surplus. Total imports in the period January to May inclusive were valued at 24,233,000,000 francs, while exports reached 22,051,000,000 francs, with an import excess of 2,182,000,000 francs as compared with an export advantage of 2,273,000,000 francs in the corresponding period of 1925.

ITALY.

The debt-funding agreement between Italy and Rumania was signed on June 15, providing for payment to Italy over a period of 50 years of an amount of 151,000,000 lire at a nominal rate of interest. At the same time the Italian Government authorized the Azienda Generale Petroli to lend to the Rumanian Government 200,000,000 lire for ten years at 7% interest; the purpose of this loan, according to the terms of the agreement, was to promote commercial relations between the two countries with particular regard to the petroleum requirements of Italy.

HUNGARY.

Industrial production, railway traffic, and the domestic consumption of goods are increasing in Hungary. Insolvencies and unemployment are decreasing and savings and current accounts in the banks are growing. Merchants still complain of small demand, slow payments, money stringency and very keen competition, owing to the excessive number of merchants in proportion to the present size of Hungary.

NORWAY.

The labor conflict, which started during the latter part of April, was settled on practically the same terms as those previously proposed. The laborers affected resumed their duties on June 9. Improvement in the industrial situation has followed, but there is, on the whole, no fundamental improvement as yet. Except in the automotive branch, trading activity is at a very low ebb, due to the general tendency to reduce consumption and to purchase an absolute minimum.

SWEDEN.

There have been no important changes in Swedish economic conditions during the current year, although moderate progress has been shown. The money market continued easy, with interest rates showing downward tendency. Deposits in the commercial banks decreased during May. Loans and discounts also showed a decrease. Iron production during the first five monehts of 1926 was considerably less than that of the same period of 1925, and there was a marked falling off in the exports of pig iron. Winter grain has been adversely affected by severe weather. Spring crop prospects are satisfactory.

DENMARK.

Danish economic and business life remains extremely depressed. The agricultural situation is critical as a result of the effects of the foot and mouth disease. Danish commercial activity, as a result of the forced reduction of purchases on the part of the people, has languished. This is revealed in the April foreign trade figures, which show that imports were the lowest in several years—115,000,000 crowns. Exports were maintained at a fairly high volume—137,000,000 crowns—and there was thus a favorable balance of 22,000,000 crowns; the largest monthly surplus produced in several years.

LATVIA.

Due to seasonal buying and shippnig activities, the larger ports of Latvia are temporarily enjoying a slight improvement in business. In the provinces, however, conditions are growing worse daily. Commercial failures are recorded daily and many farmers' bills are being protested. Money is difficult to obtain and rates are high. Timber floating on the Dvina River is in full swing. Since the beginning of the season 3,000 rafts have arrived from Poland and Soviet Russia, the latter shipments being sold to local timber firms.

INDIA.

Communal tension between the Punjab, northwestern India, and the United Provinces, adjoining on the southeast, is causing some anxiety and is hampering trade somewhat. Monsoonal rains are showing normal strength and extension. If this condition continues the general outlook is thought in India to be good. The jute crop, an important one, is progressing favorably and a large crop and an easy market are anticipated in the country. Crop conditions are fair to good throughout India.

DUTCH EAST INDIES.

General business of the Dutch East Indies continued rather dull in May, both for importers and exporters. Rice and sugar crops are late and money is scarce. Textiles are still overstocked as natives are buying very little. Sales of passenger cars continue excellent except in southern Sumatra, where conditions are not so good as a few months ago. Business in machinery and metal lines was slow in May.

JAPAN.

The most important development in Japan during the past month has been the recovery of the raw silk market. May exports totaled 4,665,500 pounds, against 3,865,700 pounds the previous month. The second official forecast of the spring cocoon crop places the yield at 349,553,561 pounds, a drop of 5,927,439 pounds from the first forecast and 4,811,394 pounds less than the actual crop last year. The Osaka cotton yarn market is strong with prices advancing. A combination of Japanese pig iron producers has been formed to regulate prices and an agreement of sugar mills has been effected to curtail production of 150 days per annum in order to bolster up prices on the domestic market. It is estimated in Japan that this year's tea crop will be about 20% below 1925. Conditions were adverse during the early part of the rice planting season but have since improved.

PHILIPPINE ISLANDS.

Business in the Philippines during May was normal, collections were good and prospects as viewed by the trade of an excellent sugar crop have favorably affected the credit situation. Commodity markets showed little change and inclined to dulness, except in copra, which was very active, with production running close to capacity. Importation was normal, with some improvement in textile sales, and considerable activity in automobile and tire sales.

HAWAII.

June rains in Hawaii have been the heaviest in 50 years, and broke the severest drought the Territory has seen in the same period. The effect on the pineapple crop has been especially beneficial, rain coming prior to July 1 when the summer pack begins. The long drought increased the sugar yield of the present crop, but is expected, the trade believes, to reduce prospective tonnage for the next two seasons. The contract for two new sugar mills in the Philippine Islands has been given to a Honolulu iron concern, with the result that local foundries and machine shops are busy filling orders for construction.

AUSTRALIA.

The coal mine strike in the three States, Victoria, New South Wales and Tasmania [illegible]erce since early in May, has been settled and work was resumed on J[illegible] 21. The new South Wales Government is proposing establishment of [illegible] State insurance office covering all classes of insurance, with lower premium rates than those charged by private companies. Australian foreign trade for the month of April shows an adverse balance. Imports were £12,312,000 exports for the same period, £9,928,000. General conditions in the country are normal.

ARGENTINA.

Trade continues slow with no marked changes. Rainy weather it is said has retarded the wheat and linseed planting in many sections. Sugar cane cutting is under way. Sugar production is expected in Argentina to equal last year's crop, of which large stocks are still on hand. The hide market is quiet and the price tendency is downward. Cereal shipments have increased. The wool market is extremely quiet.

BRAZIL.

The Brazilian situation remains quiet. Coffee markets are firmer and exchange is stronger.

PERU.

Basic economic conditions remained unchanged in Peru during the week ended June 19 with trade still depressed but optimistic. Exchange declined steadily to $3 60 to the Peruvian pound, with some local expectation for a strengthening next week.

GUATEMALA.

Conditions have not shown any improvement since April. The existing unsatisfactory economic position has been aggravated by political disturbances. There is no evidence of improvement in the crop situation. The rains have been much lighter up to the present time than usual, causing a delay in planting as well as retarding the growth of both coffee and corn, the principal agricultural products of the country.

HONDURAS.

General business conditions continue dull. Exchange remains at 2.15 pesos to the dollar. Banana exports to the United States during May were 1,519,000 bunches, being an increase of 316,619 bunches over the previous month. The shipment of bananas to England totaled 72,000 bunches and to Germany 32,000 bunches.

PORTO RICO.

Business is generally quiet but collections are a little more prompt as a result of the liquidations with the closing of the sugar campaign and the harvesting of the tobacco crop. Merchants are limiting their purchases anticipating the seasonal dullness usually extending from July through September. However, the sugar mill buying for repairs and replacements has stimulated the machinery and hardware trades. The drought is still causing worry to agriculturists although there have been some showers.

MEXICO.

There has been no change in business during the week ended June 20. The increase in the sales of motor vehicles has not been as large as expected. The automobile exhibition will open July 10. The labor situation is again serious. The cotton crop is estimated at 310,000 bales with stocks on hand of 50,000 bales.

Big French Credits Are Deposited Here—Wall Street Believes These Will Be Used Later to Support the Franc Exchange.

The New York "Times" of June 20 prints the following under the above head:

Huge French balances and credits, accumulated here during the "flight of capital" from France, are receiving the attention of those financial authorities who are seeking to gauge the probabilities in the situation surrounding the franc. While it is impossible to reach even an approximation of the amount of holdings transferred out of France for safekeeping, the sum is known to be very large.

French interests have accumulated holdings not only in the United States but in the Scandinavian countries, in Holland and Switzerland, and, recently, in Spain, whose currency now has reached its highest exchange level in more than four years.

Judging from precedents, all these funds will begin finding their way back to France once domestic confidence has been restored there, and eventually this is expected to furnish strong support to the French exchange position, when stabilization has been restored.

Almost parallel conditions developed when the old German mark was sliding downhill. When the Dawes Commission got down to details on this phase of German finances, records were thrown open to it in Germany, the United States, England, France and other countries, so that it was possible to learn something definite of German holdings abroad.

The Dawes Commission found that the sums held abroad by Germans mounted into billions of dollars. When the Dawes plan went into effect, with a large international loan to Germany and the establishment of the currency on a new gold basis, this money began flowing back to Germany in large amounts. Gold shipments of considerable amounts have been made from the United States to Germany on several occasions in the last year. The return of money held abroad has been one of the factors that facilitated the maintenance of the new Reichsmark virtually at parity for the last year and a half.

Financiers here believe that sooner or later a similar movement of funds back to France will develop, despite the present uncertainties that surround the franc. The Cabinet change of last week and its related occurrences caused some erratic fluctuations of the rate, but little fundamental change in conditions appeared. The franc last Monday declined to within a fraction of its record low for all time at 2.72 cents, but rallied on official support and went as high as 2.93 cents. Support dwindled, however, and the franc at the close of the week was quoted at 2.78½ cents, which compared with 2.93½ cents at the end of the previous week.

Despite the confusion which surrounds the present situation, few in the financial district expect the franc to follow the extreme downward movement that took place in the German mark following the war. There are several reasons for this, chief among which is the fact that Germany and some of the other Central European countries whose currencies collapsed were virtually isolated and their trade with the rest of the world shut off. This is not the case with France, whose foreign trade at present is of such proportions and importance that it is believed commercial interests will insist that remedial measures be put into effect. Another contrast is that while the fall of the German mark met with no real resistance in Germany, France appears determined to prevent the wiping out of the value of its currency.

French bonds have held strongly in the face of the decline of the franc, the Government 8s of 1945 having been quoted at 102 at the end of the week, the 7½s of 1941 at 97 and the 7s of 1949 at 90, while industrial and other French dollar issues traded in in New York also have been well supported. Bankers declared this was a natural market condition, as every time the franc moved downward the internal debt of France is reduced, placing its external obligations in a relatively stronger position. In addition, French interests are understood to have been buying their Government's dollar securities in considerable quantities. This provided a means of escaping from the present uncertainties of the franc and at the same time supporting French credit abroad.

While the decline of the franc has increased the cost of the country's foreign debt service, bankers declare this increase has not been as large as might appear at first glance. Aside from the compensating reduction in its domestic debt, there is the fact of large French balances in foreign countries, which are in dollars or other stable currencies and which may be used when needed with little real relation to the movements of the franc.

Since the war the United States has become a resting place for a tremendous volume of funds originating in other countries and sent here for the safety furnished by the stabilized conditions in this country. Not only France and Germany, but other countries in Europe, as well as Japan and a number of South American countries, have large balances here. Several South American countries have gold on deposit in New York to serve as an exterior reserve against their circulation. Bankers declared this has contributed to trade expansion and credit ease in this country, although it is only one of the many factors that have created these conditions.

Russian Soviet Debt to Great Britain Put at £804,000,000—Claims Lodged by Nationals Estimated at £225,000,000 by Ronald McNeill.

We quote from the New York "Herald-Tribune" the following London cablegram (copyright) dated June 23:

The Russian Soviet debt to this country, with accumulated interest, totals £804,000,000, Under Secretary for Foreign Affairs Ronald McNeill told the House of Commons this afternoon. He estimated the claims lodged by British nationals against the Soviet at £225,000,000. No definite counterclaims have been presented by the Soviet, he added.

Further questions put by Conservative back-benchers, in view of the debate next Friday on Anglo-Russian relations, drew from Godfrey Locker-Lampson, for the Government, the statement that the only trade organization here which was allowed to send and receive sealed bags was the Soviet Trade Delegation.

Asked whether Saturday's speeches by Winston Churchill and the Earl of Birkenhead, who are heading a mutiny against the Cabinet's Russian policy, were to be regarded as representing the attitude of the Government, Premier Baldwin requested that the question be put on paper. In reply to Ramsay MacDonald, who asked whether it might be assumed that the Chancellor's speeches always were made after consultation with his colleagues, the Premier said, amid laughter: "You may assume that I have such confidence in my colleagues that I do not rush to read their speeches with the same speed as do the members of the Opposition."

Danish Trades Union Council Fined For Boycotting Farmers.

Copenhagen (Denmark) Associated Press cablegrams June 22 state:

The Supreme Court has decided the Danish Trade Union Council must pay 130,000 kronen damages for interfering "maliciously" with the affairs of a large number of Danish farmers.

It was asserted by the farmers that they suffered heavy losses when they were unable to obtain necessary farmhands because of a union boycott.

Chinese Government 5% Hukuang Railway Loan of 1911.

J. P. Morgan & Co. announced on June 21 that, as a result of provision made therefor by the Chinese Government and pursuant to the plan for dealing with such coupons as announced by that government on July 3 1924, they were prepared, beginning Thursday, June 24th, to pay the following coupons from bonds of the German issue of this loan:

No. 28 which matured June 15 1925.
No. 18 which matured June 15 1920.

The payment of coupon 29 on bonds of the 1911 loan was referred to in these columns a week ago, page 3404.

Dwight W. Morrow, of J. P. Morgan & Co., Testifies Before Senate Committee Regarding Loans to France and Italy.

The Senate Committee on Finance, in furtherance of its consideration of the bill authorizing the settlement of the French debt, had before it on June 18 Dwight W. Morrow, of J. P. Morgan & Co., who was heard on the subject of the loans accorded to France and Italy. In its account of the hearing the New York "Journal of Commerce" had the following to say in its report from its Washington bureau on June 18:

Dwight W. Morrow, of J. P. Morgan & Co., was treated to something like the third degree, tempered with Senatorial courtesy, when he appeared before the Senate Finance Committee to-day to discuss with it from a banker's viewpoint the situation surrounding settlement of the Italian and French debts.

The committee session was an executive one, but it is understood that Mr. Morrow was quizzed at great length as to the loans made through American bankers both to Italy and to France. Some of the Senators wanted information, for instance, particularly on the loan floated by J. P. Morgan & Co. to Italy through the sale of bonds to American investors at about 94½, netting Italy about 90, at a cost of 7 or 7½% interest, on the advice of the bankers to the people here that this was a good buy. The loan announcement came about a week after the funding arrangement was entered into by the Debt Commission, it was pointed out.

Three loans of $100,000,000 each to France in 1920, 1921 and Nov. 1924, were brought into the discussion, and the Senators wanted to know whether there were any new negotiations under way looking to the loaning of additional amounts to France. The witness is said to have denied that any steps had been taken in that direction and entered denial also to inquiries as to whether or not American bankers had sought to use any influence on either France or Italy to bring about ratification of the settlements or urge the Government or Congress of the United States to effect a settlement on low terms.

Mr. Morrow was the witness at both the morning and afternoon sessions of the committee. He is understood to have stated that he believed both the French and the Italian settlement to be as good as could be effected, all things considered. He explained that there was no ground for criticism of the fact that early payments by Italy to England are larger than those to come to the United States, since, he said, the situation in England was different than here. England having large payments to make in her turn to the United States and it was necessary for her to exact funds from her debtors to help out.

Under secretary of the Treasury Garrard B. Winston attended the sessions to-day, but took no particular part in the discussion, it is understood. He will be called to the Capitol probably next week to make a statement and give his views on the situation as it now exists in France. Despite the fact that it has become very apparent that France will take no steps in the immediate future toward ratification of the settlement, it is proposed to continue the hearings, the idea probably being to secure campaign material.

In addition to Under Secretary Winston the same paper indicated on June 16 that possibly Benjamin Strong, Governor of the Federal Reserve Bank of New York, and others who may have knowledge of present European affairs, will be heard by the committee. The Washington correspondent of the paper in the June 16 advices said:

Despite the denial of Mr. Winston that his journey abroad was in any way connected with reported negotiations between representatives of the French Government and the New York Federal Reserve Bank for a large loan to be used in an attempted stabilization of the franc, he will be questioned at considerable length on that subject. This will be true also in the case of Mr. Strong if he actually appears before the Committee. The latter is looked upon as one of the best informed men in the United States on foreign financial affairs and there is a considerable desire on the part of some of the Democratic members to be given an opportunity to hear his views and receive a detailed statement from him.

The Senators are interested to hear from his own lips something of the conferences that he had with British and French financial heads, of the real situation in France. Then there is also a desire to ascertain why a 27c. settlement with Italy and a demand for something like 50c. on the dollar from France; whether there was financially controlled pressure back of the former which is lacking from the latter.

S. Parker Gilbert Reports German Reparations Plan for First Nine Months of Second Year as Functioning Satisfactorily—Receipts and Payments for May.

In a statement to the German Reparations Commission, at a routine meeting on June 19, S. Parker Gilbert, Agent-General for Reparation Payments, is reported as indicating that the execution of the Dawes Plan for the first nine months of the second year of its operation was most satisfactory. One account of Mr. Gilbert's report is the following which we take from the Berlin advices (copyright) to the New York "Times" June 20:

"Execution of the Dawes plan proceeded normally during the second annuity year. Germany made regularly and punctually the payments required and transfers to the credit of the powers have gone forward currently and without disturbance to exchange."

This statement is made by Seymour Parker Gilbert Jr., Agent-General for Reparations, in an interim report for the first nine months of the present annuity year, ended May 31. The report, which is couched in optimistic vein, declares further that "throughout the entire period Germany has kept financially sound, and some tendency toward recovery is now beginning to appear," and that "the Reichsbank has consolidated its position and the stability of German currency stands fully assured. In all its relations the plan has been functioning actively and normally."

In the six months since the last report "there has also been further progress toward the attainment of more normal credit conditions." Progress also has been made in simplifying organization and reducing costs of production.

Mr. Gilbert believes the crisis reached its apex last January and February, that there has been gradual improvement since and that "the processes of readjustment appear to have followed sound principles."

Payments for Nine Months.

Germany paid 821,425,066 marks in nine months. By recourse to the balance remaining on hand on Aug. 31 the Transfer Committee transferred 834,409,730 marks of which 262,852,850, or about 32%, was cash transfers. This, says Mr. Gilbert, "shows the error of attaching undue importance to cash transfers as distinguished from other forms of transfers. It remains true, as the experts said in their report, that in their financial effects deliveries in kind are not really distinguishable from cash payments."

The payments were made up of 400,000,000 marks interest on German railway bonds, 190,000,000 budget contributions, 62,500,000 interest on German industrial debentures and 168,925,066 transport taxes. The

railway company and the Government made all payments punctually on the first of every month. The Transfer Committee holds an unexpended balance of 69,839,182 marks.

The railways excess receipts over expenditures for the first business year ended Dec. 31 last exceeded 818,000,000, even after setting aside the statutory reserve fund of 113,000,000, also 3,000,000 for interest on preference bonds owned by the Reich and 150,000,000 for future deficits and amortizations. In addition 153,000,000 were carried over into 1926.

Too Early to Offer Railway Bonds.

The trustee for the German railway bonds "has found it to be the unanimous opinion of all concerned that the time has not come to attempt any sale of bonds, and it is still too early to make definite plans toward that end." The reports says the outlook is encouraging and the trustee believes the further progress of the railway company will bring increasing appreciation of the merits of the bonds as international investments, but much will depend on the progress of stability in Europe generally. None of the 5,000,000,000 industrial debentures has been negotiated or redeemed.

Mr. Gilbert notes that the German budget remains balanced and that the preliminary figures for the year ended March 31 indicate a safe margin of receipts over expenditures, but "much remains to be done in the direction of clarifying the financial accounts."

The Reich's public debt apparently has been reduced 243,000,000 during the six months preceding March 31, but Mr. Gilbert indicates that this reduction may have been more apparent than real. Moreover, the liabilities growing out of the revalorized paper mark debt are likely to exceed the alleged reduction.

The report closes with the declaration that the allied Governments, the German Government and all other agencies concerned in executing the Dawes plan "have continued to work together loyally and in a spirit of friendly co-operation."

Under date of June 10 the following regular monthly statement regarding receipts and payments was made public by Mr. Gilbert.

OFFICE OF THE AGENT-GENERAL FOR REPARATION PAYMENTS.
STATEMENT OF RECEIPTS AND PAYMENTS FOR THE SECOND ANNUITY YEAR TO MAY 31 1926.

(On Cash Basis, reduced to Gold Mark equivalents.)

	Month of May 1926. Gold Marks.	*Second Annuity Year—Cumulative Total to May 31 1926. Gold Marks.*
A. *Receipts in Second Annuity Year—*		
1. Budgetary contribution	20,000,000.00	190,000,000.00
2. Transport tax	17,825,789.38	168,925,066.29
3. Interest on railway reparation bonds	50,000,000.00	400,000,000.00
4. Interest on industrial debentures	----------	62,500,000.00
5. Interest received	186,468.50	1,869,916.38
Total receipts	88,012,257.88	823,294,982.67
B. *Balance of Cash at August 31 1925*		107,013,270.89
Total cash available		930,308,253.56
C. *Payments in Second Annuity Year—*		
1. Payments to or for the account of—		
France	43,793,371.35	403,462,160.72
British Empire	22,123,735.86	166,589,521.02
Italy	6,622,097.23	50,057,085.85
Belgium	8,781,537.94	84,443,242.49
Serb-Croat-Slovene State	5,436,565.72	27,881,037.12
Rumania	583,327.21	6,405,403.55
Japan	35,304.10	370,781.23
Portugal	462,979.04	4,676,795.34
Greece	302,935.73	2,297,207.93
Poland	31,177.41	91,955.24
Total payments to Powers*	88,173,031.59	746,275,190.49
2. For Service of German External Loan 1924	7,570,794.16	72,557,419.54
3. For expenses of—		
Reparation Commission	249,981.75	2,694,585.84
Office for Reparation Payments	307,911.88	2,775,015.78
Rhineland High Commission	253,228.97	6,162,711.45
Military Commission of Control	300,000.00	3,907,261.69
4. Costs of arbitral bodies	1,188.74	37,545.27
5. Discount on payments made by Deutsche Reichsbahn Gesellschaft in advance of due date	990,923.25	5,907,557.40
6. Exchange differences	*Dr.*18,483.48	151,783.64
Total payments	97,828,576.86	840,469,071.10
D. *Balance of cash at May 31 1926*		89,839,182.46
		930,308,253.56

* See Tables I and II for analysis of payments by category of expenditure and by Powers.

TABLE I.—TOTAL PAYMENTS TO POWERS CLASSIFIED ACCORDING TO CATEGORY OF EXPENDITURE.

	Month of May 1926. Gold Marks.	*Second Annuity Year—Cumulative Total to May 31 1926. Gold Marks.*
1. *Occupation Costs—*		
(a) Reichsmarks to Armies of Occupation	4,505,557.36	36,327,590.71
(b) Furnishings under Arts. 8-12 of Rhineland Agreement	5,531,433.00	32,709,627.99
	10,036,990.36	69,037,218.70
2. *Deliveries in Kind—*		
(a) Coal, coke and lignite	20,804,729.32	204,818,451.95
(b) Transport of coal, coke and lignite	6,736,642.47	67,981,444.80
(c) Dyestuffs and pharmaceutical products	1,162,919.80	7,879,466.90
(d) Chemical fertilizers and nitrogenous products	299,005.79	42,590,027.48
(e) Coal by-products	759,062.92	3,672,927.30
(f) Refractory earths	13,686.21	69,638.84
(g) Agricultural products	1,267,812.68	12,617,081.41
(h) Timber	3,614,670.70	15,780,254.28
(i) Sugar	952,719.51	4,709,935.72
(j) Miscellaneous deliveries	19,200,226.85	126,610,613.67
	54,811,475.35	486,729,842.35
3. *Reparation Recovery Acts*	23,228,734.25	180,859,558.62
4. *Restoration of Louvain Library*	----------	2,100,316.90
5. *Miscellaneous Payments*	95,831.63	1,867,012.62
6. *Cash Transfers—*		
(a) Liquidation of the accounts of the Franco-Belgian Railway Regie	----------	5,007,229.01
(b) Settlement of balances owing for deliveries made or services rendered by the German Government prior to September 1 1924	----------	674,012.29
	----------	5,681,241.30
Total payments to Powers	88,173,031.59	746,275,190.49

TABLE II.—PAYMENTS TO EACH POWER CLASSIFIED ACCORDING TO CATEGORY OF EXPENDITURE.

Payments to or for the Account of—	*Month of May 1926. Gold Marks.*	*Second Annuity Year—Cumulative Total to May 31 1926. Gold Marks.*
1. France—		
(a) Reichsmarks to Army of Occupation	3,503,505.40	23,715,477.85
(b) Furnishings under Arts. 8-12 of Rhineland Agreement	2,944,527.50	22,511,049.93
(c) Reparation Recovery Act	3,507,050.35	30,043,557.40
(d) Deliveries of coal, coke and lignite	14,373,782.33	139,021,331.98
(e) Transport of coal, coke and lignite	4,761,780.57	49,296,447.55
(f) Deliveries of dyestuffs and pharmaceutical products	290,817.42	1,388,859.69

Grand total	88,173,031.59	746,275,190.49

NOTES.

1. *Reichsmarks Furnished to the Armies of Occupation.*—The payments in May to the French Army of Occupation include a payment in advance in respect of June expenditure.

2. *Furnishings under Articles 8-12 of the Rhineland Agreement.*—During the month of April, negotiations were conducted by the French, British and Belgian Governments with the German Government with a view to fixing, as from April 1 1926, the amounts to be provisionally advanced to the German Government on account of furnishings to the Armies of Occupation and to the Rhineland Commission under Arts. 8-12 of the Rhineind Agreement. The Agreements concluded were notified to the Agent-General at the beginning of the month of May; the payments shown in this month, accordingly, include the agreed advances in repsect of the two months, April and May.

In the cases of France and Belgium, the payments in May include, in addition to the advances above mentioned, a settlement in respect of military transport on the railways in Occupied Territory during the period Sept. 1 to Nov. 15 1924.

Dr. Kemmerer Sails for Poland to Undertake Study of Country's Financial and Economic System.

Dr. Edward W. Kemmerer, professor of economics at Princeton University and President of the American Economic Association, sailed on the Berengaria on June 22 to take up his work as head of a special commission which is to make a study of conditions in Poland with a view to working out a comprehensive financial and economic policy for the Polish Government. Dr. Kemmerer's assignment to the commission was noted in these columns June 5, page 3153. The names of the other members of the commission were indicated as follows in Princeton advices June 15 to the New York "Times":

Dr. Herley L. Lutz of Leland Stanford Junior University, public finance; Dr. Joseph T. Byrne of Brooklyn, accounting practice and control; Joseph A. Broderick, Vice-President of the National Bank of Commerce of New York, practical banking; Wallace Clark of New York, industrial management; Frank A. Eble of Washington, D. C., customs administration, and Frank D. Graham, Associate Professor of Economics at Princeton, General Secretary of the commission. Frank W. Fetterman of Princeton will be secretary to Dr. Kemmerer.

With Dr. Kemmerer's departure this week he was quoted in the "Times" as saying:

"There is no truth in the report that this commission is connected with any banking house in this country. I went to Warsaw at the end of last December at the invitation of the Government and spent two weeks there. This invitation was confirmed after the revolution by Marshal Pilsudski.

"We shall advise the Government on reform necessary, in our opinion, for currency, accounting, taxes, banking, customs, duties and also concerning industries. For that purpose we are taking with us Wallace Clark of New York, an industrial engineer.

"I am very hopeful that we shall be able to put the zloty on a gold basis. When there has been a coalition Government, I have observed that it has worked well and accomplished things. There are fourteen members in the party altogether, which includes my wife and son and daughter and my secretary. Dr. Frank W. Setter. We shall remain in Warsaw for the summer and return by the Paris on Sept. 22 from Havre.

"Early in October, I am going to take another commission to Ecuador, and from there another commission direct to Bolivia, so that I shall be absent practically all the year."

Dr. John T. Byrne, Dr. Frank B. Graham, Dr. Harvey L. Lutz, Joseph A. Broderick are among those included in the Kemmerer party.

The same paper in its June 16 issue stated:

Dr. Kemmerer, who is President of the American Economic Association, has been a financial adviser to governments since 1903, when he served the United States Government in the Philippines. In 1906 he was special commissioner of the United States to Egypt to investigate the Agricultural Bank in Egypt. He was financial adviser to Mexico in 1917, to Guatemala in 1919 and to Colombia in 1923.

In 1924 he served as the currency and banking expert of the Dawes Commission in Paris, where he helped work out the plan for the establishment of the gold standard, the creation of a central bank and the refunding of public debt. Last year on his recommendation and that of Dr. Gerard Vissering, President of the Bank of the Netherlands, the Union of South Africa returned to the gold standard. He was Chairman of a commission to study finances in Chile in 1925 and that country, on his recommendation, returned to the gold standard, establishing a central bank and passed a general banking law making comprehensive changes in the regulations governing commercial banks, a new budget law and a law governing the reorganization of the State railways.

Dr. Lutz and Dr. Byrne were members of former commissions with Dr. Kemmerer. Mr. Broderick lately has been Secretary of the Federal Reserve Board in charge of bank examinations. Mr. Clark is Chairman of the Society of Industrial Engineers on the Elimination of Waste in Management.

German Business Men's Judgment of Poland—Modified Dawes Plan Viewed as Essential in Financial Adjustment.

June 20 advices from Berlin to the New York "Times" (copyright) state:

German business men returning from Poland appear to regard the political situation in that country favorably. They do not predict new military or civil revolts, and declare that Pilsudski's popularity with the urban population, which alone counts in Poland, is immense.

Nevertheless, the same observers agree almost unanimously that Polish finance, industry and currency cannot be put in order without foreign assistance and foreign control, the latter in the shape of a modified Dawes plan. They ascribe this necessity to the Polish nationalist sentiment, as a result of which nearly all of the former Prussian and Austrian administrators have been excluded from places of power, while the non-Polish speaking provinces have been harassed by incompetent or dishonest Poles chosen on nationalistic grounds.

It should be added, however, that this testimony is purely the German view and that the German distrust and dislike of Poland leads frequently to exaggerated views of the actual situation.

Dollar Accounts Planned in Poland—Bank to Guarantee Return of Deposits in Dollars, Says Finance Minister.

The New York "Journal of Commerce" reports the following Associated Press advices from Warsaw June 23:

Apparently Parliamentary protests against the recent coup d'etat by the Pilsudski forces and the Government's desire to rule without control will be useless.

This seemed indicated at the first session of the Polish Diet since the revolution. All the members of the Cabinet attended the session, excepting Marshal Pilsudski, who continues to demonstrate his neglect of Parliament.

The Government presented its budget through M. Klarner, Minister of Finance, who said that it showed a deficit of $10,000,000. The Government, he added, would liquidate the deficit by increasing certain returns, like the spirit monopoly and customs, and by decreasing administrative expenses. In no case would the Government have recourse to inflation.

M. Klarner said the Government would endeavor to stabilize the zloty by increasing the gold reserve in the Bank of Poland. He was of the opinion that there were more than $25,000,000 in hidden resources.

The Government would endeavor to attract these inactive dollars to the Bank of Poland, opening there dollar accounts and guaranteeing returns of deposit in dollars.

Intention of Polish Government to Protect Industries, Especially Agriculture, Oil, Coal and Timber.

Minister of Trade and Industry Kwiatowski, in an interview on June 18 is reported as saying that as Poland was an agricultural country the Cabinet would especially protect industries connected with agriculture. Industries to be placed on the preferred list would include agricultural machinery, fertilizers, sugar mills and alcohol distilleries. Associated Press advices from Warsaw, which are authority for this, added:

The Government also intended to concentrate its energies in improving industries connected with natural resources, such as oil, coal and timber.

M. Kwiatowski pointed proudly to the extension of Poland's industry, which, he said, despite economic warfare with Germany, had gained new markets. He admitted, however, that trade wars in the long run were bad things and that, therefore, he favored good relations with all nations. The Government would endeavor to win the confidence of foreign nations in Polish industries and would welcome in every manner possible the investment of foreign capital.

Czechs Dispense With Foreign Loans—Use United States Credits to Stabilize Crown but Future Borrowing Will Be at Home.

The following special advices from Prague appeared in the "Wall Street Journal" of June 23:

Czechoslovakia's financial position is now sufficiently consolidated to dispense with foreign loans, at least for some time to come. The revolving credit which the National City Bank of New York recently opened for the Czechoslovakia National Bank is not in the nature of a State loan, but a credit granted to a bank of issue for the explicit purpose of maintaining exchange at the rate for the last three years. The Czech crown is stabilized on the American dollar; the Czechoslovak National Bank was authorized by law to obtain a stabilization credit up to $50,000,000. At this time, however, it has been deemed unnecessary to go to the limit; a credit of $20,000,000, with a potential increase to $30,000,000 is considered adequate. Dr. K. English, the Czech Finance Minister, stated publicly that the Government need no longer worry over the foreign exchange rate of the crown.

Although some costly legislation has been introduced lately in the National Assembly, the Finance Minister is strongly opposed to foreign credits. He is confident that the necessary cover can be provided internally, on cheaper terms, and without entailing an increase in imports from the creditor country.

The money market in Czechoslovakia is at present admittedly not able to provide sufficient funds to satisfy the whole of the estimated public expenditure for the current financial year. The estimates of the various Government departments have therefore been cut by 25% all around, while considerable savings are to be effected in the next budget. The Finance Minister's principle is to cut his coat according to the cloth and to adapt public expenditure to revenue without recourse to borrowing. As the internal money market becomes easier, public expenditures will be permitted to rise in proportion.

Special Provisions Made for Army.

The only Government department for which a reduction of expenditure on the above scale was found too drastic is the Ministry of National Defense. To meet the situation a bill was introduced recently in the National Assembly, providing, on the one hand, for a reduction of military expenditure for 1926 by 360,000,000 crowns and for a limit of expenditure under the same heading to 1,400,000,000 crowns for the next 11 years. On the other hand, a special fund of 315,000,000 crowns was created for the same period, out of which all capital expenditure on the army is to be provided.

Another bill, involving an expenditure of 700,000,000 crowns, is that dealing with the reform of public service. This scheme provides for an annual reduction of 10% in number of public servants and other State employees for two years and a simultaneous increase in the pay of those remaining in service. The Finance Minister has limited the expenditure in connection with the scheme to 700,000,000 crowns, which it is proposed to provide from savings in the budget and from additional taxation of alcohol and sugar for home consumption. This bill is now before Parliament, and its passage is being accelerated to make it retroactive as from Jan. 1, last, the date promised by the previous Government in power.

The Internal Debt.

With regard to the internal floating debt, it is the Finance Minister's policy either to redeem or convert the short term Treasury bonds running for 12 months into bonds falling due in five years. Provision for the redemption of the one-year bonds maturing this year already has been made. By October next, the internal floating debt will have been reduced to 3,064,000,000 crowns in Treasury bonds running for three or five years. In addition, there are 1,536,000 of bonds renewable every three months. These are now being paid off gradually out of the levy on capital.

Except for additional taxation on alcohol and sugar, it is not proposed to introduce new taxes unless Parliament sanctions public expenditure not foreseen by the Treasury. At the same time, indirect taxation is on the increase, as is evidenced by a rise in all passenger fares on the State railways by 22%.

The extension of a revolving credit of $20,000,000 to Czechoslovakia by the National City Bank of New York was referred to in our issue of May 22, page 2897.

Anglo-Austrian Bank Transaction—Bank of England Withdraws from Direct Dealings in Europe Though Holding Interest Is Retained.

Commenting on the transfer by the Anglo-Austrian Bank, Ltd., of London of its Austrian Banks to the Credit-Anstalt (to which we refer in another item) the "Wall Street Journal" had the following to say on June 24 in London advices:

Sale by the Anglo-Austrian Bank, Ltd., of its Austrian branches to the Oesterreichische Credit-Anstalt terminates a post-war experiment in British banking. In some quarters it was thought to indicate an acknowledgment by the Bank of England, which is the controlling interest behind the Anglo-Austrian Bank, of the impossibility of controlling continental banking from London. Continental banking, they say, to be successful, requires that its directors be correctly and immediately informed on local and political changes to an extent not always fully appreciated by British bankers.

This opinion was reinforced by the figures of the report for the year ended Dec. 31 1924, when no dividend was paid and the available $550,000 balance carried forward to meet anticipated expenses.

Sale, however, was also in accord with the policy of the Bank of England. In 1922, when it acquired an interest in the old Anglo-Austrian bank, P. Bark, a director of the British bank, said it was planned to become a holding company of banks situated in the succession States of Central Europe. The difficulty of controlling affairs from London had always been appreciated, but previous conditions had not been favorable for return of their Austrian branches to Austrian management.

The present time seemed the opportune moment, now that the Austrian banks had compiled their gold balance sheets. The step taken was parallel to the bank's transference of its Czechoslovakian branches to the Anglo-Czechoslovakian Bank, its Jugoslavian branches to the Croatian Discount Bank and its Italian branches to the Banca Italo-Britannica.

The deal with the Credit-Anstalt coincides with Austria's financial decontrol by the League of Nations, so that foreign interference in public and private finance is now substantially mitigated.

As in the case of the other transfers the Anglo-Austrian bank will retain a share participation in the Credit-Anstalt, as one of the terms of the transaction, and the usual exchange of directors also will take place.

In the Austrian press $5,000,000 is mentioned as the purchase price.

Vienna reports state that 800 employes of the Anglo-Austrian Bank are to be dismissed. Considerable difficulty and expense were involved in the last staff reduction, which took place toward the end of 1924, compensation amounting to more than $500,000 being paid.

On the whole, the deal is thought to be in favor of the Credit-Anstalt, and this gives some color to the rumor that the Bank of England was cutting its losses.

Transfer of Austrian Branches by Anglo-Austrian Bank, Ltd., of London.

The National Bank of Commerce in New York announced on June 14 the receipt of the following advices from abroad:

According to cable advice from London, the Anglo-Austrian Bank, Ltd., London, will turn over to the Oesterreichische Credit-Anstalt fur Handel und Gewerbe, Vienna, the major part of the business of its Vienna and other Austrian branches. The Anglo-Austrian Bank, Ltd., will continue its interest in Austrian affairs by becoming an important stockholder in the Credit-Anstalt. There will also be an interchange of directors. This absorption of its Austrian business by the Credit-Anstalt, Vienna, on July 1 is in line with the policy of the Anglo-Austrian Bank, Ltd., London, to operate through local banks in which it has an interest rather than through direct branches in the different countries of Central Europe.

This arrangement will not affect in any way the relations of the Anglo-Austrian Bank, Ltd., of London with the Anglo-Czechoslovakian Bank, Ltd., of London and Prague, and with the Croatian Discount Bank of Zagreb. Reciprocal banking arrangements cover not only the two banks themselves but also their subsidiaries and affiliations.

Russian Chervonetz Stabilized According to Member of Finance Ministry.

Under date of June 15 Associated Press cablegrams from Moscow report M. Bronsky, a member of the Finance Ministry as saying that as an outgrowth of extraordinary measures taken by the Government the chervonetz, the new Russian gold unit of value, has now been definitely stabilized. The cablegrams further state:

M. Bronsky denied that there had been wholesale executions in connection with the stabilization of the new currency. He admitted, however, that campaigns against artificial dévaluation of the chervonetz had been put down with one energetic stroke. Three important Finance Ministry officials had been executed and about 100 known speculators were deprived of their liberty. A majority of these latter had merely been banished from Moscow and were permitted to live anywhere in Russia except in the six largest cities.

"The Czar's Government," declared M. Bronsky, who is one of the Soviet's best known economists, "existed by grace of periodically starving peasantry, by everlastingly exploiting the workers and by large foreign credits. We have no credits and cannot afford to exploit workers or starve peasants.

"Our so-called crisis has been really due to temporary stringency caused by large imports of heavy machinery, unsuitable for the manufacturer of every-day necessities, and by a surplus of ready cash in the hands of the population, increasing buying capacity and creating a demand for non-essentials. This is evident because production increased this year 40% and the number of factory workers by 300,000.

"Still, despite the difficulties, we have managed to stabilize our currency, and with the prospects of coming fine crops we look forward to security and a balance of the budget at the end of the current year."

Credits in France Sought by Soviets—Russians Offer Buying Program Involving $150,000,000 in 3 Years in Return for Loans.

A special cablegram from Paris, June 19 (copyright) to the New York "Times" said:

The Soviets are offering France a tempting bait in order to obtain advantages in the general treaty negotiations which are continuing sporadically in Paris. They are chiefly desirous of obtaining industrial credits with which to bring Russia out of its business depression. The same scheme was recently offered to the British, who refused to nibble.

In exchange for the much-needed money the Russians say they are ready to put into effect a buying program covering three years—$35,000,000 the first year, $50,000,000 the second and $65,000,000 the third year. The purchasers who say they will agree to spend these sums are trusts, syndicates, railroads and other Soviet economic organizations.

Besides the official buying agencies, which almost entirely require machinery of different varieties, there will, according to the Soviets, be numerous commercial purchasers of raw materials, semi-finished products and general merchandise.

The Superior Council of National Economy drew up a list of Soviet industries susceptible of buying machinery in France, which is approved by the Council of People's Commissaries.

Details of the Soviet purchasing scheme for re-equipping metallurgical plants comprise steam engines, transportation apparatus and gas motors, while the items chiefly needed for re-equipping the steel and oil industries are turbogenerators, apparatus for the refinement of gasoline, kerosene and other oil by-products, apparatus for the production of sulphuric acid, pumps, boilers and pipeline materials. The Denetz coal trusts want to buy apparatus for washing and handling coal, and the State electrotechnical trust is seeking a variety of machine tools.

The textile industry has expressed a desire to purchase from France complete apparatus for the erection of entirely new plants to the value of $30,000,000 in excess of the three-year plan outlined.

Former Finance Minister De Stefani Sees Need of Cut in Italy's State Note Issues.

An Inter-Ocean Press cablegram from Rome, Italy (June 20) appeared as follows in the New York "Journal of Commerce":

Former Finance Minister De Stefani has written an interesting contribution regarding Italy's financial problem for the newspaper "Corriere de la Sera." He points out that public opinion in Italy seems to maintain that the country has done everything possible to stabilize the lira by balancing the budget and reducing the bank note circulation. The only adverse feature remaining is the unfavorable trade balance. The general public in Italy therefore cannot understand why the breakdown of the franc should be reflected in a decline of the lira.

In his article De Stefani directs attention to one point apparently overlooked, which is the double bank note circulation system. The total bank note circulation of Italy is 19,000,000,000 lire, of which 8,500,000,000 is issued against commercial bills by the Bank of Italy, while the remainder is issued by the State, for which there is little or no covering.

De Stefani expressed his opinion that only a continuous reduction of the State issue will bring about a healthy economic condition. During the last twelve months the circulation of State bank notes was reduced by 1,500,000,000 lire. De Stefani points out that this progressive elimination must be not only maintained but rather increased in order to regain the complete confidence of international financiers.

Italy's Financial and Economic Situation.

Commercial Attache of the Royal Italian Embassy at Washington announces on June 25 receipt of a cablegram from Count Volpi, the Italian Minister of Finance, dealing with the Italian Treasury situation on May 31st, 1926. The following information is supplied:

At the end of May the Italian budget showed an effective surplus of 811 million lire, as compared with a surplus of 668 millions at the end of the preceding month, showing an increase of 143 millions. On May 31st the cash balance of the Treasury was 5,104 million lire, registering a substantial increase over the corresponding figure of previous months. On the same date the total Italian public debt was 92,033 million lire, showing a decrease of 227 millions during the month.

At the end of May last, the total State and Banking paper circulation was 19,817 million lire, as compared with 19,998 millions at the end of April, and 20,395 million lire at the end of March, showing a reduction of 578 millions during the past two months.

The industrial, commercial and labor situation remains satisfactory; on April 30th the number of unemployed in all occupations (including agriculture) stood at 98,216, as compared to 126,521 on the corresponding month of 1925.

The gradual continued betterment of all these important economic and financial indexes are, no doubt, a clear confirmation that the Italian socio-economic rehabilitation is now permanent, resting on a sound and satisfactory basis.

Chilean Government Approves Spanish Bank of Chile.

Associated Press advices from Santiago, June 22, stated:

The Government has approved the articles of the new Spanish Bank of Chile, and the institution will open next month. It is capitalized at 40,000,000 Chilean pesos (about $4,800,000), distributed in 400,000 shares of 100 pesos each.

Chilean City Obtains Loan.

Moody's Foreign Department announces June 19 that it has just learned that a New York banking firm has acquired and is placing privately a City of Santiago 8% Loan to the amount of approximately 7,000,000 pesos (about $850,000). Bonds bear interest at the rate of 8% per annum (subject to a Chilean Government tax of 4½%, which will make the bonds really a 7.54% issue) and are redeemable through a yearly cumulative sinking fund of 1%, calculated to retire the whole loan before 1954. It is stated that:

Santiago, which is the capital of Chile, has never borrowed abroad, and since it was impossible to prevail upon the City to agree to the flotation of a Dollar issue, the bankers finally consented to the issuance of a Peso loan. In 1922 the Chilean Cities of Valparaiso and Vina del Mar obtained a 6,000,000 peso loan in this market.

Definitive Bonds of Mortgage Bank of Chile.

The Guaranty Trust Company of New York announces that it is prepared to exchange its interim certificates for Mortgage Bank of Chile Guaranteed Sinking Fund 6½% Gold Bonds for definitive bonds with coupons due June 30, 1926, and subsequent attached. Immediate exchange is advised in order that interest coupons due June 30, 1926, may be collected on their due date.

Japan's Foreign Trade Figures.

The following preliminary report of Japan's foreign trade conditions during the second ten days of June has come to us from the Japanese Financial Commission.

FOREIGN TRADE RETURNS OF JAPAN.

Second ten days of June (Preliminary Reports).

Exports	47,549,000 yen	Decrease	18,553,000 yen
Imports	52,107,000 yen	Decrease	23,257,000 yen
Import balance	4,558,000 yen	Decrease	4,704,000 yen

National Loans of Japan Issued, Redeemed and Outstanding in April 1926.

Statistics bearing on the issuance, redemption, &c., of Japanese internal and external loans during April were made available this week through the Japanese Financial Commission in this city. The national loans outstanding on April 30 total 5,100,417,773 yen, as compared with 4,999,176,360 yen March 31. New loans issued during April aggregated 101,418,850 yen, while the amount redeemed during the month was 177,337 yen. The details follow:

NATIONAL LOANS OF JAPAN (APRIL 1926).

Note—*These notes (representing chiefly our credits to Russia and China) used to be listed separately from others.

Another specially treated debt, Rice Purchase Bill, issued and retired occasionally for the purpose of regulating the price of rice, amounted at the end of March to 16,044,947.69 yen, but was totally redeemed during April.

The table showing bonds issued and redeemed during March was given in our issue of May 15, page 2735.

Report That Mexico Will Resume Interest Payments on External Debt July 1—New Agricultural Bank.

The intention of the Mexican Government to resume the payment of interest on the external debt of the country is indicated by A. M. Elias, financial agent of Mexico. In its issue of June 21 the New York "Times" has the following to say in the matter:

For the first time in more than two years Mexico will pay the interest on her $500,000,000 external debt, on which one payment was made in 1923, after a long period of financial demoralization. Resumption of semi-yearly payments will be made on July 1 of this year by the International Committee of Bankers on Mexico, of which Thomas W. Lamont of J. P. Morgan & Co. is Chairman. This was officially announced yesterday by Arturo M. Elias, financial agent of the Mexican Government in this city.

The total amount in arrears is $37,500,000, which will be paid over an eight-year period beginning in 1928, in accordance with the terms of an agreement entered into last October between Alberto J. Pani, Finance Minister of Mexico, and the International Bankers' Committee. The present regular payment will amount to $11,250,000.

Mexico has been transmitting money in monthly instalments to J. P. Morgan & Co. since January 1, last. The receipts have been pooled until, with the June payment, they amount to sufficient to meet the regular semi-annual interest requirements. This plan was followed because Mexican revenues are received in an uneven flow. Another payment of $11,250,000 will be made the first of next year, according to the agreement.

Mexican Agent's Statement.

The official statement as issued yesterday by Mr. Elias follows:

"As the Financial Agent of the Mexican Government in the United States, it is my pleasure to announce that with the June payment of the monthly sum agreed upon with the Committee of Bondholders and which will be paid on the regular date, the Mexican Government will have placed in the hands of the committee since January of this year a sum that will enable the resumption of the semi-yearly payments of interest on the various bond issues of Mexico.

"In view of conditions throughout the world, it is with pardonable pride that Mexico, torn by years of internal struggles, announces that she places her public debt on an interest-paying basis. Had it not been for sinister influences both within and without Mexico who were responsible for the De la Huerta Rebellion, Mexico would have been able to resume interest payments upon her public debt in 1923. The funds for this purpose were in hand and deposited in New York when the revolt engineered by De la Huerta and his financial backers took place and all the splendid work of rehabilitation of the Obregon Administration was for a time jeopardized.

"The attempt to involve Mexico in another period of destructive civil warfare and to take away from its people all the fruits gained by the great revolutionary sweep against the selfish rule of those who had, for over a generation, exploited her people beyond the limit of human endurance, was thoroughly defeated. But the financial cost was great and when President Calles took office it was not only with an empty Treasury, but with pressing debts which existed solely as the result of the cost of putting down the rebellion engineered by the enemies of the Mexican people.

"The salaries of the civil servants of the Government were in arrears as the result of the rebellion. These must be paid first as a sacred obligation. Then there were some millions of debts to business men of Mexico who had come promptly to the aid of the stable and able Government of Alvaro Obregon. It was the first task of the new Administration of President Calles to meet these obligations and before the first year of the Administration passed this had been accomplished.

New Agreement Made.

"Then the Administration turned its attention to the task of resuming payment of interest on the public debt. A new agreement was entered into with the Committee of Bondholders at the head of which was Mr. Lamont and the first monthly payment on account of interest was paid in January, 1926, and has been followed every month since in accordance with the agreement.

"A great irrigation project involving $30,000,000 of expenditure has been begun. This is vital to the agricultural development of Mexico. One-half of the work has been taken over by one of the largest engineering firms in the United States and the other half by the largest engineering firm in Germany.

New Bank Aiding Farmers.

"The new Agricultural Bank, with an authorized capital of $20,000,000 and $9,000,000 paid in, has already begun to be of service to the Mexican farmers. Loans are made on growing crops and for the purchase of modern agricultural machinery, of which the farmers are much in need. Only this Winter as financial agent of the Mexican Government I purchased and shipped the first installment of plows. These 10,000 plows bought in the United States, together with harness, were sold to the farmers for $28, to be paid for in three years without interest.

"When it is remembered that formerly this outfit cost the farmer $112 and that he had to pay cash, which in most cases he did not have, resulting in his being compelled to pursue the most primitive methods with corresponding small production, the importance of this move, which will be extended throughout the country, will be understood."

There has been discussion for some time in the financial district of a new loan to Mexico when the debt question was cleared up and it is believed that overtures for such a loan will be made within the next year. The amount will probably be $25,000,000 or more.

Under the 1922 Lamont-De la Huerta agreement, which the agreement made last October superseded, payments started at $15,000,000 in 1923 and were to have increased $2,500,000 a year until they amounted to $25,000,000 annually, at which figure they were to have been continued. Nothing has been paid since 1923, which makes $17,500,000 owing for 1924 and $20,000,000 for 1925. Payment of these arrears will be postponed and paid over the eight-year period beginning in 1928.

The railroad debts have been separated from the total and the carriers are now collectively responsible for their portion. This portion represents about 40% of the total $500,000,000.

Offering of $25,000,000 Brazilian Bonds.

Public offering of an issue of $25,000,000 6½% external sinking fund gold bonds of 1926 of the United States of Brazil was made on June 24 by a syndicate headed by Dillon, Read & Co. This offering marks the second step in the Government's financial program. The first step was taken in May, when an issue of $35,000,000 Brazilian Government bonds was sold by Dillon, Read & Co. and members of the offering syndicate. That offering was referred to in our issue of May 22, page 2897, and May 29, page 3031. A total of $60,000,000 of bonds is authorized and to be presently outstanding. The bonds offered this week were priced at 90½ and interest, to yield over 7.25% to maturity. The books were closed at 11 a. m., an hour after their opening on June 24, the issue, it is announced, having been oversubscribed. Part of these bonds were withdrawn for sale simultaneously in Europe by Mendelssohn & Co., Amsterdam; Nederlandsche Handel Maatschappij, Pierson & Co., R. Mees & Zoonen, Amsterdam; Skandinaviska Kreditaktiebolaget, Stocksholms Enskilda Bank, and others. The bonds will be dated April 1 1926 and will become due Oct. 1 1957. They will not be callable except for the sinking fund. Regarding the sinking fund it is stated:

An accumulative sinking fund of 1% per annum, payable semi-annually, will be applied to the redemption of bonds by call by lot at par and accrued interest. The sinking fund will be increased by amounts equal to interest on bonds previously redeemed. This sinking fund is calculated to retire all of the bonds of this issue by maturity.

The service on the entire issue of $60,000,000 bonds for both interest and sinking fund calls for $4,500,000 per annum. The bonds are in coupon form, in denominations of $1,000 and $500, registerable as to principal only. Principal and interest (April 1 and Oct. 1) will be payable in United States gold coin of the present standard of weight and fineness in New York City at the office of Dillon, Read & Co., or, at the holder's option, in London in sterling at par of exchange at the office of N. M. Rothschild & Sons, free of all Brazilian taxes, present or future. The National City Bank of New York, countersigning agent. The Brazilian Government has agreed to make application to list the bonds on the New York Stock Exchange. The following information is contained in a statement furnished to the syndicate by Dr. Annibal Freire, Minister of Finance:

These bonds will be the direct obligation of the United States of Brazil, and are issued under authority of Law No. 4625 of Dec. 31 1922, and Law No. 4984 of Dec. 31 1925. The total issue of bonds will be specifically secured, in the opinion of counsel, by a first charge on the receipts of the Government from income taxes and taxes on invoices (contas assignadas duplicatas), by a charge on the consumption taxes, subject to the charge of the 8% loan of 1921, and by a charge on import duties subject to the charges of the 5% sterling loans of 1898 and 1914 and the 8% loan of 1921. The total revenue derived by the Government from the above sources in 1924 was $117,000,000, and in 1925 $148,373,000. After deducting the indicated prior charges upon a portion of this revenue, which amount to approximately $11,798,400 per annum, there would have remained from the above sources in 1925 the sum of $136,574,600. The service of the issue of $60,000,000 bonds for both interest and sinking fund calls for $4,500,000 per annum.

Resources.

The United States of Brazil, with an area in excess of three and one-quarter million square miles, comprises approximately half the continent of South America, and is equal in area to the United States (excluding Alaska), Great Britain, Holland, Belgium, Portugal and Switzerland combined. Its fertile soil extends from the tropical to the temperate zones, and its wealth in agricultural and mineral products is correspondingly diverse. The present population of Brazil is in excess of 31,000,000, and has increased 80% in the past 25 years. Brazil is the largest producer in the world of coffee, and also exports cotton, sugar, cocoa, rubber and tobacco. Its mineral resources are known to be extensive.

National Debt.

The national funded debt of Brazil on Dec. 31 1925 was approximately $936,000,000, of which $626,000,000 was external. This represents a per capita debt of approximately $30, as against which the per capita national wealth is estimated at approximately $530. The Government has undertaken to resume in 1927 the sinking funds on certain sterling loans which have been in suspense under the terms of the funding agreement of 1914. The proceeds of the bonds are to be applied in reduction of Treasury obligations, including floating debt.

All conversions of paper milreis into dollars in the aobve circular are at the rate of 14.50 cents per milreis. Other conversions are at par.[

The syndicate offering the bonds was composed of Dillon, Read & Co., the National City Co., Lee, Higginson & Co., Blair & Co., Inc., White, Weld & Co., the First National Corporation of Boston, Continental & Commercial Trust & Savings Bank of Chicago, Illinois Merchants' Trust Co., Chicago; the Union Trust Co., Cleveland; Kissel, Kinnicutt & Co.; Ladenburg, Thalmann & Co.: Hemphill, Noyes & Co.; Paine, Webber & Co.; Cassatt & Co., Edward B. Smith & Co. and Janney & Co.

Purchase of $3,000,000 Bonds of Catholic Church Welfare Institutions in Germany by Banking Group—Public Offering Next Week.

Howe, Snow & Bertles, Inc., and A. Iselin & Co., with Gebr. Teixeira de Mattos of Amsterdam, and Mitchell, Hutchins & Co. of Chicago, have purchased an issue of $3,000,000 Roman Catholic Church Welfare Institutions in Germany 7% twenty-year secured sinking fund gold bonds, representing the second large piece of German Catholic Church financing in this market by substantially the same banking group. The inclusion of the Amsterdam bank, one of the oldest in Europe, is the only variation from the original syndicate headed by Howe, Snow & Bertles that obtained and sold earlier in the year the $5,000,000 issue of Roman Catholic Church of Bavaria bonds. Public offering of the $3,000,000 issue will be made next week.

Definitive Bonds of National Bank of Panama.

The Trust Company of North America announces that definitive bonds of the Banco Nacional de Panama (National Bank of Panama) guaranteed sinking fund 6½% 20-year gold bonds, series "A"., due Jan. 1 1946, are now in process of preparation and are expected to be ready for delivery about Oct. 1 1926. The semi-annual installment of interest due July 1 1926 will be paid upon presentation of interim receipts in the principal office of the Trust Company of North America, 93 Liberty Street, New York City, for the endorsement thereon of the payment of said interest. The bonds, to the amount of $1,000,000, were referred to in our issue of Jan. 2, page 33.

Offering of $3,000,000 5% Bonds of Dallas Joint Stock Land Bank Issue Sold.

Lee, Higginson & Co. and the Illinois Merchants Trust Co. on June 22 announced a public offering of a new issue of $3,000,000 Dallas Joint Stock Land Bank 5% Farm Loan bonds. The bonds were offered at 103 and accrued interest to yield about 4.62% to the optional date and 5% thereafter. The issue, it is stated, has all been sold. The bonds are dated Jan. 1 1926, due Jan. 1 1966, and are redeemable at 100 and accrued interest on Jan. 1 1936 or any interest date thereafter. Principal and semi-annual interest at the rate of 5% per annum (Jan. 1 and July 1), are payable at the Dallas Joint Stock Land Bank, or coupons may be presented for payment at the offices of Lee, Higginson & Co. in Boston, New York or Chicago. They are coupon bonds and fully registered bonds, interchangeable, in denominations of $10,000, $5,000 and $1,000. The bonds are the direct obligation of the Dallas Joint Stock Land Bank. As of June 15 1926, there were outstanding (including this issue) total bonds issued by this bank to the amount of $33,184,000. Security for these, it is announced, was approximately as follows:

First mortgages upon farms. $33,234,000 deposited, secured by farms with appraised value of	$88,100,000
Capital stock paid in (carrying double liability)	2,500,000
Surplus and Reserve	693,215
	$91,293,215

The Dallas Joint Stock Land Bank is permitted under its charter to operate in the State of Texas and Oklahoma. The following are the bank's loan statistics as of June 15 1926.

Total amount loans closed	$34,717,622
Acreage covered by loans	2,748,475
Appraised value of lands	$80,623,750
Appraised value of improvements	11,262,783
Appraised value of land and improvements	91,886,533
Percentage of loans to appraised value of land and improvements	37.7%
Percentage of loans to appraised value of land only	43.0%

Offering of $500,000 5% Bonds of First Joint Stock Land Bank of Montgomery.

An issue of $500,000 5% farm loan bonds of the First Joint Stock Land Bank of Montgomery, Ala., was offered by a syndicate on June 23 at 103 and accrued interest, to yield about 4.62% to the optional maturity and 5% thereafter. The syndicate is composed of Barr Brothers & Co., Inc., New York; the Central Trust Co. of Illinois, of Chicago; the Shawmut Corporation of Boston, and the First National Bank of Montgomery, Ala.

The bonds are dated April 1 1926, will mature April 1 1966, and are callable at par on April 1 1936, or any interest date thereafter. They are coupon bonds in $1,000 and $10,000 denominations, fully registerable and interchangeable. Principal and semi-annual interest (April 1 and Oct. 1) are payable at the First Joint Stock Land Bank of Montgomery, Ala., or the Chase National Bank, New York City. The First Joint Stock Land Bank of Montgomery operates in Georgia and Alabama. Its statement of condition as of May 1 1926 follows:

Resources—	
Mortgage loans	$5,521,100 00
Accrued interest on mortgage loans (not matured)	72,369 72
Cash on hand and in banks	201,155 79
Accounts receivable	554 86
Furniture and fixtures	2,980 93
Payments in process of collection	9,463 14
Other assets	535 95
Total	$5,808,160 39
Liabilities—	
Capital stock	$450,000 00
Surplus	20,000 00
Legal reserve	22,800 00
Undivided profits	79,086 59
Farm Loan bonds authorized and issued	5,050,000 00
Accrued interest on Farm Loan bonds (not matured)	51,901 41
Matured interest on Farm Loan bonds (coupons not presented)	47,025 00
Amortization payments on principal	71,111 30
Additional payments on principal	10,290 00
Amortization installments paid in advance	843 60
Other liabilities	5,102 49
Total	$5,808,160 39

Under date of April 30, W. A. Howell, Vice-President, reported as follows regarding mortgage loans:

STATEMENT AS TO MORTGAGE LOANS SUBMITTED TO FARM LOAN BOARD.

Amount of mortgage loans	$5,242,100 00
Borrowers valuation of land	16,742,319 47
Borrowers valuation of improvements	4,092,575 50
Borrowers total valuation	$20,834,894 97
Appraisers valuation of land	$12,714,497 46
Appraisers valuation of improvements	2,999,713 00
Appraisers total valuation	$15,714,210 46
Appraisers valuation of insurable improvements	$2,249,455 00

ON VALUATION BY FEDERAL APPRAISERS.

Percentage of loan to valuation of land and insurable improvements	35.0
Percentage of loan to valuation of land	41.2
Percentage of loan to valuation of land and all improvements	33.4
Payments on principal of loans reduces percentage of loans to appraised value	32.0
Borrowers gross worth	$43,342,232 79
Borrowers net worth	$34,337,683 37
Percentage of loans to borrowers gross worth	12.1
Percentage of loans to borrowers net worth	15.3
Appraisers value per acre	$43 87
Average amount loaned per acre	$18 08
Taxes preceding year on property loaned on 32c. per acre or	$93,817 87
Gross revenue preceding season from property loaned on which is 9% in excess of the amount loaned.	$5,740,398 43
Annual tax and installment charge of borrowers is but 1.09% of their gross worth and but 1.34% of their net worth.	

Since organization we have received applications to amount of $12,558,875 of which we have approved $8,000,700 and closed loans to amount of $5,611,800. Only one loan is now in default. Delinquencies on installments on loans of this bank have been but one-sixth of the average delinquencies of all joint stock land banks in the past two years. One one loan reported delinquent in year 1925. We have madd no foreclosures since organization and the Farm Loan Board has approved all loans submitted them.

Bank of North Dakota Declared to Be Menace to State by Attorney General Shafer—Bank Reported as Legally Insolvent—State Operation of Oil Marketing Enterprises in South Dakota.

G. F. Shafer, Attorney General of North Dakota, advocating abolition or reorganization of the Bank of North Dakota, declared that in seven years since it began operation it has more than lost its entire capital stock according to Minneapolis advices to the "Wall Street Journal" published in that paper June 15. The advices indicate that for nearly six years the bank has been legally insolvent; we quote the same herewith:

"The Bank of North Dakota is a menace to the financial future of the state because it places sweeping powers in the hands of a few elective officers," Mr. Shafer said in a statement given out at New Rockford, North Dakota.

The state flour mill and grain storage elevator at Grand Forks, still operated, although it has lost heavily, is the outstanding feature of the industrial program inaugurated by the Nonpartisan League. The Bank of North Dakota is the big feature of the state's financial program. While the Nonpartisan League was in full control, a program of state socialism got under way. With the near approach of the June 30 primaries, at which Governor Sorlie, who favors operation of the flour mill and bank, will or will not be endorsed, significant results of the state socialistic enterprise are being brought out.

Mr. Shafer favors at least restricting the functions of the Bank of North Dakota to the farm loan business. He says the capital of $2,000,000, originally provided by the state, has been more than wiped out, and for nearly six years the bank has been legally insolvent. It has never been self-supporting. It is highly dangerous and injurious to the state to engage in the general banking business with public funds and upon the credit of the state through a politically managed bank, he said. Taking the report of O. B. Lund, auditor, to show that the bank has lost $2,067,286.34 up to Sept. 10 1925, Mr. Shafer said the bank now is being operated as no private bank would be permitted to operate for a day, without any actual capital. It is being operated entirely on its deposit reserves and if it were a private institution it would be closed at once by the Banking Department. It is permitted to continue only because it is compelled to operate by the law of the state. It is able to function only by using as its capital the public funds belonging to the state and the political sub-divisions of the state, deposits from which are placed with it.

"It seems unwise to continue the Bank of North Dakota as a general banking institution, or attempt, as the Nonpartisan League says we should, to make it the financial center of North Dakota, when it has no capital and when it is obviously insolvent," said Mr. Shafer.

"Either the state should recognize that the bank is in reality insolvent and a financial burden upon the state, or the state ought to replace its lost capital and thus put it in funds and give it another chance to be self-supporting. This latter plan could not be carried out without amending the state consitution, for only $2,000,000 in unsecured bonds is now authorized to be issued by the state and it is hardly feasible to furnish such capital by an appropriation out of the Treasury. Since the capital of the bank cannot be restored, the state has the alternative of operating it without capital or closing out the general banking activities. Experience has shown that it is extremely hazardous to vest in politically selected officials the power to invest public funds except under the most stringent restrictions."

The following additional account at to what Attorney General Shafer had to say regarding the Bank is from the "Wall Street News" of June 12:

It [the bank] has not paid interest on its capital bonds, which is $100,000 a year, and it has paid nothing toward a sinking fund for retirement of the bonds. In 1925 the records for the first time showed a profit.

"Between 1919 and 1925 there had been levied $847,150.72 against the taxpayers of North Dakota for interest and principal, the amount for the latter being $250,000. Changes in management, coming as a result of shifting political conditions, will in time bring an administration that will play havoc with the public finances."

During the early stages of its history, the Bank of North Dakota had large deposits, as the State law required that the State treasury carry its balances there, as well as the balances of counties, townships, school districts and other political subdivisions. Some of the officials refused to do this, and the laws finally were amended so that the feature of commission did not remain, but the political advocates of the Nonpartisan League willingly placed their deposits there.

As to State operation of oil marketing enterprises in South Dakota, we quote the following from the New York "Evening Post" of June 18:

On the heels of this repudiation of the Bank of North Dakota comes the Governor of South Dakota with remarks to the effect that State operation of oil market ing enterprises is economically unsound. It is no belittlement of the acumen of Governor Gunderson to consider the recognition of anything as "economically unsound" in the Dakotas as a sign of progress. It is far more significant that the decision of the courts of the State that the oil marketing project was legally unjustified.

State Filling Stations Fail.

The Governor makes bold to say State owned and operated gasoline filling stations are not the answer to the supposedly high prices of gasoline. Volume of business, he says, through the centralization of buying power is the only way to influence prices. If the people who buy gasoline will unite and give enough business to one dealer such dealer could reduce prices and still make fair profits because of the resultant volume of trade.

The Governor said a thirty days' experiment had shown that the following margins of profit are necessary according to the volume of business: 1,500 to 2,000 gallons a day, 2 cents a gallon; 1,000 to 1,500 gallons a day, 2½ cents a galon; 500 to 1,000 gallons a day, 4 cents. Sales below 500 gallons a day justify only one filling station in a community.

The statement came in answer to agitation which followed the recent general advance in the prices of gasoline.

Death of Walter F. Taylor Deplored.

A tribute to the memory of Walter Fauntleroy Taylor, of the law firm of Carter, Ledyard & Milburn, legal advisers to the New York Stock Exchange, is paid by George Gordon Battle, who in recording the loss suffered by the community in the sudden death of Mr. Taylor on June 11 says in part:

All his ideals of civic and private conduct were of the highest and they were truly exemplified in his life. His energies were, however, chiefly directed along the lines of his chosen profession. He had a veritable passion for the study and the practice of law. It is, therefore (if we except his relatives and his many and warm personal friends), among the members of the Bar that his loss will be most keenly felt. No lawyer ever came in contact with Mr. Taylor in his broad and diversified practice without feeling a profound admiration for his extraordinary legal ability and a deep respect for his ingrained and constitutional integrity both of mind and of character. At his funeral it was remarked by one of his pall-bearers, Mr. Charles C. Burlingham, himself a leader of the Admiralty Bar, that Mr. Taylor was a lawyer's lawyer. Certainly there was no encomium which he would have valued more.

He was singularly modest and lacking in any desire for publicity. His name seldom appeared in the public press. But in the higher ranks of his profession and with the many great business interests which he served with such honor and diligence, he was held in the very highest esteem. . . .

Born in Virginia in November, 1870, of ancient and distinguished lineage, he was graduated from the University of Virginia in 1890 with the degree of Master of Arts and in 1891 took the degree of Bachelor of Laws. At first he thought of making his home in Baltimore, but in 1893 he determined to come to New York, where he presented to Mr. James C. Carter a note of introduction from a well-known Maryland lawyer. Mr. Carter was at that time a member of the firm of Carter & Ledyard and the leader of the Bar of New York. He received Mr. Taylor into his office and the first task assigned to him was the study of the Will of Samuel J. Tilden, which was the subject of so much litigation. A few years later Mr. Taylor became a member of the firm, which continues to hold its high place at our Bar under the name of Carter, Ledyard & Milburn; and in that firm he remained until his death. The fact that he enjoyed the respect and affection of such men as Mr. Carter and his associates attests the fine qualities of his heart and mind. . . .

And in addition to the engrossing and laborious toil of his profession, he found time for much public service. It was characteristic that this work was chiefly of a legal nature. He was during the Great War the Chairman of the Legal Advisory Board of the Draft in New York City. He belonged to all the Bar Associations—National, State and City. He was for years on the Executive Committee of the New York City Bar Association and served as Chairman of that body. Also his legal scholarship was recognized in the Association by his appointment and long service as the Chairman of the Library Committee, one of the most important official positions in the legal profession. Always ready with wise and friendly counsel he gave freely both from his mind and from his purse for the aid of his fellowmen. Those who knew him best loved and admired him most. And so, notwithstanding his modesty and his shrinking aversion to any form of notoriety, it is recognized by the chief business and financial interests of our City and by the members of the profession in which he spent his life and his labors, that a great lawyer and a man of noble and lofty character has passed from us into the Beyond.

Mr. Taylor died sometime during the night of June 11, his death having come while he was asleep, and having been due to an attack of heart disease.

Samuel Feinstein and J. B. Kimberly, Jr., Temporarily Suspended From New York Curb Market.

Announcement was made on June 24 by the New York Curb Market Association of the suspension for a period of thirty days of Samuel Feinstein and J. B. Kimberly, Jr., for violating the provisions of the constitution which relate to disorderly conduct on the floor of the Exchange.

New York Stock Exchange Explains Listing of Non Voting Stock of Gotham Silk Hosiery Co.

For the first time since it went on record as opposed in principle to the listing of stock that failed to carry voting power, the New York Stock Exchange on June 23 (says the New York "Times") announced an exception to its policy in the admission to its trading privileges of 150,000 shares of new non-voting common stock of the Gotham Silk Hosiery Company, Inc. The listing includes $4,500,000 of first preferred stock. The "Times" in its account of the explanation said:

The listing of the non-voting stock was explained when it was pointed out that the Governing Committee had approved the application for the listing of the issue last December, prior to the declaration of the Exchange's policy on the subject of non-voting stock. The approval was made subject to notice of the issuance of the stock. This notice has just been given and the shares have been admitted formally to the list.

The new non-voting stock is issued in exchange for the convertible preferred stock. There was originally outstanding $4,500,000 of 7% first preferred, of which the first $1,000,000 was convertible into the non-voting common at 40, the second $1,000,000 at $45, the third $1,000,000 at 50 and the remainder at 60. The $850,000 of 7% second preferred bears option warrants to buy non-voting common stock at $40 a share at the rate of two and one-half shares of common for each share of second preferred. There are 320,000 shares of voting common stock outstanding and 150,000 shares of non-voting common reserved for conversion or purchase by the preferred. Up to June 19 the first $1,000,000 of first preferred had been converted and conversion of the second million is proceeding.

Consolidated Stock Exchange Sells Its Building for $1,400,000.

The Consolidated Stock Exchange of this city the early part of the week disposed of its bulding at the corner of Broad and Beaver Sts. for $1,400,000. A E. Lefcourt, a realty operator of this city, was the purchaser. He will erect, it is said, a 30-story office building on the site at a total cost of between $8,000,000 and $10,000,000. The present building, a four-story structure, erected in 1907 and rated as one of the handsomest of the small buildings in the financial district, will be torn down as soon as the new owner acquires title to the property. The building extends over 99 ft. along Board St. and more than 112 ft. along Beaver. President Philip Evans of the Consolidated Exchange, it is understood, plans to take quarters for the organization in the new [building when erected. In the

meantime the Exchange will occupy temporary quarters. In its Sunday (June 20) issue, the New York "Times" in regard to the then proposed purchase of the building, said in part:

It is proposed that the purchasers pay $300,000 in cash, assume the $600,000 first mortgage now on the property and place a second mortgage for $500,000 on it. The 217 members will receive certificates covering their pro rata interests in the property and other assets. Each member's probable equity is calculated at nearly $4,000.

The Consolidated has about $80,000 in cash in its treasury. It purposes to pay $25,000 for cancellation of a lease held by a restaurant company on a portion of the property. After allowing for $25,000 in commissions and other expenses of the sale, it will have about $330,000 in cash. It is its intention to keep $150,000 in its treasury, find smaller quarters and continue operations on a restricted scale. New counsel will work out legal problems connected with the transfer of the Exchange's facilities, including its ticker service.

It ws said yesterday (June 19) that efforts might be made to have the State Attorney-General agree to a modification of the restrictions under which the Exchange is operating. It has done little business since the signing of a stipulation with him which virtually placed it under his control on condition that his application for an injunction against it be dismissed.

Canadian Wheat Pool.

According to Associated Press advices from Winnipeg (Manitoba) on June 11, 14,000,000 acres sown to wheat in western Canada this spring have been signed up by the Canadian wheat pool, the co-operative marketing association of farmers in the prairie provinces, it is indicated in an announcement by the organization that day. The dispatch also stated:

The Canadian pool claims to have developed in three years into the largest organization of its kind in the world, with a membership totaling more than 125,000 farmers.

"Two thirds of all the wheat grown in Manitoba, Saskatchewan and Alberta in 1926 will be marketed co-operatively by the pool," the announcement said. "Success of this pool has demonstrated the advantages of co-operative marketing. Under the old marketing system farmers sold their wheat to middlemen who made a profit in reselling it. Now the pool sells the grain direct to the purchaser, eliminating this handling expense and adding to the farmers' profit."

Most of the crop marketed through the association is sold to importers abroad.

McFadden Branch Banking Bill Returned to Conference—House Insists on Hull Amendments.

The conference report on the McFadden branch banking bill, presented to the House on June 22 by Representative McFadden was returned to Conference on June 24, when a vote on the compromise legislation was taken. Insisting on the Hull branch bank amendments (carried in the bill it passed the House February 4) the House on the 24th by a vote of 197 to 118 rejected the branch bank provisions of the conference report. In its account of the House action the New York "Commercial" said:

The test vote was on a motion of Representative McFadden, chairman of the House committee on banking and currency, to approve the substitute proposed by the Senate and House conferees for the Hull amendments. The motion also provided for the approval of all other compromise provisions agreed upon by the conferees with the exception of the new matter which was stricken out on a point of order in the House on Tuesday. This new matter, which Mr. McFadden did not attempt to revive included the provision for an investigation by a joint committee of the effect of the banking system of the country upon commodity prices.

The McFadden motion met defeat by a vote of 118 to 197. Following this action Representative McFadden moved that the bill be sent back to conference. This motion was carried without opposition. Representative Hull, who led the successful fight against the conference report, then moved that the House conferees be instructed to adhere to the branch bank provisions of the original House bill. Speaker Longworth declared this motion carried on a viva voce vote.

In its report of the proceedings in the House on June 24 the New York "Journal of Commerce" had the following to say:

Inasmuch as the Senate conferees have made it plain that they will not agree to accept the so-called Hull amendments, as contemplated under the instructions to the House conferees, the suggestion has been made that the bill is dead so far as the present session of Congress is concerned. In any event the situation, from the standpoint of the proponents of the legislation, is not particularly hopeful.

New York View Stated.

The Illinois delegation which had stood back of the Hull amendments since they were sponsored by the State bank group of the outlying sections of Chicago, were joined by the New York and Ohio delegations in particular, and by some of the States not having any cities with a population of more than 100,000, which States would be precluded from the benefits of the branch banking provisions of the bill. The fact that the large national banks of New York City would be enabled under the contiguous territory provisions to invade the outlying cities and towns, such as Yonkers and Mt. Vernon, and extend their operations over a radius of fifty miles, led to opposition on the part of the New York delegation. Similarly the Ohio Congressmen expressed opposition because of the possible spread of the national banks of Cleveland, for instance.

Representative Begg of Ohio inquired of Mr. McFadden if the bill would permit the Cleveland national banks to establish branches in Lakewood and if national banks of Lakewood could invade Cleveland. Mr. McFadden answered in the affirmative with respect to the former, and in the negative as to the latter since Lakewood has a population, it was stated, only of 80,000 and its national banks would be prohibited from engaging in branch banking.

"Where is the justice in that situation?" demanded Mr. Begg. "Is that not putting a straight handicap on the Lakewood banks? Is it not forcing them into the city-proper system?"

Situation in Ohio.

Representative Burton of Ohio added that the Ohio banks are anxious to engage in national banking, but suggested that the national banks in the suburbs would not seek to have branches in Cleveland since they would hardly be large enough to carry on such a business. Mr. McFadden agreed with Representative Wainwright, New York, that the provisions dealing with "contiguous territory" were written into the bill to take care of Cleveland and Cincinnati.

Representative Wingo of Arkansas resumed his attack on the proposed compromise, denying that he is opposed to the McFadden bill as it passed the House, but reiterating his unalterable opposition to it in the form given to it in the conference committee, of which he is a dissenting member. He declared that if adopted as it is, the national banks of Chicago would be able to establish 130 branches in that city and its outlying sections and in the contiguous territory, as many additional branches as the Comptroller of the Currency might permit. He asserted that they could absolutely drive the smaller, independent banks out of business, just as "they have done in California."

Efforts were made by Mr. McFadden and by Representative Beedy of Maine to prevail upon the House to accept the compromise on the ground that bill as changed by the conference committee was more restrictive than the House draft of the measure inclusive of the Hull amendments.

Some Support Lost.

Mr. Beedy as much as told the House that the members were not properly familiar with what the legislation is and seeks to do and entered into quite a lengthy discussion of the matter, outlining the history of the so-called Hull amendments. His remarks, however, seemed to carry less weight than the letters and telegrams received from constituents back home, for those in charge of the bill lost votes they had probably to some extent counted upon. The several issues in the bill were bulked today under the single motion made by Mr. McFadden, except for the elimination of the three matters that on Tuesday were rejected on points of order sustained by Speaker Longworth. That brought the vote strictly upon the Hull amendments, and the McFadden group lost.

The Hull amendments constitute a series of changes in the original McFadden bill as presented to the House at the last session of Congress, scattered throughout the bill. In substance, they would forever preclude national banks in the present non-branch banking States from engaging in branch banking, even though those States in the future enact new legislation permitting the establishment of branches by their own State banks. Under the McFadden proposal there would have been no strings at all upon the State member banks of the Federal Reserve system, although the bill as it passed the House sought to take from such banks engaging in branch banking their membership in the system.

If the Senate conferees agree to accept the Hull amendments, the way is open to the final passage of the legislation and the transmission of the measure to the President for his signature. Negotiations will be entered into by Representative McFadden with the Senators for further conferences on the matter.

Further below we indicate that on June 22 the proposal of Representative King for a congressional investigation into the effect of the Federal Reserve Act on Commodity Prices was ruled out.

Preliminary to the presentation of the report to the House on June 22, the "Journal of Commrce" reported the following from its Washington correspondent on June 20.

When the conference report on the McFadden National Bank bill comes up in the House on Tuesday on a motion to approve the work of the conferees as to all provisions other than the so-called Hull amendments and the substitutes therefor, a demand will be made for further information on an investigation of the banking system therein contemplated.

When a group of House members yesterday were discussing this proposal, which has come to be known as the King resolution, it was suggested that this provision would prove subject to a point of order that it was new legislation and was not contained either in the House or Senate drafts of the National Bank bill upon passage. Among these members were some that propose to fight the proposal in the absence of full information as to what it is all about.

Give and Take.

With respect to much legislation in recent years, there is always a certain amount of giving and taking between the Senate and House and between the various groups in each body. The system has general approval since it is difficult to promulgate any major legislation satisfactory to all interests and all sections. These redeeming features, however, are not prominent in the case of the King resolution, it is declared, and the members of the House are loath to act upon something that may contain a vast amount of dynamite without a thorough knowledge of what they are doing.

The King proposal is for the appointment of a joint special committee to consist of three members of the Committee on Banking and Currency of the House, to be appointed by the Speaker, and three members of the Senate Committee on Banking and Currency, to be appointed by the President of the Senate, to make an inquiry into the prices of commodities in the United States as affected, since 1914, if at all, by the Federal banking laws.

Some of the House members assert that they have not been able to secure satisfactory information as to just what is sought and they are protesting against this move wherein they think may lie a hidden motive. One thought is that there is being sought a resumption of the so-called duplicate bond probe; another is that it is proposed to dig further into the financial activities of the Government and the influence of the Federal Reserve Bank of New York through its discount rates and open market purchases on commodity prices. That would be an invasion of the territory of Representative James G. Strong of Kansas, for through the hearings on the bill he is sponsoring having to do with a proposed stabilization of the dollar, that subject has been gone into in great detail. It is not believed that Mr. Strong looks with any great favor upon the King resolution.

May Spend $2,000.

If the provision is retained in the bill the joint committee would have authority to appoint and fix the compensation of such clerical, stenographic and other assistance, to hold such hearings and to sit and act at such places and times during the sessions and recesses of the Sixty-ninth Congress, to require by subpoena or otherwise the attendance of such witnesses and the production of such books, papers and documents, to administer such oaths, to take such testimony, to have printing and binding done, and make such expenditures as it deems advisable. These expenditures in their entirety are to be limited to $2,000, one-half to be paid each by the Senate and House. The provision also requires that the joint committee shall report to its respective houses from time to time the results of its inquiries, together with such recommendations as it may deem advisable.

A further feature of this proposal is that it is required that subpoenas for witnesses shall be issued upon the requirement of the joint committee "or any member thereof," under the signature of either the Speaker of the House or the President of the Senate. That would enable Representative King to bring before the joint committee any person or persons he might desire to have furnish testimony on the matter involved. Since there is no limitation upon the scope of the investigation, the subject providing almost inexhaustible sources of information, it could have incorporated the old so-called Brewer bond investigation as a part of the probe.

A further embarrassing situation, from the standpoint of the proponents of the McFadden bill, is the growing opposition to the branch banking limitation as proposed under the compromise agreement to be adopted in lieu of the so-called Hull amendments. It is contended that the 154 cities in the States now permitting branch banking, the national banks of which it was proposed to assist, have shrunk to thirty-eight cities, that being the number having a population each in excess of 100,000. No cities having a population of less than 100,000 will come under the ban.

We likewise quote what that paper had to say in its Washington advices June 22:

After spending the entire day in the discussion of the conference report on the McFadden National Bank bill the House of Representatives found itself enmeshed in a parliamentary entanglement from which it could not free itself to permit of the taking of a vote to determine whether or not the branch banking restrictions, known as the Hull amendments, should be retained or rejected. Amid cries for a vote the House put the matter over until Thursday.

A lengthy presentation of the matter by Chairman McFadden of the House Banking and Currency Committee, and Representative Wingo, ranking Democratic member, preceded the presentation by Representative Strong of Kansas of a motion to strike from the proposal the so-called King resolution calling for a Congressional investigation as to the effect of the Federal banking laws upon commodity prices.

Point of Order.

Mr. Strong made the point of order that this constituted new matter written into the legislation by the conferees, who thus exceeded their authority. Representative King of Illinois, sponsor of the probe move, spoke in defense of his suggestion, having also filed a lengthy brief with the Speaker, in advance of today's discussion on the right of the conferees to adopt it. Speaker Longworth, citing precedents, ruled against Mr. King and this new matter went out.

There were a number of members, both Republicans and Democrats, who were ready to voice their opposition to the King resolution, the effect of which was not apparent from the wording of the proposal, but which was believed to be but a move to resume the investigation into the alleged duplicate bond issues.

Branch Banking Showdown.

The measure seemed to be in a serious predicament when Chairman McFadden sought to impress upon the House the fact that in the vote which he was seeking all he wanted was a determination by the House whether or not it would agree to a new proposal restricting branch banking, as evolved by the conferees, or would insist upon the retention of the so-called Hull amendments.

The latter, if adopted, would forever preclude from engaging in branch banking the national banks and State bank members of the Federal Reserve system in the existing non-branch banking States, even though these States later should enact new legislation permitting their own State banks thus to expand and establish branches.

The conference proposal would prohibit the establishment in any State of branches by National banks or State bank members of the Reserve system when located in cities having a population of less than 100,000, the maximum number of branches in any event being placed at five and only in the case of banks located in cities having a population of 1,000,000 or more.

Representative Wingo accused certain of his colleagues on the conference committee as in reality desiring State-wide branch banking, and declared that the revamped bill would make easy through consolidations an undesirable extension of the system. He predicted that in a comparatively short time the situation in all the States would be somewhat like that now prevailing in California. He denied that he had refused to attend sessions of the conference committee, as had been charged. In conclusion he asked the House to stand upon the bill as originally passed by it.

Members from States having no cities of a population higher than 100,000, such as North Carolina, are opposed to the "population scheme," having been deluged with telegrams from the banks back home protesting against being left out. Some attacked the bill on the ground that here again the conferees had exceeded their authority in changing the provisions of the House bill which prohibited branch banking in cities of less than 25,000.

For Forty-four Cities Only.

Representative McFadden stated that under the compromise agreement, branch banking would be limited to 44 cities in 15 States, adding that if all of the present non-branch banking States changed their laws, the limitation would be upon 67 cities in 30 States. Under the bill as it originally passed the House branch banking would have been permitted in 199 cities and if all the States permitted such activity, the number of cities would be enlarged to 317.

Representative McFadden stated that the compromise agreement reached in conference is a more drastic restriction upon the future establishment of branches by national banks than was contained in the bill as it passed the House, including the Hull amendments.

He pointed out that it denies to national banks in every State the right to open branches outside of the home city of the parent bank, and the right to enter or to remain in the Federal Reserve System if they open, after the approval of this act, any branches outside of the home city of the parent bank. State-wide branch banking is absolutely prohibited by this provision after the date of the passage of this act and it will be impossible, under this bill, for the large city banks to absorb the independent unit banks in any State.

A Stricter Limitation.

In those States that do not now permit branch banking by changing their laws, a much stricter limitation is placed than the restriction on the States which now permit branch banking, wherein no branch banking would be allowed in cities under 100,000 population, only one branch will be permitted in cities over 100,000 and less than 250,000, and one additional branch for each additional 250,000 population, and in no case will any national bank be permitted to have in excess of five branches in any one city.

Mr. McFadden pointed out further that the so-called Hull amendments have nothing to do with State-wide branch banking, but relate solely to the twenty-six anti-branch banking States which may in the future change their laws and permit the establishment of home city branches, simply being a question of time when a State enacts branch banking laws.

He explained that before this bill become a law national banks may have branches; afterward national banks may not have branches. All lawful branches now in operation by national banks and all State-wide branches now in operation by State member banks who are now members of the Federal Reserve system may be retained when a State bank becomes a national bank or a member of the Federal Reserve system, or when two or more banks, national or State consolidate, all branches now lawfully existing may be retained.

To Meet Four Conditions.

He explained also that those cities in which the State banks are allowed to have branches in the territory contiguous to the city that under certain limitations branches would be permitted, but, he pointed out, before any national bank could establish such a bank four conditions must be met, namely:

The branch must have the approval of the Comptroller of the Currency, it must be located in an incorporated city, town or village, which is actually contigious to the main city. The contigious suburb must constitute an economic unit with the same city and be a part of the metropolitan area. No such branch can, however, be established until after the Comptroller of the Currency has held a public hearing to ascertain the public need for a branch at the locality in question, guarding very carefully any possible extension beyond the point of contigious territory.

Mr. McFadden also stated that the Secretary of the Treasury, the Federal Reserve Board and the Comptroller of the Curency were absolutely opposed to the enactment in this bill of the so-called Hull amendments.

National Bank Section of N. Y. State Bankers' Association Urges Enactment of McFadden Branch Banking Bill.

The National Bank Section of the New York State Bankers' Association, at its annual meeting in Quebec on June 19 adopted a resolution instructing Secretary Arthur S. O'Neil to telegraph the Conferees on the McFadden branch banking bill urging the prompt passage of the bill.

Defeat of McNary-Haugen Farm Relief Bill in Senate.

The McNary-Haugen farm relief bill, which a month ago was defeated in the House, met defeat in the Senate on June 24, being rejected by a vote of 45 in opposition with 39 registered in favor of the bill. The measure proposed to establish a Federal Farm Board to control and dispose of the surplus of basic agricultural commodities; a revolving fund of $150,000,000 from which loans would be made, and an equalization fee, or tax, on commodities sold by the farmer to reimburse the fund, were features of the proposed legislature. On June 23 Senator McNary introduced an amendment providing that not more than $75,000,000 of the $150,000,000 revolving fund should be used for financing the cotton crop. In recording the Senate defeat of the bill on June 24, the Washington advices to the New York "Journal of Commerce" stated:

It (the bill) had the indorsement of the corn belt committee, which has been here during much of this session of Congress urging farm legislation.

A coalition of Western and Southern Senators failed to overcome a combination of Eastern and other Southern members, as in the House recently when the Haugen proposal was rejected.

To Vote on Co-operative Marketing.

The battle over substitute measures will be resumed tomorrow with supporters of the McNary measure striving to save something from the wreckage and opponents, pressing their advantage, determined to pass the House co-operative marketing bill and nothing else. The McNary proposal was attached to it as a rider and the co-operative marketing bill is still to be voted upon.

Immediately after the vote the coalition in support of the bill crumbled when Senator Norris, Republican, Nebraska, reoffered the measure with an amendment providing for the immediate operation of the equalization fee against cotton instead of deferring it three years, as originally proposed.

The amended measure was rejected, 52 to 28, with the Southern Democrats standing to a man against it.

A similar amendment, offered by Senator Williams, Republican, Missouri, before the roll call on the McNary bill, had been rejected 35 to 50, with nine Democrats, none of them from the South, joining with 26 Republicans in support of it.

Export Corporation Plan Rejected.

The Senate also had rejected a substitute by Senator Robinson of Arkansas, the Democratic leader proposing the creation of a $200,000,000 export corporation to loan money to farmers. The vote on this substitute, which carried no provision for an equalization fee, was 39 to 45.

As a preliminary to the final showdown on the bill, however, the Senate reaffirmed by a formal vote of 50 to 33 the amendment, sponsored by Senator McNary, Republican, Oregon, in charge of the measure, to authorize the use of $75,000,000 of the $150,000,000 carried in the bill for the marketing of cotton. Southern Senators supported this amendment, while many from the East and West opposed it.

Before the vote on the Norris amendment, Senator George, Democrat, Georgia, appealed to the Democrats to reject the proposal, as he was convinced that the deferred fee had been inserted in the original bill solly as a bait to Southern Senators.

He declared that if the bill had passed with fee deferred an effort soon would have been made by Western Senators to lift the ban on the fee against cotton. This would have meant, he insisted, that every pound of cotton in the South would be taxed.

Senator Norris explained his proposal only would place cotton on an equal basis with wheat, corn and hogs and he wanted to know if the Democrats were serious in their efforts to relieve the farmers.

With the Norris proposal out of the way the Senate turned to other substitutes, Senators Lenroot, Republican, Wisconsin, and Norbeck, Republican, South Dakota, each seeking the attention of the Senate to proposals they sponsored.

As the debate grew in intensity' Senator McNary moved that the Senate recess.

He was greeted by shouts of disapproval and Senator Ashurst, Democrat, Arizona, raised his voice above the din with appeals to Senators to stay and complete its business. It finally was decided to remain in session, the vote on the question being 46 to 38.

The Senate soon had a change of heart, however, when it accepted without protest a motion by Senator Curtis, of Kansas, the Republican leader, for an executive session to consider nominations. At its conclusion adjournment was taken until tomorrow.

Of the 39 votes in favor of the bill 23 were those of Republicans, 15 Democrats and 1 Farmer-Labor; the 45 votes in opposition were 24 Republicans and 21 Democrats.

Last night's Associated Press dispatches from Washington, June 25, indicated that the President had agreed to outline his views on the subject, these dispatches we quote from the New York "Evening Post" stating:

The triumphant opponents of the McNary farm bill enlisted the aid of President Coolidge today as they prepared to drive home their victory, and the opposition countered with a move to lay all farm relief legislation aside until Washington had heard from the country.

Under the plan which began taking shape in hurried conferences among those who favored the McNary equalization fee, defeated by a margin of six votes late yesterday, even the Administration's co-operative marketing bill would be displaced from its preferred place before the Senate and other legislation considered while the sentiment back home received an opportunity to crystallize.

Friends of the defeated corn-belt plan, as embodied in the McNary bill, said it was useless for the Senate to put through a co-operative marketing or other "make-shift" arrangement, and at the same time deny the farmers of the West the one relief plan on which they have united.

Administration leaders, manifestly disturbed by the knowledge that a shift of three or four Senators might give the Insurgents a majority, urged the President to make a statement of his position. After a long conference with Secretaries Jardine and Hoover, it was indicated he would outline his views late today, in the hope of solving a clear majority for the Administration program.

A motion to put aside all farm legislation and take up the Veterans' rehabilitation bill was made in the Senate late this afternoon by Senator Watson, Republican, of Indiana, one of the leaders of the group favoring the McNary bill.

The Senate had wrestled all day with a new crop of substitutes, some put forward by the farm bloc and in a final desperate effort to save a part of the wreckage of the corn belt relief plan, and some sponsored by Administration Senators and acceptable to the White House.

The Norbeck farm relief proposal providing export bounties for wheat and corn was rejected during the afternoon.

In defending his amendment, which would set up a fund of $150,000,000 for loans to be used in exporting crops, Senator Lenroot said his plan did not propose permanent legislation.

Senator Norris declared after all the various substitutes had been disposed of he intended to propose a resolution providing for the appointment of a commission to investigate and aid agriculture, made up "from the Senators who opposed the McNary Committee amendment."

Senator Bruce, Democrat, of Maryland, assailed the Lenroot substitute as "worse even than the McNary amendment."

He suggested the appointment of a board of five "from such men as Owen D. Young and Professor Taussig and a lawyer of high standing to investigate and report at this session of Congress on a practical manner of alleviating the distress of agriculture."

Following is the text of the President's statement favoring Senator Fess' bill:

One of the perplexing questions before the Congress is to determine what will be most helpful in relieving agricultural distress. The Congress already has rejected certain definite proposals. But that does not relieve us of the desirability of attempting to secure constructive legislation.

Since the war the Congress and the Administration have devoted painstaking effort to strengthening the agricultural situation. During the post-war slump a great disparity arose between prices of agricultural commodities and those of industrial commodities which the farmer must buy. This is still true in certain sections and certain commodities. Much legislation has been enacted and much Administration action has been taken which have already resulted in improving the farm purchasing power.

Farmer Has Suffered.

But all these actions, helpful though they have been, are not sufficient to cover all branches of the industry. The farmer has suffered greatly and no doubt disproportionately from the effects of deflation. He is entitled to relief if it can possiibly be given on a sound basis by the Government. I know the committees of agriculture and the Congress and the President have all given the most careful thought and spent much time in seeking remedies to afford relief. I want the best method adopted which promises relief along these lines. Certainly no one can charge that the problem has been neglected.

Constructive action has been repeatedly proposed from various sections of the agricultural communities. These proposals provide for the creation of a farm marketing board whose duty is to secure a better adjustment of agricultural production; the larger development and consolidation of farmers' marketing associations under their own control and embrace the placing of one hundred millions of dollars of public money for working capital at the disposal of such farmers' controlled marketing associations, through such farm boards, for the purpose of better stabilizing their markets, improving their marketing machinery and the eliminating of waste in distribution. This form of legislation would support the whole of the agricultural industry—in the North, the South, the East and the West—both large and small—not any particular section or segment.

I am in favor of this type of legislation and I am convinced that immediate action along such lines will profoundly assist the farmers. I believe that the farmers should be provided with these advantages. It seems to me that such a proposal is embodied in the bill S4462 offered by Senator Fess on June 16, and which he has proposed to offer as an amendment to the pending co-operative bill which has passed the House and is now before the Senate.

I have advised the Congress from time to time of the necessity of further assistance in order that the farmers' position may be finally and fully restored upon a permanent and sound basis, and I sincerely believe that legislation making possible this important and effective further step in better organization in marketing in the control of the farmers themselves will bring these results which we all desire. Such legislation is of great importance to the country.

Secretary of the Treasury Mellon's views on the McNary-Haugen bill were given in these columns a week ago (page 3407). The defeat of the Haugen bill in the House was voted in our issue of May 29 (page 3033).

New York Cotton Exchange Referendum on Southern Delivery—Elimination of New York Proposed—Views of George Gordon Battle and Others.

The attention of members of the New York Cotton Exchange is just now centred on the question of the adoption of a Southern delivery contract, a referendum vote on which will be taken on July 1. We have already presented some of the arguments for and against the proposal, and this week, under a separate head are giving the views of W. R. Craig & Co. regarding the advantages and disadvantages which would accrue with the adoption of the plan. We also refer elsewhere in this issue to the report of the Texas Cotton Association against Southern deliveries, and to the vote of members of the New Orleans Cotton Exchange in favor of deliveries on Galveston and Houston contracts. In presenting some of the views in opposition to the plan affecting the New York Cotton Exchange which would permit deliveries at Southern ports on the New York contract and eliminate New York delivery, E. L. Harvey asserts that Southern deliveries would remove the cotton business from New York, the proposal being not to add Southern delivery points to New York in the New York contract, but to eliminate New York entirely. The Southern ports which it is proposed to include in the New York contract are Norfolk, Savannah, New Orleans, Galveston and Houston. Incident to the proposed elimination of New York, attention is directed to the fact that during the fiscal year 1925 1,000,000 cotton bales, to the value of $125,000,000, passed through the port of New York—500,000 bales being destined abroad and 500,000 bales to New England. Incidentally it is made known that George Gordon Battle, himself a Southerner, has rendered an opinion in which he points out that the charter of the New York Cotton Exchange, from the Legislature of the State of New York, specifies that the organization shall exist "to promote the cotton trade of the State of New York, increase its amount and augment the facilities with which it may be conducted." Mr. Battle says:

The suggested action will offend against the purposes for which the Exchange was incorporated. The Attorney-General could in that event, and in all likelihood would, take action to vacate the charter or to annul the existence of the corporation under the provisions of Section 131 of the General Corporation Law. The Legislature in such event would in all likelihood enact laws to prevent or penalize this change or by way of reprisal to impose heavier taxation or other burdens upon the Exchange.

In stating that the opponents of Southern deliveries do not stand alone on this question of self-preservation, Mr. Harvey says:

They declare that the permission of deliveries at various Southern ports, under the New York contract, would further complicate an already complicated business, tend toward the possibility of monopoly through placing the market at the mercy of large holders of cotton in Southern warehouses, which could be thrown on the market at one time and depress the price. Depression of the price of cotton on the Exchange always depresses the price of cotton to the producer. This is the point that will be of paramount interest to the South, where the Southern delivery proposition may, on the surface, seem to be a local patriotic idea. Once it is definitely explained that the adoption of Southern delivery will tend to be a continual depressing menace, it is assured that the entire South will rise up in arms against the idea. The Texas Cotton Association, at its meeting in

Galveston in March, went on record against it, as also did the American Cotton Shippers' Association meeting in Atlanta in April.

W. R. Craig, of the firm of W. R. Craig & Co., has this to say of the proposal and its probable effects: "The cotton interests of America are probably more agitated at present than at any time since the New York Cotton Exchange was closed at the beginning of the World War. The matter that is causing the greatest amount of thought and discussion is what is known as 'Southern Warehouse Delivery.' This is a technical expression which means that, instead of delivering raw cotton in warehouses in New York City in fulfillment of future contracts made on the New York Cotton Exchange, these deliveries should be made at licensed warehouses in various Southern ports. For many years prior to the closing of the Cotton Exchange, at the beginning of the World War, it was a very popular institution throughout the Cotton Belt, as both politicians and producers of cotton were strongly of the opinion that one of the attributes of the institution, or of its members, was to try at all times to depress the value of the South's main product—cotton. This intense hatred on the part of a great many Southern people resulted ultimately in legislation by Congress during the time the Exchange was closed from Aug. 1 to Nov. 16 1914. Despite the restrictions imposed by this legislation, known as the United States Cotton Futures Act, the New York Cotton Exchange has not only wiped out the feeling of dislike that existed, but has grown in favor throughout the South to such a degree that even Southern Congressmen and Senators are to-day its defenders. Until the Cotton Exchanges were closed during the summer and fall of 1914, the Southern people never fully realized the absolute necessity of these institutions. During the whole period while they were closed, a complete demoralization in all sections of the cotton trade existed. There was no market for spot cotton in the South and its business interests were paralyzed. The Cotton Exchange will do well to think twice before it seriously considers doing anything that would have a tendency to disturb this feeling of good-will towards the Exchange by the Southern people.

"Spinners, merchants and others, not only in America, but throughout the world, buy the New York Cotton Exchange future contract because they know that the seller of the contract must bring the cotton to a definite place (the Port of New York) for delivery. With Southern warehouse delivery we should have a sellers' contract, indefinite as to location, and there would be fewer buyers and more sellers, with the result that the cotton market would be under pressure every day in the year, both in large crops and in small crops, for fear that the stock of cotton in Southern ports would be dumped on the New York future contracts at any day.

'We are told that the main advocates of the 'Southern Warehouse Delivery' scheme reside in the South, and in some cases are interested in Southern cotton warehouses. They have no interest in the New York Cotton Exchange at all commensurate with the interest they have in Southern warehouses, and it is not at all surprising that they are agitating the question at the present time. The members of the New York Cotton Exchange who reside in New York are largely opposed to the measure. Certainly the business interests of our city will join hands in opposition to this scheme. The cotton industry of New York City has been a large one for over fifty years, and our port authorities, banks and merchants' associations will do well to nip in the bud this wild scheme that means the paralysis of the New York Cotton Exchange and the cotton business of New York.

"Perhaps I can make this situation still clearer by adding to what I have said the expressions of two of the best known and most thoughtful members of the cotton trade—one living in the South, the other in New England. Not long ago my firm wrote to Mr. Fergus Reid of Norfolk, Va., head of the firm of Reid & Co., and a member of the New York Cotton Exchange for a great many years, asking for his view on Southern warehouse delivery. We received the following reply:

3d June 1926.

Messrs W. R. Craig & Co.,
60 Beaver Street, New York City, N. Y.:

Gentlemen:—I am n receipt of your letter of June 2d, asking my opinion as to the advisability of permitting delivery of cotton in the South against New York contract.

Years ago I was on a committee of the Exchange to consider this question, and at that time we came to the conclusion that the move would be unwise. I am disposed to remain of that opinion now, since I do not see any special advantage to be gained by permitting deliveries elsewhere than in New York, and the fact that deliveries might under such a system be permitted at a dozen different Southern points would indicate at once to any one the obvious disadvantage. A man desiring to receive a thousand bales of cotton with specified delivery now gets it in New York. Under the proposed plan it might easily be necessary for him to take his thousand bales in ten different cotton markets. Under these circumstances the only persons who probably will be in position to take delivery of cotton on contract will be those large cotton firms that have agencies in all the large centres.

I think that further comment is unnecessary.

Very truly yours,
(Signed) FERGUS REID.

"I have also received the following letter from one of the oldest and most prominent members of the New York Cotton Exchange, Charles N. Brush, who is the head of Cooper & Brush, of Boston, Mass., one of the largest dealers in cotton in New England:

" 'In reference to the propaganda in favor of Southern deliveries which has been going on for so long, emanating from some very large interests who have been particularly active during the past several months, as far as my knowledge of the Southern shipper or the spinner is concerned, there has been no such issue; the issue has been one solely brought about by the large interests referred to.

" 'Where there might be some things in favor of Southern deliveries, they are insignificant as compared to the innumerable arguments against them, one of which is the fact that with the exception of a few large houses, there would be none who could deliver or receive against Southern deliveries to advantage. We have, in the past, as you probably know (the spinners know it, anyway), taken up large amounts of New York contracts (one year approximately over 90,000 bales), and reclassed them same as would be necessary if we bought in interior markets, and supplied them to our trade; and although we have never delivered against contracts as heavily as we have taken them up, with the exception of recent years we have delivered considerable cotton in New York. Anyone who has ever taken up or delivered cotton in New York must know that the statements relative to the cost of tender and the "economic waste" resulting therefrom, which has been the main point stressed by the proponents of Southern delivery, are so far from correct and so grossly misleading that it would seem to me that they could not help but react upon their authors.

" 'In my opinion it would be the most unsound and the most unwise thing for the New York Cotton Exchange to accept deliveries in any of the Southern markets, but if any of the members of the Exchange wished to form an exchange in any of the Southern markets, I can see no reason why they should not do so. The field is open. A very pertinent question which the members of the New York Cotton Exchange should carefully consider is:

" ' "If deliveries at the South are permitted, why not do the trading there?"

" 'Or, as your firm stated in their circular of June 4 1926:

" ' "If all tenders of cotton are to be made in the South, how long will the contract continue to be written in New York?"

" 'It is my firm belief that if the New York Cotton Exchange should adopt Southern deliveries, it would have a very adverse effect upon the Exchange.' "

Gardiner H. Miller, member of the firm of Hopkins, Dwight & Co., one of the oldest firms on the New York Cotton Exchange, says: "For the past several years there has been an agitation by certain members of the New York Cotton Exchange which during the last few months has become greatly intensified. It involves a revolutionary and far-reaching change in the method of doing business, not only upon the Exchange itself, but by the cotton trade as a whole. This radical step is the so-called 'Southern Warehouse Delivery' of cotton on contracts made on the Exchange, which is a technical term meaning that instead of deliveries of cotton in New York, the delivery shall be permitted at any one of several Southern ports. The effect of such a measure would be two-fold: first, it would tend to divert from New York shipments of cotton which now come here, and secondly, it would tend greatly to depress the price of cotton on the Exchange because the buyer would have no means of knowing where his cotton would be delivered to him, and the depression of the price of cotton on the Exchange would in turn tend to depress the price of cotton to the Southern farmer.

"The Exchange is the clearing house for the cotton trade of the whole world, and the contracts for the future delivery of cotton entered into here are the bases upon which the bulk of the American cotton crop is marketed and distributed to the consuming centres—the cotton mills of America, Europe and the Far East. For the protection of these vast and far-reaching transactions, the only logical place where a stock of cotton should be located is where the transactions are made, and not, as the advocates of 'Southern Warehouse Delivery' maintain, scattered among several widely separated Southern ports, located many hundred miles nearer the cotton fields and just so much further removed from the geographical centre of consumption, which is at a point far to the north and east of New York City. In these modern days of quick communication, the South, West, East and North are much more closely linked together than ever before in distance expressed in terms of quick communication. The railroads of the country, with the aid of the automobile truck, have been able to handle over a million cars of freight a week, with a result that the turnover of merchandise is much more rapid than ever before, a feature, which it is well known, is of the utmost importance to all merchandising enterprises. The direction of the flow of the cotton crop is from Southwest to Northeast, so that New York is in the path of the stream of the flow of the bulk of the American cotton crop each year. New York Harbor, with its unsurpassed facilities and the largest number of ocean steamers of any port in the world, surely is entitled to handle its share of the American cotton crop rather than to have this trade diverted to Southern ports. The city possesses a magnificent system of warehouses, with capacity for an almost unlimited stock of cotton, and with the flow of this stream of the fleecy staple in the direction of this port and beyond it, there is no valid reason why the port should not continue to be, as it has for the past six years, the centre and heart through which pulses the ebb and flow of transactions in cotton the world over.

"Should the interests who are advocating the so-called 'Southern Warehouse Delivery' of cotton be successful in their efforts, it is the opinion of merchants who have been identified with the cotton trade in this city ever since its inception, that it would be highly detrimental to the commercial interests of the Port of New York, and at the same time act as a boomerang on the South in its depressing effect on the price of their great staple commodity, 'King Cotton.' "

Some of the references to the subject in these columns have appeared in our issues of May 29, page 3104; June 5, page 3156, and June 12, page 3291.

New Orleans Cotton Exchange Votes in Favor of Deliveries on Galveston and Houston Contracts.

The members of the New Orleans Cotton Exchange have placed themselves in favor of extending the delivery privilege so as to include the delivery of cotton on contracts at Galveston and Houston, Texas. As to the vote, the New Orleans "Times-Picayune" of June 19 says:

The vote was overwhelmingly in favor of adopting a contract that will permit the delivery of cotton on contracts traded in in the New Orleans market at Houston and Galveston as well as at New Orleans.

The total vote as a result of the referendum was 412 out of a total membership of 436. The votes as canvassed by the special committee appointed to count them showed 264 members voting for deliveries at the Texas ports and 148 against the proposed change.

The subject of deliveries at Galveston and Houston has been agitated for some time but as the board of directors has promised to abide by the result of the referendum the announcement of the vote yesterday favoring the change by a large majority finally settled the matter.

It will of course be necessary for the exchange to formulate a set of rules and a new form of contract to put the broadened delivery system in effect so that some little time must of necessity elapse before the change is in full effect.

The Chicago cotton market delivers cotton on contracts at Galveston and Houston and the Government machinery already exists at both places for certificating cotton. The advocates of the change firmly believe that the extension of the delivery privilege to the Texas markets will greatly broaden trading in the New Orleans future market.

A division of opinion appears to have existed in New Orleans as to the advisability of extending the delivery points, the Associated Press dispatches from New Orleans on June 20 stating:

Bitterness evident in the East over the mooted question of Southern delivery of cotton on New York contracts is similar to that which recently divided the membership of the New Orleans Cotton Exchange into two factions.

Friends of the proposal to extend these privileges to Houston and Galveston, as decided upon here, contend that the innovation will facilitate the hedging of cotton here and permit Texas traders to save large sums now spent in defraying freight and warehouse storage expenses. They point out that under the new ruling Texans agreeing to deliver cotton to buyers demanding it can turn the product over to the purchaser in Houston and Galveston cheaper than by shipping it here for delivery if they have cotton stored in Texas.

The opponents argue that the decision will work a hardship on the purchasers. Members of both factions agree that the result of the referendum will tend to curb the activities of speculators.

Proponents of the change in the rules believe that the New Orleans market will obtain considerable business that is now transacted in the New York Exchange because of the granting of the request of Galveston and Houston traders unless the Exchange votes to change its present policy of requiring delivery there.

The Texas ports controversy has been a live issue in the New Orleans Exchange for more than a decade. The agitation for changing the rules grew after the Chicago Exchange decided about a year ago to allow delivery of cotton on Chicago contracts in Galveston and Houston.

Report of Texas Cotton Association Against Southern Deliveries.

The present discussion relative to the adoption of Southern delivery contracts on the New York Cotton Exchange lends interest to a report of a committee of the Texas Cotton Association in March, which contended that the plan would result in no advantage to the trade, and "would become a serious menace to the producers." The committee asserts that "with even two tender markets of New York and New Orleans, at present there is an eternal uncertainty as to class and staple certification." It goes on to say:

The standards differ at different months of tender, and what can we expect when we increase delivery points to six in number? Without insinuating anything wrong, with so many delivery points, is it not natural to expect different standards of classification, varying with local surroundings at each point? Even last week the Agricultural Bureau itself, as published in the papers, contended they wished reviewing in Washington rather than at a certain Southern point, as they desired to take it away from local influences. What better commentary than this can be given to the prejudicial influences existing around these delivery points?

During the past season, on account of the large buying by spinners of the world for distant shipments, it would seem as if it suited the books of large operators to advance the premiums on near months and depress the distant ones, for the reason that the sales were probably based on near months. Therefore, although the future straddle operation may have shown a loss, the profits of the actual have more than offset the losses. At any rate, notwithstanding the size of the crop, the near premiums have been maintained. There is no doubt that if it had suited the books of the operators to maintain discounts on the nears they would have seen to it that plenty of undesirable cotton was shipped to New York to protect the position. It is more than likely that when a season presents itself with no great amount of contracts sold to spinners for distant shipments, we will see discounts on the nears, and, if necessary, those interested will ship enough cotton to the future market at a loss in order to force these discounts. If they are equipped with Southern delivery, God forbid what will happen to the general values of cotton brought about by the ease of delivering unlimited quantities without going to the expense of moving a single bale. Such a result would work untold detriment to the general prices of cotton and might result in the elimination of hedging facilities which the future markets are designed to support.

We do not have to look far to see what the Southern delivery means in other evil consequences. It means that if the arguments of the advocates are realized that very large quantities of cotton will be stored at these six delivery points, and large stocks will remain there throughout the cotton season as a menace to the general value of cotton throughout the whole year. If any commodity is gathered up from all the byways where it is produced and concentrated and held at a few points for manipulative purposes, every buyer is led to think that there is more of this commodity than actually exists, and spinners of cotton may reduce their purchases to a hand-to-mouth plan. This is no advantage to the trade, and it would become a serious menace to the producers.

The stock and trade argument of every advocate of Southern warehouse delivery is that it will produce carrying charges. Is this not equivalent to saying that by reason of unnatural and abnormal accumulation of large stocks of cotton at the six delivery points the near months will be depressed? Does it not also mean that the spot quotations of the ten Southern markets will advertise to the world every day lower quotations than warranted? We say correctly "than warranted," because the large stocks of cotton that bring it about are abnormal and artificial, and not caused by the natural laws of trade. It is more than likely that Southern delivery will not bring carrying charges, except under unusual conditions, but it is questionable if the trade is entitled to carrying differences between months if it has to be brought about by slugging the market with artificially large quantities of cotton. Such a procedure is at the expense of the value of the South's living commodity, and no such system should be employed to depress the near months—which are the months on which purchases from the producer are based. Would it not be better to find a system, legally, of curbing the limits to which straddles can put these premiums on near months? A remedy that will drive directly at these straddles should be proposed, and not one that will increase the power of manipulation, as Southern warehouse delivery will undoubtedly do. What the cotton trade needs to-day is a system by which the trade can take its normal course without being disturbed by wholesale manipulation. The actual cotton business will take care of this, if manipulation can be eliminated; but any system proposed such as a Southern warehouse delivery, which makes it possible to dump an enormous quantity of cotton on the market, is unnatural and contrary to the normal conduct of trade, and serves no purpose except to demoralize the markets of the world.

The following is also from the report:

The cotton world has been shaken from center to circumference during the past season, with almost a unanimity of opinion that sweeping reforms are necessary with reference to futures on our American cotton exchanges. Criticism is particularly directed at the New York Cotton Exchange, because it is the most important, and because such a preponderance of future business passes through its machinery. This exchange is the world's market, and the clearing house of all other exchanges, so far as the volume of transactions is concerned, and, hence, there is where the enormous straddles and manipulations are conducted. Those conducting straddles must use the New York Exchange in order to find sufficient volume to take care of their enormous operations. It is claimed by many that, on account of manipulation, the New York Exchange is losing its usefulness as a hedge market. Also, many members of this Exchange, itself, realize that something must be done to correct the manipulative abuses, and are willing to take the proper steps to this end, provided the proper remedy is proposed. Some think Southern delivery against future contracts on the New York Exchange will properly remedy the imperfections now existing.

The advocates of this remedy have claimed that in shipping cotton to New York for tender a certain number of bales are frequently rejected and that these are undesirable in being located in New York. However, so far as Texas is concerned, recent rulings of the Bureau of Markets permit classification in Houston and Galveston, which eliminates this objection. They also claim that warehousing and freight on tendering in New York is greater than at Southern delivery points, but it is more than probable the future price will take care of this difference, for, if less at Southern points, the price of futures would doubtless be correspondingly less. The claim is also made that warehouse room is too limited in New York, but reliable information is to the effect that ample room can be secured in Brooklyn and the City of New York if it is needed.

The most important point to be considered in the contention for Southern delivery is that the delivery of cotton in Southern ports against futures in the New York market will correct the straddle manipulations now so prevalent and so iniquitous to the whole cotton trade.

As far as it is possible, let us look into the nature of those straddle operations and their purpose and results.

In passing, it should be said that in this paper no criticism is directed at any individual or individuals, but at the rules governing future operations which permit of manipulation by any individual or individuals.

The fact is that Congress of the United States, through the Bureau of Markets, in restricting the number of tenderable grades, in its policy as to grade differences and classification, has made unquestionably a buyer's contract so far as the near positions of the future markets are concerned, and the larger spot firms are forced to maintain control over the near positions in the future markets as a protection for their hedge and spot operations.

There is no doubt that since the World War there are individual fortunes in the cotton trade which have outgrown the exchanges to such an extent that the old principles and present rules governing futures are inadequate against the power of their wealth. This is so much the case that the natural flow of cause and effect in the cotton trade is set aside by artificial manipulations. The result is that it is easy for large operators to sell forward to spinners very large quantities of cotton at a very cheap basis, based on one or two option months of the future market, and then, by enormous straddle operations, to advance these particular basing months to unreasonable premiums and to simultaneously depress other positions. The profit in these operations is not made in the actual straddle as between months, but in the difference between the selling price fixed on a premium month and the buying price based on the months which are depressed. It is probable that the future straddles many times show a loss, but this is more than overcome by their large fixation profits which the manipulated months yield in the spot transactions. These interests, if it suits their purpose, will take hundreds of thousands of bales at a loss, or will deliver a like amount on a contract loss, whichever suits their spot positions. The evil does not lie so much in the fundamental principles of our exchanges as in the extraordinary ability of large operators to set aside all the logical rules of the cotton business by artificial methods, in order to accomplish their purposes in the large spot transactions throughout the world. Therefore, excepting the increasing of the number of tenderable grades, it is doubtful that any rules formed to liberalize the delivery of cotton on future contracts will go very far in correcting the straddle evils.

Some have concluded that if delivery points were established at Norfolk Savannah, New Orleans, Houston and Galveston, these evils will be corrected by reason of the easiness with which cotton can be delivered against manipulated months. The history of the future markets in recent years does not confirm this theory. In Liverpool, at the time of this writing, the stock of cotton is from six to seven hundred thousand bales, and yet premiums on near months exist throughout the list. In New Orleans this year there has been a stock of four hundred thousand bales, and yet January in New Orleans maintained a premium of 50 to 60 points over March. The Chicago cotton market was established on the theory that the delivery of Western cotton against it at Galveston and Houston would correct the same evil, and it has proven a fallacy, as March, at this writing, is at a premium of 46 points over May.

It will probably be contended that this is true this year on account of the scarcity of tenderable grades, but how can this argument hold when New Orleans, which has always been a Southern delivery point, has frequently carried a near month premium in many years past, and it cannot be said that tenderable cotton has been scarce every year. Notwithstanding what has been said about the present sixteen million bale crop and the alleged scarcity of tenderable cotton, the recent developments have proven there has been an ample amount in existence in America. One of the troubles is that as soon as the market approaches a tender basis the differences on low grades are widened to such a point that they cannot be bought on a tender basis. Whether Southern deliveries will provide any correction in this is any one's guess. It is certain that premiums on nears have existed this year where Southern deliveries exist, and it is also certain that premiums on nears have existed in New Orleans frequently in recent years, although it has always been a Southern delivery point.

What is overlooked by the advocates of Southern warehouse delivery is that in considering the manipulating of premium months the economic worth of the cotton taken on these premium months is not of so much importance because the cotton taken is hedged by the sale of other months. The safest straddle for the manipulator is a long position in the nearest month, because his loss per bale is practically known at all times, being limited by the carrying charge and the extent to which he depresses the following months, and it should be easy for him to measure this loss with what he expects to make out of the sales of actual cotton which this straddle is designed to cover. So that even though Southern deliveries be permitted, being fortified with a buyer's contract in difference and restriction of tenderable grades, large, wealthy operators are able to take cotton on delivery against the near premium month to a much greater extent than seems possible. The quantity is largely measured by the quantity of actual cotton sold throughout the world. Usually large operators are prepared to take more cotton than the balance of the trade cares ordinarily to tender. At any rate, it is almost certain that manipulation between months of some kind will continue irrespective of the physical location of the cotton.

It is also contended that cotton tendered against future contracts at Southern delivery points is worth more than at New York. This, if true, is more in favor of near-month premiums than otherwise, but let us see if the statement is true:

New Orleans is a Southern delivery point. The freight from New Orleans to New York is only 35 points, and yet at this writing March New Orleans is 75 points under March in New York. So far as the delivery price is concerned, there is certainly no advantage in New Orleans to the American farmer or the tenderer of cotton, and there is serious doubt if there is any advantage to the American spinners when the average freight to all mills is considered. Even if it were admitted that delivery in the South is advantageous to either foreign or domestic spinners, the history of these transactions shows that it is overwhelmingly to their advantage to buy their cotton either directly or indirectly from shippers throughout all parts of the

South. Their buying or taking of contract cotton on futures either in New York or New Orleans has been so small in quantity that it is not to be considered as a factor of any importance. If a thorough investigation of the amount of cotton taken on contracts in the past should be made it will be found that the tendering and receiving of cotton on futures has largely been by large operators for manipulative purposes, both for straddle operations and for depressing and advancing the general market. The futures markets are not intended for this purpose. If trade buyers need cotton, the easiest, cheapest and most satisfactory way to get it is directly from shippers, who will ship it directly to them in even running grades and staples. There is no necessity for this to be done through the futures markets. If it were possible to equip the future market for the purpose of conducting the whole spot business the usefulness of the merchants and shippers throughout America will have passed. The fact is that it is impracticable, and it was never intended that any large part of the cotton bought by the trade should pass physically through the future markets of the New York and New Orleans future exchanges. These exchanges are not the paramount machinery of the cotton business, but are simply adjuncts for serving as hedging facilities, and when the arguments for their existence pass beyond this they have no support. It is not necessary to pass any great amount of cotton on tender through the New York Exchange to establish either the logical differences between months or the relative value of futures as compared with spots.

When we go beyond the argument of the hedging function of the future markets and attempt to make them serve in place of the shippers of cotton, by enormously increasing the value of tenders, we defeat the very purpose of them and they become a menace to the trade, including the spinner and producer, rather than a benefit. Instead of equipping them to dominate and lead the spot transactions throughout theworld, we should reverse it so that they may coincide with and follow spot conditions, and this can be done without regard to the physical location of the cotton.

When we start out to make cotton tenderable, located in Norfolk, Savannah, New Orleans, Houston and Galveston, where will we stop? It is just as sound to include Memphis and Dallas and every compress point in the interior. When we get down to the cold facts, Memphis, Little Rock and Dallas are more favorably located than any of the ports named, because cotton can be shipped in any direction to domestic mills as well as to ports. But, even if it is confined to the ports named, how can any but very large firms equip themselves with sufficient organization to take care of the cotton tendered at these indiscriminate places?

It is necessary that a buyer know what kind of cotton he is going to receive on contracts—whether it is Atlantic or Western cotton—and how can he know if cotton is going to be delivered unexpectedly at five different points in the South?

We have already seen the actual working of Southern delivery in the New Orleans and Chicago markets, and premiums on near months exist to-day in both markets, and this is far stronger evidence against the remedy than all the untried theories that can be suggested in its favor.

If we start out into the unknown and endless fields of delivering cotton anywhere against the future contracts of New York and New Orleans, let us see what evils will follow: There is every indication that it will lead us into more disastrous consequences than anything now existing in the present system. Let us take Houston for an example, because it is near and we can better visualize the results. A large spot firm, or firms, could have extraordinary capital facilities and could be equipped with their own enormous warehouses. They could at any time have a stock of 500,000 or 1,000,000 bales of such grades as are not in demand. Notice day arrives, and, like a bolt from a clear blue sky, the whole 500,000 or 1,000,000 bales could be tendered without moving a bale in the warehouse. How many mills or buyers are prepared to take this million bales at once? It's ten to one that these notices would go begging for days and meanwhile depress not only the near months but the entire future market. It means that by taking the bridle off as to the location of the actual cotton tendered there is practically no limit as to the amount a wealthy operator or operators could dump on the market at any one time. It is exactly like offering to sell for one hour the Houston Cotton Exchange Building or the American Exchange National Bank Building at Dallas in order to establish their value. We venture to say that it would take several days to find buyers who would give the real value. The same is true with regard to spot cotton. It takes days to establish the value of 50,000 bales of cotton, to say nothing of 500,000 to 1,000,000 bales. There is also no way to prevent the tenderer from buying back his own tenders at a bargain price, after he has run all the buyers out of the market with these enormous tenders. In this method he could even tender cotton he has sold, knowing he could get it back the same day he tendered. His knowledge of the contract gives him the advantage of knowing what to take back and what to let others have. These tender operations would become so large and so numerous that the humble and small cotton shippers throughout the interior would probably be kept busy travelling to Houston, Galveston, New Orleans, Savannah and Norfolk every month trying to ascertain how much cotton the large operators were going to tender in order to protect their spot business. Even the large speculators in New York, who are so necessary as investors of cotton, would be at the mercy of what is going on in tenders at Houston, Galveston, New Orleans, Savannah and Norfolk to such an extent that it is likely they would be driven from the market. These people are not interested in taking actual cotton—they are investors, and their loss would be a serious blow to hedging facilities.

We have considered the inadequacy of the remedy proposed, as well as some of the evils that Southern point delivery would bring to general values. Now let us turn for the moment to the effect it would have on our own business as merchants and shippers of cotton: It is most significant that when large amounts of cotton are taken on contract in New York and New Orleans, certain foreign markets, such as Italy and Japan, become demoralized in prices for months following. What could this mean except this cotton is dumped on these markets at such a low price that legitimate business cannot compete with it? It is more than likely taken on contract for straddle purpose, and the takers probably willing to sell it in large quantities at a sacrifice, and, as a result, it serves to undermine normal and legitimate trade wherever it is sold. The advocates of Southern warehouse delivery contend that this system will greatly increase tenders, and, if this is true, it will very greatly increase demoralization wherever the cotton is sold. This is not good for the trade, as it is unnatural and disorganizing of trade principles.

Suggestions by Munds & Winslow for Making New York Concentration Market for Cotton.

Some benefits which it is believed would accrue to northern mills as a result of making the port of New York a concentration market and gateway for cotton en route to destination, with stopover privileges to permit inspection, acceptance or rejection at a limited cost, are set forth by Munds & Winslow of the New York Cotton Exchange in the following circular, dated June 12:

Regardless of the outcome of the proposed referendum on the question of Southern warehouse deliveries, we believe the New York Cotton Exchange has before it a genuine and long-neglected opportunity to perform a service of inestimable value to the cotton trade and the textile industry by establishing in this port a great and continuous market for actual cotton. The suggestions offered in outline herewith relate to the function which New York, and New York alone, can perform and would supplement instead of compete with the facilities provided by other markets. This, the greatest commercial and financial centre of the world, has much to offer the shipper, manufacturer and exporter, and with plans worked out along sound and natural lines should occupy in the cotton trade a position both pre-eminent and unique.

Several factors have contributed to stunt the logical growth of New York as a "spot" market. In all candor it might be stated that jarring individual interests in the past have operated against united, constructive action such as would be necessary for practical results. Consequently, if the Metropolis of the western world is to become a great market for actual cotton, it will have to be the fruit of combined and public-spirited participation by all members of the New York Cotton Exchange and associated interests. The maxim that "Everybody's business is nobody's business" is largely explanatory of the failure of New York to make justifiable progress as a cotton market. Galveston, Houston, New Orleans and other centres have had their deeply interested protagonists, a support in which New York has been lacking.

Moreover, there has been an inclination to consider the "spot" market aspects of New York as purely incidental to operations in the contract market. Large or small stocks of cotton at this port have been mainly reflective of the premiums and discounts prevailing in future contracts.

On the last page of this letter will be found a diagram [This we omit.—Ed.] that is graphically descriptive of overlooked potentialities. New York should be developed into a concentrating point for cotton en route, overland or coastwise, to New England, Northern and Canadian mills, as well as concentration for overland cotton for export.

New York should be and can be the centre for concentrating cotton on its way to Northern and Canadian mills. With ample warehouse facilities, installation of high-density presses, furnished with modern equipment for the handling of cotton, aided by transit privileges which would permit the stopover of shipments at minimum cost, the advantages that could be offered by this port would, result in the saving of millions of dollars annually to Northern manufacturers and Southern shippers.

One of the most stupendous items of waste in the cotton industry consists of losses entailed by mill rejections. Frequently these rejections will amount to 10 or 15% of a given shipment, and the average annual toll constitutes a terrific burden which necessarily must be borne by both buyer and seller. No matter how conscientiously the shipper may effect replacements, the actuarial loss calculated upon experience is figured in the price of every bale the New England spinner buys. The elimination or reduction of this loss means a mutual gain to seller and buyer, but in the long run the manufacturer probably would profit most.

The waste involved in disposing of rejections, occasionally resulting in reshipments for delivery on contract in New York and still further accentuated by replacements and substitution, could be cut to a minimum through the medium of concentration in New York. The benefits that would accrue could not be measured solely by the financial losses that would be avoided. Elimination of friction and needlessly severed business relations should be added to the sum total of gain.

Cotton concentrated here could be classed by mill representatives and rejections that now lie in northern mill warehouses entailing huge aggregate liabilities to shippers, could be applied on other commitments at practically no expense, and in case of slow sale or exchange, could be delivered on contract.

We believe developments along this line would meet with the unanimous support of northern mills and southern shippers. Transit or stopover privileges could be obtained at low cost and the outlay involved would be trivial compared with the losses now entailed in disposing of rejections stored in distant and separated mill warehouses.

The effect of such a movement on New York as a cotton market should result in a virtual transformation. Cotton used by northern and Canadian mills is largely of the better grades and of good body and staple—what may be termed as "character" cotton. New York, therefore, instead of being the dumping ground for the lowest grades that will pass on contract, would assume a place, quite apart from contract operations, as the clearing house of highly desirable cotton.

We set forth below the various steps which we consider essential to bring about this beneficial change.

First, Northern mills and Southern shippers should lend their hearty endorsement.

Second, transit and stopover privileges such as have built up some of the leading Southern markets should be obtained from the railroads, thus entailing minimum cost for this service.

Third, steps should be taken for the adoption of staple premiums for contract delivery on cotton running above seven-eights and including inch and one-sixteenth. There has been a fairly strong sentiment in favor of staple premiums up to and including inch cotton, but we believe the range should include inch and one-sixteenth, as many Northern mills use cotton of this quality. Premiums, in our opinion, should be limited to the so-called "character" zone and should not run into "staples." This would divide cotton into its logical groups, "short," "character" and "staple."

Fourth, concentration should be coupled with the single bale system such as was established in New Orleans in 1922. Requirements should be made that the usual charges on each and every bale should be known from the time cotton arrives in the port until it leaves. One of the chief drawbacks at present is the indeterminate charges now applying on cotton, especially in shipping out.

Fifth, we should have a warehouse system of ample facilities, with concentration in one area on the New Jersey side, with ample water front, adequate docking facility, and plant equipped with high density compresses and all labor-saving devices.

Concentration in one area is essential in order to reduce costs. The expense of sending gangs of inspectors and weighers with scales from one part of the harbor to another is the chief item in causing the high cost of handling cotton in the port of New York.

Rail shipments landed on the waterfront along the New Jersey shore have the advantage of reduced handling charges, for trans-shipment by lighter to Staten Island or Brooklyn merely pile up needless costs. In order to obtain the best results, it would be essential for New York to establish one large plant for the storage of cotton. Without this, the establishment of concentration privileges would lose much of their value. To have cotton stored in half a dozen points over the harbor would result in economic waste.

All this sounds like a large order, particularly when it comes to the establishment of a great warehouse system under the supervision of the New York Cotton Exchange. We do not believe that the difficulties are insurmountable or even serious. We understand that a company which already has acquired considerable land on the New Jersey side and has

considerable more acreage under option, stands ready to co-operate with the New York Cotton Exchange along the lines above mentioned. This company already has a fireproof warehouse with facilities for the storage of 60,000 bales. It is prepared to increase this to 100,000 bales inside of a year, and to expand its facilities to meet requirements upon reasonable assurance of volume. We have been informed that ample waterfront, giving adequate docking and lighterage facilities, will be available as needed. Plans have been drawn for the installation of the most up-to-date labor-saving devices which would permit decisive and continued reduction in storage and handling costs.

Volume is all that is required to bring about a radical cutting of costs. Quantity or volume operation is the first requisite of reduced charges. It is the response to the law of modern progress, and runs throughout every line of industrial endeavor from the manufacture of automobiles to the enormous activities of the steel industry. It is the chief element that results in the minimizing of overhead charges. Concentration at one point with volume developed would permit the installation of every modern improvement and labor-saving device, thus placing New York charges on a basis with or even lower than the warehouses of the south.

We also wish to emphasize the necessity for and advantage of transit privileges. The leading spot markets of the South have grown largely because of the reduced costs thus afforded. These privileges gradually have resulted in building up an extensive marketing system in which mal-adjustments in freight rate and privileges have been ironed out. Progress has been accomplished almost wholly through traffic arrangements and advantages of concentration, the foundation of which is represented by the granting of privileges at certain designated points for the purpose of storing, classing, weighing, marking, &c., and for a small loss in freight rate to re-ship to final destination for the through rate from the original point of shipment.

We have set forth some of the benefits that would accrue to Northern mills as a result of making the Port of New York a concentration market and gateway for cotton en route to destination with stopover privileges to permit inspection, acceptance or rejection at a limited cost. The major advantage remains to be emphasized. The continuous flow of two or three million bales through this channel would act as a deterrent to harmful market practices. Whereas cotton now comes in quantity to New York only through the attraction of high premiums for delivery on contract, it would, under the suggested plans, arrive here through natural transportation processes. The adoption of staple premiums on cotton up to and including inch and one-sixteenth would permit the delivery of cotton on contract in the event of contract congestion, as tenders would not be subjected to the penalty of being received only on the basis of seven-eighths cotton.

We believe this development would materially reduce, if not practically eliminate, the so-called "manipulative area" now involved in bringing cotton here purely for contract delivery. Spinners buying cotton on "call" would not then be forced to fix prices at premiums which cause ruinous losses to them and make hedging by Southern shippers a hazard instead of an insurance. We believe the gains for the mills could be computed in millions, while the rank and file of cotton merchants could pursue their calling without the constant threat of being caught in a trap.

In other words, the New York Cotton Exchange could perform its normal function of providing price insurance.

We admit the meagreness of the outline contained in our suggestions and the necessity for working out practical details. It is our earnest hope, however, that the membership of the New York Cotton Exchange, aided by mills and shippers, will lend their united efforts to competent research of the principles involved and their adoption as soon as may be practicable.

MUNDS & WINSLOW.
Dict. by C. T. REVERE.

Views of W. R. Craig & Co. Regarding Southern Delivery.

Among the arguments presented in the recent controversy of the New York Cotton Exchange regarding the question of Southern delivery was one by W. R. Craig & Co., addressed to members of the Exchange under date of June 4. In indicating the immediate effects of the proposal, the firm stated that "it would probably help a few very large merchants, but it would injure the great number of highly respectable firms who operate in restricted territory. It would help those who have warehouse investments in Southern ports, but it would injure those who have warehouse investments in New York. It would add to the prestige of Southern ports; it would damage the prestige of New York." We give herewith the firm's views:

June 4 1926.

To the Members of the New York Cotton Exchange:

To the New York Cotton Exchange the question of Southern delivery is not only serious, it may even be vital. We hope that every member will strip away all thoughts of personality, all statements made to him that have not been proved, and every consideration of temporary personal advantage, and will then examine Southern delivery on its merits only and decide whether as a loyal member of the New York Cotton Exchange it should have his support or his opposition. We will try to strip all such considerations from this letter. We are bound by interest as well as duty to promote the real and permanent welfare of this Exchange; we do not wish to deceive ourselves or to mislead others. If in spite of caution we should make a statement that is not correct, we will quickly withdraw it if it is brought to our attention and will give the withdrawal the same currency that we give this letter.

Those who urge Southern delivery assert, of course, that it will bring certain benefits. Naturally, they do not claim these benefits without assigning reasons. The reasons they assign are set forth as statements of fact. As they are the plaintiffs they have the burden of proving these statements of fact. They have not assumed that burden, but apparently a number of people in the cotton trade (including some members of the New York Cotton Exchange) have accepted as accurate, without assaying their accuracy, the statements on which the Southern delivery argument is based, relieving the plaintiffs of their duty to make strict proof. We have waited some time and have concluded that the proof will not be offered.

In a recent market letter we sought to show that two of the plaintiffs' important statements of fact were incorrect. We wish to deal again with one of these statements presented in a somewhat different form.

Mr. W. L. Clayton has been prominently identified with those who ask for Southern delivery. He seems to have been their spokesman on more than one occasion. We believe they will all accept his statements as representing their view.

In a letter which Mr. Clayton addressed to members of the New York Cotton Exchange, dated May 14 1926, we see the following paragraph: "So long as our contract requires delivery at a point removed to the extent of $4 or $5 per bale from the normal path of travel of cotton from field to mill, all expedients of whatever nature seeking to eliminate the causes of complaint will avail nothing," etc., etc. Here is the argument stated in very simple form—We ought to have Southern delivery because at present "our contract requires delivery at a point removed to the extent of $4 or $5 per bale from the normal path of travel of cotton from field to mill." The "point" referred to is, of course, New York City. Also, we have seen in the public press a more recent statement by Mr. Clayton from which we quote: "To-day no cotton comes to New York except in satisfaction of future contracts. The economic waste attendant upon the bringing of cotton to New York for this purpose is about $4 to $5 per bale." Of course this means that there is a waste incident to delivering in New York in excess of the waste that would accrue from delivery at Southern ports. A child would realize that if cotton is stopped anywhere between the field and the mill and subjected to Government class and inspection, and delivered on contract, that cotton will be saddled with certain charges from which it would have been free if it had moved continuously. Government inspection and delivery cost money wherever they are executed, and they add nothing to the spinning value of the bales that are so inspected and delivered. Therefore, to construe the words we have quoted as meaning that there is no "economic waste" from delivery in the South would be unfair to Mr. Clayton's intelligence; and, on the other hand, we feel he was neither so insincere nor so contemptuous of the mental ability of our membership as to mean anything except the following: That it costs $4 to $5 per bale more to bring cotton to New York for delivery and then move it to a mill than to bring cotton to a Southern port for delivery and then move it to a mill.

Now, the gentleman offered no proof of his statement about this excessive cost of $4 to $5 per bale. However, we did see in Pearsall's "Bulletins" some days ago a letter attributed to Messrs. Harriss, Irby & Vose, and which we understand had a wide circulation, in which certain figures were given showing difference between direct movement from two Southern points (namely, Dallas and Augusta) to mill destinations and movement from the same points to the same destinations with stoppage in New York for certification and tender, receipt on tender, and then re-shipment. Figures were given in detail and of course they showed that it was much more expensive to stop in New York than to move directly on to the mill. We understand Messrs. Harriss, Irby and Vose have identified themselves with the campaign for Southern delivery, and we think it is fair to take their figures as the only semblance of "proof" of Mr. Clayton's assertions that has so far been submitted.

The letter of Messrs. Harriss, Irby & Vose dealt, as we have said, with both Augusta, Ga., and Dallas, Texas, but for the sake of brevity and because it seems that Dallas is less favorable to our own contention than Augusta, we will deal with Dallas only. The letter in question shows:

	Points.
Cost of moving cotton from Dallas to New York and delivering it on contract here	148
Cost of receiving this same cotton on contract in New York and shipping to Lowell, Mass.	75
Total cost through New York	223

We wish to set against these figures the cost for the same movement and handling through Galveston:

Cost of moving cotton from Dallas to Galveston and delivering it on contract in Galveston	112
Cost of receiving same cotton in Galveston and shipping it to Lowell, Mass.	102
Total cost through Galveston	214

The cost through New York is 223 points; the cost through Galveston is 214 points; the difference is 9 points. Where is the difference of $4 to $5 per bale?

The letter referred to also shows:

Cost of moving cotton from Dallas to New York and delivering it on contract here	148
Cost of receiving this same cotton on contract in New York and shipping to Liverpool, Eng.	98½
Total cost through New York	246½

The cost through Galveston would be:

Cost of moving cotton from Dallas to Galveston and delivering it on contract in Galveston	112
Cost of receiving the same cotton in Galveston and shipping it to Liverpool	118
Total cost through Galveston	230

The cost through New York is 246½ points; the cost through Galveston is 230 points; the difference is 16½ points. Where is the difference of $4 to $5 per bale?

Again the letter referred to shows:

Cost of moving cotton from Dallas to New York and delivering it on contract here	148
Cost of receiving the same cotton on contract in New York and shipping it to Greenville, S. C.	136
Total cost through New York	284

Our figures based on Galveston delivery would be:

Cost of moving cotton from Dallas to Galveston and delivering it on contract there	112
Cost of receiving this same cotton at Galveston and shipping it to Greenville, S. C.	121
Total cost through Galveston	233

The cost through New York is 284 points; the cost through Galveston is 233 points; the difference is 51 points. This is a great difference, and is in favor of Galveston, but it is not $5 or even $4 per bale. Of course it is due to the fact that there is a sharp and long back-haul from New York to Greenville, S. C., but it would be possible, if we desired to becloud the issue, to show that New York would be at an advantage instead of a disadvantage if certain selected origins and destinations were used. In the computations made for Galveston we have used the following freight rates: Dallas to Galveston, 83½ cents per cwt.; Galveston to Lowell, Mass., 63½ cents; Galveston to Liverpool, 61 cents; Galveston to Greenville, S. C., 82 cents. We have made the total excess in cost (for both freight and marine insurance) of the Galveston-Liverpool movement over the New York-Liverpool movement 19½ points, which we think is fair, but if it is unfair, either to New York or to Galveston, we wish to be corrected. However, the difference would certainly not be enough to affect the argument. We obtained the railroad freight rates we have just mentioned from the Traffic Department of the New York Cotton Exchange; the other figures are those used by Messrs. Harriss, Irby & Vose in their letter published May 3. We think they showed some unnecessary charges, but it would be tedious to go into that. We have assumed that the Government services and other services mentioned by Messrs. Harriss, Irby & Vose would cost the same in Galveston as in New York.

Nearly all Southern markets maintain traffic bureaus that watch intently every change in rates on cotton. It is our impression that New York has been less alert. We do not think our Exchange even provides for

a committee on transportation. We might have more favorable arrangements on cotton if we tried to get them. For example, it ought to be possible to correct the present situation with respect to Greenville, S. C.: It costs 80 cents per cwt. to have a compressed bale of cotton hauled from Greenville, S. C., to New York, while the charge is 95 cents per cwt. for moving a compressed bale from New York to Greenville, S. C., by the same route. There are now certain movements of cotton that can be made via the port of New York at the through rate from origin less a concentration charge of 7 cents per cwt. (or 35 cents a bale), and this is as low a concentration charge as can be obtained in any other port, and lower than can be obtained for these certain movements in some of the ports. This may be a surprise to some of our members. If they think we are mistaken, we refer them to the Inter-State Commerce Commission or to the Traffic Department of the New York Cotton Exchange.

We will depart from our main argument to say that Messrs. Harriss, Irby & Vose cited their figures to show the difference between direct shipment and shipment with stoppage in New York. They proved, for instance, that the direct shipment from Dallas to Lowell, Mass., cost $1 60½ per cwt., while the shipment from Dallas to Lowell, with stoppage in New York, cost $2 23 per cwt., a difference of $3 12 per bale. We respectfully request them to make exactly the same computations that were made before substituting Galveston or New Orleans for New York and to publish the results as widely as they published their first calculation. If they will do so, they will prove to themselves, as well as others, that they were not attacking New York, but were assailing delivery of cotton on contract anywhere. We should have felt no surprise if their figures had emanated from the office of a certain Southern Senator who wishes to abolish future trading and delivery.

Those of us who say a New York contract should be executed in New York have been charged with living in the past and shutting our eyes to the changes of the past forty years. We not only deny this; we say that the advocates of Southern delivery are those who ignore the modern history of cotton. Forty years ago the great bulk of the cotton that reached New Orleans belonged to the farmer; twenty years ago a very large percentage of it was farmers' cotton; to-day that percentage is insignificant; and what we have said about New Orleans applies to other ports. Their cotton, in the main, arrives, not in a flat state, not in crop lots, not under bills of lading showing the gin marks, but in lots matched up for quality, compressed, patched and ship-marked. Nearly all of it has been sold once and much of it has been sold several times. The idea that the Southern ports have at all times large quantities of unsold cotton available for tender is a mistaken one. On February 11 1926 the total stock in New Orleans was 510,505 bales; and we hold a telegram sent on that date by one of the best firms in the trade, estimating the quantity of unsold tenderable cotton in that port (excluding cotton already tendered) at 10,000 bales. The primary markets are in the interior; some of the primary markets are at country gins, for some of these gins are buying cotton in the seed.

We owe some members an apology for mentioning facts that are so well known, but they may be new to other members who are not familiar with Southern conditions and have not watched the evolution of recent years.

Putting aside theories as to ultimate effects, let us see what some of the immediate effects of Southern delivery would be. It would probably help a few very large merchants, but it would injure the great number of highly respectable firms who operate in restricted territory. It would help those who have warehouse investments in Southern ports, but it would injure those who have warehouse investments in New York. It would add to the prestige of Southern ports; it would damage the prestige of New York.

Cotton cannot be certificated and delivered on contract without someone on the ground to manage the details of handling and financing. We hope that every member before reaching a decision will answer to himself the following question:

If all tenders of cotton are to be made in the South, how long will the contract continue to be written in New York?

Yours very truly,
W. R. CRAIG & CO.

Semi-Annual Meeting of Business Organization of Government—President Coolidge on Budget—Says State of Finances Does Not Warrant Promise of Further Tax Reduction—Costs of Local Governments.

The question of possible further tax reduction was alluded to in the address of President Coolidge at the semi-annual business meeting of the Government, held at Washington on June 21, the President making the statement that "it would be unfortunate to raise hopes of further tax relief until we are sure that the state of our finances justifies it." "There is," he said, "no such surety to-day." The President stated that "what the complete result of the 1926 tax law will be is still a matter of estimate," and he holds that the answer to the question as to another tax reduction in the near future "should be delayed until we know definitely the revenue-producing ability of the present Revenue Act." "The estimate to-day is," said the President, "that we will close the current fiscal year with a surplus of about $390,000,000,"—the revenue from income and profits taxes including about $350,000,000 of back taxes, most of which accrued in years prior to 1920. He pointed out that "we do not anticipate such accrual of back taxes in the future. Rather will they materially diminish and reach an estimated total of only about $100,000,000 in 1928." "For the coming fiscal year," the President noted, "the estimates indicate that we will have a margin of $185,000,000 of revenues over expenditures. . . . A surplus of only $185,000,000 in a business involving an annual expenditure in excess of $3,500,000,000 is far from being a safe margin."

Commenting on the estimates of appropriations for the fiscal year 1928, the President said the indications were that there would be a surplus of only $20,000,000, "which is negligible and may easily be converted into a deficit." "This," he observed, "is the dark side of the picture, but it lends weight to the views I have previously expressed with regard to further tax reduction." Reviewing what had been accomplished since the introduction of the budget system in 1921, the President said:

On June 30 1921 the public debt amounted to $23,977,000,000, carrying an annual interest charge of $1,018,000,000. At the close of this year the debt will stand at approximately $19,680,000,000, with an interest charge of $806,000,000. This shows since 1921 a reduction of nearly four and one-quarter billions of dollars in the principal of the debt and nearly $212,000,000 in annual interest. Our expenditure, which for the fiscal year 1921 amounted to $5,538,000,000, will approximate for the current year $3,620,000,000, a reduction of nearly two billions of dollars. Taxation has been reduced from $54 14 per capital to $27 28. This does not take into consideration the Revenue Act of last March.

"This effort to perfect our governmental business, to round out the accomplishment of the task on which such a notable beginning has been made," said the President, "offers unlimited opportunity for economical administration. Your best efforts and the continued support and co-operation of Congress will be required to hold our expenditures for government business at approximately their present level."

Attention was drawn by the President to the costs of State and local governments, as to which he said:

In 1921, when the cost of all government in this country was approximately $9,500,000,000, Federal expenditure constituted nearly 60% of the total. In 1925 the cost of all government increased to more than $11,500,000,000, of which only 27% is represented by Federal expenditure. . . . The Federal Government has decreased its costs by practising the homely virtue of thrift. This has not been an easy task. It has required co-operative effort and sacrifice in every direction. If the interests of the people demanded this action on the part of the Federal Government, surely they would seem to demand similar action with regard to the increase in these other local government costs.

The address of the President follows herewith:

Members of the Government's Business Organization: Hail!

The more these business meetings of the United States Government increase in number the more I am impressed with their surpassing importance. They are held for the purpose of discussing the financial affairs of one of the greatest business institutions in the world. Primarily we consider the corporate welfare of the Federal Government, but that is not the ultimate object. The real purpose for which we are assembled is to discuss plans and adopt policies which will affect in their actual daily life the welfare, progress and prosperity of 117,000,000 people. What we do here reaches into every home in the land. It determines whether the tax gatherer is going to require more money from the head of the household to meet the cost of maintaining the Government, or whether the tax gatherer is going to leave more money with the head of the household to meet the cost of maintaining the family. Our efforts here are translated into benefits for the head of the household and his family. This does not mean that the Government should refuse to make outlays which are for the development of the country and the benefit of the people, but, taking all these elements into consideration, it does mean a strict adherence to the principle of constructive economy.

It is not, then, for the purpose of discontinuing any of those public functions which are really for the benefit of the people that we have been working under a budget system for the past five years. It is rather to secure a wiser use of our national resources and a more satisfactory result at less cost. More work and better work for a smaller outlay of the money of the taxpayer is the real test of a progressive Administration.

In the performance of your daily work you are naturally concerned with the immediate task which confronts you. You know the immediate result of your labor. You may not know its effect on the operations of the entire Federal Government. But it is the sum total of these daily tasks that measures our public efficiency. No task is so small that the effort of its performer loses its influence on the product of the whole. Individual effort brings collective results.

The effort has been to improve the public service by elimination of waste and lost motion and by constructive conservation of our resources. The effort has not been to reduce the expenses of the Government at the expense of the public welfare. It has been to reduce expenses for the benefit of the public welfare. It has been an effort for constructive economy. So long as the Government remains this work will not end. That you may know the result of your collective effort it has been our custom to hold these meetings twice each year.

It was but nine years ago that the Federal Government was obliged to draft not only the persons but the property of the people to meet the requirements of the World War. It was less than eight years ago that this nation faced the host of problems arising from military demobilization of persons and industry. The intervening period has been one of restoration and rehabilitation. It is to these ends that our efforts have been directed. Much has been accomplished, but much remains to be accomplished. The orderly management of our affairs is a perpetual test of our ability. You have demonstrated what can be done, and I am confident you will continue unabated the effort for even greater accomplishment.

We cannot anticipate further appreciable reduction in the total annual expenditure for the business of the Government. Our main chance comes in debt reduction. It was estimated in the last budget that we would spend this year $89,000,000 more than we spent last year. That estimate, as shown by the returns to date, will prove to be substantially correct. But this effort to perfect our governmental business, to round out the accomplishment of the task on which such a notable beginning has been made, offers unlimited opportunity for economical administration. Your best efforts and the continued support and cooperation of Congress will be required to hold our expenditures for Government business at approximately their present level.

We are not striving to save the dollar simply to save it. We are not striving to save the dollar at the expense of the public service. Rather do we approach it from the other side and save the dollar for the good that it will bring to the people whom we serve. We can make the dollar purchase more by purchasing more wisely. We can eventually save money by a justified expenditure to-day which will reduce future annual unproductive expenditures. This is constructive economy. Congress has most wisely provided a program of constructive economy in the two public building laws, one for domestic use and one for our foreign legations. These measures will eliminate annual cost for rentals which bring us no future returns.

Funding of the Public Debt.

The recent act providing for construction at military posts and stations is also a measure of constructive economy. The funding of our public

debt at lower rates of interest has been another notable achievement in constructive economy. Every dollar that has been applied to the reduction of the debt has saved the people of this nation and the generations to come at least 4 cents per year in interest. Keep this in mind in your administration of public funds. Every dollar that you save swells the surplus which goes to the further reduction of our debt. Thus every saved dollar saves at least 4 cents per year in interest to the taxpayer. In considering immediate projects or requirements you should have in mind their future benefit so that the element of possible constructive economy in contemplated expenditures may not be overlooked.

The budget system prescribed by Congress in 1921 coordinated our financial requirements. It paved the way for the co-ordination which now exists in the Government's routine business. We are transacting our business in a co-ordinated and business way. If we have duplications or overlapping of departmental authority we are minimizing the possibility of waste in effort or expenditure by co-ordination of policy and action. The improvement in the public service is apparent and expressive. It is apparent in the manner in which its business is being transacted. It is expressive in the lessening requirement of funds for administration. The budget system is not the system of any one agency in the Federal service. Each of you in the public service is an integral and important part of this system. Your allegiance to it is inseparable from your allegiance to the Federal Government. And this includes the accounting elements of the budget system vested in the General Accounting Office. The task of the Controller General is a difficult one, but his functions are vital to the operation of the budget system. Your co-operation with the Controller General is essential.

As a natural sequence to the law adjusting the compensation of civilian officers and employes of the Government, the Congress has recently enacted a law adjusting their travel allowances. This law provides adequate rates of reimbursement for expenses of travel. It does justice to both the traveler and the Government. The new law takes effect July 1 1926. I wish to direct your attention particularly to the provision that any increases deemed necessary to be made in the rates of actual expenses or per diem allowance under the authority of the new law shall not be authorized by the heads of departments and establishments to the extent of incurring a deficiency in appropriations during the fiscal year 1927.

Accomplishments Since 1921.

At this eleventh meeting of the business organization of the Government it is proper to recount briefly the accomplishments of these last five years in which your efforts have played such a material part. It is for this purpose and to define plans for the immediate future that we hold these conferences.

On June 30 1921 the public debt amounted to $23,977,000,000, carrying an annual interest charge of $1,018,000,000. At the close of this year the debt will stand at approximately $19,680,000,000, with an interest charge of $806,000,000. This shows since 1921 a reduction of nearly 4¼ billions of dollars in the principal of the debt and nearly $212,000,000 in annual interest. Our expenditure, which for the fiscal year 1921 amounted to $5,538,000,000, will approximate for the current year $3,620,000,000, a reduction of nearly two billions of dollars. Taxation has been reduced from $54 14 per capita to $27 28. This does not take into consideration the Revenue Act of last March.

While the figures speak for themselves their real import lies in the influence which these reductions have had on the welfare and prosperity of the people. This influence goes far beyond the material reductions I have mentioned. It reaches into every phase of the daily lives of the people. There are more of the necessaries, conveniences and luxuries in the homes of the people, in the city and in the open country, because the Government has let the people have more of the money they earn for themselves instead of taking so much from them in taxes.

Since the commencement of the fiscal year 1921 there have been three substantial reductions in taxes. The benefit of this joint executive and legislative effort to reduce Federal expenditures has therefore gone directly to the people. At our meeting one year ago it was my privilege to state that the financial condition of the Government warranted further tax reduction. That forecast has been realized in the Revenue Act of 1926. The large tax receipts of March 15 last show clearly that the country anticipated a reduction in tax rates. Individuals who had undistributed profits in securities and investments took their profit under the expected reduction of the surtax rate. It was this same anticipation of tax reduction that prompted investment in productive business of capital which would otherwise have gone into tax-exempt securities. The great increase in revenue was due in large measure to the unusual prosperity in the year 1925, but the confident expectation of a reduction in rates was an important factor in this revenue increase.

Reductions to Individual Payers.

The 1926 Act relieved some 2,000,000 people from paying any direct tax and reduced the tax burden of all other taxpayers. General prosperity is the aggregate of the individual prosperity of our citizens. To permit the people to retain more of their own earnings is to increase their savings and purchasing capacity, which assures prosperity. In 1921 the income tax of a married person with no dependents and a total net income of $3,000 from salary was $60; in 1923 it was $7 50; in 1926 it was nothing. For a single person with an income of $3,000 from salary in 1921 the income tax tax was $120; in 1923 it was $22 50; while in 1926 it is only $16 88.

Miscellaneous war taxes were also materially reduced. These taxes were levied under more than fifty categories, which are now reduced to five. This removes in large measure the so-called nuisance taxes which have been found so irritating to every one. The revenue from these taxes is reduced by about $275,000,000, and there are no compensating increases as in the case of the income and profits taxes.

Incorporated business has been benefited directly as well as indirectly by the repeal of that tax based upon the value of the capital stock of the corporation. Many concerns with not one dollar of profit were obliged to pay a large tax. This was unfair, as the ability of a corporation to pay depends upon its profits. Fully 40% of the corporations making income tax returns have no profits or taxable incomes, but under the old law they were obliged to pay.

Result of 1926 *Tax Law Still Matter of Estimate.*

What the complete result of the 1926 tax law will be is still a matter of estimate. The correctness of the theory that reduction of tax rates economically applied will stimulate business, and thereby increase taxable revenue, is being demonstrated. To what point further reduction may be carried can not be stated until the new tax law has had sufficient opportunity to become fully effective, and experience has shown what revenue it will produce.

The question is on the lips of many as to whether there is prospect of another tax reduction in the near future. I think the answer to this question should be delayed until we know definitely the revenue-producing ability of the present Revenue Act. The estimate to-day is that we will close the current fiscal year with a surplus of about $390,000,000. This can not be safely considered as an indication of what revenue the present law will give. Our revenue this year from income and profits tax includes about $350,000,000 of back taxes, most of which accrued in years prior to 1920. We do not anticipate such accrual of back taxes in the future. Rather will they materially diminish and reach an estimated total of only about $100,000,000 in 1928.

It would be unfortunate to raise hopes of further tax relief until we are sure that the state of our finances justifies it. There is no such surety to-day. Business was quick to anticipate the last tax reduction. It was justified in so doing. To raise such hopes at this time might be to encourage business to anticipate again, as it did in 1925, further tax reduction. This might have a detrimental effect upon the stabilization of the country under the present tax law.

You have your appropriations for the next fiscal year. I have previously stated our effort must be not to increase expenditures over what they will be for the current year. Rather do the latest estimates for next year indicate that it may be possible to spend less than in 1926. The survey which has been made of our requirements indicates the possibility of reaching a minimum of $3,600,000,000 in our expenditures next year. This will be our objective. For the coming fiscal year the estimates indicate that we will have a margin of $185,000,000 of revenues over expenditures if the latter do not exceed the figure I have stated. A surplus of only $185,000,000 in a business involving an annual expenditure in excess of three and one-half billions of dollars is far from being a safe margin.

This margin could be easily dissipated by a falling off of our anticipated income. The revenue estimate is necessarily based on the present prosperous condition of the country. Any change unfavorable to this condition would be reflected in lessened income. But I look to you to see that the margin is not threatened by any increase in our estimated expenditures. Further expansion of the business of Government which would add to our costs should await a better estimate of our future income.

Estimates for 1928.

We are approaching the time for consideration of the estimates of appropriations for the fiscal year 1928. I have expressed to the Director of the Bureau of the Budget the hope that these estimates can be kept within a limit of $3,200,000,000 exclusive of the Postal Service and tax refunds. It may become imperative before the budget is finally completed substantially to reduce that figure. This will depend entirely upon our revenue outlook for 1928, concerning which we will have better information a few months hence. I say to you frankly that the outlook to-day is not encouraging. We know our public debt and other fixed charges for that year.

A preliminary but very exhaustive estimate of our other requirements compared with an estimate of the expected revenue for that year indicates a surplus of only $20,000,000, which is negligible and may easily be converted into a deficit. This is the dark side of the picture, but it lends weight to the views I have previously expressed with regard to further tax reduction. It also emphasizes the need for the utmost care in the scrutiny of your 1928 requirements. If I have occasionally had to give warning as to the possibility of a deficit, it has served to our advantage. When we face the future too sanguine as to available funds, we court disaster if the prophecy be erroneous. We face no such disaster if we err on the other side and view with conservative eye our financial outlook.

I have spoken to you often on the subject of personnel. Our salary and wage expenditure is the most costly single item of the budget. While the Post Office Department has necessarily had to increase its personnel with its growth of business we have been decreasing personnel elsewhere. It is very easy to have too many people on the payroll. The reductions which have been made in personnel show no detrimental effect upon our results. Rather has it seemed to improve the efficiency of the service. I am encouraged in the thought that we can have further reduction of personnel without discharging a single person, by the simple device of not filling all the vacancies that occur. This would not operate in the summary separation of any one from the Federal service. General Lord will outline to you a plan to carry this into effect, which has my approval.

Expenditures of State and Local Governments.

No doubt what has been accomplished by the Federal Government has served as an inspiration to some local political units in reducing their governmental costs, but it is not disclosed by the aggregate for all of them. From 1921 to 1925 the Federal Government reduced expenditures more than two billions of dollars. The same period showed an increase of more than four billions of dollars in State, county, municipal, and other governmental expenditures. In 1921 when the cost of all government in this country was approximately nine and one-half billions of dollars, Federal expenditure constituted nearly 60% of the total. In 1925 the cost of all government increased to more than eleven and a half billions, of which only 27% is represented by Federal expenditure.

The answer to this reduction of 33% in the Federal share of all governmental costs is not that we are performing less service for the people or neglecting our physical plant. The real answer is that we have so far put our house in order as to decrease our demands upon the people and to give them more efficient government at less cost. The local governments, like the Federal Government, have no moneys which they do not take from the people. To meet an increase of more than one billion dollars a year for four years in the expenditures by the States and their political subdivisions there must have been a corresponding increase in levies upon the people or in bonded indebtedness.

Cause for Grave Concern.

There is cause for concern in this situation. It is fraught with grave consequences to the public welfare. The Federal Government has decreased its costs by practicing the homely virtue of thrift. This has not been an easy task. It has required co-operative effort and sacrifice in every direction. If the interests of the people demanded this action on the part of the Federal Government, surely they would seem to demand similar action with regard to the increase in these other local governmental costs.

This suggestion is not meant as a criticism of the officers of our local governments. It is rather a statement of fact. It shows how hard it is in these times to reduce the costs, taxes and debts of governments. But it can be done if the people will co-operate. Unless they do, however, special interests will continue to overwhelm the legislative bodies for more expenses and more taxes. The limit is close at hand when further expansion in the costs of government will bring the danger of stagnation and financial depression.

We are testing out in this country the success of self-government. We require no property qualification for voters. Students of history have claimed that under such a system it has too often been found that democratic institutions tend to confiscate property to such an extent that economic progress becomes impossible. That has not been our experience, in part because the Constitution protects us from legislation of that nature. But this is the test which America must meet, and meet constantly, and unless it is met successfully the strength, progress and prosperity of our country will cease. You will readily see, therefore, the vast and far-reaching importance of your efforts and co-operation in the policy of constructive economy.

All of this effort would not be worth while unless it had an ultimate purpose above and beyond the mere saving of money. We ought to use money as we use any other utility—to advance the welfare of the human race. Money is not endowed with any sacred quality. Man was not made for money, but money was made for man. It has become absolutely necessary in these days of dense population, and under an advancing system of co-operation by society, for what was once a purely private function to take on more and more the character of a public function. It must, then, be carried on out of the public treasury. For that purpose money must be provided. Its expenditure is required. But we must have a wise expenditure, well balanced and within the means of the people.

That is constructive economy. It does not partake of a mean and sordid nature; it is not narrow and selfish, but rather broad, generous, and ennobling, undertaking to deal justly with the whole situation by raising such revenues as the people can fairly bear to meet, such expenditures as are fairly required. The results are systems to provide transportation and communication, improved sanitation, public order, the administration of justice, necessary legislation, advancing educational facilities, and the development of the artistic and spiritual side of life. These provide an evenly balanced basis for the support of an enlightened civilization. The result is America. Into the making of that result and its continued success your patriotic service and devotion is a contributing factor of enormous importance.

The office of Director of the Budget has been established in order to provide an advisory staff to the President, the Congress, and the various departments in their efforts to meet these requirements. At its head is General Lord. The law has clothed him with some authority, but far greater authority is derived from the character of the man. His ability and integrity inspire confidence. He has laid out plans for constructive economy.

When I say that his plans have not only been carried out but actually improved upon in the Congress under the leadership of Representative Madden and Senator Warren, I mean to extend very high praise to those two seasoned legislators. These three men are representative of the spirit which has made our budget system a success. In order that we may further profit by his counsel and encouragement, I present to you again the Director of the Bureau of the Budget, General Lord.

Director of Budget, Brigadier-General Lord, on Accomplishments of Bureau—Hopes for $20,000,000 Saving in Year Through 2% Personnel Club.

The reductions effected through budget control were detailed by Brigadier-General H. M. Lord, Director of the Budget, at the semi-annual meeting on June 21 of the Business Organization of the Government; in summarizing the showing for the first four budget years, he said:

In these four budget years we spent $14,529,101,681 53 and accumulated surpluses totaling $1,379,331,336 04, which has been applied to debt reduction and tax relief in addition to $1,750,082,954 93 applied to debt reduction as required by law and included in the expense total given. As I stand appalled at that extraordinary expenditure of fourteen and a half billions of dollars in four years I wonder how much of that great amount was wasted, how many millions were spent on unnecessary projects and for useless purposes. I wonder had we been wiser, had we been more courageous, had we been more self-sacrificing, had we been more devoted to the welfare of the people, had we more regard for the letter and spirit of our oaths of office how much of that $14,529,101,681 53 spent might have been transferred to that $1,379,331,336 04 saved. However, this may be, let us resolve that there shall be cause for no such question with regard to future expenditure.

Stating that the 1% club organized for 1926 has been enthusiastic, and that a determined effort is being made to effect a 1% saving in the interest of a balanced budget, Mr. Lord had the following to say (we quote from the "United States Daily"):

At the last business meeting the financial prospect for the current year was discussed. We anticipated receipts under then existing tax rates, of $3,880,716,942. Probable expenditure totaled $3,618,675,186. This gave an indicated surplus of $262,041,756. Congress was busy revising tax rates. We were also threatened with material losses in revenue in other directions. These factors made the situation delightfully uncertain. To meet whatever contingency might arise we appealed to you as usual. At the last business meeting the President said: "The penalty for achievement is always a demand for even greater achievement." So in that hour of uncertainty you were asked to reduce your 1926 spending program by approximately $36,000,000, or 1% of your program of expenditure. Our Two Per Cent Club of 1925 with its actual saving in excess of $60,000,000 was so successful that we organized for 1926 a One Per Cent Club. The response from the service, from here, there, and everywhere, was general and enthusiastic, and a determined effort has been made and is being made to effect the required 1% saving in the interest of a balanced budget and a satisfactory surplus. Exactly how much saving has been effected by this effort can not be determined at this time. I am confident, however, we won out as usual.

The latest estimate for 1926 indicates a most gratifying surplus for the year. It carries in its generous total the result of your loyal effort to reduce expenditure.

For some months we were sorely and surely troubled about 1927. The first estimates after enactment of the new tax law showed a deficit. The President immediately applied the rule of "absolute necessity" to all estimates for 1927 expenditure. Calls for funds for projects and purposes that could not pass that test—"absolute necessity"—met one answer, and one answer only: "They shall not pass." And they did not. Income tax returns, however, despite tax reduction, continued so to grow, and showed so little regard for estimates, that the Treasury's dependable and resourceful estimators sat up and said: "How come£" As months passed the financial prospect brightened.

Surplus for 1927 *Estimated at* $185,000,000.

Fear of a deficit faded away before hope of a surplus. To-day we see possibility of a surplus of not less than $185,000,000 for 1927. Our hope is based on an uninterrupted continuance of present prosperous business conditions and on rigid and uncompromising adherence to the President's expenditure program. The former condition we can no control; the latter we can and must control. The Chief Executive, in his insistence upon a balance budget and a surplus, has limited expenditures in 1927 to $3,600,000,000, including tax refunds and debt reduction. This total, large as it seems, means another year of closest scrutiny of every obligation, of every expenditure. Loyalty to the people, loyalty to the President, loyalty to the Federal service demand that in the year coming we get 100 cents worth of absolutely necessary service of 100 cents worth of urgently needed supplies for every dollar spent. We must make each dollar sweat.

Limited Estimates—And what about 1928? The President has stated that the estimates of appropriations for the budget for that year shall not exceed $3,200,000,000. This does not include tax refunds and excludes also certain other indeterminate items. It would require a more sanguine person than the speaker to find in this maximum established by the Chief Executive warrant for any expansion of Federal activities. To be candid, it looks rather more like reduction. It does not contemplate for 1928 an increase in expenditure over the limit set for 1927.

With regard to the national debt Mr. Lord said "We reached the peak of our national debt Aug. 31 1919, when it totaled $26,596,701,648 01. June 30 next it will stand at $19,725,000,000 approximately, showing a reduction of nearly $7,000,000,000. Of this reduction something more than $4,000,000,000 was effected during the budget period. In that same period there have been three reductions in tax rates.

As to the saving hoped for through the reduction of superfluous employees of the Government—to be accomplished through a 2% Personnel Club, Mr. Lord in part stated:

Appreciating the difficulty you may have the coming year and the year following in keeping within the President's limitations on expenditures and estimates, the Budget Director has been casting about for methods and means of assisting you in solving what I know is going to prove a real problem. His first thought is personnel, to which the President has called your attention. This is always a fertile and legitimate field for saving.

Nov. 11 1918—Armistice Day—we had 656,672 employees in the Federal executive civil service, exclusive of the Postal Service. April 30 1926 we had 246,419 people on the roll, a reduction of 410,253 employees at an annual saving of $738,000,000.

Statements have been made and widely circulated that we have to-day in the Federal Executive Civil Service more employees than when President Coolidge took office. * * *

President Coolidge became Chief Executive Aug. 2 1923. June 30 1923 there 262,709 people in the Federal Executive Civil Service, exclusive of the postal people. April 30 1926 we had 246,419, a reduction of 16,290 during President Coolidge's administration.

Nevertheless we still have superfluous employees on the Government payroll. To help you meet the President's requirements as to expenditures the coming year it has been decided to apply a 2% reduction to your force with the organization of the Two Per Cent Personnel Club—a thrift club of a new pattern, designed to save $20,000,000 in the next twelve months. This plan does not require the discharge of any one from the Federal army of workers. It does provide, however, for a graceful, scientific and painless reduction in personnel. I know your response will be enthusiastic, joyful and effective.

The number of vacancies in the Federal Executive Civil Service filled annually by original appointments is about 9% of the total employees. It is proposed, during 1927, to omit filling such a number of these vacancies as will result in saving at least 2% of the total salary cost. This means that for each $100 you have for such salaries $2 at least will be covered into the surplus fund of the Treasury. No employee need be discharged for the sold purpose of effecting a reduction. Details governing this plan, which has the approval of the President, will be announced later. I might say in passing that you are not necessarily limited to 2% in this personnel elimination. It will be interesting to note at the end of the year who wins the blue ribbon for greatest percentage of reduction in this friendly and profitable contest. Here, again the question of administration, good, bad and indifferent, comes into the picture.

The record of the four years since 1922 (to which reference is made above) was detailed as follows by Mr. Lord:

The total expenditure in 1922, first year of budget control, was $3,975,302,499 84, with a surplus of $313,801,651 10, which was distributed to the taxpayers to whom it belonged through the medium of debt reduction or tax relief. The expenditure for that year was one and three-quarter billions less than the disbursements in 1921, the last year free from budget supervision. And 1922 was the year the departments and independent establishments in response to the eloquent appeal of the then Budget Director, General Dawes, made voluntary offering on the altar of economy of $117,000,000 saved from their appropriated funds, and thus auspiciously inaugurated the greatest thrift crusade in history.

In 1923 the total outgo was $3,697,478,020 26, a reduction of $100,000,000 below the splendid record of the preceding year. And that year, 1923, we faced an extraordinary demand for $100,000,000, accrued interest on war-savings stamps of the vintage of 1918, which some one kindly passed on to the budget period for settlement. We met this unusual and, in a measure, unexpected burden with a smile—sort of a dry smile—absorbed the amount, and piled up a nice little surplus of $309,657,460 30, guaranty to an expectant people of further relief.

In 1924 expenditures were cut to $3,506,677,715 34, nearly $200,000,000 less than we spent in 1923, while the surplus was boosted to $505,366,986 31—more than half a billion dollars saved—the largest surplus in the history of the Government. And here was further assurance to the taxpayers that their agents in the Federal service were committed to the policy of creating surpluses as part of the regular routine.

In 1925 we spent $3,529,643,446 09, and demonstrated a surplus of $250,505,238 33—a quarter of a billion of dollars, saved for the benefit of those who contributed it to the Government. That year, 1925, we assumed the burden of the so-called soldiers' bonus Act, which cost us that 12 months $100,000,000. Although this formidable obligation was peremptorily added to our burden, savings in other directions enabled us to absorb the most of it, and we ended the year with an increase of only $23,000,000 above the preceding year.

Bureau of Subtraction.

Commenting on the fact that his bureau had been referred to as the "Bureau of Subtraction," Mr. Lord said:

With June 30 next the present Director of the Bureau of the Budget completes four years at the head of what has been called by a member of Congress the "Bureau of Subtraction." I never quite knew whether that appellation was intended as a compliment or a criticism. If reduction of departmental estimates by $1,456,000,000, if elimination of opposing and wasted effort in Federal business operations to make way for effective team work, if substitution of thrift for extravagance, if replacing inefficiency with efficiency be subtraction then the tite is no misnomer.

W. J. Donovan, Assistant to United States Attorney-General, in Address Before New York State Bankers, Warns Against Undue Combinations.

In addressing the New York State Bankers' Association, at its annual convention in Quebec on June 22, William J. Donovan, Assistant to the Attorney-General of the United States warned of "undue concentration of power," stating that "banking institutions, upon whose support these expansions must necessarily depend, should direct their efforts to halting undue combinations and consolidations, particularly those calculated to violate competitive principles. It is infintely better that the reformation should come from within," he declared, "and corrective methods should be applied by the industry itself." Mr. Donovan made the statement that "the present evils of modern industrial development are coming to be recognized" and he added, "there is the beginning of the same resentment toward consolidations of industry that was so evident against the combinations of the early '90." "If then," he said, "there is to be a carrying out of the express desire of the business man that Government be kept out of business, it is incumbent upon the business man and banker that he so conduct his business that there be no necessity for the intrusion of Government into business."

"Good sense alone," Mr. Donovan observed, "should prompt the leaders of industry to apply an economic brake to undue combination and consolidation, and particularly to those calculated to violate the competitive principle." Incident to Mr. Donovan's warning the New York "Times" published the following from Washington June 22:

The statements made by Assistant Attorney-General Donovan before New York bankers at Quebec to-day in regard to mergers were made public here and were generally regarded as an Administration warning in connection with the continued formation of big combinations.

It was pointed out that he was admonishing business to proceed with care along the line of industrial amalgamation and was calling attention to the discussion now prevalent of means to strengthen the anti-trust laws.

Particular attention was given to these paragraphs of his speech as issued here:

"It is not difficult to conceive that as a result of huge combinations being illegally formed and arbitrarily administered the Government should be forced to interfere and take over and regulate these corporations, even though in so doing there might be developed a bureaucracy in the country with attendant evils greater than those sought to be corrected.

"If that day should come it will be due not so much to the desire of the people of this country to accept socialistic doctrine as to the folly of those who, in their dominion of industry, have failed to conform to that principle of competition upon which our economic life has been based."

The same paper, in its report of Mr. Donovan's remarks, said:

Colonel Donovan said that through the general public investing in stocks there had been created a great reservoir of capital for the development of industrial enterprise. Management, he said, was now separated from ownership, and the savings and thrift of a vast multitude were made available for the uses and purposes of a few.

"Those who are charged with managing business in which the great bulk of the stock is held by individuals who have neither the training nor the opportunity of participating in the activity of the business," he said, "owe a peculiarly high obligation to their stockholders. They bear not only responsibility for the direction of the business, but are charged with the conservation and protection of the funds entrusted to them in the management of the business. They are in a position of stewardship. As trustees they owe a duty to their shareholders that often is not truly recognized.

"There is necessity for organization of effort in a society so highly industrialized as is ours. It may be well that business consolidations can be effected so as to eliminate waste of economic effort without detriment to the public."

Size in and of itself is not an evil, Mr. Donovan said, but it is the abuse that constitutes the evil. The one justification for the effecting of a consolidation was the serving of the public interest. The means taken either to regulate or to operate industry must be decided, he said, by the application of that principle.

Dangers to Be Feared.

"If within this principle there shall be a fusion of these two movements under discussion," Mr. Donovan continued, "the result will be beneficial to the country. But there are two dangers to be feared, one is that the natural separation of ownership from management, which is the inevitable result of the diffusion of stock holding, shall be further accentuated by the effort of those in control to make it impossible for the stockholders ever to assert their rights. This is attempted to be accomplished by legal devices, which, while depriving the shareholders of the right to vote, equally deprives them of the means of holding their management to strict accountability.

"The other is that with the undue concentration of power placed in the hands of a few, there will be increased temptation to violate or evade those laws which were enacted for the preservation and maintenance of the competitive system.

"Over-development and speculative expansion are seldom indulged in by those who are dealing with their own money. There is a tendency, however, to expand and amalgamate without a proper regard for the law of diminishing returns by those who, charged with the responsibility of management, are lacking in a proper sense of obligation to those whose money is being handled."

Earnings Back in Business.

"There is a tendency on the part of the corporate managers, instead of paying earnings to the stockholders as dividends, to turn them back into the business of the corporation, and the earnings so turned back are used not for maintenance and improvement, but too often for unsound expansion and the acquisition of competing properties.

"The bankers occupy a position which gives them unusual opportunity for properly directing the course of conduct and management of business and of saving from ruin the small investor who has placed his funds in the business, relying upon the standing and character of the banker.

"Where the purpose of men in industry is by combination and consolidation to so control that industry that they may eliminate competition, destroy individual initiative and by skillful devices award themselves profits disproportionate to their services, then these combinations are a serious economic and social danger.

"It may be remarked that if existing legislation is adequate to avert the dangers apprehended, it only remains for prosecuting officers to enforce the law in order to insure our safety. But the history of recent years reveals that, despite, the earnest efforts made to enforce the law, the trend toward combination has continued. This can only mean that the existing laws are not adequate to meet all the varying forms of combination that have been devised and that fact already is a matter of public discussion.

"As the Supreme Court has pointed out, whether the free operation of the normal rule of competition is a wholesome rule for trade and commerce or not, it is the settled law of this country that public convenience and welfare demand that the natural lines of competition be left undisturbed and that the control of prices through combination tends to restraint of trade and monopoly and is an evil thing."

To this "rule of law" business men must conform, Mr. Donovan said, and it was the high duty of bankers, who by reason of their position of dominance and control in the industrial world to-day were able to influence the conduct of the managers of business, to see that this principle is adhered to.

In conclusion, Mr. Donovan said:

"If there is to be a carrying out of the expressed desire of the business man that Government be kept out of business, it is incumbent upon the business man and banker that he so conduct his business that there be no necessity for the intrusion of Government into business. Good sense alone should prompt the leaders of industry to apply an economic brake to undue combination and consolidation, and particularly to those calculated to violate the competitive principle."

Dissent of Commissioners Nugent and Thompson from the Order Dismissing the Complaint of the Federal Trade Commission Against the Continental Baking Corporation.

In our issue of April 10 1926, page 2048, we reported that Commissioner Nugent had dissented from the decree entered April 3 last by Judge Morris A. Soper in the United States District Court at Baltimore dismissing the complaint of the Federal Trade Commission against the Continental Baking Corporation (see also decree of the court in Vol. 122, page 1995). Commissioner Thompson, who was not present when Commissioners Hunt, Humphrey and Van Fleet dismissed the complaint (April 2) later stated for record that, had he been present, he would have dissented, and "desired to join Mr. Nugent in his dissent of the action taken and ask that the record show the dissent." Commissioners J. F. Nugent and Huston Thompson have now filed a written dissent from the dismissal on April 2 1926 of the complaint against the Continental Baking Corporation, charging it with the acquisition of the capital stock of a large number of baking companies in violation of Section 7 of the Clayton Act. Commissioners Nugent and Thompson, in referring to the consent decree, state:

The bill of complaint of the Department of Justice in the Ward suit alleged, among other things, that the Ward Baking Corporation, the Ward Baking Co., the Continental Baking Corporation, the United Bakeries Corporation, the General Baking Co. and the General Baking Corporation, together with certain individuals, "are engaged in a combination and conspiracy in undue and unreasonable restraint of trade and commerce among the several States, and in the District of Columbia . . . with respect of bread, cake, pastry and similar products . . . in violation of Sections 1, 2 and 3 of the Sherman Anti-Trust Act."

Paragraphs 5, 6 and 7 of the consent decree entered by the Federal Court at Baltimore in said suit at the request of the Department of Justice, enjoins, restrains and prohibits each of said corporations from acquiring, directly or indirectly, or exercising direct or indirect control of, etc., the whole or any part of the shares of capital stock of either of the other corporate defendants, or their controlled companies, and from acquiring any of their physical assets.

Under the decree, the six corporations above named may not acquire either the capital stock or physical assets of each other, but all of them are at liberty to acquire the physical assets of other bakeries.

Paragraph 8 of said decree enjoins, restrains and prohibits the said corporations "from acquiring directly or indirectly, the whole or any part of the stock or other share capital of any other baking corporation engaged also in inter-State commerce, where the effect of such acquisition may be to substantially lessen competition in such commerce between the corporation whose stock is so acquired, and the defendant corporations, or tend to create a monopoly."

We are, of course, aware of the fact that said paragraph follows, substantially, the language of the first paragraph of Section 7 of the Clayton Act, except in one important particular, namely, that said corporations are not enjoined from acquiring the capital stock of other corporate competitors where the effect of such acquisition may be "to restrain such commerce in any section or community." The acquisition by one of said corporate defendants of either the capital stock or the physical assets of a corporate competitor in many sections or cities would, as a matter of fact, restrain commerce in said sections or cities.

We call attention to the fact that the Ward Baking Corporation, the General Baking Corporation and the Continental Baking Corporation are holding companies only, and as such are not engaged in the baking business. No acquisitions of stock they may make will lessen competition between them and the companies whose stock they acquire. The consent decree does not prohibit them from acquiring the capital stock of two or more baking corporations where the effect of such acquisition may be to substantially lessen competition between such corporations, or any of them, whose stock is so acquired, or to restrain commerce in any section or community. The second paragraph of Section 7 of the Clayton Act specifically forbids stock acquisitions having such effects.

The complaint of the Department of Justice also charged that the corporate defendants "have acquired . . . the whole or a substantial part

of the stocks or other share capital . . . of other corporations engaged in inter-State trade and commerce in the baking and related industries . . . in violation of Section 7 of the Clayton Act" and sets out the names and location of certain of such "other corporations." The consent decree does not require the defendants to divest themselves of the capital stock unlawfully acquired. Neither does it require them to divest themselves of said stocks and the physical assets so acquired by any of them. The Commission has issued such orders in several similar cases, and in two cases its orders have been affirmed by different Circuit Courts of Appeal. Hence, the corporate defendants in the Ward suit are to-day in the enjoyment of property obtained contrary to law.

The said bill of complaint alleged that: "This unlawful plan for restraining and monopolizing inter-State trade and commerce in bakery products and the ingredients and equipment used in the manufacture thereof originated with the defendants, W. B. Ward and Howard B. Ward. The other defendants, individual and corporate, entered into the plan from time to time as they came into relation with those defendants or were brought into existence by them. The defendant, W. B. Ward is to-day the most powerful single personage connected with the baking industry. Closely allied with Ward are the defendants Helms and Barber, who have been associated with him for many years and who with Ward constitute a triumvirate controlling and directing the fortunes of the baking industry. . . .

"Howard B. Ward is a brother of the defendant, William B. Ward, and has been associated with him in all his enterprises since 1912. He is Vice-President of the defendant Continental Baking Corporation. . . .

"Paul H. Helms has been associated for many years in the business enterprises of the defendants William B. Ward and George B. Smith. He is a former Secretary-Treasurer of both the Ward Baking Co. (of New York) and the Ward Baking Corporation. He is now President of the defendant General Baking Corporation. . . .

"George G. Barber has been associated for many years with the defendant William B. Ward in various baking enterprises. . . . He was active in the promotion of the defendant Continental Baking Corporation, and has served as its President since it was organized."

Paragraph 10 of the consent decree reads as follows: "That the defendants, William B. Ward, Paul H. Helms and George G. Barber are severally required to dispossess themselves of all voting shares of the capital stock in any of the defendant corporations and the companies controlled by them, other than such defendant corporations and its subsidiaries as he may elect to retain his holdings in under Section 9 hereof."

It will be noted that the gentlemen named are not required to divest themselves of said "voting shares" in good faith, or for an adequate or any valuable consideration. They can therefore comply with the provisions of said paragraph by merely transferring said shares to members of their families or to Howard B. Ward, George B. Smith, J. W. Rumbough, or R. E. Peterson, their personal friends and business associates, as to whom the complaint of the Department of Justice was dismissed.

Paragraph 13 of said consent degree reads as follows: "It appears that the charge contained in the petition herein that the acquisition and holding by the defendant, the Continental Baking Corporation, of the stocks and other share capital of alleged competing baking companies is in violation of Section 7 of the Clayton Act, was included also in a complaint filed by the Federal Trade Commission against the Continental Baking Corporation on Dec. 19 1925; wherefore, the petition is dismissed as to that charge without prejudice to the right of the United States to again raise the issue in any other proceeding."

The only reasonable inference that can be drawn from that language and, unquestionably, the inference that it was intended should be drawn therefrom, is that said charge was dismissed for the reason a complaint involving the same subject matter was then pending and undetermined before the Federal Trade Commission. It is mere camouflage. The consent decree was signed by the Judge of the Federal District Court at Baltimore and entered on Saturday, April 3, and the Federal Trade Commission, at a regular meeting held on Friday morning, April 2, was informed by its chief counsel that the entry of said decree was subject to the dismissal by the Commission of its case against the Continental Baking Corporation.

At said meeting of the Commission, by vote of Commissioners Hunt, Humphrey and Van Fleet, with Commissioner Thompson absent on official business, and Commissioner Nugent voting "no" and dissenting, the said complaint of the Commission was dismissed, the order to become effective when said decree was entered by the Federal court, and the chief counsel of the Commission was directed to "informally advise the Attorney-General" of said action which, we have no doubt, he did before noon of said day. However that may be, the fact remains that about 3 o'clock p. m. of April 2 the Attorney-General was informed by letter dispatched to him by special messenger that the Commission had dismissed its complaint against the Continental Baking Corporation as above stated.

We quote the following from said letter to the Attorney-General:

"In consideration of the above mentioned (consent) decree, and in accordance with the recommendation of its chief counsel, the Commission has dismissed its complaint against the Continental Baking Corporation, Docket 1,358, alleging violation of Section 7 of the Clayton Act, such dismissal to become effective upon the entry of the degree.

"By direction of the Commission, Mr. Nugent dissenting."

It is therefore plainly apparent that when, on April 3, the Department of Justice requested the court at Baltimore to sign and enter said decree, which contained Section 13 above quoted, it was fully aware of the fact that the very moment said decree was entered, the order of dismissal of the Commission's case against the Continental Baking Corporation became effective.

When Commissioners Hunt, Huphrey and Van Fleet, "in consideration of this (consent) decree," dismissed the Commission's complaint against the Continental Baking Corporation it was with knowledge that said decree dismissed the Section 7 charge of the Department of Justice against that corporation.

The result of said dismissals is that the Continental Baking Corporation is to-day in the quiet, undisturbed and unchallenged ownership and possession of the capital stock of corporations owning and operating at least 83 bakeries, among which are some of the largest in the country, and others among the largest in the sections in which they are located, notwithstanding both the Department of Justice and the Federal Trade Commission had solemnly charged that said stock was acquired in violation of Section 7 of the Clayton Act.

A few weeks ago the President of the United States, according to the public prints, addressed a letter to Mrs. Henry W. Peabody, Chairman of a committee representing the Women's National Committee for Law Enforcement, in which he said:

"This earnest manifestation of interest in enforcement of law is gratifying. Such interest on the part of those citizens not officially connected with the execution of the law is heartening to those charged with that responsibility. In this message I desire to reiterate the following statement which I made on the subject of your present deliberations: 'The law represents the voice of the people. Beyond it, and supporting it, is a divine sanction. Enforcement of law and obedience to law, by the very nature of our institutions, are not matters of choice in this republic, but the expression of a moral requirement of living in accordance with the truth. They are clothed with a spiritual significance, in which is revealed the life or the death of the American ideal of self-government.'"

It is evident that the Attorney-General and Commissioners Hunt and Humphrey, who were appointed by President Coolidge, and Commissioner Van Fleet, are not in accord with the statements of the President on law enforcement. As public officials, they are, to quote the President, "charged" with the "execution of the law," and, so far as the Continental Baking Corporation is concerned, they not only executed Section 7 of the Clayton Act, but they buried it, "unwept, unhonored and unsung."

While the consent decree dissolved the Ward Food Products Corporation, which had issued no stock and owned no property, it left William B. Ward, his former employees, intimate friends and business associates, in control of the Ward, the General and the Continental baking corporations, the three largest in the country. The Department of Justice estimated the annual sales of the bakeries controlled by the Ward and Continental corporations at between $120,000,000 and $140,000,000.

The decree would have been really effective and of great benefit to the public had it required the corporate defendants in the Ward suit to divest themselves in good faith of the capital stock and of the physical assets, where they had been taken over, of the baking corporations they had unlawfully acquired, as charged by the Department of Justice and also by the Federal Trade Commission in the case of the Continental.

We expressly disclaim any intention to criticize the Federal court at Baltimore for entering the consent decree. In view of the consent of the Department of Justice, the entry of said decree was, of course, a mere formal matter. We are confident that had the court been informed as to the facts in the case, a decree materially different from the one under consideration would have been entered.

J. F. NUGENT.
HUSTON THOMPSON.

New York City's Committee on Planning and Survey Named By Mayor Walker.

On Monday of this week, June 21, the City Planning and Survey Committee, named by Mayor James J. Walker earlier in the month, held its first meeting in the Aldermanic Chamber of the City Hall. In making known the names of those constituting the Committee on June 14, Mayor Walker referred to it as "a non-partisan committee" and indicated that its task would be "to make a survey of the City of New York and plans for its future needs." The Mayor announced that seven sub-committees were to be assigned as follows:

On Housing, Zoning and Distribution of Population; Port and Terminal Facilities; Traffic Regulation and Street Uses; Sanitation and Harbor Pollution; Highways and Bridges; Parks and Recreational Facilities and New Sources of City Revenue.

The full committee is composed of men and women, residents of the city, to the number of 475, prominent in various lines of activity—bankers, lawyers, educational and civic workers, &c., &c., being enlisted to undertake the survey proposed by the Mayor. On June 21, when nearly all the members of the committee were in attendance at the first meeting, Mayor Walker announced the appointment of Morgan J. O'Brien, formerly Justice of the Supreme Court, as Chairman of the Committee. Joseph A. Warren, Commissioner of Accounts, was named as Secretary.

The naming of the Executive Committee and the Sub-Committees was deferred pending the return of Mr. O'Brien from Chicago, where he has been in attendance at the Eucharistic Congress. We are giving further below the names of the full Committee named by the Mayor. The following is the statement of the Mayor made public June 14:

Soon after the inception of the new Administration I suggested the formation of a non-partisan committee to make a survey of the City of New York and plans for its future needs. The suggestion met with approval. Since that time I have been inviting co-operation from various civic, professional and commercial organizations as I have had occasion to address them. The response has been most gratifying and I am now able to announce the appointment of a large general committee for this purpose, to be known as the City Planning and Survey Committee. This is the first time that such a body has been organized under official auspices.

As the weeks passed since I took office and I had an opportunity at first hand to meet the great problems confronting the administration of the city, I have appreciated the more the necessity for the organization of such a body that would be representative of every phase of activity in our community of more than six million residents. The help which such a committee can give to the officers of the City of New York constantly becomes more apparent. The vast extent of territory included within the city and the numberous problems arising from the needs of housing, of feeding the people, of business and manufacturing, as well as of health and recreation, make the tasks of those assigned to the seat of government in the City Hall almost insuperable without the cordial and helpful advice of the citizens.

To the end that the various communities in the city may have a voice and may meet and co-operate, invitations were sent to the leaders of associations representing community needs to serve on the committee. In like manner those active in the various leading industries were asked to serve. The formal organizations of business men were also recognized, as well as the professional and engineering societies. Men and women prominent in philanthropic service and civic work were invited.

Curiously enough, it was found that some of the most active in certain forms of civic activity in New York City were not residents of the city. And, upon learning this, it was decided not to include them on this particular committee. They may be asked to serve on another committee having to do with welfare work that is in process of organization.

It is my purpose to invite all those who have been designated to meet in City Hall at an early date for the purpose of organization. At that time I shall take the privilege of addressing them on the scope of the work I wil

entrust to them. At this time I feel it is not necessary to do more than outline the form of organization to be presented to the committee. That will include the selection of a chairman of the whole committee, the selection of chairmen of each of seven subcommittees, and the appointment of an executive committee.

The subcommittees are to be seven in number, assigned as follows:

1. On Housing, Zoning and Distribution of Population.
2. Port and Terminal Facilities.
3. Traffic Regulation and Street Uses.
4. Sanitation and Harbor Pollution.
5. Highways and Bridges.
6. Parks and Recreational Facilities.
7. New Sources of City Revenue.

It is planned to call the members together for their first meeting on Monday June 21.

The remarks of the Mayor on June 21 when the Committee held its initial meeting, follow:

As Mayor of the City of New York I extend to this body of patriotic citizens my thanks for their willingness to serve the city. I know that all of you are men and women of large affairs whose time is of value. Despite this you have come, freely offering your services in an endeavor to help the officials of this city to work out some scientific method for its improvement and its government. I feel sure that no one is actuated by any selfish or ulterior motives; and it is a great source of gratification to me as the Mayor of this city to feel that I can rely upon the best of our citizenship for aid and assistance.

As you all know, I have lived in this city all my life. I have been part of its public life for the last seventeen years. I believe that I know fairly well the needs, desires and wishes of the people. But no man, no matter how long he has lived in the city, no matter how varied has been his experience, can possibly know all there is to be known about this phenomenon which we call the City of New York.

Within the city limits we have over 6,000,000 people. We have more Germans than any city in the world with the exception of Berlin. We have more Irish than Dublin. We have more Italians than Rome; and scattered throughout the city we have communities representing almost every nationality in the world. We spend at the rate of over a million and a half dollars for every working day throughout the year. We have over 4,500 miles of improved streets. We have over 116,000 employees and officials. In a word, socially, politically and industrially we have in New York City one of the most complex and gigantic institutions in history.

Even before I was elected Mayor, even before I was a candidate for the office of Mayor, indeed even from boyhood, I had learned to appreciate the magnitude of this city. I had some appreciation also of the haphazard way in which the problems of its civic life have been handled. During my campaign for election I stated that in the past we have provided most of our improvements with a view to the benefit of some particular locality, that we have not looked upon the city as a whole, and have not tried in any intelligent, far-seeing way to plan our improvements with a view to the best development of the city as a whole. The consequence has been, as I then said and as I now even more fully realize, that some localities have been favored at the expense of the entire city. Each situation has been dealt with piecemeal and spasmodically. If a locality needed an improvement and raised sufficient clamor, the improvement would be provided, even though the making of such improvement rendered impossible the supplying of a like or other need in some other locality more in need but less vociferous.

A moment's consideration of the formation of this city as it is now constituted will demonstrate that this haphazard development is about what might have been expected.

On Jan. 1 1898, by fiat of the Legislature, there was evoked this municipality, which I have already called a phenomenon. The cities of New York, Brooklyn and Long Island City, the counties of New York, Kings, Queens, Richmond, parts of Westchester, including over two score municipalities, were thrown into the one municipality to be known as the City of New York.

Bear in mind that each one of these various municipalities had grown up and developed along its own lines, according to its own needs, and in all probability without skillful planning or designing. An examination of the original charter of the consolidated city will disclose that no very careful scheme for the development of the city as a whole was embodied therein. At most it was a mere consolidation of the governmental agencies of the separate municipalities.

No substantial provision has been made for the comprehensive development of the city since the original charter of 1897. We have since that time gone along supplying the needs of the localities which have bothered us most. We have dealt with each phase of the city's needs as a separate and unrelated thing. As a result, we have to-day a city overdeveloped in some parts, underdeveloped in others, but thereby tending to increase the confusion and the waste that we must and can eliminate.

Among the great problems confronting us are:

Housing, zoning and distribution of population.

Port and terminal facilities.

Traffic regulations and street uses.

Sanitation and harbor pollution.

Highways and bridges.

Parks and recreational facilities.

There is also the problem that always will confront the officials of the city of New York if they are alive to the responsibilities of their offices. I mean the development of new sources of revenue by which these various improvements can be instituted and facilitated.

As we think over the list of problems which I have just enumerated and which is not intended to be complete, we will see that the fundamental problem with which we have to deal is the distribution of population. Immigrants from abroad, Americans from other parts of this country, have poured into this city for a century and have stopped where they first landed. Overcrowding in some portions and incomplete development in others have resulted. It is obvious that every one of the problems which I have enumerated is dependent upon where the people are. We cannot intelligently build schools except with the population to be supplied in mind. The same is true of streets, of bridges, of parks, of transit. Until we have developed some intelligent plan for the distribution of our population, no real or substantial improvement of conditions can be expected.

Until the last few years nothing along these lines has been attempted. In recent years, however, a tendency has manifested itself to deal with the problem scientifically. Witness the zoning laws and regulations, the Port Authority legislation and the Regional Planning Commission. All these are steps in the right direction. But even these measures look to the solution of a specific problem rather than to a general plan for development in all respects of the city as a whole.

We cannot expect permanently to improve and intelligently to develop this great community in which we live until we have worked out some plan for decent living conditions for every man, woman and child within our limits.

Now it is obvious that no small group of men could know enough or have had experience enough to deal with all the phases of the great problem which confronts us. Therefore it has been my endeavor to include in the membership of this committee representatives of all of the professions and of every phase of activity connected with the life and industry of the City of New York.

It is my idea that this body of experts shall be subdivided into groups to study the particular phases of the problem in which they have had the most experience. They in turn will sift their information into a central body which from a broad survey, may pick and choose what in all human probability are the best remedies. To accomplish this for the present I have divided the main committee into seven subcommittees, to which will be assigned, respectively, the following subjects:

1. Housing, zoning and the distribution of population
2. Port and terminal facilities
3. Traffic regulation and street uses
4. Sanitation and harbor pollution
5. Highways and bridges
6. Parks and recreational facilities
7. New sources of city revenue.

It seemed to me that all of the major problems confronting the city will naturally fall into some one of these various subdivisions. If after our investigations have been under way it develops that there are some needs or problems not covered by these subdivisions, other and further subcommittees will be appointed.

It is my intention that the Chairmen of these various subcommittees will further specialize their work and assign to groups in their sub-committees such special investigations and studies as may seem to them necessary. The Chairmen of the subcommittees will sit on the Executive Committee, which will be the central clearing house for the whole investigation. In addition to these Chairmen there will sit on the Executive Committee the Chairmen, Vice-Chairmen and the Secretary of the General Committee and five other members-at-large to be appointed by the Mayor. After the Executive Committee has received, digested and passed upon the work, and reports of the subcommittees, it will then make its report and recommendations to the General Committee for final action.

Representatives of such organizations as the Committee on Regional Plan of the City of New York and Its Environs, the Merchants' Association, the Chamber of Commerce of the State of New York, the City Club and other bodies familiar with the problems of city and port development and all phases of life in this community have accepted the invitation to serve on this committee. The great body of related material which has hitherto been prepared separately by these bodies will be assembled. For the first time the work of these several organizations may be co-ordinated, and I think that the committee and the city are very fortunate in having at their command the co-operation of these organizations, foundations and groups.

In the work which you are about to undertake you may have every assurance that I shall render any assistance within my power, and I expect every official of the city to co-operate with you with intelligence and zeal. In so far as I personally am concerned, I am confident, even to the point of optimism, that the results of your labor will meet with the approval of the people and will make Greater New York a greater and a better city.

The following are the names composing the committee:

A

Adamson, Robert, banker; ex-Secretary to Mayor.
Adikes, John, attorney; member Queens C. of C.
Allen, Frederic W., banker.
Amend, Alfred J., lawyer.
Ames, Edwin A., President Dime Savings Bank, Brooklyn.
Amster, Dr. J. L., ex-Health Commissioner.
April, Abraham, manufacturer.
Arndt, Walter T., Citizens Union.
Arnheim, W. W., President, Marks Arnheim, Inc.
Ashforth, A. B., real estate; member State C. of C.
Astor, Vincent, capitalist.
Augenblick, Samuel, real estate; builder.
Abel, Mrs. Minnie, Board of Assessors.

B

Baker, Stephen, Trustee Columbia University; President, Bank of the Manhattan Co.
Baldwin, Arthur J., lawyer, publisher.
Baldwin, H. De Forest, lawyer; member Charter Revision Committee.
Balwin, LeRoy W., President, Empire Trust Co.
Ball, Ancell H., Vice-President Fifth Avenue Association.
Ballard, Sumner, President, International Insurance Co.
Banham, Walter J. K., member State C. of C.
Baright, Mrs. Clarice, lawyer; civic worker.
Barney, W. J., member Amer. Soc. Terminal Engineers.
Barrett, A. M., ex-Public Service Commissioner.
Barrett, Daniel J., automobiles.
Barrett, Edward F., Vice-Pres. National City Bank.
Barrett, James M., County Judge.
Bassett, Ed. M., ex-Public Service Commissioner.
Battle, George Gordon, lawyer; President Parks and Playgrounds Association.
Beach, H. Prescott, lawyer.
Becker, C. A., President Bronx Borough Bank.

Yettman, Mrs. Laura B., civic worker.

Addenda.

McManus, Chas. A., Alderman.
Cunningham, Frank A., Alderman.
Burden, Sam J., Alderman.
Sullivan, William P., Alderman.
Kaltenmeier, Reinhard E.

ITEMS ABOUT BANKS, TRUST COMPANIES, &C.

The New York Curb Market membership of William A. Hoover was reported sold this week to Clarence B. Whitaker for $33,000. The membership of Jack Alexander was also reported sold this week to H. Leonard Rothschild for $32,000. The last previous sale was at $31,000.

The resignation of James H. Carter, as a Vice-President of the National City Bank of New York, has been accepted by the Board of Directors, effective June 30th, at which time Mr. Carter will become a member of the Stock Exchange firm of Carter & Company.

Notification was received yesterday (June 25) by the management of the National City Bank of New York that the consolidation of the Peoples Trust Company of Brooklyn with that institution has been approved by the Comptroller of the Currency. The merger becomes effective at the close of business to-day (June 26) and the eleven Peoples Trust Company branches in Brooklyn will open under the new management Monday morning, June 28.

George Melville Hard, Vice-Chairman of the board of directors of the Chatham Phenix National Bank & Trust Co. of New York, died of heart disease on June 24. Although Mr. Hard was in his eighty-fourth year, he continued to take an active part in the affairs of the bank. Mr. Hard was born in Johnsonburg, N. J., and entered the employ of the Chatham Phenix National Bank & Trust Co. when 18 years of age. In 1870 he was made Cashier and seven years later he became President, which position he held for more than 30 years. In 1910 he resigned as President, becoming at that time Chairman of the board of directors.

The following appointments were announced on June 22 by the National City Bank of New York: Sherman Allen, Trust Officer; Daniel C. Borden, Assistant Vice-President; Francis A. Zara, as Assistant Comptroller; Charles A. Clark, Manager of the 72d Street office; William N. Fulkerson, Manager of the 57th Street office; James L. Harrison, Manager of the Park Avenue office; Henry W. Salisbury, Manager of the 96th Street office.

It is announced that the Corporation Commission of Virgina has approved the Industrial Finance Corporation's plan for funding the accumulated dividends on its 6% preferred stock and refunding the stock itself. This is to be done by the issue of a 7% preferred stock, to be exchanged for the 6% stock on the basis of 1.3 shares of the new 7% stock for each share of the old 6% stock. According to a statement made by Arthur J. Morris, President, the privilege of making the proposed exchange may be exercised until July 20 1926.

The Guaranty Trust Co. of New York announces the appointment of James L. Conway as Real Estate Officer. Mr. Conway will continue to serve also as Assistant Treasurer of the Fidelitas Realty Corp., a subsidiary of the trust company, with which he has been associated during the last two years.

Plans are under way to organize the Traders' National Bank of Brooklyn, N. Y., with a capital of $500,000. The stock (par $100) will be placed at $160 per share. It is reported that B. P. Van Benthuysten has resigned as Vice-President of the Nassau National Bank of Brooklyn, to become President of the New Traders National Bank. Mr. Van Benthuysten, who has been in the banking business for more than 40 years, is a trustee of the Prudential Savings Bank of Brooklyn and Chairman of the Finance Committee. The Traders National will be located at De Kalb and Flatbush Aves. The organization committee is composed of Philip A. Benson, Secretary of the Dime Savings Bank of Brooklyn; Charles R. Gay, member of the firm of Whitehouse & Co. and a Governor of the New York Stock Exchange; Alexander Cunningham, former Vice-President of the Atlantic State Bank; Russell J. Perrine, President of Johnson Bros., lumber dealers; W. B. Greenman, a director of the New York Title & Mortgage Co. and a trustee of the City Savings Bank; Fenwick Small, director of the Greenpoint National Bank; R. Wyllis Goslin, Superintendent of the Brooklyn Department of the Prudential Insurance Co.; George B. Roy, President of the Roy Engineering & Iron Works; Louis Gretsch, real estate operator of 154 Montague St.; John B. Cain, Vice-President of Fort Hamilton Savings Bank; Frank Grossman, Vice-President of Julius Grossman, Inc., shoe manufacturers; Erastus E. Haff, President of Haff Supply Co.; Philip B. Newmark, President of Philip B. Newmark, Inc.; Henry A. Rohman, President of C. F. Rohman Sons, and Frederick A. Keck, attorney of 32 Court St.

William J. Wason, Jr., heretofore Second Vice-President of the Kings County Trust Co. of Brooklyn, has been elected First Vice-President to succeed Julian P. Fairchild, whose election as President we noted in our issue of Jan. 30, page 569. Howard D. Joost, previously Third Vice-President, and J. Norman Carpenter, Fourth Vice-President, have been elected Second and Third Vice-Presidents, respectively.

The Citizens Bank of Brooklyn, N. Y., located at 80 Jamaica Ave., was formally opened on June 21. The capital and surplus is $300,000. Deposits during first four days totaled $500,000. The officers are: F. J. Heidenreich, President; C. S. Heidenreich, Henry M. Feist, John J. Smith, Vice-Presidents, and George L. Porter, Cashier. The proposed opening of the bank was noted in our issue of June 19, page 3416. We also referred to the organization of the bank on March 20, page 1565.

The North Syracuse National Bank of North Syracuse, N. Y., organized with an authorized capital of $25,000 and surplus of $6,250, began business on June 7. The officers elected are: W. F. Down, President; G. W. Hamilton, Vice-President, and M. H. Hollister, Cashier.

A new national bank to be known as the Seaford National Bank is being organized in Seaford, L. I., with a capital of $50,000. The application to organize has been approved by the Comptroller of the Currency. Frank W. Raynor is slated for the presidency, while Charles H. Haff and William H. Whitner will be made Vice-Presidents of the bank. The directors are: William Buchanan, H. H. Graef, C. H. Haff, A. M. Redmond, O. N. Rankin, Ansel Raynor, W. E. Sexton, H. N. Thomas, W. H. Whitner, A. G. Patterson and F. W. Raynor. The stock (par $100) will be placed at $125 per share. It is planned to begin business about July 20.

The First National Bank of Gardiner, N. Y., has applied to the Comptroller of Currency, for permission to organize. The new institution will have a capital of $200,000. The Gardiner family owns $110,000 worth of stock and $90,000 worth of stock will be offered for sale at $110 per $100 share. The officers are: Edward C. Conway, President; D. Brodhead Conway and C. E. Brodhead, Vice-Presidents; Emma G. Appel, Treasurer, and John B. Appel, Cashier. The Managers are: Emma G. Appel and John B. Appel.

The Comptroller of the Currency has approved an application to organize the Port Newark National Bank of Newark, New Jersey with a capital of $200,000. The stock (par $100) is being placed at $135 per share, a surplus of $50,000 being created and $20,000 being applied toward equipment and reserve. The President is Graham B. McGregor, the Vice-Presidents are W. D. Goldsmith and J. Warren Armitage and Arthur B. Johnston is Cashier. The bank was chartered June 21. It is stated to open about Nov. 15 at South and Dawson Streets.

At a meeting of the Board of Directors of the Commercial Trust Co. of New Jersey, Jersey City, on June 23, the regular dividend of 4% and an extra dividend of 1% were declared payable July 1 to stockholders of record of June 26. At the same meeting Reeve Schley, a Vice-President of the Chase National Bank of New York, was elected a director of the institution.

On June 16 Isaac Ferris was elected Vice-President of the Camden National Bank, Camden, N. J., to succeed Herbert C. Felton, deceased. The personnel of the bank is now as

follows: Francis C. Howell, President; Isaac Ferris, Vice-President; Elias Davis, Cashier; and Edmund D. Strafford, Orlando M. Bowen and William K. Cook, Assistant Cashiers.

In regard to recent reports that a merger of the Union National Bank of Philadelphia with the People's Bank & Trust Co. and the Excelsior Trust Co. of that city was contemplated the Philadelphia "Record" in its issue of June 18 printed the following:

When the current rumors of a consolidation of the Union National Bank with the Peoples' Bank & Trust Co. and the Excelsior Trust Co. were called to the attention of Joseph S. McCulloch, President of the Union National Bank, yesterday, he stated that the consolidation had been suggested to them, but would not take place and was not receiving consideration by the Union National Bank.

The Union National Bank of Carnegie, Pa., the newly organized bank whose opening on June 19 was noted in these columns in our issue of that date, occupies the former quarters of the defunct First National Bank of Carnegie, although the new bank has no connection with that institution. According to the Pittsburgh "Gazette" of June 20, a gratifying number of persons became depositors in the institution on the opening day. As stated on June 19, the bank is capitalized at $100,000 with surplus of $25,000.

Under the caption, "Our First Forty Years," the Pennsylvania Trust Co. of Reading, Pa., has issued this week an interesting chart showing the continuous growth of the company since its organization on June 21 1886 up to and including June 21 1926. Comparison of the figures for the first and last years indicated on the chart shows that beginning with a capital of $250,000, surplus and undivided profits of $2,801, resources of $424,419, deposits of $159,444, and trust funds of $6,250, the institution has to-day a capital of $1,000,000, surplus and undivided profits of $2,422,366, resources of $17,546,662, deposits of $12,907,687, and trust funds of $7,412,546. The bank's roster is as follows: Edward Brooke, Chairman of the Board; George Brooke, Vice-Chairman of the Board; H. B. Hagy, President; Edward H. Knerr and Fletcher E. Nyce, Vice-Presidents; George M. Jones, Secretary and Trust Officer; Harry Doell, Treasurer; Arthur S. Howell, Assistant Secretary and Assistant Trust Officer; Frank Z. Hosley, Assistant Treasurer; F. H. Glase, Title Officer, and Paul W. Levan, Auditor.

Frank P. Kennison, a Vice-President of the Ohio Savings Bank & Trust Co. of Toledo, Ohio, died on June 17 as a result of a bullet wound received when the rifle he was cleaning was accidently discharged. Mr. Kennison was a director of the Owens Bottle Co. and active in other large corporations.

Proposed consolidation of the Commercial State Bank and the Farmers' State Bank, both of Holgate, Ohio, under the title of the latter institution, was reported in a press dispatch from Napoleon, Ohio, on June 17 to the Cleveland "Plain Dealer." The consolidation, which is subject to the approval of the stockholders and the State Superintendent of Banks, will give Holgate an institution with resources of more than $1,000,000, it was stated. If approved, it will become effective about July 1, it is understood.

The following in regard to the affairs of the Inland Trust & Savings Bank of Chicago, an institution which began business in 1923, appeared in the Chicago "Journal of Commerce" of June 10:

Directors of the Inland Trust & Savings Bank, Milwaukee Avenue, Irving Park and Cicero, have declared an initial dividend of 1¼% on the capital stock, payable July 1. This is at the rate of 5% per annum. The bank was organized three years ago with $300,000 capital and $50,000 surplus, the latter having since been increased to $75,000 from earnings. The invested capital, including undivided profits, now exceeds $400,000, and the resources are over $3,000,000.

The application to organize the First National Bank in Mt. Clemens, Mich., was approved on May 25 by the Comptroller of the Currency. The new bank will commence business with a capital of $200,000 and a surplus of $50,000. Henry Stephens will be President; Harry Diehl, John A. Freimann and Dr. Henry Amsel, Vice-Presidents, and Charles R. Walters, Cashier.

Appointment of Lewis C. Van Auken as a Vice-President of the Bank of Detroit, Detroit, Mich., was announced recently by George B. Judson, President of the institution. Mr. Van Auken goes to the Bank of Detroit from the Michigan State Banking Department, where for the past seven years he has served as an examiner. In his new position he will specialize on credit work. Mr. Van Auken gained his early banking experience at the Lansing State Savings Bank, Lansing, Mich., which he left during the war to join the Navy. Following the war he entered the City National Bank of Lansing, but resigned from that institution to join the State Banking Department.

The First National Bank of New Sharon, Iowa, has been merged with the Citizens State Bank of that place and the institution went into voluntary liquidation effective June 1.

A press dispatch from Chanute, Kan., on June 14 to the Topeka "Capital" stated that the Fidelity State Bank of Chanute had been closed on that day by the State Banking Department at the request of its directors and that John L. Robinson, the President of the institution, and his son-in-law, J. E. Wood, the Cashier, had been arrested for the alleged making of false statements and held for a hearing under bonds of $1,000 each. The Fidelity State Bank, according to the dispatch, was organized 11 years ago by Mr. Robinson. It was capitalized at $50,000 with surplus of $16,000 and had deposits aggregating $351,000. The "Capital" in its June 15 issue also printed the following in regard to the closed bank's affairs:

A report of irregularities in the accounts of J. L. Robinson, President of the Fidelity State Bank of Chanute to Roy L. Bone, State Bank Commissioner, resulted in the closing of the bank by the board of directors yesterday. The discrepancies were discovered by R. O. Bishop, examiner, last Saturday. W. S. Kennedy, Assistant Bank Commissioner, and N. R. Oberwortmann, examiner, are in Chanute investigating the situation. Commissioner Bone said last night he had no further information as to the amount of the irregularity, but it apparently would run into the thousands of dollars.

The National Bank of Commerce in Pittsburg, Kans., has changed its name to the "American Exchange National Bank of Commerce in Pittsburg."

According to the "Oklahoman" of June 11, legal formalities in connection with the recent absorption of the Oklahoma National Bank of Oklahoma City by the Liberty National Bank of that city (referred to in the "Chronicle" of June 5, page 3168) were completed on June 10 when the stockholders of the Liberty National Bank increased the directorate of the institution by the election of six former directors of the Oklahoma National Bank. These were as follows: W. H. Garside, J. W. S. Hutchings, V. E. McInnis and Ben Mills, all of Oklahoma City; Melvin Cornish, McAlester, Okla., and E. E. McInnis, Chicago. Continuing, the "Oklahoman" said:

The merger of the Oklahoma National and the Liberty National strengthens the latter, as the fourth largest bank of Oklahoma City. On the last call, preceding announcement of the consolidation, the Oklahoma National had $3,047,561 72 in deposits. The Liberty, at the close of business April 12 had $6,913,673 65 on deposit. Under the plan of the merger, Ben Mills, President of the Oklahoma National, becomes Vice-President of the Liberty National P. A. Janeway is President of the institution.

Closing of the Chaonia State Bank, Chaonia, Mo., and the disappearance of its Cashier, Jeff Kime, was reported in a press dispatch from that place on June 16 to the St. Louis "Globe Democrat." According to J. A. Estes, the bank's President, the dispatch stated, Mr. Kime disappeared on June 12, when he left Chaonia with the explanation that he was going to Poplar Bluff to collect an account due the bank.

At a special meeting held on June 18 the respective stockholders of the Central State National Bank and the First National Bank, Memphis, ratified the proposed consolidation of the institutions under the title of the latter. As part of the merger plan, it is understood, the First National Bank will reduce its number of shares of capital stock from 5,000 to 4,000 by calling for one-fifth of the holdings of each stockholder, the surrendered stock being paid for at the rate of $275 a share. The remaining stock will be exchanged share for share for stock in the new institution. Likewise, Central State shares will be exchanged share. The new First National Bank will be capitalized at $1,000,000 with surplus of $800,000 and undivided profits of at least $125,000. The capital will be divided into 10,000 shares of the par value of $100 each. P. S. Smithwick, now President of the First National Bank, will be active Chairman of the Board, while S. E. Ragsdale, President of the Central State National Bank, will be President. The physical merger of the banks will take place about July 10, it is understood. In regard to distribution of the surplus profits of the Central State National Bank, the Memphis "Appeal" of June 19 said:

The surplus profits the Central State will have to divide, will have been augmented considerably through the reappraisal of the bank building at Madison Ave. and Second St. It is estimated by President Ragland that each shareholder will get near 33 1-3% of his holdings as his share of the melon.

The proposed amalgamation of these banks was noted in our June 5 issue, page 3169.

Effective June 9, the First Woman's Bank in Tennessee, Clarksville, an institution organized and operated exclusively by women, was merged with the First Trust & Savings Bank of that place, according to a dispatch from Clarksville on that day to the Nashville "Banner." According to the announcement of officials, it was stated, the consolidation of the institution with the First Trust & Savings Bank was made necessary by the inability of its President, Mrs. Frank J. Runyon, to resume active management of the bank because of a fracture of her hip sustained in April last. Mrs. Matt G. Lyle, the Cashier since the founding of the bank in 1919, continues with the enlarged institution.

Effective June 17, the Fidelity Bank & Trust Co. of Spencer, N. C., and the Bank of Spencer, the only banks in that place, were consolidated with the Atlantic Bank & Trust Co. of Greensboro, N. C., and are now operating under the title of that institution, according to the Raleigh "News and Observer" of June 19. The dispatch further stated, that plans had already been made for the merged Spencer banks to occupy enlarged quarters in the building of the former Fidelity Bank & Trust Co., as soon as the work of remodeling the building for the purpose could be complete. d

Thomas W. Ellett, Vice-President of the Title Insurance Co., of Richmond, Va., on June 10 was elected active President of the Industrial Bank of Richmond, effective July 1 1926. Mr. Ellett. who will devote his whole time to the institution, succeeds R. McC.. Bullington, who has resigned. A. M. Pullen, Vice-President of the bank, also has resigned. Both, however, will remain members of the directorate and continue to take an active part in the institution's affairs. In reporting the proposed change in the presidency of the Industrial Bank of Richmond, the Richmond "Dispatch" of July 11 said in part:

The election of Mr. Ellett is in line with the policy of the institution to have the personnel of its official staff composed entirely of full-time, active executives, a policy necessitated by the great growth and expansion of its business.

To facilitate the execution of this policy, Mr. Bullington has resigned the presidency and A. M. Pullen the vice-presidency. Mr. Ellett at present is Vice-President of the Title Insurance Co. of Richmond, and he will resign this office to accept active presidency of the Industrial Bank.

The Industrial Bank was organized in May 1924 with a capital of $200,000 and a surplus of $20,000. At that time Mr. Bullington of the R. McC. Bullington Paint Co. and a director of the American National Bank, accepted the presidency; and Mr. Pullen, of A. M. Pullen & Co., certified public accountants, the vice-presidency. A little later C. F. Hayward was eelcted Active Vice-President and A. W. Mann Assistant Cashier.

Due to the rapid strides and the increasing business of this institution, the capital was enlarged in July 1925 to $300,000, and the paid-in surplus to $30,000. Again in February 1926 there was a capital increase to $500,000, the surplus and undivided profits to $90,000 and the total reserves to $425,000. This gives the bank total resources of approximately $3,200,000.

Because of this increase in the business of the institution, Mr. Bullington and his board of directors about six months ago deemed it advisable to obtain the services of an executive who could devote his entire time to the work of the bank. Mr. Ellett, a member of the board of directors and of the executive committee, as well as one of the stockholders of the institution, was sought for this position, due to his experience and training in matters pertaining to mortgage finance. Mr. Bullington stated that in his opinion and in the opinion of the board, the institution has obtained the services of one of the best qualified men in the mortgage field.

It is announced that the City National Bank & Trust Co. of Miami, Fla., has absorbed by purchase the Miami Bank & Trust Co. and the Commercial Bank & Trust Co. of Miami. The City National Bank & Trust Co. of Miami, formerly the City National Bank of Miami, began business with $1,000,000 capital, $250,000 surplus and initial deposits of $2,000,000, having for its President Clark B. Davis, formerly Vice-President of the Bank of America, New York, and for its Chairman of the Board, S. M. Tatum of Miami, who during 35 years has been an executive and director of more than a score of corporations in Florida. The combined institution began business this week in the new ten-story building of the Miami Bank & Trust Co. Initial deposits are reported as aggregating $20,000,000. Mr. Davis will continue as President of the institution, and Mr. Tatum as Chairman of the Board. The officers and directors remain the same, except for six additional directors.

Consummation of a transaction whereby the National City Bank of Los Angeles has become affiliated with the California Bank, with headquarters in that city, was announced by Malcolm Crowe, President of the National City Bank of Los Angeles, and A. M. Chaffey, President of the California Bank, on June 15. In reporting the announcement of the union of interests of these important institutions, the Los Angeles "Times" of June 16 said in part:

It is understood that controlling interest of the National City passed under the terms of the deal.

Although the transaction does not assume the proportions of a consolidation or a merger, it does create one of the strongest banking groups in the city, controlled by the same interests. The National City Bank has total resources of about $15,000,000 and deposits of about $13,000,000, raising the total resources of the California Bank group to approximately $105,000,000, and deposits to $98,000,000. .

In his official announcement of the deal, Mr. Crowe said the National City will continue to operate as an independent bank under the same personnel and the same name as heretofore. The only change will be the election of several members of the California Bank group to the directorate of the National City. The new directors will include A. M. Chaffey, G. Allan Hancock, A. N. Kemp, George A. J. Howard, Harry J. Bauer, and others affiliated with the California Bank.

Affiliation of the National City Bank with the California, Mr. Chaffey explained, will round out the operations of the California Bank group along the lines he has planned. The group now includes the California Trust Co., the California Securities Co., the California Bank, operating under a State charter, and the National City Bank, doing business under a national charter.

The growth of the National City Bank, as outlined by Mr. Crowe, has been rapid since its organization in 1923 by a group headed by Mr. Crowe. The bank opened in small quarters on Spring Street, and in the space of three years has built its own building on the corner of Eighth and Spring, and built up deposits of $13,000,000 and resources of $15,000,000. During its first year of business the bank acquired more than $6,000,000 in deposits, and has more than doubled this amount during the period from July 14 1924 to the date of the deal.

The California Bank is one of the large branch banks in Southern California, now having a chain of forty branches. The National City has not participated in the branch business.

Initial dividends of the Crocker First National Bank and the Crocker First Federal Trust Co., San Francisco, since the consolidation of these two institutions six months ago, have been declared at the rate of $10 50 per share for the former and $10 per share for the latter, according to advices received here from F. G. Willis, Vice-President and Cashier. Mr. Willis is reported as saying:

The consensus expressed at the semi-annual dividend meeting of directors was decidedly optimistic. The earnings for the first six months of business of the combined banks has been gratifying and the prospects of growth are good. The general outlook of business throughout the Pacific Coast States is bright.

The National Bank stock consists of 60,000 shares and the Trust company stock of 15,000 shares. One share of the former carries one-quarter share of the latter. On this basis the holder of National Bank stock receives a combined semi-annual dividend of $6 50, payable July 1.

The Standard Bank of Canada (General Manager's Office, Toronto, Ont.), announces the declaration of a dividend for the current quarter ending the 51st of July 1926 at 3%, being at the rate of 12% per annum, upon the paid-up capital stock of the bank, and which is to be payable on and after the 2d of August to shareholders of record as of July 16 1926.

THE WEEK ON THE NEW YORK STOCK EXCHANGE.

Buoyancy in the oil shares and renewed activity in the railroad issues have been the noteworthy features of the stock market the present week. Trading has been generally brisk except for a brief period on Friday, and a considerable number of new high levels for the present movement have been recorded by many of the more active speculative stocks. The tendency of the market on Saturday was toward general recovery, though the movement of prices was somewhat irregular during the greater part of the two-hour session. Oil shares continued to hold a prominent place in speculative activities, Union Oil of California surging forward 8¼ points. Railroad stocks also were important factors in the general recovery of the market, Reading coming to the front as the chief feature of the group with an advance of nearly 5 points. High-priced industrials made sharp advances, Woolworth making a net gain of 3½ points to 171 and General Electric shooting upward 6 points to 344½ at its high for the day. Motor stocks were firm, General Motors advancing nearly 2 points to 145½ at its peak.

The forward swing was resumed as the market opened on Monday, Oil shares and railroad issues again leading the advance. Around the noon hour the list wavered somewhat under the heavy realizing sales, but these were quickly absorbed and the market again swung briskly forward. The strong shares in the oil group included nearly all the active leaders such as California Petroleum, Marland, Phillips Petroleum, and Pan American B. The notable features among the rails were the new high records of Canadian Pacific and Reading, and the jump of nearly five points in Delaware & Hudson. Great Northern pref. and Chicago & North Western were particularly strong and New York Central moved forward nearly a point. Other strong stocks were Wabash, Kansas City Southern, St. Louis-San Francisco, Missouri Pacific, Rock Island, and Lehigh Valley. Railroad Equipment stocks kept pace with the rails, Ameri-

can Locomotive making a further advance of two points and Baldwin moving into new high ground for the present movement. Pullman advanced to the highest figure reached in several years.

On Tuesday oil shares again moved to the front, Union Oil of California moving forward 2 points to 54. Further gains were recorded by the railroad stocks, Rock Island rising two points, and Missouri Pacific pref. three points to 86⅜. Lehigh Valley was also prominent and Atchison crossed 138. United States Steel common was again in demand and advanced to 139. Motor stocks continued weak, General Motors yielding 1 point to 143½, Mack Trucks slipping back a point or more and Pierce Arrow losing nearly two points to 263¼. Heavy realizing sales near the close of the session caused many declines.

On Wednesday the market lost much of its firmness and strength, the heavy selling causing wide breaks in many of the market favorites. High priced specialties, many of which were particularly active in the recent trading yielded from 1 to 7 points. In the downward movement Du Pont slipped back with a net loss of 7 points and substantial losses were recorded by such stocks as United States Cast Iron Pipe & Foundry, Woolworth, General Electric and General Motors. Oil shares also moved to lower levels.

The trend of the market became irregular on Thursday, particularly in the industrial stocks, in which gains and recessions were about evenly balanced. The strength of the railroad shares was the outstanding feature of the trading, interest centering especially in the so-called Van Sweringen group, due to rumors that the Van Sweringen plan would soon be re-submitted. Canadian Pacific advanced to the highest level since 1919. Other strong stocks included Atlantic Coast Line, Chesapeake & Ohio, Atchison and Southern Pacific. Oil shares under the leadership of General Petroleum advanced to higher levels.

The trend of stocks was somewhat irregular on Friday, motor stocks moving sharply downward, both General Motors and Hudson Motors breaking badly in the early trading. On the other hand, railroad stocks continued to move upward, Ches. & Ohio at one period being up 2 points and Atchison at 139 was close to its peak. New Haven crossed 45 again and Norfolk & Western advanced 2¼ points to 155. United States Cast Iron Pipe & Foundry scored a gain of 4½ points to 193½; otherwise industrial stocks made little or no progress. In the last hour a number of good recoveries were registered. The final tone was good.

THE CURB MARKET.

There was little of interest to Curb Market trading this week. Business was in reduced volume and prices moved about aimlessly, changes for the most part being without significance. Oil shares displayed a fairly firm tone. Continental Oil rose from 20⅞ to 22⅛ and closed to-day at 22. Galena-Signal, old preferred, improved from 71¼ to 75½. Illinois Pipe Line gained two points to 124. Ohio Oil sold up from 57⅞ to 60⅝ and closed to-day at 60⅛. Standard Oil of New York was heavly traded in up from 32 to 34¼ and at 33⅞ finally. Alabama Great Southern RR. was a strong feature, the common advancing from 109 to 116 and the preferred from 113 to 120. Public Utilities were inclined to firmness. Amer. Gas & Elec. common moved up from 81½ to 88 and reacted to 86, closing to-day at 86½. Commonwealth Power improved from 37¼ to 39, and ends the week at 38⅜. Elec. Investors gained almost five points to 43½, but reacted finally to 41. Industrials as a class were lower though changes were only fractional.

A complete record of Curb Market transactions for the week will be found on page 3594.

COURSE OF BANK CLEARINGS.

Bank clearings the present week will again show a small increase compared with a year ago. Preliminary figures compiled by us, based upon telegraphic advices from the chief cities of the country, indicate that for the week ending to-day (Saturday, June 26) bank exchanges for all the cities of the United States from which it is possible to obtain weekly returns will aggregate 3.5% more than in the corresponding week last year. The total stands at $9,388,567,934, against $9,065,952,650 for the same week in 1925. At this centre there is an increase for the five days of 2.7%. Our comparative summary for the week is as follows:

Clearings—Returns by Telegraph Week Ended June 26.	1926.	1925.	Per Cent.
New York	$4,303,000,000	$4,188,100,110	+2.7
Chicago	513,711,841	538,656,202	—4.6
Philadelphia	459,000,000	489,000,000	—6.1
Boston	393,000,000	359,000,000	+9.5
Kansas City	117,038,039	108,999,907	+7.4
St. Louis	119,000,000	114,700,000	+3.7
San Francisco	156,150,000	142,000,000	+10.0
Los Angeles	140,856,000	120,988,000	+16.4
Pittsburgh	149,896,191	150,227,805	—0.2
Detroit	154,380,764	143,690,889	+7.4
Cleveland	93,730,291	90,659,847	+3.4
Baltimore	101,187,387	94,543,406	+7.0
New Orleans	53,154,329	49,352,919	+7.7
Thirteen cities, five days	$6,754,104,842	$6,589,919,085	+2.5
Other cities, five days	1,069,701,770	953,586,820	+12.2
Total all cities, five days	$7,823,806,612	$7,543,505,905	+3.7
All cities, one day	1,564,761,322	1,522,446,745	+1.4
Total all cities for week	$9,388,567,934	$9,065,952,650	+3.5

Complete and exact details for the week covered by the foregoing will appear in our issue of next week. We cannot furnish them to-day, inasmuch as the week ends to-day (Saturday), and the Saturday figures will not be available until noon to-day. Accordingly, in the above the last day of the week has in all cases had to be estimated.

In the elaborate detailed statement, however, which we present further below, we are able to give final and complete results *for the previous week*—the week ended June 19. For that week there is an increase of 1.9%, the 1926 aggregate of the clearings being $10,394,679,296 and the 1925 aggregate $10,203,591,661. Outside of New York City the increase is 3.0%, the bank exchanges at this centre having recorded a gain of only 1.0%. We group the cities now according to the Federal Reserve districts in which they are located, and from this it appears that in the Boston Reserve District there is an improvement of 8.5%, but in the New York Reserve District (including this city) of only 1.2%, while in the Philadelphia Reserve District there is a falling off of 6.2%. In the Cleveland Reserve District the totals are

larger by 1.9% and in the Richmond Reserve District by 1.0%, but in the Atlanta Reserve District the totals are smaller by 1.7%. The Chicago Reserve District has a gain of 2.7% and the St. Louis Reserve District of 2.9%. The Kansas City Reserve District has an increase of 6.0%, the Dallas Reserve District of 19.9% and the San Francisco Reserve District of 12.0%. The Minneapolis Reserve District has suffered a loss of 2.2%.

In the following we furnish a summary by Federal Reserve districts:

SUMMARY OF BANK CLEARINGS.

Week End. June 19 1926.	1926.	1925.	Inc. or Dec.	1924.	1923.

THE ENGLISH GOLD AND SILVER MARKETS.

We reprint the following from the weekly circular of Samuel Montagu & Co. of London, written under date of June 9 1926:

GOLD.

The Bank of England gold reserve against notes on the 2nd inst. amounted to £147,591,730 as compared with £147,826,815 on the previous Wednesday.

About £700,000 bar gold came into the market. Of this a small amount was taken for India and the Trade; the remainder was divided roughly between the Bank of England and the Continent.

The Bank of England has received and given out gold as follows, since our last issue:

	June 3.	*June* 4.	*June* 5.	*June* 7.	*June* 8.	*June* 9.
Received	------	------	------	------	£332,000	------
Withdrawn	------	£7,000	------	£54,000	£16,000	£22,000

The receipt shown above was in the form of bar gold and was understood to be of South African origin. The destinations of the £92,000 sovereigns included in the withdrawals were as follows: £21,000 to Spain, £20,000 to Argentina, £26,000 to Holland, £8,000 to Brazil, £5,000 to Uruguay and £12,000 to Straits Settlements.

During the week under review £233,000 on balance has been received by the Bank, increasing the net influx since the 1st January 1926 to £4,712,000, and reducing the net efflux since the resumption of an effective gold standard to £6,883,000.

United Kingdom imports and exports of gold during the week ending the 2nd inst. were:

Imports—		*Exports*—	
British South Africa	£55,371	Egypt	£62,000
		British India	104,468
		Ceylon	10,000
		Other Countries	21,358
Total	£55,371	Total	£197,826

SILVER.

The market has kept fairly steady under the influence of moderate bear covering. Supplies have not been plentiful, America having had some local demand for China and also for India. The uneasy feeling which created a poor undertone before the Strike has for the time being disappeared, and there is little disposition to open fresh bear commitments. This does not mean that the future prospects of silver have improved, for now that Continental coinage purchases seem improbable and China is surfeited with stocks, the great bulk of the world's silver production must be absorbed by India. India is well aware of this responsibility and, as on previous occasions, has been selling forward against spot shipments. It remains to be seen whether the course of events will justify India's reasonable apprehension of the likely trend of prices. The official forecast of the monsoon in India for 1926 states that the rainfall is likely to be normal in the Peninsula and North East India, but somewhat defective in North West India.

United Kingdom imports and exports of silver during the week ending the 2nd inst. were:

Imports—		*Exports*—	
U. S. A	£166,394	Hungary	£32,640
Mexico	53,337	British India	42,236
Other Countries	16,611	Other Countries	9,580
Total	£236,342	Total	£84,456

INDIAN CURRENCY RETURNS.

(*In lacs of rupees.*)	*May* 15.	*May* 22.	*May* 31.

* From unofficial sources. †The New York Stock Exchange has ruled that stock will not be quoted ex-dividend on this date and not until further notice. ‡The New York Curb Market Association has ruled that stock will not be quoted ex-dividend on this date and not until further notice.

§ One-fiftieth of a share of Class B common stock.

a Transfer books not closed for this dividend. d Correction. e Payable in stock. f Payable in common stock. g Payable in scrip. h On account of accumulated dividends. m Payable in preferred stock.

i Dividend is 8% per annum on paid-in amount of no par preferred stock for two quarters from Aug. 1 1925 to Feb. 1 1926.

j Dividend is six and one-quarter shillings sterling per "American share."

k Declared monthly dividends for six months of 1 2-3% each, payable on the fifteenth of each month.

l Payable either 30 cents in cash or 2½% in common stock.

n Dividend is one-fiftieth of a share of no par common stock.

o Payable either in cash or in class A stock at rate of one-fortieth of a share for each share held.

p Stockholders have option to take, instead of cash, one-fortieth of a share of class A stock for each share held, and class B stock, one-fortieth of a share of class B stock for each share held.

q Dividend is 10 pence per share and all transfers received in London on or before June 11 will be in time for payment of dividend to transferees.

r Also on 70% paid allotment certificates, being 70% of $1 75.

s To be paid in common stock or in the event of the failure of the stockholders at a meeting to be held June 25 to approve the increase in the common stock, then the dividend is to be paid in cash.

t Dividend is one new share of no par common stock for each 20 shares outstanding.

u Holders of class A com. stock are given the right, on or before June 21, to subscribe to additional class A stock to the extent of the dividend.

v Less 38c. per share for first and second installment of 1925 income tax.

w Less 60c. per share for first and second installment of 1925 income tax.

x Payable either in cash or stock: on original series pref. at rate of 4-100ths of a share of class A stock for each share original series pref., and on $7 dividend series pref. 6.75-100ths of a share of class A stock for each share of $7 dividend series pref.

y Less $2 per share for expenses in connection with extending second mortgage bonds and first and second installment of 1925 income tax.

z Dividend is one share of ordinary stock for each four shares.

Weekly Returns of New York City Clearing House Banks and Trust Companies.

The following shows the condition of the New York City Clearing House members for the week ending June 19. The figures for the separate banks are the *averages* of the daily results. In the case of the grand totals, we also show the *actual* figures of condition at the end of the week.

NEW YORK WEEKLY CLEARING HOUSE RETURNS.

Philadelphia Banks.—The Philadelphia Clearing House return for the week ending June 19, with comparative figures for the two weeks preceding, is given below. Reserve requirements for members of the Federal Reserve System are 10% on demand deposits and 3% on time deposits, all to be kept with the Federal Reserve Bank. "Cash in vaults" is not a part of legal reserve. For trust companies not members of the Federal Reserve System the reserve required is 10% on demand deposits and includes "Reserve with legal depositaries" and "Cash in vaults."

Contingent liability on bills purchased for foreign correspondents	13,213,000	14,718,000	**10,442,000**

NOTE.—Beginning with the statement of Oct. 7 two new items were added in order to show separately the amount of balances held abroad and amounts due to foreign correspondents. In addition, the caption, "All other earnings assets," now made up of Federal intermediate credit bank debentures, has been changed to "Other securities," and the caption, "Total earning assets" to "Total bills and securities." The latter term has been adopted as a more accurate description of the total of the discounts, acceptances and securities acquired under the provisions of Sections 13 and 14 of the Federal Reserve Act, which are the only items included erein.

Weekly Return of the Federal Reserve Board.

The following is the return issued by the Federal Reserve Board Thursday afternoon, June 24, and showing the condition of the twelve Reserve banks at the close of business on Wednesday. In the first table we present the results for the system as a whole in comparison with the figures for the seven preceding weeks and with those of the corresponding week last year. The second table shows the resources and liabilities separately for each of the twelve banks. The Federal Reserve Agents' Accounts (third table following) gives details regarding transactions in Federal Reserve notes between the Comptroller and Reserve Agents and between the latter and Federal Reserve banks. *The Reserve Board's comment upon the returns for the latest week appears on page* 3539, *being the first item in our department of "Current Events and Discussions."*

NOTE.—Beginning with the statement of Oct. 7 1925 two new items were added in order to show separately the amount of balances held abroad and amounts due to foreign correspondents. In addition, the caption, "All other earning assets", now made up of Federal Intermediate Credit Bank debentures, has been changed to "Other securities," and the caption, "Total earning assets" to "Total bills and securities". The latter term has been adopted as a more accurate description of the total of the discounts, acceptances and securities acquired under the provisions of Sections 13 and 14 of the Federal Reserve Act, which are the only items included therein.

Weekly Return for the Member Banks of the Federal Reserve System.

Following is the weekly statement issued by the Federal Reserve Board, giving the principal items of the resources and liabilities of the 703 member banks from which weekly returns are obtained. These figures are always a week behind those for the Reserve banks themselves. Definitions of the different items in the statement were given in the statement of Dec. 12 1917, published in the "Chronicle" of Dec. 29 1917, page 2523. *The comment of the Reserve Board upon the figures for the latest week appears in our Department of "Current Events and Discussions," on page 3539.*

Note.—The above table includes only sales of coupon bonds. Transactions in registered bonds were:

1 1st 4s	100.12 to 100.12	20 3d 4¼s	101.10 to 101.13
1 1st 4¼s	102.18 to 102.18	71 4th 4¼s	102.26 to 103
50 2d 4¼s	100.24 to 100.26	1 Treasury 4¼s	108.22 to 108.24

Foreign Exchange.—The sterling exchange market was quiet but firm and practically unchanged. The Continental exchanges were also less active than in recent weeks, with francs showing some improvement, and Spanish exchange conspicuously strong; the remainder of the list was neglected.

To-day's (Friday's) actual rates for sterling exchanges were 4 83⅛@4 83 3-16 for sixty days, 4 86¾@4 86 7-16 for cheques, and 4 86¾@4 86 13-16 for cables. Commercial on banks, sight, 4 86¼@4 86 5-16; sixty days, 4 82¾@4 82 11-16; ninety days, 4 81⅛@4 81 3-16, and documents for payment (sixty days), 4 82⅞@4 82 15-16; cotton for payment, 4 86¼@4 86 5-16, and grain for payment, 4 86¼@4 86 5-16.

To-day's (Friday's) actual rates for Paris bankers' francs were 2.79¼@2.89 for long and 2.84¼@2.93½ for short. German bankers' marks are not yet quoted for long and short bills. Amsterdam bankers' guilders were 39.72 for long and 40.08 for short.

Exchange at Paris on London, 166.85 francs; week's range, 166.85 francs high and 173.10 francs low.

	Sixty Days.	Cheques.	Cables.
Sterling Actual—			
High for the week	4 83 3-16	4 86¼	4 86¾

New York Stock Exchange—Bond Record, Friday, Weekly and Yearly

Jan. 1 1909 the Exchange method of quoting bonds was changed and prices are now "and interest"—except for income and defaulted bonds.

BONDS N. Y. STOCK EXCHANGE Week Ended June 25.	Interest Period	Price Friday, June 25.		Week's Range or Last Sale		Bonds Sold	Range Since Jan. 1	
U. S. Government.		Bid	Ask	Low	High	No.	Low	High

Cincinnati and Pittsburgh Stock Exchanges.—For this week's record of transactions on the Cincinnati and Pittsburgh Stock Exchanges see page 3567.

New York Curb Market.—Below is a record of the transactions in the New York Curb Market from June 19 to June 25, both inclusive, as compiled from the official lists. As noted in our issue of July 2 1921, the New York Curb Market Association on June 27 1921 transferred its activities from the Broad Street curb to its new building on Trinity Place, and the Association is now issuing an official sheet which forms the basis of the compilations below.

Week Ended June 25. Stocks— Par.	Friday Last Sale. Price.	Week's Range of Prices. Low.	High.	Sales for Week. Shares.	Range Since Jan. 1. Low.		High.

Latest Gross Earnings by Weeks.—In the table which follows we sum up separately the earnings for the third week of June. The table covers 4 roads and shows 10.43% increase over the same week last year:

Third week of June.	1926.	1925.	Increase.	Decrease.
	$	$	$	$
Buffalo Rochester & Pittsburgh	329,700	301,793	27,907	------
Canadian Pacific	3,428,000	2,895,000	533,000	------
St Louis-San Francisco	1,670,533	1,669,083	1,450	------
Texas & Pacific	617,778	609,594	8,184	------
Total (4 roads)	6,046,011	5,475,470	570,541	------
Net increase (10.43%)			570,541	

In the table which follows we also complete our summary of the earnings for the second week of June:

Second week of June.	1926.	1925.	Increase.	Decrease.
	$	$	$	$
Previously reported (5 roads)	11,123,744	9,531,722	1,592,022	------
Duluth South Shore & Atlantic	104,571	117,154	------	12,583
Georgia & Florida	30,800	29,400	1,400	------
Great Northern	2,201,000	2,249,178	------	48,178
Mineral Range	5,279	11,680	------	6,401
Minneapolis & St Louis	302,237	293,088	9,149	------

Barcelona Traction, Light & Power Co., Ltd.

(*11th Annual Report—Year Ended Dec.* 31 1925.)

Chairman H. Malcolm Hubbard, Toronto, Canada, May 14, wrote in substance:

Reorganization.—As a result of the reorganization resolved on in the year 1924 and subsequent amortizations, the bond and share capitals of the company at present outstanding in the hands of the public as follows:

7% Prior lien A bonds (sterling and peseta issues)	£997,765
Consolidated 6½% prior lien bonds	£2,800,000
5½% First mortgage bonds	a£2,147,500
7% 30-Year bonds	bPtas.38,202,000
232,489 Preference shares of $100 each	$23,248,900
274,500 Ordinary shares of $50 each	$13,725,000

a Including £55,580 of bonds set aside for redemption of the income bonds not yet surrendered. b £2,640,000 of the 5½% 1st mtge. bonds are deposited as collateral security for the 7% 30-Year bonds.

Bonds.—The 7% prior lien A bonds have been called for redemption on June 1 1926 (V. 122, p. 746). When these bonds are redeemed the consol. 6½% prior lien bonds become automatically a first specific charge on the whole of the mortgaged assets of the company and a first floating charge on its general undertaking and assets. The operation of the accumulative sinking fund for the amortization of these bonds commenced during the year 1925.

The amount of the outstanding bonds of the operating companies in Spain has, during the year, been reduced by the net amount of Pts. 1,832,000 as a result of the various amortizations and issues referred to below.

Depreciation, &c.—The usual provisions have been made for amortization of underlying bonds, and, in addition the following reserves for depreciation were made by the chief operating companies:

Light and power companies	Pts.8,215,898
Railway companies	Pts.583,883

Earnings.—The operations of the Union Electrica de Cataluna resulted in a net profit of Pts. 4,130,560 for 1925. This amount was applied as to Pts. 2,318,400 in payment of the bond interest and expenses of that company, and the balance of Pts. 1,812,160 has been transferred to the amortization account. The dividend of 5% declared in April 1925, on the Union company's shareholding in the Energia Electrica de Cataluna has also been transferred to the amortization fund, having been applied in payment of a call of 20% on those shares of the Energia company which are partly paid.

Financing.—During 1925 the Energia company and its subsidiaries issued Pts. 4,185,500 of bonds, partly for redeeming the bonds of the gold franc issue and partly for providing funds towards meeting their capital expenditures.

Accident.—In April 1925, an accident occurred on the Railway of the Ferrocarriles de Cataluna, between Las Planas and Sarria, causing loss of life and injury to many people. The authorities have recognized that there was no gound for declaring any direct responsibility on the part of the Railway company for the accident. A majority of the claims arising out of the occurrence have been settled and no further important expenditure is anticipated beyond what has been provided for.

Although the revenue of the Railway for the year showed a considerable decrease, as a result partly of the accident referred to and partly of the lower spending power of the working classes, there was an increase of Pts. 7,208,865 in the total gross earnings of the combined enterprises of the companies operating in Spain over those for the year 1924, and an increase in the net earnings of Pts. 5,507,205.

Value of Peseta.—The average rate of exchange between London and Spain has not improved during the past year and is still causing the board some anxiety. The following are the average rates for the past 6 years: 1920, 23.32; 1921, 28.52; 1922, 28.65; 1923, 31.83; 1924, 33.24; 1925, 33.71.

Changes in Personnel.—E. R. Peacock who, since the reorganization of the company's affairs in 1915, held the office of president of the company, retired from the position at the end of the year owing to his time becoming more and more occupied in other spheres. Mr. Peacock has consented to retain his seat on the Board of directors.

H. Malcolm Hubbard, who has been associated with the Barcelona company since its incorporation as legal adviser and vice-president, has accepted the office of chairman, and will be charged with the general supervision of the finances and other affairs of the company. F. Fraser Lawton, president of the Ebro Irrigation & Power Co., who since July 1918, has acted as general manager of the companies operating in Spain, continues in such position, and is also appointed President of the Barcelona Traction Company, charged with the general management and operation of the business.

COMBINED RESULTS OF EBRO IRRIGATION & POWER CO., LTD., AND FERROCARRILES DE CATALINA, S. A.

(Including Union Electrica de Cataluna and Energia Electrica de Cataluna.

Note.—There are contingent liabilities in respect of guarantees, and also liabilities for future annual payments under agreements in connection with controlled and associated companies. The liabilities, as shown above, are subject to any adjustment which might be found to be necessary in respect of the provision for taxes. There are contracts and options involving the issue of further preference shares of the Barcelona Traction, Light & Power Co., Ltd.—V. 122, p. 746.

Burns Bros. and Subsidiaries.

(*Annual Report—Year Ended March* 31 1926.)

President Sanders A. Wertheim, New York, May 24, wrote in substance:

Results.—The net consolidated income for the year ended March 31 1926, including the income of the newly acquired subsidiaries for the 8 months from August 1 1925, the date of their acquisition until March 31 1926, after depreciation and provision for Federal taxes, amounted to $2,420,780, as compared with $1,271,903 for the year ended March 31 1925. Allowing for prior preference and preferred dividends paid, this net income is equivalent to approximately $15 17 per share on the 97,365 shares of class A common stock and $7 17 per share on the 97,367 shares of class B common stock outstanding at the close of the year, as compared with $10 22 on the 80,944 shares of class A common stock and $2 22 on the 80,940 shares of class B common stock outstanding at the close of the previous year.

Current Assets.—The net current assets at March 31 1926 amounted to $7,603,370 as compared with $6,213,535 at the end of the previous fiscal year, or an increase of $1,389,835.

Acquisitions.—In accordance with the action taken by the stockholders at the last annual meeting, the directors at their first meeting appointed a committee to investigate the Wyoming Valley Coal Co., Inc., Steamship Fuel Corporation, Temple Contractors, Inc. and Schuylkill Fuel Corp. and to negotiate for their acquisition.

This committee engaged Arthur Young & Co. to audit the books of the Steamship Fuel Corp., Temple Contractors, Inc., and Schuylkill Fuel Corp. and to list the assets and liabilities of the Wyoming Valley Coal Co., Inc., which were acquired and assumed, respectively, by your company and engaged Ford, Bacon & Davis to measure their coal inventories. After using the reports of these firms as well as the appraisal of the American Appraisal Co., as a basis for negotiation, the committee on Sept. 2 1925 recommended to the board of directors the purchase of these properties. Pursuant to this recommendation, on Sept. 2 1925 the business and assets of the Wyoming Valley Coal Co., Inc. and the total outstanding capital stock of Steamship Fuel Corp., Temple Contractors, Inc. and Schuylkill Fuel Corp. were purchased for 16,421 shares of class A stock and 16,427 shares of class B stock. Although completed on Sept. 2 1925, the purchase was made as of Aug. 1 1925, so that company secured the benefit of the business done during the month of August.

The acquisition of these properties greatly increased the facilities of your company for the handling and sale of coal in the Borough of Brooklyn, City of New York, and also gave your company new facilities in Jamaica, Cedarhurst and Far Rockaway, Long Island, and in Hartford, Conn., Springfield, Mass., and Newark, Red Bank, Long Branch and Eradley Beach, N. J.

Subsequent to the purchase of these properties company established a new coal yard in Lakewood, N. J., acquired an operating coal yard in Manasquan, N. J., and is now preparing to open a new coal yard in Mineola, L. I.

Coal Strike.—To maintain a supply of anthracite coal to take care of the needs of our customers, and to avoid the operating loss sustained by the company through reduction of volume during previous strikes, your president at the beginning of the last strike sailed for Europe and while there visited most of the European coal fields and coal producing companies and arranged for the importation of large quantities of Welsh and Belgian anthracite coal during the period of the strike. This imported anthracite coal enabled the company to serve its customers and tended to maintain the company's volume of business, so that the customary strike period loss was not suffered.

Sale of Interest in Pattison & Bowns, Inc.—One of the assets acquired by company in 1921 from William Farrell & Son, Inc., was a minority stock interest in Pattison & Bowns, Inc., the controlling interest in which company was owned by United States Distributing Corp. The stock of Pattison & Bowns, Inc. owned by the company was carried on the books and appeared on last year's published report at the value of $375,000. This stock interest was sold to United States Distributing Corp. for $1,400,000, of which $700,000 was paid in cash and the balance of $700,000 is to be paid in guaranteed annual installments of $100,000 each with interest, and represented by $700,000 6% cumulative prior preference stock of Pattison & Bowns, Inc., being the entire authorized amount of that class of stock.

The increase in investments on the 1926 statement is primarily due to this receipt of $700,000 prior preference stock of Pattison & Bowns, Inc. upon the sale of the previous holdings in that company. The increase in fixed assets is primarily due to the acquisition of the new properties. The increase in mortgages on real estate is accounted for by the existence of mortgages on some of the properties acquired from Wyoming Valley Coal Company, Inc.

Surplus.—The surplus account shows a surplus on March 31 1926 amounting to $4,455,387. The unappropriated surplus on March 31 1925 amounted to $3,170,354. The net increase for the year is therefore $1,285,032. This net increase of surplus remained after full provision of reserve for retirement of prior preference stock and dividends on all classes of stock and after extraordinary charges against surplus of $687,063. The major extraordinary charge consisted of the transfer of $465,485 from unappropriated surplus to class B common capital account.

Class B Capital Account Increased to $40 *per share.*—The class B common stock was originally created and issued in 1921 for the purpose of acquiring the assets of William Farrell & Son., Inc. At that time the class B common stock was set up on the ledger as having a stated value of $8 per share and the balance of the Farrell assets was set up as surplus creating the item "Surplus—paid in—from William Farrell & Son, Inc. $6,513,681." Your board of directors upon the recommendation of your auditors and counsel increased the class B common stock capital account from $8 per share to $40 per share, thereby reducing this paid in surplus and also to the above extent reducing the unappropriated surplus.

The board also reduced "leases, contracts and good-will" by the amount of paid in surplus then remaining, so as to eliminate this paid in surplus This adjustment in "leases, contracts and good-will" and the increase in said item through the good will acquired from Wyoming Valley Coal Co., Inc. and Steamship Fuel Corp. resulted in the final amount of "leases, contracts and good-will" which appears on the present balance sheet.

Changes to Calendar Year.—Hereafter, in accordance with action taken by the board of directors, the fiscal year will conform to the calendar year instead of terminating on March 31, so that our next report will be for the 9 months' period from April 1 1926 to Dec. 31 1926.

The income account was published in V. 122, p. 3088.

CONSOLIDATED BALANCE SHEET MARCH 31.

GENERAL INVESTMENT NEWS.

STEAM RAILROADS.

Repair of Locomotives.—Fewer locomotives were in need of repair on June 1 this year than at any time since the compilation of these records began in 1920, according to reports filed by the railroads of this countfy with the Car Service Division of the American Railway Association. The total number of locomotives in need of repair on June 1 was 9,266, or 14.7% of the number on line. This was a decrease of 557 locomotives compared with the best previous record, which was on Oct. 1 1923, and at which time there were 9,823 in need of repair, or 15.3%. The total number in need of repair on June 1 this year was also a decrease of 715 compared with the number in need of repair on May 15, at which time there were 9,981, or 15.9%. It was also a decrease of 1,636 locomotives compared with the number in need of repair on June 1 1925, at which time there were 10,902, or 17%. Of the total number of locomotives in need of repair on June 1 this year, 5,055, or 8%, were in need of classified repairs, a decrease of 489 locomotives compared with May 15, while 4,211 locomotives or 6.7% were in need of running repairs, a decrease of 226 within the same period.

Class I railroads on June 1 had 5,913 serviceable locomotives in storage, a decrease of 11 compared with the number on May 15.

Repair of Freight Cars.—Freight cars in need of repair on June 1 totaled 158,498, or 7.3% of the number on line, according to reports filed by the carriers with the Car Service Division of the American Railway Association. This was an increase of 5,676 over the number reported on May 15, at which time there were 162,822, or 7%. It was, however, a decrease of 27,488 cars compared with the same date last year. Freight cars in need of heavy repair on June 1 totaled 122,488, or 5.3%, an increase of 2,075 cars compared with May 15. Freight cars in need of light repair totaled 46,010, or 2%, an increase of 3,601 compared with May 15.

Car Surplus.—Class I railroads on June 15 had 268,778 surplus freight cars in good repair and immediately available for service, according to reports filed by the carriers with the Car Service Division of the American Railway Association. This was a decrease of 2,063 cars compared with June 8, at which time there were 270,841 cars. Surplus coal cars in good repair on June 15 totaled 76,071, a decrease of 2,942 within approximately a week, while surplus box cars totaled 145,684, an increase of 2,892 during the same period. Reports also showed 25,161 surplus stock cars, a decrease of 1,296 under the number reported on June 8, while surplus refrigerator cars totaled 14,917, a decrease of 627 within the same previous period.

Car Shortage.—Practically no car shortage is being reported.

New England States Petition I.-S. C. Commission to Reinstate on Permanent Basis the Temporary Through Rates from Southern Soft Coal Fields Which Were in Effect During Anthracite Strike.—"Times" June 22.

Matters Covered in "Chronicle" June 19.—(a) President Coolidge names members of Board of Mediation created under Watson-Parker Bill, p. 3414. (b) Train dispatchers seek wage increase, p. 3414.

Ashley Drew & Northern Ry.—*Final Valuation.*—
The I.-S. C. Commission has placed a final valuation of $465,500 on the company's property owned and used as of June 30 1918.—V. 100, p. 138.

Atlantic Coast Line RR.—*Construction of Line.*—
The I.-S. C. Commission has issued a supplemental certificate authorizing the company to construct a line of railroad in Hillsborough and Pasco Counties, Fla., over a somewhat different route than authorized in March last (V. 122, p. 1758). The plan now authorized shifts the main stem of the proposed line eastward a maximum distance of approximately 4 miles, so that it will pass through Zephyrhills, a town with about 250 inhabitants, and strike the right-of-way of the company's west coast main line at Richland, a point approximately 7 miles south of Dade City, continuing along said right-of-way to Dade City. The proposed line would be 22½ miles long
This supplemental certificate is issued upon the express condition that the construction of said line of railroad shall be commenced on or before Sept. 1 1926 and be completed on or before Dec. 31 1927.

To Pay Off Bonds.—
The $868,000 class A 1st mtge. 5% gold bonds of the Petersburg RR. due July 1 1926 will be paid off at maturity at the Central Union Trust Co., trustee, 80 Broadway, New York City. The July 1 1926 coupons will be paid at the First & Merchants National Bank of Richmond, Richmond, Va.—V. 122, p. 2324.

Baltimore & Ohio RR.—*Equipment Trusts Certificates.*—
The I.-S. C. Commission on June 14 authorized the company to assume obligation and liability in respect of $7,475,000 equip. trust series D certificates to be issued by the Girard Trust Co. under an agreement to be dated July 1 1926 and sold at not less than 97.78% and divs. in connection with the procurement of certain equipment. (See offering in V.122, p. 3078.)

The report of the Commission says in part:
Arrangements have been made for sale of the certificates to Kuhn, Loeb & Co. and Speyer & Co., at 97.78% and divs. On that basis the average annual cost to the applicant will be approximately 4.815%.
We find that the proposed assumption of obligation and liability by the applicant as aforesaid (a) is for a lawful object within its corporate purposes, and compatible with the public interest, which is necessary and appropriate for and consistent with the proper performance by it of service to the public as a common carrier, and which will not impair its ability to perform that service, and (b) is reasonably necessary and appropriate for such purpose.

Chairman Eastman, dissenting, said:
I am unable to join in the conclusions of the majority for the reasons stated in my separate expressions in *New York Central Lines Equipment Trust of 1925*, 99 I. C. C. 121, 124, and in *Pennsylvania RR. General Equipment Trust, Series D*, decided May 14 1926. (See latter company in V. 121, p. 2944).—V. 122, p. 3078.

Brownstone & Middletown RR.—*Final Valuation.*—
The I.-S. C. Commission has placed a final valuation of $70,378 on the owned and used property of the company as of June 30 1917.

Canadian Pacific Ry.—*Equipment Trust Certificates Sold.*—The Union Trust Co. of Pittsburgh, the Bankers Trust Co. of New York, and Brown Brothers & Co. have sold, at prices to yield from 4% to 4.55%, according to maturity, $12,000,000 equipment trust 4½% gold certificates, series B 1926, issued under the Philadelphia plan.
Dated June 1 1926, maturing $500,000 semi-annually from Dec. 1 1926 to June 1 1938, inclusive. Principal and dividends payable in U. S. gold coin at the Union Trust Co. of Pittsburgh, trustee, or at Bankers Trust Co., New York.
These certificates are to be issued by the Union Trust Co. of Pittsburgh, as trustee, under an equipment trust agreement. Title to new standard equipment, costing more than 20% in excess of the face amount of these certificates, will be vested in the trustee and leased to the railway company. The trustee will hold on deposit $14,794,640 to be expended in payment of equipment as delivered.—V. 122, p. 2794.

Central RR. of New Jersey.—*Special Dividend.*—
The directors have declared a special dividend of 2% on the capital stock, payable July 15 to holders of record July 6. Special dividends at the rate of 4% per annum have been paid since Dec. 1899.
The directors have also declared the regular quarterly dividend of 2%, payable Aug. 16 to holders of record Aug. 6.—V. 122, p. 3074.

Chesapeake & Ohio Ry.—*To Pay Off Equipment Trusts.*—
The $1,200,000 5% equipment certificates, series V, due July 1 1926, will be paid off at maturity on and after July 1 1926 at office of J. P. Morgan & Co., New York City.—V. 122, p. 3078.

Chicago Indianapolis & Louisville Ry.—*Listing.*—
The New York Stock Exchange has authorized the listing of $1,000,000 additional 1st & gen. mtge. 5% bonds, series A, due May 1 1966, making the total amount applied for: Series A, $4,261,000, and series B, $4,000,000.—V. 122, p. 3334.

Chicago & North Western Ry.—*Construction and Abandonment of Lines.*—
The I.-S. C. Commission has issued a certificate authorizing the company: (*a*) to construct a line of railroad extending from a connection with its Wisconsin division at Wiscona, in an easterly direction to a point on its Lake Shore division north of Whitefish Bay, a distance of 2.84 miles, with a wye track 0.56 miles in length between Wiscona and the village of Whitefish Bay; and (*b*) to abandon that part of its existing Lake Shore division extending from the junction with its Wisconsin division tracks at Shorewood, through the villages of Shorewood and Whitefish Bay, to a point north of Whitefish Bay 3.92 miles north of said junction, with a wye and connecting track extending therefrom westward to Tower SW on its Wisconsin division, a distance of 1.267 miles, all in Milwaukee County, Wis. The Commission states that the proposed abandonment shall not become effective until the completion of the construction.—V. 122, p. 3334.

Duluth Union Depot & Transfer Co.—*Tentative Value.*
The I.-S. C. Commission has placed a tentative valuation of $1,161,565 on the owned and used property of the company as of June 30 1917. This property is operated by the Northern Pacific Ry. Co.

Georgia & Florida Ry.—*Report.*—
Receiver John Skelton Williams, June 10, says in substance:
For the month of April 1926 the earnings of the company were ahead of the corresponding month in all previous years, and for the 12 months ending April 30 1926 the road's operating results have been the best thus far reported for any 12 months period:

	April 1926.	*Increase Over April* 1925.	12 *Mos. end. April* 30 '26.	*Inc. over Prev.* 12 *Mos.*
Mileage	404	------	404	------
Gross operating revenue	$139,925	$12,718	$2,027,898	$317,176
Operating expenses	102,726	6,251	1,401,489	112,419
Net oper. revenue	$37,199	$6,467	$626,409	$204,757
Ratio exp. to earnings	73.41%	------	69.11%	------
Net before car hire & int.	$30,995	$7,117	$549,421	$203,251
Int. on receiver's ctfs., U.S.loan,div.bds.,&c.	13,300	34	159,272	683

Approximate figures for May 1926 show an increase in gross operating revenues of 11% over May 1925.
The following table shows, at two-year intervals, the persistent and healthy growth which this railway has been making, especially in the past five years since 1921:

Under Former Managements.	*Mileage.*		*Under Present Management.*	*Mileage.*	
1916	404	$912,560	1922	404	$1,363,379
1918	404	1,194,607	1924	404	1,782,334
1920	404	1,308,042	1926 (June est.)	404	2,049,515

The increase for the 12 months ending June 30 1926, as compared with the 12 months ending June 30 1916, has amounted to $1,136,955, or 124%.

12 *Mos. End. June* 30—	1924.	1925.	*1926.	*Avge. 3 Yrs.*
Mileage	404	404	404	404
Net oper. rev. before taxes, car hire, &c.	$434,853	$443,051	$634,488	$504,131

* June 1926 estimated.
Net operating revenue for the 12 months ending June 30 1925 would have been much larger had it not been for the unprecedented floods in January and February of that year.
Coverdale & Colpitts, consulting engineers, in their supplementary report upon the property, of March 17 1926, conservatively estimate that beginning 6 months after the completion of the Greenwood extension the road can be reasonably expected to show for the first year additional earnings, arising directly and indirectly from the Greenwood extension, and from the Statesboro branch, but exclusive of the normal increase which may be expected from the existing lines, of more than $1,200,000, which would mean an increase over the present per mile earnings of the system of about $2,500 per mile.
The extension of the Georgia & Florida Ry. to Greenwood, S. C., will give it a connection over three competing lines from Greenwood to Spartanburg, S. C., where connection is made with the Clinchfield RR., which forms a part of the direct through line from Florida and Georgia to the Ohio River and the Great Lakes region. This through route via Spartanburg, S. C., and Elkhorn City, W. Va., was opened for traffic July 1 1915 and has resulted in an enormous increase in the business of the Clinchfield RR. itself and also of its connections; among others the Charleston & Western Carolina RR., with a mileage of 341 miles, whose gross operating revenues for the calendar year 1915 had amounted to $1,765,636, but which has increased for the calendar year 1925, on the same mileage, to $4,118,309, or over $12,000 per mile, the increase being $2,352,673, or $6,900 per mile. The present distance from Augusta, Ga., to Greenwood, S. C., by the Charleston & Western Carolina Ry., is about 68 miles. The Georgia & Florida Ry.'s proposed extension will shorten this distance to about 56 miles, and the total mileage of the system will then be 500 miles.—V. 122, p. 3334.

Great Northern Ry.—*Bonds Sold.*—J. P. Morgan & Co., First National Bank and National City Co., New York, have sold at 94 and int., to yield over 4.80%, $15,000,000 general mortgage 4½% gold bonds, series "D."
Dated July 1 1926; due July 1 1976. Int. payable J. & J. in N. Y. City. Not redeemable before maturity. Denom. c* $1,000 and r* $1,000 and authorized multiples thereof. First National Bank of the City of New York, trustee.
Issuance.—Subject to authorization by the I.-S. C. Commission.

Data from Letter of Pres. Ralph Budd, St. Paul, Minn., June 21.

Security.—The total mileage covered (directly or collaterally) by the general mtge. is 7,644 miles; constituting approximately 97% of the total mileage of the Great Northern system. No more underlying mortgage bonds may be issued. Stock representing approximately one-half of the ownership of the Chicago Burlington & Quincy RR. is pledged, free from prior lien, under the general mortgage.

Earnings for Calendar Years.

	Gross Operat. Revenues.	*Income Avail. for Charges.*	*Total Charges.*	*Net Income.*
1922	$103,452,937	$27,763,604	$16,897,932	$10,865,672
1923	120,077,772	35,045,252	16,977,305	18,067,947
1924	110,243,104	35,855,165	17,913,564	17,941,600
1925	114,924,960	39,704,431	18,269,034	21,435,396

Net railway operating income for the first 4 months of 1926 amounted to $3,328,300, as compared with $3,114,367 in the corresponding period of 1925.
Since July 1 1901 the Great Northern has invested more than $491,000,000 in road, equipment and other capital assets; whereas during the same period the company's net funded debt has increased by $223,000,000, an amount less than 46% of the amount added to assets. Of the amount added to assets, more than $126,000,000 was derived from surplus earnings and reserves, and approximately $142,000,000 from stock sold at not less than par.
Purpose.—Proceeds will be used for the company's general improvement and betterment program, including the laying of heavier rails, ballasting, building additional main and side tracks, installing automatic signals and train control, building heavier bridges, building new cars and locomotives, and improving existing equipment.
Dividends.—Company has now outstanding $248,916,550 of capital stock, upon which as outstanding from time to time regular dividends at the rate of at least 5% annually have been paid in every year since 1892. The present dividend rate is 5% per annum.
Listing.—Application will be made for listing on the New York Stock Exchange.—V. 122, p. 3335.

Gulf Mobile & Northern RR.—*To Acquire Control of Jackson & Eastern Ry.*—
Chairman John W. Platten announced on June 25 that the board of directors have exercised their option to purchase all of the outstanding stock of the Jackson & Eastern Ry. The acquisition of the control of this railway involves its rehabilitation and extension into Jackson, Miss., and the establishment at that point of a reciprocal traffic arrangement with the New Orleans Great Northern RR.
The directors have also authorized the execution of a contract with the Nashville Chattanooga & St. Louis RR. for trackage rights between Jackson, Tenn., and Paducah, Ky. The extension of the freight service between Paducah, Ky., and the Ohio River contemplates a reciprocal traffic relationship with the Chicago Burlington & Quincy RR.
The agreements are made subject to the approval of the I.-S. C. Commission.—V. 122, p. 1753.

Houston East & West Texas Ry.—*Tentative Valuation.*
The I.-S. C. Commission has placed a tentative valuation of $4,352,000 on the owned and used property of the company as of June 30 1918.—V. 113, p. 1887.

International-Great Northern RR.—*Bonds Sold.*—Kuhn, Loeb & Co. have sold at 95 and int., yielding over 5.33% to maturity, $6,000,000 1st mtge., 5% gold bonds, series "B," dated July 1 1926 and due July 1 1956.
Denom. $1,000 c* exchangeable for fully registered bonds and re-exchangeable under conditions provided in the mortgage. Interest payable J. & J. The entire series "B," but not part thereof, will be redeemable at the option of the company on any interest date, on 60 days' previous notice, at 102½ and int.
Issuance.—Subject to the approval of the Inter-State Commerce Commission.
Listing.—Application will be made in due course to list these bonds on the New York Stock Exchange.

Data From Letter of Chairman William H. Williams, June 22.

Security.—These bonds will be issued under the first mortgage, dated July 1 1922, and will be secured by a direct first mortgage on all property now owned or hereafter acquired by the company, subject as to after acquired property to pre-existing liens and purchase money liens. The property includes 1,106 miles of railroad, and equipment having a book value as of Dec. 31 1925 of $6,649,143, after deducting depreciation and equipment obligations then outstanding. The first mortgage bonds outstanding, including the present issue, are at the low rate of approximately $21,000 per mile of road owned.
The lines of railroad covered by the mortgage, of which approximately 90% are main lines, serve most of the principal cities of central and south Texas and, with connecting railways, afford the most direct route from St. Louis to Houston and Galveston, as well as to Austin and San Antonio and to a connection at Laredo with the National Rys. of Mexico.
Purpose.—The proceeds are to be applied to the redemption of $2,400,000 of 6% secured notes and to reimburse the treasury of the company, in part, for capital expenditures heretofore made.
Earnings.—For the year ended Dec. 31 1925, the gross income applicable to the payment of interest on the 1st mtge. bonds amounted to $2,334,187 while annual interest on the outstanding 1st mtge. bonds (incl. this issue) amounts to only $1,335,000.
Capitalization.—The 1st mtge. bonds are followed by $17,000,000 adjustment mortgage bonds, and by $7,500,000 of common stock, all o which stock (except directors' qualifying shares) is owned by New Orleans, Texas & Mexico Ry. Over 86% of the stock of New Orleans, Texas & Mexico Ry. is owned by Missouri Pacific RR.

The total authorized amount of 1st mortgage bonds is limited to $40,000,000, of which there will be outstanding in the hands of the public, upon the completion of this financing, $17,250,000 of series "A" 6% bonds and $6,000,000 of series "B" 5% bonds. Approximately $2,000,000 additional series "B" bonds will be in the company's treasury, unpledged, and $500,000 series "A" bonds are pledged to secure a surety bond. The remainder of the bonds are issuable from time to time to reimburse, to the extent of 80%, expenditures for the acquisition of new properties or securities representative thereof, or for extensions, equipment, betterments and improvements.—V. 122, p. 2323.

Jackson & Eastern Ry.—*Control to Be Acquired by Gulf Mobile & Northern RR.*—

See that company above.—V. 122, p. 1915.

Kentwood & Eastern RR.—*Final Valuation.*—

The I.-S. C. Commission has placed a final valuation of $243,427 on the owned and used property of the company, as of June 30 1916.—V. 115, p. 2905.

Lake Providence, Texarkana & Western RR.—*Valu'n*

The I.-S. C. Commission has placed a final valuation of $29,500 on the owned and used property of the company, as of June 30 1919.

Maxton, Alma & Southbound RR.—*Final Valuation.*—

The I.-S. C. Commission has placed a final valuation of $132,435 on the owned and used property of the company as of June 30 1918.—V. 122, p. 477.

Murfreesboro-Nashville Southwestern Ry.—*Acquisit'n*

The I.-S. C. Commission has issued a certificate authorizing the acquisition and operation by the company of a line of railroad extending from Nashville in a northeasterly direction to Murfreesboro, a distance of approximately 15 miles, in Howard, Hempstead and Pike counties, Ark. This line is a part of the railroad formerly owned by the Memphis, Dallas & Gulf RR.

The Murfreesboro company was incorp. on July 7 1925 in Arkansas for the purpose of acquiring and operating the Murfreesboro line. Its authorized capital stock is $100,000, par $100.

Nevada Central RR.—*Tentative Valuation.*—

The I.-S. C. Commission has placed a tentative valuation of $528,700 on the owned and used property of the company as of June 30 1917.—V. 106, p. 189.

New York Central RR.—*Secures Many New Industrial Plant Locations.*—

Reports covering industrial development on the New York Central RR. for the year of 1925 and the first quarter of 1926 indicate a substantial increase in the number of new industrial plants that have been located adjacent to the company's trackage during this period, and are now being afforded traffic service by the road. The number of these industries so located for these 15 months is shown by the records to have been 350, with an accompanying increase in car loadings estimated at 117,308 cars of revenue freight. These new locations represent the establishment of new industries, relocation of plants or the adding of additional plant facilities needed because of business expansion.

In addition to the 350 additional industries located along its line, the New York Central reports that increased trackage facilities for the same 15 month period were provided for 96 existing plants, with increased car loadings accruing from these expansions estimated at 28,468 cars of revenue freight.

A third classification carried in the reports showing industrial development covers temporary trackage operations provided for construction companies engaged in highway and road construction. The number of facilities provided for these companies numbered 146, for the 15-month period, and represented an estimated increase in car loadings for this special service of 29,997 cars.

The total increase in car loadings for the New York Central RR. from the additional industries located, the increased facilities provided existing industries, and temporary operations for road construction contractors, is placed in excess of 175,000 cars for these 15 months.

Figures available for the year 1925 and first quarter of 1926, covering the industrial development as recorded for the New York Central lines, which include reports for the New York Central, Cleveland Cincinnati Chicago & St. Louis Ry. (Big Four route), Michigan Central RR., and Pittsburgh & Lake Erie RR., show a total of 771 new industries located, with an accompanying estimated increase in car loadings of 175,398 cars; 168 industries afforded additional facilities, for which an increase in carloadings of 51,327 cars is estimated; and temporary operations for road construction companies numbering 193, producing an estimated increase in loadings of 44,020 cars. The total estimated increase in car loadings on the New York Central Lines for all the three classifications is given as 270,745 cars.—V. 122, p. 3335.

New York Susquehanna & Western RR.—*Value.*—

The I.-S. C. Commission has placed a tentative valuation of $14,263,500 on the owned and used properties as of June 30 1918.—V. 120, p. 84.

Norfolk & Portsmouth Belt Line RR.—*Note.*—

The I.-S. C. Commission on June 12 authorized the company to issue a one-year 6% promissory note for $50,000 in renewal of a promissory note for like amount maturing July 16 1926.—V. 122, p. 1759.

Norfolk & Western Ry.—*Listing.*—

The New York Stock Exchange has authorized the listing of $6,000,000 additional divisional first lien & general mtge. 4% gold bonds, due July 1 1944, making the total amount applied for $35,000,000.

From Dec. 31 1924 to April 30 1926 the following changes in capitalization have occurred: The common stock has increased $3,242,000 and the funded debt, including equipment trust certificates has decreased $7,826,000.

From Dec. 31 1924 to March 31 1926 the company's investment in road and equipment has increased $27,883,799, the mileage of road in operation remains approximately the same; the tractive power of locomotives in service, the capacity of freight car equipment and the seating capacity of passenger car equipment are practically unchanged.—V. 122, p. 3335.

Okmulgee Northern Ry.—*Tentative Valuation.*—

The I.-S. C. Commission has placed a tentative valuation of $310,000 on the company's owned and used property, as of June 30 1919.—V. 118, p. 795.

Pittsburgh Cincinnati Chicago & St. Louis RR.—*Larger Dividend.*—The directors have declared a semi-annual dividend of $2.50 per share, payable July 20 to holders of record July 10. Up to and incl. Jan. 1 1926, dividends had been at the rate of $4 per annum, payable semi-annually. According to the terms of the lease by the Pennsylvania RR. dividends henceforth will be $5 a year, payable semi-annually.—V. 122, p. 2489.

Pittsburgh & West Virginia Ry.—*Abandons Plan to Change Capital Structure.*—

The I.-S. C. Commission announced June 23 that it had vacated and set aside its order of March 22 (V. 122, p. 1916), in which it authorized the company, subject to certain conditions, to reorganize its capital structure by the issuance of new common and preferred stock to be exchanged for its present $30,235,100 of common stock. The order stated that this action had been taken "upon the representation of the applicant that none of the stock authorized by the Commission's order entered herein March 22 1926 has been or will be issued, and at the applicant's request and for good cause shown."

On April 23 F. H. Harvey, Secretary of the company, wrote to the Commission advising that the plan for changing the capital structure had been abandoned, and that it would therefore not take advantage of the Commission's order, which disallowed the company's proposed plan to issue one share of common stock of $50 par value each and ½ share of 6% cum. pref. stock (par $100 per share) non-voting, in exchange for each share of present common stock, par $100 each, and authorized the company to issue ½ share of common stock (par $100) and ½ share of pref. stock (par $100), both pref. and common stocks to have equal voting power, for each share of common stock (par $100) outstanding.—V. 122, p. 3451.

Reading Co.—*Proposed Lease of Lehigh & New England RR. Approved.*—

The stockholders on June 24 approved the proposed lease subject to approval by the I.-S. C. Commission and other public authority, for a term of 999 years. From Jan. 1 1927, of the railroad, property and franchises of the Lehigh & New England RR.

The Lehigh company owns and operates approximately 220 miles of railroad, extending from Tamaqua, Schuylkill County, Pa., to Campbell Hall, N. Y., where connection is made with the New England lines. The acquisition of the Lehigh and New England will give the Reading a direct all-rail conection with New England ans afford a favorable opportunity for the development of traffic between the New England States and other sections of the country. The Reading Co. will pay an annual rental of $1,069,000, clear of all charges and deductions.—V. 122, p. 3451.

Seaboard & Roanoke RR.—*Extension of Bonds.*—

The I.-S. C. Commission on June 12 authorized the company to extend the time of payment of $2,500,000 of 1st mtge. bonds from July 1 1926 to July 1 1931 with int. at the rate of 5% per annum; and to enter into an agreement providing for redemption of the bonds proposed to be extended.

The Seaboard Air Line Ry. has entered into an agreement, dated April 28 1926, with Baker, Watts & Co. and the Mercantile Trust & Deposit Co. of Baltimore, whereby the bankers have agreed to purchase at par all bonds presented by persons not assenting to the proposed extension.

The extended bonds will be red. upon 30 days notice at 101 and int. at any time up to and incl. July 1 1927, and at any time thereafter at a premium of ¼ of 1% for each full year to elapse between the date designated for redemption and July 1 1931.—V. 70, p. 740.

Sumter & Choctaw RR.—*Final Valuation.*—

The I.-S. C. Commission has placed a final valuation of $251,188 on the owned and used property of the company, as of June 30 1917.

Tennessee RR.—*Bonds.*—

The I.-S. C. Commission has granted the company authority to procure authentication and delivery of not exceeding $60,000 of general mortgage 6% gold bonds, dated March 1 1922, $30,000 thereof to be sold at not less than 95% of par and $30,000 to be held in the treasury for future requirements.—V. 122, p. 2944.

Ulster & Delaware RR.—*Final Valuation.*—

The I.-S. C. Commission has placed a final valuation of $6,468,019 on the owned and used property of the company as of June 30 1916.—V. 122, p. 3333.

West Virginia Northern RR.—*Final Valuation.*—

The I.-S. C. Commission has placed a final valuation of $174,563 on the on the owned and used property of the company, as of June 30 1918.—V. 119, p. 1627

Western Allegheny RR.—*Tentative Valuation.*—

The I.-S. C. Commission has placed a tentative valuation of $2,002,500 on the owned and used properties as of June 30 1918.—V. 122, p. 1167.

Western Pacific RR.—*Bonds Authorized.*—

The I.-S. C. Commission on June 15 authorized the company to issue $2,600,000 of 1st mtge. 5% bonds, series A, due March 1 1964; said bonds to be sold to the highest bidder, but at not less than 92 and int., and the proceeds used to reimburse the treasury for additions and betterments made, &c.

The report of the Commission says in part: "The bonds will be offered for sale in a single block through competitive bidding, and will be sold to the highest bidder, but at not less than 92 and int., on which basis the cost to the applicant would be approximately 5¾% per annum. No contracts, underwritings, or other arrangements for the sale have been made, but it is understood that the Western Pacific RR. Corp., which has common directors with, and owns the capital stock of, the applicant, intends to bid for the bonds pursuant to the requirements of law."—V. 122, p. 3336.

Wilkes-Barre & Eastern RR.—*Tentative Valuation.*—

The I.-S. C. Commission has placed a tentative valuation of $3,175,000 on the owned and used property as of June 30 1918.—V. 60, p. 481.

PUBLIC UTILITIES.

Adirondack Power & Light Corp.—*Definitive Bonds.*—

The Guaranty Trust Co. of New York is now prepared to deliver definitive 1st & ref. mtge. gold bonds, series of 5s, due 1956, in exchange for the outstanding temporary bonds. For offering see (V. 122, p. 93.)—V. 122, p. 1453.

American Public Service Co.—*Bonds Offered.*—Halsey, Stuart & Co., Inc., and A. B. Leach & Co., Inc., are offering an additional issue of $3,000,000 1st lien 5% gold bonds, series C of 1912, due Dec. 1 1942 at 96 and int., yielding, over 5.35%.

Data From Letter of President Martin J. Insull, Chicago June 17.

Company.—Incorp. in Delaware in 1912. Controls, through ownership of all the capital stocks (except directors' qualifying shares) and all outstanding funded debt, 11 public utility operating companies. The subsidiary companies supply, without competition, 124 communities with one or more classes of public utility service, 122 with electric service, 58 with ice, 2 with street railway service and 6 with gas. The communities thus served are situated in eastern Oklahoma and central and eastern Texas and have an estimated combined population of 233,000. The varied resources and industries of the territory served offer excellent opportunities for securing large and profitable increases especially in the power and lighting business.

The physical property of the company includes electric generating plants having a generating capacity of approximately 47,500 k.w., and a combined daily ice capacity of 1,200 tons. The electric light and power transmission system consists of 1,366 miles of high tension lines. The 6 gas properties serve their respective localities with natural gas through 123 miles of mains.

Consolidated Capitalization (After Financing).

	Authorized.	*Outstanding.*
Preferred stock, 7% cumulative	$15,000,000	$7,742,500
Common stock	15,000,000	a6,914,500
1st lien gold bonds (including this issue)	c	b17,241,700

a Practically all controlled by the Middle West Utilities Co. b Of this amount $8,308,700 bear 6%, $1,255,200 bear 6½%, $1,864,400 bear 5½% and $5,813,400 bear 5% interest. c Issuance of additional bonds limited by restrictions of trust indenture.

Purpose.—Proceeds will be used to partially reimburse the company for necessary improvements, betterments and extensions to its property and for other corporate purposes.

Security.—Secured by a first lien on all the outstanding bonds and capital stocks (except directors' qualifying shares) of the subsidiary companies, all of which are deposited and pledged with the trustee. No additional stocks or bonds may be issued by the subsidiary companies unless deposited as additional security under the first lien mortgage.

Consolidated Earnings of Company and its Subsidiaries.

12 Months Ended April 30—	1925.	1926.
Gross earnings, including other income	$4,275,438	$5,033,154
Operating expenses, including taxes	2,551,370	2,924,245
Net earnings before depreciation	$1,724,068	$2,108,909
Annual int. on 1st lien bonds, to be presently outst'g, requires		973,322

Management.—The operations of the company are controlled by the Middle West Utilities Co.—V. 122, p. 2648.

American Water Works & Electric Co., Inc.—*Power Output Increases.*—

President H. Hobart Porter, in announcing the net power output of the company's electric system for the first 5 months of 1926, pointed out that this side of the company's business was continuing to grow at about the rate of 13% over the previous year. "This indicates the continued expansion of business in the territory served and the increased use of electric energy by our customers," Mr. Porter said.

Net power output of the company for May was 113,791,138 k.w.h., against 101,866,105 k.w.h. for the corresponding month of 1925, a gain of 11,925,033 k.w.h., or over 11%. For the first 5 months of 1926 the net power output aggregated 603,738,677 k.w.h., comparing with 533,310,265 k.w.h. for the corresponding period 1925, an increase of 70,428,412 k.w.h., or 13%.—V. 122, p. 3208.

Atlantic Public Utilities, Inc.—*Bonds Offered.*—

Sawyer, Fiske & Spencer, Inc., Boston, and Dangler, Lapham & Co., Chicago, are offering at 96½ and int., to yield over 6.30%, $750,000 1st collateral lien & refunding 6% gold bonds, series "A."

Dated March 1 1926; due March 1 1946. Denom $100, $500 and $1,000. Red. on any interest payment date all or part on 30 days' notice at 103 and int. Interest payable (M. & S.) in Boston and Chicago without deduction for any normal Federal income taxes not exceeding 2%. The personal property tax in Conn., Penn., not exceeding 4 mills per annum, Maryland not exceeding 4½ mills per annum, and the income tax not exceeding 6% on the interest thereon in Mass. and New Hampshire, will be refunded. Old Colony Trust Co., Boston, trustee.

Data From Letter of Pres. Arthur S. Dewing, May 15.

Company.—Organized to own, operate or manage electric light and power, water and gas companies in the Eastern States. It operates the Provincetown Light & Power Co. of Provincetown, Mass.; the Millbury (Mass.) Water Co.; the Grafton (Mass.) Water Co.; the Caribou (Me.) Water, Light & Power Co.; the City Water Co. and the Ohio Northern Public Service Co., both of Bowling Green, O., supplying electric light, power and water to Bowling Green and surrounding territory. The Atlantic Public Utilities, Inc. owns not less than 75% of the preferred stock and 60% of the common stock of the Edisto Public Service Co. supplying electric light and power and ice to 14 communities in Barnwell, Bamberg, Allendale and Hampton Counties, S. C.

The total population served by the subsidiaries of the Atlantic Public Utilities, Inc., amounts to over 70,000 people. The services represent approximately 5,000 electric light and power customers, and 2,500 water customers. Of the total gross earnings approximately 70% comes from the sale of electric energy and 25% from the sale of water and 5% from the sale of ice.

Purpose.—Proceeds to be used to purchase and retire the present collateral trust bonds, to retire or refund subsidiary company bonds, to provide funds for payment for properties recently purchased, for the purchase of additional properties, for extensions and additions to present properties and for additional working capital.

Security.—Secured both by first lien through pledge of all the outstanding common stock of the Provincetown Light & Power Co., which has no bonds outstanding, and by pledge of all outstanding stock of the Caribou Water, Light & Power Co. and the City Water Co., and of over 98% of the common stock of the Millbury Water Co., Grafton Water Co., Ohio Northern Public Service Co., and of 60% of the common stock of the Edisto Public Service Co.

Management.—The properties are all under the management of Charles W. Young & Sons, Inc., Boston, Mass.

Birmingham (Ala.) Water Works Co.—*Definitives Ready*

The definitive 1st mtge. 5% gold bonds, series B, are ready for delivery in exchange for temporary certificates at the United States Mortgage & Trust Co., trustee. For offering of bonds, see V. 122, p. 1606.

Bristol & Warren Water-Works Co.—*To Refund Bonds.*

The $250,000 5% bonds, due July 1 1926, will be paid off at maturity at the office of the Industrial Trust Co., Providence, R. I.

In connection with this payment the company will issue $425,000 5% first mortgage bonds, dated July 1 1926, due July 1 1946. Of the new securities $348,000 have been sold to Bodell & Co., Providence. The balance of $77,000 is reserved to retire outstanding debenture bonds of like amount.—V. 87, p. 287.

Brooklyn-Manhattan Transit Corp.—*Dividends.*—

The directors have declared a regular quarterly dividend of $1 per share on the common stock, payable July 15 to holders of record July 1. The directors also declared the full year's dividend of $6 per share on the pref. stock, payable as follows: $1 50 each on July 15, Oct. 15 1926 and Jan. 15 and April 15 to holders of record July 1, Oct. 1, Dec. 31 1926, and April 1 1927, respectively. See also V. 122, p. 1607.—V. 122, p. 2327.

Canadian Light & Power Co.—*Definitives Ready.*—

The company's definitive 5% 1st mtge. gold bonds, due July 1 1949, are now available for exchange for interim certificates at the office of the Royal Trust Co., trustee, 105 St. James St., Montreal, Canada. See also V. 122, p. 1607.

Central Illinois Light Co.—*Earnings.*—

—V. 122, p. 2797, 2491.

Chicago Surface Lines.—*Surplus Reserve Cash.*—

Alderman Oscar F. Nelson on June 16 presented to the Chicago City Council two resolutions, calling for the immediate investment of $15,831,832 idle reserve cash for construction of track extensions and for purchases of additional cars, claiming these improvements will yield 8.25% profit on the money, which is now available for such purposes and for purchases of 1st mtge. bonds, pursuant to the 1907 and 1913 ordinances.

The Nelson resolution claims these improvements will greatly promote public welfare, and yield more than twice the 3% income obtainable from bank deposits.

The second resolution recommends a board for liquidation of damage claims to administer the $5,997,810 reserve cash which is divisible, after accident settlements, 45% to the companies and 55% to the Chicago City Treasury. Copies of the Chicago Council proceedings may be had on request.—V. 122, p. 2649.

Columbia Gas & Electric Co. & Subs.—*Earnings.*—

[Controlled by practically 100% common stock ownership or lease.]

Cumberland County Power & Light Co.—*Bonds Offered.*—Harris, Forbes & Co. and A. C. Allyn & Co., Inc., are offering at 94½ and interest, to yield 4.85%, $9,000,000 first mortgage gold bonds, 4½% series.

Dated June 1 1926; due June 1 1956. Interest payable (J. &D.) in New York, Chicago and Boston. Redeemable, all or part, on any interest payment date on 60 days' notice, at a premium of 5% of the principal amount and accrued interest, to and including June 1 1936, this premium decreasing ¼ of 1% each June 2 thereafter, the bonds being redeemable on Dec. 1 1955 at 100 and interest. Denom. $1,000 c*. Old Colony Trust Co., Boston, trustee.

Issuance.—Subject to the authorization of the Maine P. U. Commission. Company will agree to pay interest without deduction for any Federal income tax, not exceeding 2%, and to refund any Penna. personal property tax not exceeding 4 mills per annum on each dollar of the face amount or value of the bonds imposed upon holders resident in that State.

Data from Letter of President H. M. Verrill, June 19.

Company.—Incorp. in Maine in 1907. Owns and operates an extensive interconnected system for the generation, transmission and distribution of electricity for power and lighting purposes. Company furnishes, without competition, electric light and power in Portland, Westbrook, Biddeford, Saco, Sanford and 50 other communities in Cumberland and York counties, Maine. Company supplies gas, also without competition, to Saco and Biddeford. The total population served, according to the 1920 census, is over 150,000.

In 1912 the company leased the property of the Portland RR. Co. for 99 years. The railroad property, its earnings and the lease are not subject to the lien of the mortgage securing the present bond issue, and, in the opinion of counsel, all of the obligations of the Cumberland company under the lease are subordinate to these bonds.

Property.—The physical property of the electric department of the Cumberland company consists of 5 hydro-electric stations located on the Saco and Presumpscot rivers with a combined generating capacity of 28,750 kva.; a 28,125 kva. modern steam generating station located at Portland, completed in Jan. 1925; about 220 miles of transmission lines, most of which are operated at 38,000 volts; 36 substations of about 75,000 kva. transformer capacity and distribution systems serving 41,809 consumers. Included in the capacity of the hydro-electric stations is a 5,000 kva. unit now under construction, and of the total installed power plant capacity, both steam and hydro, 36,125 kva. have been constructed since the latter part of 1922.

During the 12 months ended May 31 1926 the output of the power plants of the company was 97,950,970 k.w.h., of which 83,338,400 k. w. h., or over 85%, were generated in the hydro-electric stations.

The property of the gas department comprises a water gas plant in Biddeford with a total daily manufacturing capacity of 1,000,000 cu. ft. and a distribution system with more than 20 miles of mains serving 2,059 consumers in the cities of Biddeford and Saco.

Capitalization (upon Completion of Present Financing).

	Outstanding.
Common stock	x40,000 shs.
6% cumulative preferred stock par $100)	$4,024,000
First mortgage gold bonds, 4½% series due 1956 (this issue)	9,000,000

x More than 99.8% is owned by National Electric Power Co.

Leased Property.—The Portland RR. owns 101 miles of track serving Portland and certain nearby towns, all of its properties being leased to the Cumberland County Power & Light Co. Under the terms of the lease the Cumberland county receives all revenues from the leased railroad property and pays all operating expenses and taxes, makes all necessary property renewals and pays as rent an amount sufficent to meet bond interest and 5% per annum on the capital stock of the railroad company. The Cumberland company is obligated to provide a purchaser for such new securities as may be issued by the Portland RR. to refund at maturity the $2,045,000 first mortgage 5% bonds due 1945, and $1,600,000 consolidated 3½% bonds due 1951 of the railroad company.

The annual gross revenues of the railroad property have averaged $1,601,465 for the four years ended Dec. 31 1925. The total annual charges for the four-year period, required to be met by the Cumberland company under the lease including operating expenses and taxes, liberal reserves for renewals and replacements and the rental payments (including the amount of bond interest and guaranteed dividends of 5% on the stock of the railroad company) have averaged $1,646,490, leaving an average annual deficit to be met by the Cumberland company of $45,024. The Cumberland company furnishes power for the operation of the Portland RR. property and received $133,475 therefor during 1925.

Security.—These bonds will be secured by a direct first mortgage on all of the fixed property of the company. Based on an appraisal by independent engineers, the depreciated reproduction value of the mortgaged property is largely in excess of the principal amount of this issue, which, upon completion of the present financing, will constitute the only funded debt of the company.

Purpose.—To retire all bonds at present outstanding against the property of the company and its former subsidiaries (bearing interest rates higher than that of this series of 1st mtge. gold bonds) to reimburse its treasury for construction expenditures and to provide an adequate medium for future financing.

Mortgage Restrictions.—Additional 1st mtge. gold bonds may be issued from time to time to a principal amount not exceeding 75% of the cost or value of "permanent additions" made or acquired subsequent to June 1 1926, less the principal amount of "prior liens" outstanding thereon, if any, or upon the deposit of cash, provided "earnings applicable to bond interest" for 12 consecutive calendar months within the 15 calendar months immediately preceding the date of application for issuance of bonds shall have been not less than twice the annual interest charges on all 1st mtge. gold bonds outstanding, including those proposed to be issued, and all "outstanding prior lien bonds," if any, all as defined in the mortgage. 1st mtge. gold bonds may also be issued to refund equal principal amounts of the same or other series of bonds issued under the mortgage, or prior liens, as defined in the mortgage. The mortgage contains no provision for the issuance of 1st mtge. gold bonds against railway property. 1st mtge. gold bonds may be issued from time to time in such series as may be determined by the directors. The bonds of additional series may bear such dates, rates of interest, mature at such times not longer than 30 years from the date of their issue and carry such redemption, sinking fund and tax refund provisions, and such other varying or distinguishing provisions as may be determined by the directors, subject to the restrictions of the mortgage, but, except as to sinking funds which may be established for the exclusive enefit of a particular series, all bonds of all series shall be equally and ratably secured by the mtge.

Sinking Fund.—Company covenants to pay to the trustee on June 1 1928 and on each June 1 thereafter to and incl. June 1 1955 an amount equivalent to 1% of the principal amount of the 1st mtge. gold bonds, 4½% series due 1956, outstanding on the date of such payment. The sinking fund money shall be applied to the purchase or redemption of bonds of this series at not exceeding their then redemption price plus accrued interest. All bonds acquired for the sinking fund shall be cancelled. Company may tender to the trustee bonds of the 4½% series due 1956 in lieu of cash at the principal amount thereof or at the cost to the company, whichever is less.

Earnings.—Earnings from the properties to be mortgaged have been as follows:

Years Ended May 31—	1925.	1926.
Gross earnings	$2,482,481	$2,632,631
Oper. exp., maint. & taxes, other than income taxes	939,792	927,424
Net earnings	$1,542,689	$1,705,207
Annual interest on 1st mtge. gold bonds this issue)		405,000
Balance available for other charges and surplus		$1,300,207

For the year ended May 31 1926 approximately 94% of such gross earnings were derived from the sale of electrical energy.—V. 122, p. 3452.

Detroit Edison Co.—*Listing.*—The New York Stock Exchange has authorized the listing of $15,000,000 additional gen. & ref. mtge. gold bonds, series B, 5%, due June 1 1955, making the total amount applied for, series A, $12,500,000, and series B, $23,000,000.

Federal Water Service Corp.—*Notes Offered.*—G. L. Ohrstrom & Co., Inc. are offering at 97½ and int., to yield 6%, $1,000,000 3-year 5% gold notes.

Dated May 1 1926; due May 1 1929. Principal and interest (M. & N.) payable in New York City. Denom. $1,000 c. Redeemable at any time upon 60 days' published notice at 101½ and int. for the first 6 months and thereafter decreasing ¼ of 1% each succeeding 6 months. Interest payable without deduction of any Federal income tax not in excess of 1½%. Refund of Penn., Conn., Kansas and Calif. taxes, not to exceed 4 mills. Maryland taxes not to exceed 4½ mills, Kentucky and Dist. of Columbia taxes not to exceed 5 mills, Michigan exemption tax not to exceed 5 mills. Virginia taxes not to exceed 5½ mills, and Mass. income tax not to exceed 6% to resident holders. Central Union Trust Co. of New York, trustee.

Data from Letter of President of the Corporation.

Corporation.—Through its operating properties, will supply without competition water for domestic and industrial purposes to various communities located in New York, New Jersey, Pennsylvania and Ohio. The communities served with water at retail include Ocean City, West Paterson, Butker, Little Falls, Bloomingdale, Smith Mills, N. J., Massillon, O.; Punxsutawney and Big Run, Pa. In addition, White Plains, N. Y. and Pompton Lakes, N. J. are served at wholesale with water, and Pompton Lakes in turn serves at wholesale Haskell, Riverdale and Wanaque, N. J., and sewer service is rendered in Ocean City, N. J. The total permanent population served, excluding the large summer population of Ocean City, is approximately 105,000.

Capitalization Outstanding upon Completion of the Present Financing.

Three-year 5% gold notes, due May 1 1929	$1,000,000
7% cumulative preferred stock	500,000
Class A stock, without par value	5,000 shs.
Class B stock, without par value	50,000 shs.

Security.—These notes will be a direct obligation of the corporation which will own all of the outstanding capital stock of the Union Water Service Co. (V. 122, p. 3456). The latter company will own all of the capital stocks and all of the mortgage indebtedness of the following constituent companies. Ocean City Water Service Co., Ocean City Sewer Service Co., the Massillon Water Service Co., Mountain Water Service Co., Punxsutawney Water Service Co. and Westchester Water Service Corp. The future financing of the operating properties will be limited under conservative restrictions in the indenture to secure the first lien 5½% gold bonds of the Union Water Service Co., which will be the only funded debt of the company.

Consolidated Earnings of Corporations and Subsidiaries.

	Year Ended Dec. 31 '25.	*Year Ended June* 30 '26
Gross revenues	$488,037	$524,638
Oper. exp., maint. & taxes other than Fed. inc. tax	220,950	231,997
Net earnings	$267,087	$292,641
Annual bond interest		137,500
Balance		$155,141
Maximum annual interest charge on this issue		$50,000

x Month of June 1926, estimated.

Management.—The general operation of these properties will be under the management of the Union Water Service Co.

Purpose.—The proceeds from the sale of these notes and other securities will be used in part for the retirement of underlying indebtedness of the operating companies and partially to reimburse expenditures for extensions and improvements to properties and for other corporate purposes.—V. 122, p. 3338.

Fifth Avenue Coach Co., N. Y. City.—*Acquires "Gray Line."*—Pres. Frederick T. Wood has issued the following statement:

The company has just purchased the "Gray Line," a coach company which operates sight-seeing bus tours throughout New York City, an up-State line to Bear Mountain and lines to other points.

It is the intention of the company to develop these sight-seeing and touring services and to maintain on them the same standards as on its existing motor coach service in Manhattan, the Bronx and Queens, with the same full measure of financial responsibility for which the company is known. In addition to the tours on specified routes, the company will, as a part of its plan, place both single and double deck coaches at the disposal of the public for special service to whatever points those chartering the coaches may elect.

The existing equipment of the "Gray Line" will be increased immediately by 5 new de luxe touring coaches, built by the Yellow Truck & Coach Mfg. Co., and further additions to the fleet will be made as the volume of traffic increases and new lines are laid out. The headquarters of the "Gray Line" and its New York terminal will be continued at the Waldorf-Astoria Hotel, as at present.—V. 122, p. 3081.

Florida Power & Light Co.—*Expansion—Earnings.*—

To provide for the rapidly increasing business, the company is building two entirely new steam electric generating stations which are expected to be in operation by the close of the present year. One of these stations is to have an initial installation of 10,000 k. w. and the second station an initial installation of 50,000 k. w. The company has under construction approximately 600 miles of high voltage transmission lines. Many of the electric properties are already interconnected and when the transmission lines now under construction are completed, all of the electric properties owned by the company, with a few exceptions, will be interconnected and will be operated as one system.

For the month of May gross earnings of the company and subsidiaries were $1,275,380, an increase over May 1925 of $576,506, equal to 82%. Net earnings for May were $445,131, an increase over May 1925 of $189,151, equal to 74%.

For the 12 months ended May 31 1926 gross earnings of the company and subsidiaries were $13,023,763, as compared with $7,520,970 for the 12 months ended May 31 1925, an increase of $5,502,793, equal to 73%. Net earnings for the 12 months ended May 31 1926 were $5,179,574, as compared with $2,976,124 for the corresponding period a year ago, an increase of $2,203,450, equal to 74%.

The American Power & Light Co., which controls Florida Power & Light Co., reports gross earnings for all operating subsidiaries for April of $4,916,392, an increase over April 1925 of $911,269, equal to 23%. Net earnings for April were $2,138,401, an increase of $356,649, equal to 20%.

For the 12 months ended April 30 1926 gross earnings of all operating subsidiaries of American Power & Light Co. were $54,037,673, an increase over the previous 12 months of $8,183,218, equal to 18%. Net earnings were $24,149,919, an increase of $3,885,859, equal to 19%.—V. 122, p.3338.

General Gas & Electric Corp. (Del.).—*Listing.*—

The New York Stock Exchange has authorized the listing of 4,672 shares of common stock, class A, without nominal or par value (of a total authorized issue of 800,000 shares) on official notice of issuance and payment in full, making the total amount applied for 317,706 shares.

The 4,672 shares now applied for represent the maximum number of shares required for issuance to holders of common stock, class A, for subscriptions to additional common stock, class A, to the extent of the dividend payable on July 1 to stockholders of record June 15, pursuant to resolution of the board of directors adopted May 26 1926, the proceeds to be used for general corporate purposes.

Consolidated Income and Surplus Account for Year Ended March 31 1926.

a From the commencement of operations under Contract No. 3 and the related certificates, respectively, it has been the practice to include in all reports of operating expenses 14% of the gross operating revenue upon the Manhattan division and 17% of the Subway Division to cover maintenance and depreciation. These are the percentages fixed for the first year of operation in each case. Negotiations have been pending between the company and the Commission ever since the end of the first year to determine what, if any, changes in these percentages should be made for subsequent years. Prior to July 1 1923 the amount expended in excess of 14% upon the Manhattan Division was approximately offset by the amount under 17% expended upon the Subway Division. The next expenditures for maintenance in excess of the amounts therefor, included in "operating expenses, taxes and rental paid city for old subway," are shown hereinabove as "maintenance in excess of contractual provisions."—V. 122, p. 3339, 3082.

Illinois Bell Telephone Co.—*Expenditures.*—

The directors have authorized expenditures of $3,002,946 for a new plant in Chicago and $1,718,830 in Illinois outside of Chicago. Total expenditures authorized so far this year are $17,832,760.—V. 122, p. 3081.

Idaho Power Co.—*Annual Report.*—

Interstate Power Co.—*Additional Pref. Offered.*—Pynchon & Co., West & Co. and W. S. Hammons & Co. are offering at 95 and divs., to yield 7.37%, 15,000 additional shares of $7 dividend preferred stock, preferred as to both assets and cumulative dividends. Shares are fully paid and non-assessable.

Dividends are exempt from normal Federal income tax. They are exempt also from all Federal income taxes when received by an individual whose net income, after all allowable deductions, does not exceed $10,000. Dividends are not subject to Federal income tax when received by a domestic corporation. Transfer agents, American Exchange-Pacific National Bank, New York; Office of the Company, Chicago. Registrars, The Chase National Bank, New York; Continental and Commercial Trust & Savings Bank, Chicago.

Preferred stock is entitled to receive cumulative dividends at the rate of $7 per share per annum, payable Q-J. Has priority in liquidation or dissolution up to $100 per share, together with all dividends accrued or in arrears, plus a premium of $15 per share if such liquidation or dissolution be voluntary, before any distribution shall be made to the holders of common stock. Callable all or part by lot or pro rata, at $115 per share, plus divs.

Data From Letter of H. L. Clarke, President of the Company.

Company.—Incorp. in Delaware. Company and its subsidiary and controlled companies, furnishes electric light and power to 316 cities and communities located in Minnesota, Illinois, and in addition supplies gas to 6 cities and steam heat to one, and also operates a street railway and bus service in Dubuque and adjacent territory. The total population of the territory served by the system is approximately 420,000 and the customers total over 66,000. The combined annual electric output is about 84,000,000 k.w.h. Over 85% of the net earnings of the system is derived from the sale of electric light and power.

The subsidiaries comprise the Interstate Power Co. of Wisconsin, which is controlled through ownership of all outstanding stock and bonds; the Dubuque Electric Co., controlled through ownership of all outstanding common stock and 933 shares of the preferred stock; the Tri-State Utilities Co., controlled through ownership of all outstanding common stock, and the Minnesota Electric Distributing Co., controlled through ownership of all outstanding common stock. Through the Dubuque Electric Co., the Interstate Power Co. also controls the Eastern Iowa Electric Co. and the East Dubuque Electric Co., and through the Minnesota Electric Distributing Co. it also has control of that company's several subsidiaries, viz.: Peoples Light & Power Co., International Public Service Corp., Bemidji Electric & Mfg. Co., Red River Valley Power Co. and Minnesota Electric Light & Power Co.

Practically all the properties of the Interstate Power Co. system, with the exception of those of the Minnesota Electric Distributing Co. and Tri-State Utilities Co., control of which companies was recently acquired, have been physically connected, and it is proposed that substantially the whole system will be interconnected ultimately so as to permit a more efficient operation of the steam plants and a more complete utilization of electric energy generated by the hydro-electric plants and by the Dubuque power plant, the system's largest central station. The company and its subsidiary and controlled companies, including those recently acquired, own 23 steam electric generating plants, 14 hydro-electric generating plants, 6 gas plants and one steam heating plant. The combined properties have 184 substations with 3,980 miles of transmission lines and a complete system of distributing lines. In addition to the power which the system generates at its own plants, it has favorable contracts for the purchase of power from the Northern States Power Co., Wisconsin Ry., Light & Power Co. and Interstate Light & Power Co. It also has favorable contracts for the interchange of power. In order to meet the increasing demand for service the company is installing a 7,500 k.w. turbine generating unit for an addition to its Albert Lea, Minn., power plant. This unit, together with auxiliary equipment and new boilers, will be installed in the next few months. Early in January new gas holders were put into service at Clinton, Iowa, and at Albert Lea and Austin, Minn.

Capitalization (After Financing).

	Authorized.	*Outstanding.*

a Issuance of additional bonds restricted by provisions of the mortgage.

Note.—In addition there will be outstanding not owned by Interstate Power Co., $9,427,700 funded debt of subsidiary companies and $1,929,200 of preferred stock of subsidiary companies.

Purpose.—The purpose of the issue of this preferred stock is to reimburse the treasury of the company in part for expenditures heretofore made for additions and improvements to physical properties and for other corporate purposes, including the acquisition of the stock of Tri-State Utilities Co. and the Minnesota Electric Distributing Co.

Valuations.—The present properties of the company and its subsidiary and controlled companies have been valued as of Feb. 28 1926, at approximately $37,500,000. Against this amount there are now outstanding bonds, notes, and underlying preferred stocks aggregating about $26,100,000, leaving a balance of approximately $11,400,000, which is at the rate of over $207 per share for the 55,000 shares of $7 dividend preferred stock presently to be outstanding, including this issue.

Consol. Earnings for Year Ended Feb. 28 1926, (Incl. Present Subs. and Controlled Cos.)

Ohio Power Co.—*Bonds Sold.*—Dillon, Read & Co., Lee, Higginson & Co., New York, and Continental & Commercial Trust & Savings Bank, Chicago, have sold at 93 and int., to yield 4.95%, $9,635,000 1st & ref. mtge. 4½% gold bonds, series D.

Dated June 1 1926, due June 1 1956. Denom. c* $1,000 and $500 and r* $1,000. Prin. and int. payable (J. & D.) in New York City. Red. all or part by lot, on any interest date on 4 weeks' notice at 103 to and incl. June 1 1931; at 102½ thereafter to and incl. June 1 1936; at 102 thereafter to and incl. June 1 1941; at 101½ thereafter to and incl. June 1 1946; at 101 thereafter to and incl. June 1 1951; at 100½ thereafter to and incl. June 1 1954 and at 100 thereafter to maturity; in each case accrued interest being added to the price named. Company agrees to pay interest without deduction for the normal Federal income tax up to 2% per annum and to refund the Penn. 4-mill tax. Central Union Trust Co. of New York, trustee.

Data From Letter of Vice-President Geo. N. Tidd, June 17.

Company.—Owns and operates large electric power and light generating plants and transmission and distributing systems in important manufacturing and mining sections of Ohio. The company is about to acquire important electric power and light properties formerly owned by a number of established operating companies in Ohio, including the Ohio Service Co. and the Portsmouth Public Service Co. Transmission and distributing lines owned, including properties about to be acquired, aggregate 3,468 miles and serve a prosperous territory in Ohio having an estimated population of 719,000. Upon acquisition of the new properties, the company will supply electric power and light to 225 communities, among which are Canton, Lima, Portsmouth, Steubenville, Newark, East Liverpool, Lancaster, Ironton and Cambridge, and a number in the Wheeling district west of the Ohio River.

The company is one of the two most important subsidiaries of American Gas & Electric Co., which controls electric power and light properties in various districts east of the Mississippi River, including Wheeling, Huntington, Charleston and Logan, W. Va.; Roanoke and Lynchburg, Va.; Atlantic City, N. J.; Scranton, Pa.; Rockford, Ill.; Marion, Muncie, South Bend and Elkhart, Ind., and Benton Harbor and St. Joseph, Mich.

Property.—With the addition of properties about to be acquired, the company will own a total installed electric generating capacity of 234,490 kilowatts, 1,414 miles of high voltage transmission lines (not including 145 miles now under construction), and 2,054 miles of distribution system. The company owns two principal electric generating stations, the Philo station at Philo, O., and the Windsor station at Power (formerly Windsor), W. Va. All properties owned by the company, including those about to be acquired, are inter-connected by high voltage transmission lines. In addition to the 132,000-volt steel-tower transmission lines interconnecting the eastern and western systems of the company and its principal generating stations on the Ohio and Muskingum Rivers, the company also owns similar lines extending south to the Ohio River and west to the Indiana state line. The company's transmission system is interconnected through the line to the Ohio River with the system of the Appalachian Electric Power Co., and through the extension to the Indiana state line with the system of the Indiana & Michigan Electric Co. Both of these companies are also subsidiaries of American Gas & Electric Co., and this interconnected system, extending into 6 states, constitutes one of the largest super-power systems in the world.

Security.—Upon completion of present financing, there will be outstanding under the first and refunding mortgage a total of $43,131,500 bonds, all equally and ratably secured by direct mortgage lien on the company's plants and properties, valued at over $63,000,000 based on an appraisal made by Ford, Bacon & Davis in 1921, with subsequent additions at cost. The 1st & ref. mtge. bonds are secured by direct first mortgage lien on the greater part of the company's properties including the two principal generating stations and practically all the new high voltage transmission lines recently constructed and acquired by the Ohio Power Co., and by second mortgage lien on the remainder, subject to divisional lien issues aggregating $2,731,000 outstanding under closed mortgages. All these divisional lien bonds must be paid at maturity and not extended.

Purpose.—The proceeds will be used to provide funds in connection with the purchase of important electric power and light properties in Ohio, to reimburse the company in part for capital expenditures already made under the terms of the mortgage, and for other corporate purposes.

Earnings.—During the 3-year period ended April 30 1926, as shown below, annual gross earnings of all properties owned, including those about to be acquired, increased $1,857,205, or over 14%, and total annual net revenue available for bond interest, after taxes, maintenance and depreciation charges, increased $1,048,552, or over 21%.

Earns. for 12 Mos. End. Apr. 30—	1926.	1925.	1924.
Gross earnings	$14,503,288	$13,267,280	$12,646,083
Net revenue	5,874,425	5,203,385	4,825,873

Annual interest charges on the 1st & ref. mtge. bonds to be outstanding on completion of the present financing, and on all underlying divisional bonds, amount to $2,539,480. The average of the annual net revenue, as shown above for the 3 years ended April 30 1926, was equal to more than twice the amount of such interest charges. Total annual interest charges on all funded debt, incl. the 6% gold debenture bonds, amount to $2,659,480.

Capitalization Outstanding (Including This Issue).

Divisional issues	$2,731,000
1st & refunding mortgage bonds	x43,131,500
6% gold debenture bonds	2,000,000
6% preferred stock	14,113,300
Common stock (no par value)	1,095,375 shs.

x Series A 7% bonds, due 1951, $9,702,000; series B 5% bonds, due 1952, $13,794,500; series C 6% bonds, due 1953, $10,000,000 (not incl. $18,000 held by co.), and series D 4½% bonds, due 1956, $9,635,000.

Control.—The entire common stock is owned by American Gas & Electric Co.—V. 122, p. 3341.

Ohio Cities Telephone Co.—*Bonds Sold.*—

The issue of $400,000 first mortgage 6% convertible gold bonds, series A, recently offered at 100 and interest, have been sold. In addition to R. W. Evans & Co., Inc., Pittsburgh, and Schulz Brothers, Cleveland, Shapker, Stuart & Co. of Chicago participated in this offering. The latter in an advertisement on June 22, gave the following facts:

History.—The peoperties now operated by the company have enjoyed a steady growth, indicated by the fact that in 1901 they had 790 stations, compared with over 4,600 at the present time. It is conservatively estimated that they will have 6,000 stations connected by the end of 1926 and 7,000 in 1927.

Property.—The property of the company has continuously been increased and improved since organization, out of surplus earnings. The new plant and exchange building is completed, and the company has contracted for the transformation of the entire system into a complete automatic service, which, the management estimates, will be in operation within thirty days.

Security.—Secured by a first mortgage upon all of the company's properties and franchises now owned or hereafter acquired (consisting of over 4,600 stations and an installed capacity of 6,000 stations with underground facilities capable of almost 100% additional stations). The value of the present

properties of this company after depreciation, based upon expert appraisals, together with the proposed additions and extensions made out of the proceeds of this financing, is in excess of $1,000,000.

Earnings.—For the 12 months ended April 30 1926, net earnings, after all expenses, maintenance and taxes, were over three times interest requirements on this issue. See also further data in V. 122, p. 1763.

Peninsular Telephone Co. (Fla.).—*Bonds Sold.*—Coggeshall & Hicks and Bodell & Co. have sold at 101½ and int., to yield over 5.40%, $1,000,000 additional 1st mtge. gold bonds, 5½% series, due 1951.

Dated Jan. 1 1926; due Jan. 1 1951. Interest payable (J. & J.) at the office or agency of the company in New York City. Callable all or part on or before Jan. 1 1949 at 105 and int., and thereafter at 100 and int. on any interest date upon 30 days' notice. Denom. c* $1,000 and $500 and r* $1,000, $5,000 and $10,000. Company agrees to pay interest without deduction for any Federal income tax not exceeding 2%. Irving Bank-Columbia Trust Co., and Willard V. King, New York City, trustee.

Data From Letter of Pres. W. G. Brorein, June 18.

Company.—Incorp. in Florida in 1901. Owns and operates, without competition, the central station telephone systems in Tampa, St. Petersburg, Port Tampa and 16 surrounding cities and towns, all of which are connected by toll and long distance lines of the company. The toll and long distance lines also extend to 11 other nearby cities and towns of south Florida. Connections are made with the long distance lines of the American Telephone & Telegraph Co. under favorable contract, thus affording nation-wide telephone service. The population served by the company, including St. Petersburg, is over 400,000 showing an increase of over 300% since 1915. The franchises are satisfactory for the operation of the business.

On Dec. 31 1914, company operated 9,422 telephones and on Dec. 31 1925, it operated 42,881 telephones, an increase of over 355% in 11 years. Since Dec. 31 1925, over 4,000 additional telephones have been installed. In the 12 years ended Dec. 31 1925, the gross revenue increased 545% and the net income 417 .

Capitalization as of May 31 1926—	*Authorized.*	*Outstanding.*
1st mtge. gold bonds, 5½ series, due 1951 (incl. this issue)	a	$4,500,000
10-yr. conv. deb. bonds, series "A," 6½%, due April 1 1934	$10,000,000	b421,500
7% cumulative preferred stock		2,300,000
Common stock (paying cash divs. at rate of 7% per annum)		2,306,900

a The 5½% series due 1951 is limited to $5,000,000 and the issuance of the balance of this series ($500,000) and of additional bonds of other series, is subject to restrictions of the indenture. b Original issue $1,250,000 and $828,500 have converted into common stock.

Purpose.—To pay current indebtedness incurred for additions and extensions to the property made during the year 1926, and will in addition thereto provide some cash for future extensions and additions to the company's telephone plant and system.

Gross Revenue, and Net Income, Available for Interest, Amortization o Discounts, Dividends and Depreciation.

Calendar Years.	*Gross Revenue.*	*Net Income.*	*Calendar Years.*	*Gross Revenue.*	*Net Income.*
1913	$261,970	$114,633	1921	$611,611	$241,714
1915	312,922	143,427	1922	703,071	298,312
1917	367,181	169,676	1923	939,208	b402,033
1919	a	147,547	1924	1,161,653	452,369
			1925	1,690,645	592,498

a Government operation for larger part of period. b Includes St. Petersburg for full year. It was purchased in 1923.

Earnings for 12 *Months Ended April* 30 1926 (*Excluding Depreciation*)

Gross revenue	$1,898,175
Operating expenses, maintenance and taxes	a1,243,647
Net income	b654,528
Annual interest on $4,500,000 first mortgage 5½% bonds	247,500
Balance	$407,028

a Maintenance equals 26% of gross revenue. b 2.6 times interest on 1st mortgage bonds.

The earnings do not reflect any benefits from very substantial additions and extensions to the properties amounting in total to approximately $1,115,000 which until completed will not begin to earn. Furthermore, on the basis of the new rates granted by the Florida P. S. Commission to become effective July 1 1926, it is estimated that the additional net income (ex. depreciation) from the new rates with the stations now in service will amount to approximately $30,000 per month.

Sinking Fund.—The indenture provides for a sinking fund of 1% per annum, payable semi-annually commencing June 1 1927, to be used to purchase 1st mtge. gold bonds entitled to the benefit of purchase therefrom at the sinking fund prices of such bonds (at or below 102 and int. for 5½% series due 1951) if purchasable at such prices, and, if not, such sinking fund moneys may be used to reimburse the company for properties for which additional bonds might otherwise be issued.—V. 122, p. 3455.

Penn Central Light & Power Co.—*Listing.*—The Philadelphia Stock Exchange has authorized the listing of 96,866 shares (of a total authorized issue of 150,000 shares) cumul. pref. stock, $5 series, without par value, being part of a total of 110,000 shares applied for listing, the balance of 13,134 shares to be listed upon official notice of issuance full paid. (See V. 122, p. 348.)—V. 122, p. 2497.

Pennsylvania Edison Co.—*Tenders.*—The Bank of North America & Trust Co., trustee, City Hall Square, Philadelphia, Pa., will until July 7 receive bids for the sale to it of 1st mtge. sinking fund gold bonds, dated April 1 1916, to an amount sufficient to absorb $101,713 at prices not exceeding 105 and int. for series A and B bonds. —V. 122, p. 2652.

—V. 122, p. 2043, 483.

Texas-Louisiana Power Co. (Del.).—*Preferred Stock Offered.*—R. E. Wilsey & Co., Inc., Chicago, and Frederick Peirce & Co., Philadelphia, are offering at 95 and divs., to yield about 7.37%, $850,000 7% cumul. pref. stock (par $100), fully paid and non-assessable.

Preferred both as to assets and dividends. Divs. exempt from present normal Federal income tax. Mass. 6% income tax, Maryland 4½ mills securities tax and Penn. 4 mills personal property tax refunded. Divs. payable Q.-J. Red. all or part on any div. date on 30 days' prior notice at $107 and divs. Transfer agent, Union Trust Co., Chicago, Ill. Registrar, Central Trust Co. of Illinois, Chicago, Ill.

Data from Letter of A. P. Barrett, President of the Company.

Company.—A public utility operating company. Incorp. in Del. Owns and operates a number of previously existing public utility properties serving without competition over 11,600 electric and gas customers and over 600 water customers in 48 communities located in the northeast section of Texas and in Oklahoma, New Mexico and Louisiana. Company furnishes electric and gas service to a population in excess of 100,000. While its principal earnings are derived from the sale of electric light and power, the company also serves 14 communities with ice, including Houston and Gainsville, Texas.

Capitalization (After Financing)—	*Authorized.*	*Outstanding.*
1st mtge. 20-yr. 6% gold bds., Ser. "A," due 1946	x	$3,250,000
Series "A" 6% gold notes, due Dec. 1 1926	$200,000	200,000
7% cumul. pref. stock (this issue)	5,000,000	850,000
Common stock (no par value)	30,000 shs.	20,000 shs.

x Limited by conservative restrictions of the trust indenture, but not to any principal amount.

In addition to the above, there are outstanding $255,000 6% purchase money obligations, payable in annual installments during the next 13 years.

Security.—Based upon appraisal by Hagenah & Erickson, Chicago, plus subsequent capital expenditures, the properties have a reproduction value in excess of $5,950,000. After deducting from this amount the total funded debt and purchase money obligations, it leaves a balance of about $2,250,000 or approximately $265 for each share of 7% cumul. pref. stock outstanding. On the basis of depreciated values, it leaves an equity of more than $181 for each share of this issue.

Consolidated Earnings for Years Ended April 30.

	1925.	1926.
Gross earnings	$1,000,175	$1,140,428
Oper. exps., incl. maint. & taxes other than Federal income taxes	601,639	677,529
Net earnings	$398,536	$462,899
Annual interest requirements on total funded debt		222,300
Earnings available for deprec., Fed. income taxes & divs.		$240,599
Annual div. requirements on 7% cumul. pref. stock (this issue)		$59,500

Purpose.—To reimburse the company's treasury for expenditures made for improvements and extensions, for payment of obligations incurred through acquisition of properties, for retirement of short term funded debt, and for additional working capital.—V. 122, p. 751, 613.

Tennessee Electric Power Co.—*Bonds Sold.*—The National City Co., Bonbright & Co., Inc. and Hodenpyl Hardy Securities Corp. have sold at 98 and int., yielding 5.13%, $3,500,000 1st & ref. mtge. gold bonds 5% series.

Dated June 1 1926; due June 1 1956. Interest payable (J. & D.) 1 at the National City Bank of New York, trustee, without deduction of the normal Federal income tax up to 2%. Four mills tax in Penn. will be reimbursed. Denom. c* $500 and $1,000 and r* $1,000, $5,000 and $10,000. Red. all or part, either at the option of the company or by the sinking fund, on any interest payment date, upon 30 days prior notice, at 105 on or before June 1 1952, and at 100 thereafter.

Issuance.—Subject to authorization by the Tennessee RR. and P. U. Commission.

Data from Letter of President B. C. Cobb.

Company.—Owns or controls and operates an extensive system of properties engaged primarily in the generation, transmission and distribution of electric energy. The high tension transmission lines of the company which are inter-connected with those of other large electric power companies in neighboring States, constitute an important part of the extensive super-power system of the south. The field of operation of the System embraces a large part of the State of Tennessee, extending nearly 200 miles from east to west and 100 miles from north to south, and includes Nashville, Chattanooga, Knoxville (on a wholesale basis) and other cities having a total estimated population of over 500,000.

More than 81% of the aggregate net earnings is contributed by the electric light and power business and the balance is derived principally from railway operations. The System includes 7 electric generating stations having an installed capacity of 258,000 h. p. (now being increased to 283,000 h. p.), of which 4 are modern waterpower plants with an aggregate capacity of over 144,000 h. p. During the past 6 calendar years the hydro-electric stations have supplied over 86% of the total electric output of the system.

Capitalization of System Outstanding upon Completion of this Financing.

	Outstanding with Public.
Common stock (without par value)	200,000 shs.
2nd pref. stock, $6 a year a sh., non-cumul. (without par value)	30,000 shs.
1st pref. stock 6% cumul. (par $100)	a&b$5,454,300
do do 7% cumul. (par $100)	8,345,400
do do 7.2% cumul. (par $100)	b3,342,700
10 Year 6½% Debentures, due 1933	900,500
15 Year 6½% debentures, due 1939	902,000
1st & ref. mtge. gold bonds, 6% series due 1947	24,786,500
do do 5% series due 1956 (this issue)	3,500,000
Divisional Lien Bonds—	
Bonds of former Tennessee Power Co., due 1962	2,256,000
Bonds of former Chattanooga Ry. & Light Co., due 1956	2,336,500
Nashville Ry. & Light Co. bonds, due variously to 1958	6,670,500
Chattanooga Office Building 5½% bonds, due 1929	175,000

a Includes $128,000 par value, reserved for exchange in the future for a like amount of Nashville Ry. & Light Co. 5% preferred stock outstanding with the public. b These amounts include $590,000 of 6% and $509,300 of 7.2% 1st pref. stock for which subscriptions have been received on a partial payment plan, but they do not include sales made locally by the company since May 31 1926.

Note.—In addition to the divisional lien bonds shown above to be outstanding in the hands of the public, there are pledged under the First & ref. mtge. the following: $10,045,000 Tennessee Power Co. 1st mtge. 5% bonds, $4,038,000 Chattanooga Ry. & Light Co. bonds of various issues; and $4,042,000 bonds of the Nashville Ry. & Light Co. Of the divisional lien bonds outstanding with the public, $10,778,000 bear interest at the rate of 5%, $175,000 at the rate of 5½% and $485,000 at the rate of 6% per annum.

Earnings for 12 *Months Ended May* 31.

	1926.	1925.
Gross earnings	$11,836,973	$10,253,943
Operating expenses, current maintenance and taxes	6,646,986	5,368,844
Net earnings	$5,189,987	$4,885,099
Mortgage bond interest charges	2,063,025	1,902,335
Balance	$3,126,962	$2,982,764

The above earnings reflect little benefit from important additions to the property to be financed in part with the proceeds from the sale of these bonds. Annual interest requirements on the $39,724,500 mortgage bonds presently to be outstanding amount to $2,239,815.

Security.—Secured by (1) a direct first mortgage on the 54,000 Hales Bar Hydro-Electric Station, the new 54,000 h. p. steam station at that site, high tension transmission lines, important substations and certain parts of the distribution system in Chattanooga; (2) a direct mortgage on the entire remaining physical property of the company, subject to mortgages securing divisional lien bonds of which only $4,767,500 are outstanding with the public; (3) the pledge with the trustee of $14,083,000 divisional lien bonds or about 74% of the total outstanding amount; and (4) the pledge with the trustee of $4,042,000 bonds and an aggregate of over 98% of the outstanding stocks of the Nashville Railway and Light Company.

Purpose.—Proceeds will reimburse the company in part for the retirement of certain divisional lien bonds and for the cost of improvements, extensions and additions to the company's property.

12 *Months Ending May* 31—	1926.	1925.
Gross earnings	$11,836,974	$10,253,944
Operating expenses, incl. taxes & maintenance	6,646,986	5,368,844
Fixed charges (see note)	2,224,641	2,103,393

Wichita (Kan.) Water Co.—*Permanent Bonds Ready.*—The Farmers' Loan & Trust Co. is now prepared to deliver permanent first mortgage bonds in exchange for outstanding temporary bonds. See also V. 122, p. 1612.

Woodhaven Water Supply Co., N. Y. City.—*Bonds Sold.*—Love, Macomber & Co., New York, have sold at 100 and int. $1,000,000 1st mtge. 5½% gold bonds, series "A."

Dated June 1 1926, maturing June 1 1946. Red., all or part, on the first day of any month upon 30 days' notice at 105 up to and incl. June 1 1936; at 104 thereafter up to and incl. June 1 1941; at 103 thereafter up to and incl. June 1 1943; at 102 thereafter up to and incl. June 1 1945, and 101 thereafter up to May 1 1946, plus accrued interest in each case. Int. payable (J. & D.) at the Brooklyn Trust Co., New York, trustee, without deduction for normal Federal income tax not to exceed 2%. Denom. $1,000 and $500 c*. Reimbursement will be made of the Penna. and Conn. 4 mills taxes and the Mass. income tax not in excess of 6%.

Data from Letter of President A. J. Cordier, June 19.

Company.—Incorp. Feb. 28 1888 in New York. Serves that section of Greater New York known as "Woodhaven," located in the Fourth Ward of the Borough of Queens, having a population estimated to be in excess of 125,000. The total number of consumers served is 17,398. The company s properties comprise 40 acres of land on which are located 60 wells, 5 pumping stations having a daily capacity of 17,000,000 gallons of water and two reservoirs having a capacity of 4,000,000 gallons which are used to equalize the maximum draft at times of heavy consumption. The distributing system comprises about 86 miles of mains and supplies over 2½ billion gallons of water annually in this territory. The company's rates are as low as any other independent company in the Metropolitan district, using the same frontage measurement scale of rates and the same meter scale of rates as the City of New York. Water is furnished to 1,214 hydrants for fire and other purposes.

Capitalization (Upon Complation of Present Financing).

1st mtge. 5½% gold bonds, series "A" (this issue)	$1,000,000
Capital stock (8,000 shares of $50 par value)	400,000

Security.—These bonds will be secured by a direct 1st mtge. on the entire physical properties of the company now owned or hereafter acquired, funds to be deposited with the trustee to retire $827,000 of mortgage debt due Jan. 1 1928.

Additional bonds (other than for refunding purposes, par for par) may be issued only to the extent of 75% of the net cost of expenditures made for permanent extensions, enlargements and additions subsequent to June 1 1926 of and to the properties of the company, provided net earnings for the 12 consecutive calendar months within the 15 months immediately preceding application therefor shall have been equal to at least twice the annual interest requirements on all 1st mtge. bonds outstanding and for the issuance of which application is then made.

Purpose.—The proceeds will be used for the retirement of $827,000 of mortgage debt maturing Jan. 1 1928 and for other corporate purposes.

Earnings for Calendar Years—	1923.	1924.	1925.
Gross revenues	$262,162	$285,488	$305,314
Oper. expenses, maintenance & taxes (except Federal income tax)	106,665	122,698	123,818
Net earnings	$155,497	$162,790	$181,496
Interest on total mortgage debt			55,000
Balance avail. for deprec., Federal income taxes, &c			$126,496

Dividends have been paid regularly on the common stock at increasing rate since the inception of the company.

INDUSTRIAL AND MISCELLANEOUS

Refined Sugar Prices.—On June 21 Arbuckle Bros. reduced price 15 pts. to 5.45c. Arbuckle Bros. established price of 5.45@5.60c. per lb. on June 22 and of 5.45@5.50c. on June 24. Also on June 24 National Sugar accepted business at 5.60c. per lb.

Matters Covered in "Chronicle" June 19.—(a) Deliveries of refined copper exceed production; stocks on June 1 the smallest this year, p. 3393. (b) J. P. Morgan & Co. in receipt of funds for payment of December interest on Chinese Ry. bonds, p. 3404. (c) Sentencing of William R. Jones, former head of failed brokerage firm of Jones & Baker, deferred; Court holds that recent reversing of conviction of Burrill Ruskay by Court of Appeals has wiped out trading statute, p. 3411. (d) Brokerage firm of Walter Kavanagh & Co., Montreal, fails; suspended from associate membership in New York Curb Market, p. 3411.

Albany Metropolitan Hotel (Albany, N. Y.).—*Bonds Offered.*—S. W. Straus & Co., Inc., are offering at 100 and int., to yield 6¼%, $1,800,000 1st mtge. fee 6¼% sinking fund gold bonds, due June 1 1938 (safeguarded under the Straus plan).

Interest payable J. & D. Denom. $1,000, $500 and $100 c*. Title insured by New York Title & Mtge. Co. Red. for the sinking fund at 101 and int. Callable, except for the sinking fund, at 104 and int. up to and incl. June 1 1930; at 103 and int. after June 1 1930 and up to and incl. June 1 1934, and at 102 and int. after June 1 1934 and before June 1 1938. Federal income tax up to 2% paid by borrowers. The following State taxes refunded: Pa., Conn. and Vt. 4 mills, Md. 4½ mills, District of Columbia 5 mills, Va. 5 mills, Mass. not to exceed 6% of int. p. a. and New Hampshire not to exceed 3% of int. p. a.

Security.—Secured by a direct closed first mortgage on the building, together with land owned in fee thereunder fronting 255.58 ft. on the east side of Eagle St., 60.18 ft. on State St. and 73.58 ft. on Howard St. The building will be 10 stories in height of strictly fireproof construction. Will contain 405 rooms, each with bath.

Valuation.—The land and completed building have been appraised by the company at $2,559,500.

Earnings.—The estimate of earnings is based on a room schedule considerably below that in effect at the only comparable hotel in Albany and lower than the average rental now being obtained in other hotels which are not in any way comparable in the conveniences and service our hotel will offer. On this basis, and after deducting taxes and operating charges, including insurance, and with a liberal allowance for vacancies, the net earnings are estimated at $270,725 per annum, which is more than $100,000 in excess of the greatest combined annual interest and sinking fund requirements on this issue.

Albany Perforated Wrapping Paper Co.—*Dividends.*—The directors have declared quarterly dividends of 50c. a share on the no par value common stock and of $1.75 a share on the 7% cumul. preferred stock, payable June 30 to holders of record June 28. (See also V. 122, p. 216.)—V. 122, p. 2500.

Allegheny Steel Co., Brackenridge, Pa.—*Par Value of Common Shares Changed.*—The stockholders on June 22 changed the authorized common stock from 35,000 shares, par $100, to 300,000 shares of no par value. The company also has an authorized issue of $3,500,000 7% cumulative pref. stock, all outstanding.

Four shares of common stock, no par value, will be issued in place of each share of the present common stock of $100 par value, leaving available in the treasury 160,000 shares of no par value common stock, which may be issued from time to time as the needs of the company require.—V. 115,p.762.

Alpine Montan Steel Corporation.—*Control.*—See United Steel Works Corp. below.—V. 122, p. 3456.

American Cigar Co.—*New Officers.*—J. L. Hardin has been elected Vice-Pres.; C. V. Seaman, Treas.; Sidney Schou, Sec., and G. E. Bolivar, Asst. Treas.—V. 122, p. 1613.

American Pneumatic Service Co.—*2d Pref. Dividend.*—The directors have declared a semi-annual dividend of $1 per share on the 2d pref. stock, payable June 30 to holders of record June 24. A like amount was paid Dec. 31 last. Previously dividends at the rate of $1 50 per annum were paid on this issue.—V. 122, p. 2802.

American Solvents & Chemical Corp.—*Debentures Offered.*—John Nickerson & Co. and Lage & Co. are offering at 99 and int., to yield 6.65%, $2,200,000 6½% 10-year sinking fund gold debentures (with stock purchase warrants).

Dated March 15, 1926; due March 15, 1936. Denom. $1,000 and $500c*. Int. payable (M. & S.) at Chase National Bank of the City of New York without deduction for normal Federal income tax not to exceed 2% per annum; Penn., Calif. and Conn 4 mills tax; Maryland 4½ mills tax and Mass. income tax not to exceed 6% refunded. Red. all or part at 105 and int. at any time upon 30 days' notice.

Data from Letter of H. I. Peffer, April 24.

Corporation.—Has been organized in Maryland and has acquired the properties and businesses of Everett Distilling Co., Jefferson Distilling & Denaturing Co., Crescent Industrial Alcohol Co., and through a wholly owned subsidiary, of Western Industries Co., all established successful companies which have been engaged in the manufacture of industrial, or denatured ethyl alcohol for a number of years. The croporation is the second largest producer and distributor of industrial alcohol in the country, with 4 modern plants located near Boston, Mass., New Orleans, La., and San Francisco, Calif., having a total capacity of about 18,000,000 gallons per annum. Corporation has also acquired by lease, with option to purchase, the plant of the Witbeck Chemical Corp., at Albany, N. Y., and acquired its good will and business with certain exceptions. This company is a producer of derivative products from alcohol, and its acquisition will favorably supplement the operations of the corporation.

The basic material, molasses, is purchased in Cuba, Porto Rico, Hawaii and the cane growing sections of this country, and transported direct to the plants by water and rail without rehandling. Industrial alcohol and its by-products are marketed throughout the United States through the corporation's own organization and jobbers.

Corporation will own or control patents for the production of various by-products of alcohol and its related products, viz.: carbonic gas, absolute alcohol, 85% magnesia and magnesia pipe covering, which should enhance the earning possibilities.

Earnings.—Net sales, and net earnings after depreciation and exclusive of non-recurring charges, available for interest and Federal income taxes of the predecessor companies (not incl. the earnings of leased plant) were as follows:

Calendar Years—	1925.	1924.	1923.
Net sales	$6,830,484	$4,846,807	$3,575,725
Net earnings	1,014,847	736,173	619,165
Deb. int. requirement, times earned	7.09	5.14	4.32

For the 3-year period the average annual net earnings were $790,062 or 5.52 times the interest requirement on this issue of debentures.

Capitalization—	*Authorized.*	*Outstanding.*
6½% 10-year sinking fund gold debentures	$2,200,000	$2,200,000
xConv. partic. preference stock (no par value)	160,000 shs.	100,000 shs.
Common stock (no par value)	320,000 shs.	160,000 shs.

x 160,000 shares of common stock are reserved for conversion by holders of preference stock and 55,000 shares of preference stock are reserved for sale to holders of the stock purchase warrants issued with debentures.

Assets.—The balance sheet as of Dec. 31 1925, after giving effect to the present financing, shows current assets of $2,284,573, current liabilities of $779,438, and net tangible assets of $3,927,716 or nearly $1,800 for each $1,000 debenture.

Valuation.—According to a valuation as of Dec. 15 1925, by the General Appraisal Co. of the plant formerly owned by the Western Industries Co. and valuations as of Nov. 30, 1925 by the American Appraisal Co. of the other properties, the net sound value of the fixed assets totals $2,472,340.

Stock Purchase Warrants.—These debentures will carry detachable stock purchase warrants, entitling the holders to purchase from the corporation at any time on or before March 15 1936, convertible part cipating preference stock at $40 per share flat, at the rate of 25 shares for each $1,000 of debentures. An adjustment in price, as provided in the indenture, will be made in the event of the future issue of preference stock for cash or porperty at less than $40 per share.

Preferred Stock Provisions.—The preference stock is preferred as to assets and cumul. divs. at the rate of $3 per share per annum from April 1, 1926, over the common stock is entitled in liquidation to $40 per share and accrued dividends at said rate, and is callable at $60 and divs. When divs. are paid on the common stock, the preference stock is entitled to participate in such distribution share for share, until it shall have received an aggregate of $4 per share in any one year. Convertible at any time into common stock share for share. Each share of preference stock has two votes, and each share of common stock has one vote.

The entire proceeds from the sale of preference stock through the exercise of the rights evidenced by the stock purchase warrants will be used to retire debentures. Warrant owners will have the further privilege, as provided in the indenture, of making payment for preference stock with debentures at par and int.

Sinking Fund.—Commencing Dec. 15 1926, and quarterly thereafter, the corporation will deposit with the trustee in cash $25,000 as a sinking fund

for the retirement of debentures either by purchase or by call by lot at 105 and int. The indenture also provides for an additional sinking fund payable on Apr 1 1 1927, and on April 1 of each year thereafter to an amount in cash equivalent to 20% of the amount by which the consolidated net net earnings of the corporation for the preceding calendar year, after deducting all charges and an amount equal to the cumulative dividend requirements for that year on the preference stock, exceed $300,000. In lieu of cash, as above provided, the corporation may deliver debentures at cost, but not in excess of the redemption price. The corporation shall receive credit upon sinking fund requirements for debentures retired as a result of the exercise of warrants. Debentures retired through the sinking fund shall be cancelled.

Purpose.—The proceeds of tbis issue and of the sale of stock of the corporation have been used in acquiring the assets and business of Crescent Industrial Alcohol Co., Everett Distilling Co., Jefferson Distilling & Denaturing Co. and Western Industries Co., to provide additional working capital and for other corporate purposes.—V. 122, p. 3086.

American Writing Paper Co.—*Reorganization.*—

The proposed plan of reorganization submitted by the committees of stockholders and bondholders, further details of which will be published in a subsequent issue, calls for the formation of a new company with an issued capital of $5,500,000 new 6% 1st mtge. bonds, $1,000,000 4% serial notes, $9,000,000 of 7% pref. stock, par $100, and 140,000 shares of no par value common stock. The plan further provides that: (*a*) Holders of the present 6% 1st mtge. bonds will receive for each $1,000 held, $500 par value of new 1st mtge. bonds of 1947 and $680 of the new pref. stock; (*b*) secured debtors will receive $500 in cash, $500 par value in new serial notes and $150 par value in voting trust certificates for new preferred; (*c*) unsecured debtors will receive $100 cash and $900 par value voting trust certificates for new preferred stock.

Holders of the present preferred stock will be assessed $10 a share and for each 100 shares held will receive $500 of new 1st mtge. bonds, 5 shares of new pref. and 60 shares of new common stock. If holder does not elect to purchase new stock, he can receive 1 share of new common stock without assessment. Holders of the present common will be assessed $5 a share and for each 100 shares held will receive $250 of new bonds, 2½ shares of new pref. and 25 shares of new common stock.—V. 121, p. 589, 2879.

Ames, Holden, McCready, Ltd.—*Interim Payment to Bondholders.*—

An interim payment of 30% will be made to holders of 1st mtge. 6% 25-year sinking fund gold bonds on June 30 next. The payment will apply towards principal and unpaid interest coupons, together with interest on the latter at the rate of 6%. Holders are requested to present the bonds to the Eastern Trust Co. at the time payment is claimed in order that a memorandum of payment be made on the certificates, ("Monetary Times" of Toronto).—V. 120, p. 3189.

Archer-Daniels-Midland Co. & Subs.—*Earnings.*—

Period Ended May 31 1926—	3 *Months.*	9 *Months.*
Net profit	$411,529	$1,157,999

—V. 122, p. 1767, 95.

Arlington Mills.—*Dividend Rate Reduced.*—

The directors have declared a quarterly dividend of 1½%, payable July 1 to holders of record June 23.

The company paid regular quarterly dividends of 2% from Oct. 1 1917 up to and incl. April 1 1926. In addition, extra cash dividends were paid as follows: 2% each on July 2 1917, Jan. 2, April 2, July 1 and Oct. 1 1918 and Jan. 2 1919; 4% Jan. 2 1920 and 2% April 1 1920. In April 1920 a stock dividend of 50% was also paid.—V. 122, p. 753.

Armour & Co. (Ill.).—*Buys Creamery Plants.*—

Through its subsidiary, Armour Creameries Co., the company has purchased from Receiver W. B. Harbeck the plants of the Des Moines Creamery Co. and Shotwell Produce Co. The latter plant handled poultry, while the Des Moines plant handled dairy products.—V. 122, p. 3086.

Associated Laundries of America, Inc.—*Class "A" Stock Offered.*—Stone, Seymour & Co., Inc., Syracuse, N. Y., are offering at $15 per share 12,500 additional shares of class "A" participating stock (no par value). For description, &c., see V. 122, p. 2501.

According to President Charles H. Parmelee, the proceeds are to be used to extend the chain of laundries into other cities of New York State and to perfect the organization in the cities in which the company now operates. At present the company owns and operates laundries in Syracuse, Buffalo, Utica, Elmira, Cortland, Corning and Binghamton.—V. 122, p. 3345.

Atlantic Gulf & West Indies SS. Lines.—*Listing.*—

The New York Stock Exchange has authorized the listing of $13,000,000 (of an authorized issue of $15,000,000) 5% coll. trust gold bonds due Jan. 1 1959, which are issued and outstanding.—V. 122, p. 3087, 2802.

Atlantic Refining Co.—*Notes to be Retired.*—

The $4,000,000 4½% serial gold notes due July 1 1926 will be paid off at maturity at the Equitable Trust Co., 37 Wall St., N. Y.—V. 122, p. 2656.

Belding Heminway Co.—*Definitive Notes Ready.*—

Definitive 10-year 6% conv. gold notes, dated Jan. 1 1926, are now ready for delivery in exchange for temporary bonds at the Bankers Trust Co., 10 Wall St., N. Y. City.—V. 122, p. 3456.

Berlin Building, Detroit.—*Bonds Offered.*—Harris, Small & Co. and the Union Trust Co., Detroit, Mich., are offering, at prices to yield from 5% to 5½%, $700,000 1st mtge. 5½% serial gold bonds.

Dated June 1 1926. Due serially 1927-1936, incl. Denom. $1,000 and $500 c*. Red. all or part on any interest date upon 30 days notice at 102 and int. Principal and interest (J. & D.) payable without deduction for normal Federal income tax up to 2% at the Union Trust Co., Detroit, Mich., trustee. Tax-exempt in Michigan.

Security.—These bonds are the personal obligation of David Berlin, Detroit, Mich., and in addition are secured by a first mortgage on the land at the northeast corner of Woodward Ave. and Montcalm St. (consisting of 91 feet on Woodward Ave. and 102 feet on Montcalm St.), Detroit, and 8-story building located thereon.

Valuation.—The Union Trust Co. has appraised this real estate as follows: Land, $1,100,000; building, $300,000; total, $1,400,000.

Sinking Fund.—There will be a monthly sinking fund payable to the trustee, beginning in June and operating through 1935, of 1-12 of the next maturing principal installment and 1-6 of the next maturing interest payment. For the year 1936 there will be a monthly sinking fund of 1-12 of $90,000 for principal installment and 1-6 of the next maturing int. payment.

Bingham Mines Co.—*Earnings.*—

Month of—	*May* '26.	*Apr.* 26.	*Mar.* 26.	*Feb.* 26.	*Jan.* 26.
x Net profit before depreciation & depletion (approx)	$15,000	$8,409	$23,537	$27,918	$32,177

x The earnings and equities for the first 5 months of 1926 were approximately $105,000 as compared with $236,500 for the same period a year ago. —V. 122, p. 3087, 1921.

British-American Tobacco Co., Ltd.—*Capital Increased —Stock Dividend of 25%—Rights.*—

The shareholders on June 21 increased the authorized capital stock from £22,500,000 to £30,000,000 by the creation of 7,500,000 additional ordinary shares of £1 each.

The shareholders also approved the plan to capitalize from undivided profits, £4,050,994, to be distributed on July 2 as a stock dividend on the ordinary shares pro rata among the shareholders of record July 1, at the rate of one new share for every 4 shares held.

It is the intention of the board to offer on or about July 15 to the ordinary shareholders of record July 1 additional ordinart stock at £1 per share, in the proportion of one share for every 5 ordinary shares held, payable to one of the bankers of the company in London on or before Sept. 1 1926.

The Guaranty Trust Co. is prepared to receive from bearer shareholders coupons Nos. 112 and 113, and obtain for them the bonus shares which accrue to them as of July 1 1926, and also to handle subscriptions to the additional shares to which holders will be entitled.—V. 122, p. 3345.

Building Products, Ltd.—*Annual Report.*—

Earnings for Year Ended Dec. 31 1925.

Profits from operations after providing for income taxes	$89,206
Divs. and int. on outstanding shares, bonds, &c., of constituent cos.	35,994

The income account was published in V. 122, p. 3214.

Celotex Co.—*New Financing Planned.*—

This company, manufacturers of a thermal insulating building material, has begun construction of two additional units to the four now comprising the manufacturing plant at New Orleans. To finance the construction, Hayden, Van Atter & Co., bankers of Detroit and Grand Rapids, are preparing to market in the near future an issue of $1,000,000 3-year 6% convertible gold notes computed to yield about 6%.

Upon the completion of this financing the company will have outstanding $4,000,000 of 7% cumul. preferred stock, 50,000 shares of common stock, no par value, a funded debt of 1,250,000 series A 1st mtge. gold bonds and $1,000,000 3-year 6% convertible gold notes.

Net earnings for the 6 months ended April 30 1926 amounted to $705,420, or at the rate of nearly 10 times the interest charges on the total funded debt, and upon completion of the new additional units it is estimated the annual earnings will reach $2,250,000, or over 16 times the maximum interest charges of $141,750.

Production in 1925 totaled 123,624,351 sq. ft. of Celotex and sales amounted to $5,164,127. The new units under construction when completed in October will add 400,000 ft. of Celotex to the 700,000 ft. of present daily production.—V. 122, p. 217.

Central Manhattan Properties, Inc.—*Registrar.*—

The Empire Trust Co. has been appointed registrar of the class A stock. See also V. 122, p. 3457.

Century Rubber Works, Cicero, Ill.—*Bonds Offered.*—Greenebaum Sons Investment Co. are offering at prices ranging from 100 and int. to 101 and int., according to maturity, $250,000 1st mtge. 6½% serial gold bonds.

Dated May 15 1926, maturing semi-annually, 1½ to 6 years. Interest payable M. & N. 15. Denom. $500 and $1,000 c. 2% of Federal normal income tax paid by borrower. Prin. & int. payable at offices of Greenebaum Sons Investment Co., Chicago. Monthly deposits in advance with Greenebaum Sons Bank & Trust Co., trustee, to meet interest and principal payments. Privilege to prepay by giving 60 days' written notice to trustee at a premium of 3%.

Company.—Originally incorp. March 9 1912 and the present management has been in control since 1915. The gross volume of sales since 1915 has been as follows: 1915, $38,000; 1916, $146,164; 1917, $343,673; 1918, $719,340; 1919, $950,252; 1920, $873,859; 1921, $1,300,514; 1922, $1,815,494; 1923, $1,770,976; 1924, $3,209,718; 1925, $5,277,692. Of the corporation's business 50% is the production of special brand tires for concerns like Montgomery Ward & Co., Shapleigh Hardware Co. and other large national distributing houses. The remainder of the production is the company's own brand of Century tires. The corporation operates 5 branches throughout the country, catering chiefly to commercial accounts whose volume of business is not as seasonable as the retail tire business. A large percentage of the corporation's own volume is with bus and trucking companies, using the heavy duty type of tires, this type forming the bulk of the company's production of its own brand. The capacity of the company's plant is 2,500 pneumatic automobiles tires daily, produced in its present buildings having a total floor area of 90,000 sq. ft. Equipment includes a 2,500 h.p. boiler for vulcanizing purposes and 2,500 h.p. electrical capacity for the operation of machinery. The corporation employs from 400 to 450 individuals. Plans for this year contemplate a sales volume of $8,000,000. With the financing provided by this bond issue, the corporation plans to extend its sales facilities by opening at least 10 additional branches throughout the country.

Security.—Closed 1st mtge. on land, buildings, equipment, machinery and earnings. The site of the company's plant comprises an area of 244,088 sq. ft. of land, or 5.6 acres, fronting on South 54th Ave., near West 18th St., Cicero, Ill. The plant comprises a group of 13 completed buildings. While the plant is built primarily for the manufacture of automobile tires, it is so constructed as to be readily adaptable to other types of industrial and commercial occupancy.

Valuation.—Appraisal of the land, buildings, machinery and equipment is placed at $853,225.

Earnings.—Average net earnings of the corporation for the last 3 years amounted to $210,000, which is more than 12 times the maximum annual interest charges on the entire issue, reduced semi-annually. The average for the last two years was $296,461.

Payments Guaranteed.—Prompt payment to investors of principal and int. is personally guaranteed by President Charles J. Venn. The bonds are a direct obligation of the Century Rubber Works. Officers of the corporation are Charles J. Venn, Pres.; G. H. Wheatley, V.-Pres., and Henry L. Venn, Secretary.

Chevrolet Motor Co.—*May Sales.*—

During May the company sold 70,935 cars in the United States, an increase of 23,650 over May 1925, when 47,285 cars were sold. Including Canada and overseas, total sales were 84,944 cars.

For the first 5 months of 1926 the company sold 250,927 cars in the United States, an increase of 84,138 over 166,789 in the same period of 1925. On June 1 there were 8,398 dealers, against 5,910 in the United States a year ago.

Monthly sales in the United States compare as follows:

Sales in U. S.	*Jan.*	*Feb.*	*March.*	*April.*	*May.*	*Total.*
1926	25,006	33,150	53,505	68,331	70,935	250,927
1925	11,258	18,184	36,779	53,283	47,285	166,789

—V. 121, p. 2524.

Chicago Builders' Bldg. (Corp.), Chicago, Ill.—*Bonds Offered.*—S. W. Straus & Co. are offering at prices to yield

from 5.80 to 6.05%, according to maturity, $5,000,000 1st mtge. 6% leasehold serial gold bonds (safeguarded under the Straus plan).

Dated May 28 1926, maturing 4 to 15 years. Principal and int. (M. & N. 28) payable at the offices of S. W. Straus & Co. and Continental & Commercial Trust & Savings Bank, Chicago, Ill. Denom. $1,000, $500 and $100 c. Callable on any int. date at 103 and int. to May 28 1931; at 102½ subsequent to May 28 1931, and on or prior to May 28 1936; and at 102 thereafter. Federal income tax up to 2% paid by borrower. Calif. 4 mills, Colo. 5 mills, Iowa 6 mills, Kan. 2½ mills, Ky. 5 mills, Minn. 3 mills and personal property tax refunded.

Legal Investment.—These bonds are legal investment by national banks

Security.—Secured by a direct closed 1st mtge. on a building 22 stories in height, to be erected on the southwest corner of N. La Salle Boulevard and W. Wacker Drive, and a 99-year leasehold estate on the land thereunder, fronting approximately 220 feet on W. Wacker Drive and 150 feet on N. La Salle Boulevard, covering approximately 2-3ds of the frontage on the south side of Wacker Drive between La Salle Boulevard and Wells St. The building when completed and the leasehold estate have been appraised at $8,354,000. Proceedings are now pending for the condemnation of the east 20 feet of said premises for the widening of N. La Salle Boulevard. The borrowing corporation foresaw this possibility and is planning for the building to cover only the west 200 feet of the property.

The bonds are a direct obligation of the Chicago Builders Corp., the borrowing corporation.

Earnings.—The net earnings, after operating expenses, taxes, insurance and ground rent and an ample allowance for vacancies, are estimated at $699,998 per annum, which is more than 2¼ times the greatest annual interest charge and $276,638 in excess of the greatest combined annual interest and principal payment.

Childs Co.—*Listing.*—

The New York Stock Exchange has authorized the listing on or after July 1 of 3,375 additional shares of common stock without par value, on official notice of issuance as a stock dividend, making the total amount applied for 341,760 shares.—V. 122, p. 3346.

Christiana Securities Co.—*To Pay Off Bonds.*—

The $600,000 5½% bonds, due July 1 1926, will be paid off at maturity at the office of Bankers Trust Co., New York City. The company will not issue any refunding bonds to replace them.—V. 119, p. 697.

Congress Cigar Co.—*Earnings.*—

Quarters Ended March 31—	1926.	1925.
Net profit before taxes	$403,458	$363,757

—V. 122, p. 3214, 2335.

Consolidated Retail Stores, Inc.—*Initial Div.*—

The directors have declared an initial quarterly dividend of 2% on the 8% cum. pref. stock, payable July 1 to holders of record June 19. For offering of stock see V. 122, p. 1923.

Continental Baking Corp.—*Written Dissent of Complaint Against Corporation Filed by Commissioners Nugent and Thompson.*—

Commissioners J. F. Nugent and Huston Thompson have filed a written dissent from the dismissing on April 2 last of the Federal Trade Commission's complaint against the corporation charging it with the acquisition of the capital stock of a large number of baking companies in violation of Section 7 of the Clayton Act. See also under "Current Events and Discussions" on a preceding page of this issue.—V. 122, p. 3089.

Continental Gin Co., Inc.—*Registrar.*—

The Chase National Bank has been appointed registrar for 60,000 shares pref. stock and 100,000 shares common stock. See also V. 122, p. 2197.

Corn Products Refining Co.—1% *Extra Dividend.*—The directors on June 25 declared an extra dividend of 1% (25 cents per share) in addition to the regular quarterly of 2% on the common stock, both payable July 20 to holders of record July 2. The extra dividend on the common stock is payable out of surplus earnings for the 6 months ending June 30.—V. 122, p. 2336.

(Wm.) Cramp & Sons Ship & Engine Bldg. Co.—*Omits Dividend.*—

The directors have voted to omit the quarterly dividend usually paid on June 30. On Dec. 31 1925 and Mar. 31 1926 quarterly distributions of 50 cents per share were made.—V. 122, p. 2953.

Crown Willamette Paper Co.—*Listing.*—

The New York Stock Exchange has authorized the listing of $20,000,000 1st mtge. sinking fund 6% gold bonds dated Jan. 1 1926, due Jan. 1 1951, on official notice of issuance. (For offering see V. 122, p. 487.)

x Represented by 200,000 shares of 1st pref. stock (no par value), 41,000 shares 2d pref. stock (no par value), and 1,000,000 shares of common stock (no par value).

Note.—The company is contingently liable as guarantor on $5,002,000 bonds of Pacific Mills, Ltd., which are secured by mortgages on properties of that company, having a book value of approximately $17,000,000, and also on notes receivable discounted aggregating $123,183.—V. 122, p. 3346.

Dalton Adding Machine Co., Cincinnati.—*Notes Offered.*—The Fifth-Third National Bank, W. E. Hutton & Co. and Benj. D. Bartlett & Co., Cincinnati, O., are offering at 100 and int. $1,500,000 6% sinking fund 15-year convertible gold notes.

Dated July 1 1926; due July 1 1941. Denom. $1,000, $500 and $100. Principal and int. (J. & J.) payable at the Union Trust Co., trustee, Cincinnati, O., without any deduction from interest for the Federal normal income tax up to 2%. Callable all or part at 105 on any int. date, on and from July 1 1926 to and incl. June 30 1928; at 104 on and from July 1 1928 to and incl. June 03 1930; at 103 on and from July 1 1930 to and incl. June 30 1932; at 102½ on and from July 1 1932 to and incl. June 30 1934; at 102 on and from July 1 1934 to and incl. June 30 1936; at 101½ on and from July 1 1936 to and incl. June 30 1938; at 101 on and from July 1 1938 to and incl. June 30 1940; at 100½ on and from July 1 1940 to maturity, plus accrued interest to call date.

Conversion Privilege.—Convertible on any interest date up to and incl. maturity into common stock at the ratio of 10 shares of common stock for every $1,000 note.

Data from Letter of President Harry Landsiedel, June 15.

Company.—Incorp. in Ohio in July 1914 for the purpose of purchasing and taking over all of the assets, patents, good-will, &c. ,of the Dalton Adding Machine Co. of Missouri, and continuing the business in Ohio on a more extensive scale.

Security.—Secured by a trust indenture entered into between the company and the trustee. There is no mortgage on the plant, and no mortgage can be placed upon the company or its subsidiaries without providing for the retirement of these notes. Company further agrees that so long as any of these notes are outstanding and unpaid, it will not place or cause to be placed any mortgage upon its assets, or the assets of any of its subsidiary companies.

Sinking Fund.—A semi-annual sinking fund has been provided to retire at least $1,120,000 of the present 6% notes on or before maturity as follows: $40,000 July 1 1927 and $40,000 semi-annually thereafter to and incl. Jan. 1 1941. In addition, the company, beginning with July 1 1929, and annually thereafter so long as any of the notes are outstanding and unpaid, will pay to the trustee 10% of its net earnings for its preceding fiscal year remaining after depreciation, interest, taxes, dividends on its preferred stock at any time outstanding, and the regular sinking fund requirements, are provided for, and before any dividend is paid on its outstanding common stock.

Earnings.—From Jan. 1 1923 to April 30 1926, covering a period of 3 years and 4 months, the average annual net earnings, applicable to the payment of interest, amounted to over $308,000, or over 3.4 times the annual interest charge on this issue.

Purpose.—To retire the $650,000 8% sinking fund convertible gold notes now outstanding, to pay its outstanding bank loans, and for other proper corporate requirements.

Consolidated Balance Sheet April 30 1926 *(After Financing).*

8829 Fort Hamilton Parkway (Alocin Apartments), Brooklyn, N. Y.—*Bonds Offered.*—S. W. Straus & Co. are offering at prices to yield from 6 to 6¼%, according to maturity, $550,000 1st mtge. fee 6¼% serial gold bonds, due serially June 15 1928 to June 15 1936.

Interest payable J. & D. 15. Denom. $1,000, $500 and $100 c*. Title insured by the Home Title Insurance Co. Callable at 104 and int. up to and incl. June 15 1929; at 103 and int. after June 15 1929 and on or before June 15 1932, and at 102 and int. after June 15 1932 and before June 15 1936. Federal income tax up to 2% paid by the borrowers. Penna., Conn. and Vermont 4 mills taxes, Maryland 4½ mills tax, Dist. of Columbia 5 mills tax, Virginia 5½ mills tax, New Hampshire State tax not exceeding 3% of the interest per annum and Mass. State income tax not exceeding 6% of the interest per annum refunded upon proper application.

Mortgaged Property.—The bonds are a direct closed first mortgage on two high grade 6-story elevator apartment buildings, now under construction at 8829 Fort Hamilton Parkway, Brooklyn, N. Y., and land in fee, 200 x 100 feet. Independent appraisals of land and completed building show a minimum valuation of $835,000. Completion is guaranteed to the bondholders.

Earnings.—The net annual rental earnings are estimated at $74,060, more than twice the greatest annual interest charge.

Ownership.—The bonds are the direct obligation of Alocin Court, Inc., owned and controlled by Brooklyn interests.

Electric Ferries, Inc.—*Depositary.*—

The Chatham Phenix National Bank & Trust Co. has been appointed agent and depositary for the voting trustees under the agreement dated May 21 1926, covering an authorized issue of 75,000 shares no par value common stock.—V. 122, p. 2049.

Electric Refrigeration Corp.—*Definitive Notes.*—

The New York Trust Co., 100 Broadway, N. Y. City, is now prepared to deliver definitive 10-year 6% conv. gold notes due Jan. 1 1936, in exchange for the temporary notes.—V. 122, p. 3459.

(The) Envoy (S. S. & L. P. Corp.), New York.—*Bonds Offered.*—American Bond & Mortgage Co. is offering at 100 and int., to yield from 6 to 6½%, $840,000 1st mtge. serial 6½% gold bonds.

Dated June 1 1926; due serially June 1 1928-1936. Callable at 102 and int. Individual trustee, Charles C. Moore; corporate trustee, Chatham Phenix National Bank & Trust Co., N. Y. City. Normal Federal income tax up to 2% on the annual interest paid when claimed. Penna., Conn. and Vermont 4 mills tax, Dist. of Col. and Mich. 5 mills tax and New Hamp. income tax up to 6% of the interest refundable.

Security.—Secured by a closed 1st mtge. on land owned in fee and the 16-story fireproof apartment building now under construction at the northwest corner of West End Ave. & 98th St., N. Y. City. Land fronts 91 ft. on West End Ave. and 80 ft. on W. 98th St.

The apartments will be divided into 3, 4 and 5 room suites and one 6 room apartment. Permanent light and air is assured on all sides by reason of the 20-foot court between our property line and a 7-story building on 98th St.; also a 10-foot court on West End Ave., being the northerly 10 feet of our property which is restricted against the erection of any type of structure.

Estimated Income.—It is estimated that the net annual income from operation will be approximately $119,850, which is over 2.19 times the heaviest annual interest requirements on this issue.

Exchange Buffet Corp.—*Annual Report.*—

—V. 122, p. 1177.

Famous Players-Lasky Corp.—*Stock Increase, etc.*—

The stockholders on June 25 approved the increase in the authorized common stock from 450,000 shares to 1,000,000 shares, the stock dividend of 2% recently declared and the offering of new common stock to common stockholders at $107 49 a share, at the rate of one share of new for each two shares of present common held. See details in V. 122, p. 3347.

Federal Motor Truck Co.—*Capital Changed.*—

The stockholders on June 24 voted to change the authorized capital stock from 200,000 shares, par $10 (all outstanding), to 500,000 shares of no par value, of which 400,000 shares will be issued in exchange for the outstanding $10 par value stock on the basis of two new for one old. It is the present intention of the directors to distribute as stock dividends to the stockholders the remaining 100,000 shares in 10 quarterly installments approximating 2½% of the then outstanding shares at each quarter, until the total 100,000 shares are distributed.

The directors also recommended that the annual dividend rate on the new stock be established at the rate of 80c. per share, payable in quarterly installments on the outstanding no par value stock. This is equivalent to $1 60 on the old stock, which has been receiving $1 20 per annum.—V. 122, p. 3348.

(The) First Baptist Church, Jacksonville, Fla.—*Bonds Offered.*—The Hibernia Securities Co., Inc., is offering at 100 and int. $450,000 1st mtge. 6% serial gold bonds.

Dated May 1 1926; due serially May 1 1928-36. Int. payable (M. & N.) at the Hibernia Bank & Trust Co., New Orleans, or at the American Trust Co., Jacksonville, Fla., trustees, without deduction for any normal Federal income tax up to 2%. Red. all or part in the reverse order of maturity by lot at 103 and int., on any interest date upon 30 days prior notice.

Security.—Secured by a closed first mortgage on property belonging to the Church located in Jacksonville and which forms a corner fronting 210 feet on Church St. and 105 feet on Hogan St. The improvements consist of a large modern Indiana limestone church building, having a seating capacity of 1,500, and a modern 5-story and basement steel and brick building, now in course of construction, with two elevators and all necessary furnishings to equip it as an Activities Building, to be used by the church for its Sunday school and church educational work. The Activities Building is not a specialty building and could be used without extensive alterations for commercial purposes.

These bonds will be additionally secured by deposit with and assignment to the trustees of pledges aggregating $255,000 in the form of notes, made by some of the leading citizens of Jacksonville and payable serially over a period of 5 years. The proceeds of these notes can only be used to pay maturing bonds, or with the consent of the trustees, to pay interest on these bonds.

Valuation.—The average of appraisals, taking the new building at actual cost, shows a value of the property pledged to secure these bonds of $1,022,000.

Income.—The budget of the church for 1926 was fixed at $62,000. However, more than $72,000 was raised.

Purpose.—The proceeds of this issue will be used to construct the 5-story Activities Building and to retire outstanding mortgages.

First National Pictures, Inc.—*New Plant Completed.*—Completion of a huge new production plant for First National Pictures, Inc., on a 62-acre tract acquired some time ago by the company at Burbank, Calif., just outside of Los Angeles, was recently announced. The plant was financed through an offering of $1,000,000 first mortgage 6½% serial gold bonds of First National Properties, Inc., a subsidiary organized for that purpose. See also V. 122, p. 2954.

502 Park Ave. (502 Park Ave. Corp.), N. Y. City.—*Bonds Offered.*—S. W. Straus & Co., Inc. are offering at 100 and int., $3,800,000 1st mtge. fee 6% sinking fund gold bonds. Due Oct. 1 1941 (safeguarded under the Straus plan).

Interest payable A. & O. The first interest coupon will cover 4 mos. from June 1 1926 to Oct. 1 1926. Denom. of $1,000, $500 and $100 c*. Title insured by Title Guarantee and Trust Co. Red. for sinking fund at 101 and int. Callable, except for sinking fund at 104 and int. on or before Oct. 1 1931; at 103 and int. after Oct. 1 1931, and on or before Oct. 1 1936; and at 102 and int. after Oct. 1 1936, and before Oct. 1 1941. Federal income tax up to 2% paid by borrowers. Various State taxes refunded as shown herewith: Kans., 2½ mills; Minn., 3 mills; Calif., Conn., Pa. and Vt., 4 mills; Md., 4½ mills; Dist. of Colum., Ky. and Mich., 5 mills; Va., 5½s mills; Iowa, 6 mills; New Hamp. not exceeding 3% of int. per ann. and Mass. not exceeding 6% of int. per ann.

Security.—Secured by a direct closed first mortgage on a 30-story, fireproof, office and apartment hotel building to be erected on the northwest corner of 59th St. and Park Ave., N. Y. City; together with land owned in fee thereunder fronting 100 ft. 5 ins. on Park Ave. and 140 ft. on East 59th St. The second, third and fourth floors of the building will be divided into 46 high-class office suites with a separate entrance from 59th St., and with two special elevators running only to the fourth floor. There will also be 9 shops on the 59th St. frontage. Above the fourth floor there will be 178 apartments in units of from 1 to 4 rooms.

Valuation.—Land and building have been appraised at $5,576,360.

Earnings.—The diversity of earning power comprising revenue from store offices and apartment hotel suites is an exceptionally strong feature of this loan. The estimated net annual earnings are $458,334 per annum after deducting taxes, all operating charges including insurance and with a liberal allowance for vacancies. This sum is more than $125,000 in excess of the greatest annual interest and sinking fund requirements combined.

Ownership.—These bonds are the direct obligation of 502 Park Avenue Corp. of which David J. Rubinstein, President and controlling stockholder.

Folmer Graflex Corp.—*Eastman Co. to Handle Products.*

The Eastman Kodak Co. makes the following announcement: "Complying with a Court decree, the Eastman Kodak Co. has sold its Folmer-Century plant and the line of cameras and accessories manufactured therein to the Folmer-Graflex Corp., a new and independent company with William F. Folmer as President. The Folmer-Graflex Corp. will from now on manufacture Graflex cameras and the Century line of professional cameras and equipment. These goods, however, may be secured from this company exactly as before, as this company's selling organization is to be supplied by the Folmer-Graflex Corp. with a full line of these products."

Depositary Appointed.—

The New York Trust Co. has been appointed depositary for the company's pref. and common stock. See offering in V. 122, p. 3216.

Follansbee Bros. Co.—*Bonds Called.*—

One hundred ninety 20-year 7% collateral trust gold bonds, dated March 1 1921 (numbers ranging between 1 and 3975), have been called for redemption Sept. 1 at 103 and int. at the Bankers Trust Co., trustee, 10 Wall St., N. Y. City.—V. 120, p. 3320.
—V. 120, p. 3321.

Forhan Company.—*Earnings.*—

5 Mos. Ended May 31—	1926.	1925.
Net profit after Federal taxes	$188,328	$239,364

—V. 122, p. 3091, 1034.

(H. C.) Frick Coke Co.—*To Retire Bonds.*—

The $589,000 5% bonds, due July 1 1926, will be paid off at the office of Union Trust Co., Pittsburgh, Pa. No new financing is contemplated. The company is a subsidiary of the United States Steel Corp.—V. 112, p. 2195.

Gabriel Snubber Mfg. Co.—*New President.*—

George H. Ralls, who has been for several years sales manager and general manager of the company, has succeeded Claude H. Foster as President. Mr. Foster has been elected Chairman of the board and will continue to be active in the affairs of the company.—V. 122, p. 3348.

General Electric Co.—*Listing.*—

The New York Stock Exchange has authorized the listing on or after July 15 of $7,211,484 additional special stock, par $10 on official notice of issuance as a stock dividend, making the total amount applied for $42,947,280.—V. 122, p. 3217.

General Refractories Co.—*Dividend Rate Increased.*—

The directors have declared a quarterly dividend of 75 cents per share on the common stock, no par value, payable July 15 to holders of record July 7. From July 1924 to April 1926, incl., the company paid quarterly dividends of 50 cents per share on this issue.—V. 122, p. 2805.

Gilchrist Co., Boston.—*Earnings.*—

—V. 122, p. 2199.

Goodyear Cotton Co. of Canada, Ltd.—*Preferred Stock Offered.*—Dickson, Joliffe & Co., Toronto, are offering at 99 and divs., to yield 7.07%, $475,000 7% cumulative preferred shares (par value $100).

Dividends payable Q.-J. Preferred as to assets and dividends. Callable all or part at 100 and dividends on any dividend date on 30 days' notice. Registrar and transfer agent, Montreal Trust Co., Montreal.

Data From Letter of C. H. Carlisle, President of the Company.

Company.—Organized in March 1926 at the instance of the Goodyear Tire & Rubber Co. of Canada, Ltd. Has acquired a modern cotton mill located at St. Hyacinthe, Que., for the production of tire fabrics and of cotton duck used in the manufacture of mechanical rubber goods such as hose and belting. Owns 8 acres of land having a siding on the Canadian National Rys., and a thoroughly up to date cement and brick plant containing 166,800 sq. ft.

Valuation.—According to an appraisal made Sept. 10 1925, the land, buildings and equipment showed a net depreciated replacement cost of $1,013,660. Additional machinery and equipment costing well over $150,000 and having a much greater value than its cost to us, is now being installed.

Capitalization—	*Authorized.*	*Issued.*
1st mtge. 6% bonds	$300,000	$300,000
7% cumul. pref. shares, par $100 (this issue)	475,000	475,000
Common stock (no par value)	5,250 shs.	5,250 shs.

Control.—All the common stock (except directors qualifying shares) is owned by the Goodyear Tire & Rubber Co. of Canada, Ltd.

Contract.—The continuous profitable operation of the Goodyear Cotton Co. of Canada, Ltd., is assured by a contract with the Goodyear Tire & Rubber Co. of Canada, Ltd., under which the latter has agreed to purchase a minimum of 300,000 lbs. of fabric per annum so long as any of the 1st mtge. bonds or preferred stock of the Cotton company may be outstanding. This contract assures the Cotton company of the payment of a sum sufficient to meet the following: (*a*) Gross cost of manufacture; (*b*) bond interest and sinking fund; (*c*) cumulative preferred stock dividends, and (*d*) all other expenses and charges of every kind whatsoever.

Preferred Stock Provisions.—In event of dividends to the extent of 10% being in default, preferred stock has sole voting right, until arrears are paid in full. So long as any of preference stock shall be issued and remain outstanding, the company shall not issue any bonds, debentures or other class of stock ranking prior to such preference stock, with the exception of $300,000 of 1st mtge. bonds. See also offering of bonds in V. 122, p. 3349.

Gotham Silk Hosiery Co., Inc.—*Pref. Stk. Converted.*—It is announced that the first $1,000,000 1st pref. stock has been converted into non-voting common stock at $40 per share. The second $1,000,000 of the 1st preferred is convertible into non-voting common at $45 per share.—V. 122, p. 3459.

Great Falls Mfg. Co., Boston.—*Balance Sheet April 30.*

—V. 122, p. 3321.

Guardian Discount & Finance Corp.—*Stock Offered.*—The Corporation Service & Finance Co., Inc., Albany, N. Y., is offering 10,000 shares of 7½% preferred stock (par $100) and 10,000 shares of common stock (no par value) at $130 per unit (each unit consisting of one share of preferred and one share of common stock.

The pref. stock is red. at 110 and divs. at any dividend period on 60 days notice. Both classes of stock are fully paid and non-assessable and exempt from normal Federal income tax. Divs. on pref. stock payable Q.—J.

The bankers' circular says in part:

Business.—The principal business of this corporation is the purchase from manufacturers, wholesale dealers, &c., of their accounts receivable and trade acceptances, representing goods sold and delivered.

The company also finances the purchases of standard makes of new passenger automobiles, buying from dealers of recognized financial responsibility the purchase-notes given by their customers for the unpaid balance of the purchase price of new cars bought on the partial payment plan. It is required that at least one-third of the purchase price must be paid at the time of sale and about 90% of such total sales are so made. Such notes are secured by a mortgage on the car which must be fully covered by insurance.

This corporation will have an investment and mortgage department to handle issues of merit and first mortgage loans in Greater New York.

The assets of this corporation will always remain in a highly liquid state. There is no investment in plant, building, machinery or stock in trade—or even in long-term paper. Liquidation could occur within a period not to exceed five months, and would show a current profit during that period.

Capitalization.—The authorized capital stock will consist of $2,000,000 7½% preferred stock, par $100, and 20,000 shares of common stock, no par value.

Directors.—E. V. Harman (Pres.), A. E. Stilwell (Chairman & Vice-Pres.), Frank H. Richmond (Vice-Pres.), Newton W. Gilbert (General Counsel), Lester C. Burdett (Sec. & Treas.), Edwin Q. Bell, Paul T. Brady, B. E. Bushnell, H. M. Davis, Louis Gold, Mitchell Hall, Walter S. Josephson, G. A. Knoche, Robert M. McBride, Frederick D. Nims, W. H. O'Toole, E. E. Peterson, W. F. Prior, Frank P. Ranahan, N. I. Stone, Joseph A. Schuchert, John M. Switzer and Ernest Uehlinger.

Hibbard, Spencer, Bartlett & Co.—*Extra Dividend.*—The directors have declared three monthly dividends of 35c. per share, payable July 30, Aug. 27 and Sept. 24, and an extra div. of 20c. a share to be paid Sept. 24. Each div. will be payable to holders of record at the close of business on the last Friday preceding the date of the div. payment. An extra of 20c. per share was also paid on Mar. 26 and June 25 last.—V. 122, p. 1618.

x Including land department interest and rents and transfer fees. y After deducting proposed final distribution of £35,000 charged to land account for the year ended Jan. 31 1926.—V. 122, p. 3460, 757.

Hudson River Navigation Corp.—*Registrar.*—
The Farmers Loan & Trust Co. has been appointed registrar of the company's 8% pref. and common stock.—V. 122, p. 2509.

Industrial Finance Corp.—*Refunding Approved.*—
The corporation has received approval from the Virginia Corporation Commission to refund its 6% pref. stock and accumulated dividends by replacing it with 7% pref. stock on the basis of 1.3 shares of new for every share of old. The exchange offer will expire July 20. (See also V. 122, p. 892.)
The Farmers' Loan & Trust Co. has been appointed registrar of the 7% pref. stock.—V. 122, p. 3092.

International Paper Co.—*Strengthening Its Forest Reserves.*—The company on June 10 made the following announcement:
With a view to strengthening its forest reserves, the company has recently acquired the Ste. Anne des Monts timberlands. The company also has just acquired approximately 2,000 square miles of Crown timber limits on the Upper Ottawa and Gatineau rivers in the Province of Quebec. Because of its location and stand of timber this purchase is of peculiar value to the company and will permit the enlargement as market conditions require of both the Kipawa and Gatineau Mills, as well as reinforce the available supply for the newsprint mill which the company contemplates building on the Quinze (Upper Ottawa) River some time during the next four years.
These acquisitions of timber limits reflects a policy of balancing mill construction with adequate timber reserves so that the company's mill properties will be assured of permanence. The opposite policy of building or expanding mills beyond the capacity which their timber reserves justify has in the past been productive of serious injury not only to the industry but also to the communities in which it is located.—V. 122, p. 3092.

Kresge Department Stores, Inc.—*Earnings.*—

Quarters Ended April 30—	1926.	1925.
Net sales	$2,299,865	$2,069,419
Gross profit	705,821	697,004
Operating profit	loss252,992	16,934
Other income (net)	181,839	85,856
Net profit	loss$71,153	$102,790
Provision for Federal taxes	------	12,965
Balance	loss$71,153	prof $89,825

President S. S. Kresge stated:
"The above figures do not reflect the important transactions, which took place after the close of the first quarter, in connection with the sale of the real estate holdings to the Kresge Foundation and which resulted in the financial condition of Kresge Department Stores, Inc. being improved very materially.
"Kresge Department Stores, Inc. has been relieved of the burden of carrying large real estate holdings and thus enabled to use its assets, which are practically all liquid, in the merchandising of its stores. It will rent the buildings from The Kresge Foundation on long term leases and on a favorable basis.
"After giving effect to the sale of the real estate, there will be eliminated from the Kresge Department Stores, Inc. balance sheet the real estate holdings and also notes payable in the amount of $4,500,000, which represent money borrowed on my personal guarantee for construction of the building at Newark. While as of Jan. 31 the balance sheet showed an excess of current liabilities over current assets of more than $1,000,000, the balance sheet as of April 30 giving effect to the changes aforesaid will show a situation entirely reversed and materially improved.
"With respect to the operations, the Palais Royal, Inc., which is the Washington store, continued to show a profit, but the operations of the Plaut store in Newark showed a loss. Operations at the latter store have been under a severe handicap, due to the construction work which is under way. The sales volume of this store has not yet assumed its proper proportions, owing to this construction work, and on account thereof the store will probably operate under difficulties until the end of the year."—V. 121, p. 1916.

(The) Kresge Foundation.—*Temporary Notes Ready.*—
The Chase National Bank announces that it is prepared to exchange its outstanding interim receipts representing the Kresge Foundation 10-year collateral trust 6% gold notes for the temporary notes. See also offering in V. 122, p. 3093.

Lefcourt Empire Building, N. Y. City.—*Bonds Offered.*—S. W. Straus & Co. are offering at prices to yield from 5.65% to 6%, according to maturity, $800,000 1st mtge. fee 5¾% serial gold bonds.

Due serially, semi-annually, Dec. 15 1928 to June 15 1941. Int. payable J. & D. 15. Denom. $1,000, $500 and $100 c*. Title insured by Lawyers Title & Guaranty Co. Callable at 104 and int. on or before June 15 1931, at 103 and int. after June 15 1931 up to and incl. June 15 1936, and at 102 and int. after June 15 1936 and before June 15 1941. Federal income tax up to 2% paid by the borrowers. Penna. and Conn. 4 mills taxes, Maryland 4½ mills tax and Mass. State income tax not exceeding 6% of the interest per annum refunded upon proper application.
Security.—The bonds are a direct closed first mortgage on the 20-story Lefcourt Empire Building, now under construction on the west side of Sixth Ave. (625-627 Sixth Ave.), between 36th and 37th streets, and land in fee, 50 x 100 feet. Land and completed building are valued by Spear & Co., Inc., at $1,100,000. Completion is guaranteed to the bondholders.
Earnings.—A considerable amount of space in the building, designed especially for the millinery trades, has been leased. Based on these leases, the net annual rental earnings are conservatively estimated at $120,000, nearly three times the greatest annual interest charge.
Ownership.—The bonds are the direct obligation of Felcourt Realty Corp., owned and controlled by the interests headed by A. E. Lefcourt, who also own 15 other valuable properties in this neighborhood.

Lehigh Coal & Navigation Co.—*Committee Organized.*—
A statement issued by the company says in substance: "The committee appointed by the President in accordance with the resolution adopted Feb. 23 1926 (V. 122, p. 1179), to review the capital structure of the company and report to the board of managers their recommendations (see V. 122, p. 3350), met and organized by the election of Thomas S. Gates as Chairman and Henry H. Pease as Secretary of the committee. The meeting adjourned to afford the members time to study the problem which, owing to the great variety of the company's interests, will require a considerable length of time."—V. 122, p. 3462.

Lehigh Valley Coal Co.—$1 25 *Dividend.*—
The directors have declared a dividend of $1 25 a share, payable Aug. 2 to holders of record July 10. The company made disbursements of like amount on Jan. 31 and Aug. 1 1925.—V. 122, p. 1775.

Lion Oil Refining Co.—*New Directors.*—
F. C. Kaths, Kansas City, Mo. and J. K. Mahony, Eldorado, Ark., have been elected directors. Mr. Kaths has also been elected a member of the executive committee.—V. 122, p. 2957.

Louisard Realty Co., Inc.—*Corporate Trustee.*—
The Chatham Phenix National Bank & Trust Co. has been appointed corporate trustee of an issue of $200,000 6½% 1st mtge. gold bonds, maturing serially March 15 1928 to March 15 1936 incl.

(The) Loyola Apartments (Loyola Building Corp.), Chicago.—*Bonds Offered.*—Greenebaum Sons Investment Co. are offering at prices ranging from 100 and int. to 101 and int., according to maturity, $475,000 1st mtge. 6½% serial gold bonds.

Dated May 1 1926; due serially (M. & N.) from May 1 1929 to May 1 1938. Denom. $100, $500 and $1,000 c. 2% Federal normal income tax paid by borrower. Principal and interest (M. & N.) payable at offices of Greenebaum Sons Investment Co., Chicago. Monthly deposits in advance with Greenebaum Sons Bank & Trust Co., trustee, to meet interest and principal payments. Privilege to prepay by giving 60 days' written notice to trustee, at a premium of 3%.
Security.—Closed first mortage on land, building and equipment. The Loyola Apartments, when completed, will be 8 stories and English basement high, of concrete, fireproof construction. The building will contain 72 apartments, including 32 2-room kitchenettes, 32 3-room kitchenettes, and 8 of one room with full kitchen.
Income.—According to estimates, the annual income from the property, will be as follows: Gross income, $83,520; operating expenses, $20,000; leaving a net income of $63,520 which is more than twice the maximum annual interest charges on the entire issue, reduced semi-annually by substantial serial payments of principal. The entire earnings of the property comprise part of the security for the first mortgage.

M. L. A. Investment Co., Milwaukee, Wis.—*Bonds Offered.*—The Second Ward Securities Co., Milwaukee & Chicago, are offering at prices to yield from 5.10% to 5.50%, according to maturity, $425,000 1st mtge. 5½% serial gold bonds.

Dated June 1 1926, maturing serially from June 1 1928 to June 1 1936. Interest payable J. & D. at the office of the Second Ward Savings Bank, Milwaukee, and principal will be payable at the First Wisconsin Trust Co., trustee, Milwaukee. Denom. $1,000, $500 and $100 c*. Callable, all or part, on any int. date on 30 days' prior published notice at par and int. plus a premium of ¼ of 1% for each year or fraction thereof between the date of maturity and the date fixed for redemption.
Legal Investment.—In the opinion of counsel these bonds are legal for trust fund investment in Wisconsin.
Company.—A Wisconsin corporation. Owns and operates a number of business buildings and apartments in Milwaukee and also engages in the real estate brokerage business. All of the stock of the company is owned by M. L. Annenberg, President.
Security.—These bonds are secured by a direct first mortgage lien on the on the following fee properties:
(1) Northwest corner of 27th and Wells Sts., Milwaukee. This property has a frontage of 255.26 on 27th St. and 105 feet on Wells St. It consists of 3 pieces, the first occupying the corner of 27th and Wells Sts., 105 feet on Wells St. and 125 ft. on 27th St. The building, known as the Cecelia Apartments, is a 4-story fireproof building of reinforced concrete. This building contains 32 apartments and 6 stores. Next to the Cecelia is the West Point Garage, with a frontage of 100 feet on 27th St. and a depth of 220 ft. This garage is a fireproof building of brick and steel construction. Next to the garage is a lot 35 feet on 27th St., with a depth of 150 ft. On this lot is a modern frame duplex, each apartment containing 8 rooms.
(2) Northeast corner of 27th and Wells Sts., Milwaukee. This property has a frontage of 150 ft. on 27th St. and 75 ft. on Wells St. On this piece of property is located the West Point Apartments, a fireproof building of reinforced concrete construction. This building contains 21 apartments and 7 stores.
(3) Southeast corner of 12th and Wells Sts., Milwaukee. This property has a frontage of 40 ft. on 12th St. and 70 ft. on Wells St. The building on this property is known as the Muriel Apartments. This building is fireproof and constructed of reinforced concrete. There are 12 apartments and 4 stores in the building.
Guarantee.—As additional security there will be deposited with the trustee the personal unqualified guarantee by M. L. Annenberg of prompt payment of both principal and interest of these bonds.
Valuations.—The land, and buildings have been appraised at $851,190.
Earnings.—Earnings for the year 1925 available for interest charges were $76,000, or more than 3 times the maximum interest charges on these bonds.
Purpose.—The proceeds will be used to retire present outstanding indebtedness and for other corporate purposes.

Mack Trucks Real Estate, Inc.—*To Pay Off Notes.*—
The $200,000 secured gold 6% notes, series A, due July 15 1926, will be paid off at maturity at the Chase National Bank, 57 Broadway, N. Y. City.—V. 122, p. 1620.

(The) Manhattan Refrigerating Co.—*Bonds Offered.*—E. H. Rollins & Sons, Arthur Perry & Co. and Tucker, Anthony & Co. are offering at 97½ and int., to yield 5.75%, $2,000,000 1st mtge. sink. fund gold bonds, series "A" 5½%.

Dated July 1 1926; due July 1 1941. Red. all or part at 102½ and int. on 45 days notice to and incl. Jan. 1 1929, and thereafter at 102½ and int., less a reduction of 1-10% for each 6 months of expired term from Jan. 1 1929 to maturity. Semi-annual interest (J. & J.) at Central Union Trust Co. of New York, trustee. Denom. $500 and $1,000 c*. Company agrees to pay interest without deduction for any normal Federal income tax not exceeding 2%, and to reimburse resident holders of these bonds, for the 4 mill tax in Penn. and the Calif. personal property tax not exceeding 4 mills, and for the income tax, not exceeding 6% on the interest thereon in Massachusetts.
Legal Investment.—These bonds are a legal investment for trust funds in New York.

Data From Letter of Pres. T. A. Adams, New York, June 17.

Company.—Incorp. in 1894 in New York. Has been successfully engaged in the cold storage business for 32 years. Its business, consists principally of the cold storage of perishable food. In addition it furnishes refrigeration under a City franchise to customers in the adjacent West Washington and Gansevoort market districts in New York City. Its plant is within the city block bounded by West, Gansevoort, Washington and Horatio Sts. It has excellent railroad facilities. The tracks of the New York Central RR. directly serve its loading platforms. As a consequence food products from various parts of the United States, such as beef, poultry, meat products, eggs, butter and other dairy products, fruits and other perishables may be stored as a supply for the local New York market and also for the export market under very favorable traffic and shipping conditions.
The company owns franchises: (a) to own and operate a street pipe line system to supply refrigeration to a district bounded generally by West 15th St., West 4th St., Horatio St., West St., and 10th and 11th Aves., the Borough of Manhattan. Under this franchise, which extends beyond the maturity of these bonds, the company refrigerates approximately 1,000,000

cubic feet of customers space; (b) to maintain a pipe line to the Hudson River, by which the company obtains water for plant purposes. The company, under a franchise granted by the City to the New York Central RR., has for its exclusive use loading switches which directly serve the company's warehouse platforms.

Capitalization (After Financing)—	*Authorized.*	*Outstanding.*
First mortgage 15-year 5½% bonds	$5,000,000	$2,000,000
Preferred stock	900,000	700,000
Common stock	200,000	200,000

Earnings for 12 Months Ended April 30 1926.

Gross earnings	$552,001
Operating expenses, maintenance and taxes	283,436
Net earnings	$268,565
Annual interest on these bonds	110,000
Balance	$158,565

Results for Calendar Years—	1925.	1924.	1923.
Gross revenue	$536,932	$474,374	$453,446
Operating expenses	292,781	264,016	237,460
Net avail. for bond int., Fed. taxes, deprec. & divs.	$244,151	$210,357	$215,986

Security.—Secured by a direct first mortgage on real estate, buildings and equipment independently appraised at a depreciated value of over $3,200,000 including additions about to be made.

In addition to the properties under the mortgage, the company owns a street pipe line refrigerating system and valuable franchise rights granted by the City of New York and covenants that, in the case of disposal of this pipe line and (or) any of its franchises, the proceeds derived therefrom shall be used to retire these bonds by purchase or call. The total plant and properties of the company are independently appraised at a depreciated value of over $3,440,000 including the addition about to be made.

Sinking Fund.—The mortgage provides for the annual payment of $140,000 to the trustee in equal semi-annual payments which are to be applied, first to the payment of interest on outstanding bonds, and the balance to the retirement of bonds by purchase or by call which will retire approximately 33% of this entire issue before maturity even at the call prices.

Purpose.—The proceeds will be used to refund $618,500 of outstanding mortgages, to purchase properties under option to the amount of $786,980, for the construction of additional storage space and other corporate purposes.

Balance Sheet, April 30 1926 (After Financing).

For the nine months ended May 31 1926 net income, after provisions for Federal taxes and all other charges, amounted to $395,407, as compared with $200,575 for the corresponding period last year.—V. 122, p. 1775, 490.

Medical Arts Building (The Medical Building Co., Inc.), Atlanta, Ga.—*Bonds Offered.*—

Adair Realty & Mortgage Co., New York, are offering at prices to yield from 6¼ to 6½%, according to maturity, $625,000 6½% 1st mtge. serial gold bonds.

Dated March 15 1926; due 1928 to 1938. Int. payable M. & S. at the offices of the Adair Realty & Mortgage Co., Inc., New York. Callable at 102 and int. on any int. date upon 30 days' notice. Federal income tax up to 2%, personal property tax, Penna., Conn., Maryland, Dist. of Col., Mass. income tax up to 6%, refunded.

Security.—First mtge. on land, buildings and complete equipment valued at $957,405, and, in effect, a first lien upon annual net earnings conservatively estimated at $90,062.

Montreal Dry Ice & Products, Ltd.—*Pref. Stock Offered.*—

Ryan, Grier & Hastings, Ltd., Montreal, Can., are offering at par ($100) $550,000 7% cumulative preference stock (carrying a bonus of two shares of common stock with each share of pref. stock).

Pref. divs. will be cumulative from July 1 1926. Callable at 105. The pref. shares will be entitled to full voting power should the pref. stock be one year in arrears of dividend, this proviso, however, not to take effect before April 15 1929. The Bank of Nova Scotia, bankers; Crown Trust Co., Montreal, registrar; The Eastern Trust Co., Montreal, transfer agent.

Data from Letter of S. E. Elkin, Managing Director of Dry Ice Co., Ltd.

Property.—The proposed property comprises an area of approximately 64,000 sq. ft. on Christopher Colombe St.—C.P.R. works and yards—thus affording excellent facilities as a distributing centre for the company's products, both locally and for rail shipment. Company intends to proceed at once with the erection of a 25-ton unit, which, according to the engineers' estimates, will produce 25 tons of dry ice and 26 tons of hydrated lime per day. It will also have an excess of oxygen and liquid CO_2, sufficient to meet the local market demand. It is planned to have the plant in operation about Sept. 30 1926. Estimated cost of plant, including organization, site, railway sidings, buildings, manufacturing and delivery equipment, patents, &c., is $371,000. Working capital on completion of plant is estimated at $179,000. In the construction and equipment of the 25-ton unit provision has been made so that an additional unit of 45 tons per day can be added at approximately the same initial cost as the 25-ton unit.

This plant will be constructed for the Montreal Dry Ice & Products, Ltd., by our company under contract as to cost of plant and products, and we have undertaken to operate the plant for their company until such time as contract conditions have been fulfilled.

Patents.—The processes of manufacture and distribution of the company's products are fully protected by patents. Our agreement with the company will entitle it to all future technical improvements and patent protection arising from same. The agreement also includes the option on the manufacturing and sales rights for the Province of Quebec.

Capitalization (Upon Completion of Financing).

	Authorized.	*Outstand'g.*
7% cumulative preference shares (par $100)	$1,000,000	$550,000
Common shares (no par value)	40,000 shs.	22,000 shs.

Dry Ice.—Is the most economical form of refrigeration available to-day. It competes successfully with either water ice or mechanical refrigeration. Being dry it eliminates the unsanitary and labor cost features of water ice. Its use does not entail heavy expenditures for equipment and the resultant continuous operating and depreciation charges brought about by the use of the electrical or mechanical refrigeration devices.

Estimated Earnings.—The present market value of dry ice is $100 per ton, but figured upon a more conservative basis, however, in anticipation of our creating more diversified uses and allowing for substantial reduction in price, and taking into consideration lime sales only in conjunction with dry ice, net earnings should after depreciation show approximately 5 times the preferred dividend requirements.

Subscriptions for Pref. Stock.—Payable 25% on application; 30% July 15; 25% Aug. 16, and 20% Sept. 30. Installment payments may be anticipated and payment in full made at any time.

Provisional Directors of Montreal Dry Ice & Products, Ltd.—John I. Rankin, J. R. Ryan, W. E. Burke, S. E. Elkin and T. P. Phelan.

Page-Hersey Tubes, Ltd.—*Preferred Stock Offered.*—

A. E. Ames & Co., Ltd., and Aldred & Co., Ltd., Montreal, Canada, are offering at par ($100) and divs. $3,000,000 7% cumul. conv. preference stock.

Fully paid and non-assessable; preferred as to divs. and assets; entitled to cumul. preferential cash divs. at the rate of 7% per annum, payable quarterly by cheque at par at any branch in Canada of the company's bankers (The Dominion Bank); callable all or part at 110 and divs. on 90 days' prior notice, at the option of the company, or the company may purchase for redemption in the open market up to 110 and divs.; conv. at the option of the holder at any time up to and incl. Jan. 1 1934 into no par value common stock on the basis of one share preference stock for two shares no par value common stock, unless called prior to that date, in which case the holder shall have the right of conversion until the expiration of the 90-day redemption notice. Transfer agent, National Trust Co., Ltd. Registrar, Montreal Trust Co.

Data from Letter of W. W. Near (to be Elected President) June 18.

Company.—Is being incorp. with a Dominion charter to acquire and operate the business, plants and undertakings of Page-Hersey Tubes, Ltd. (incorp. 1920), and its subsidiaries as follows: Cohoes Rolling Mill Co., Mohawk Conduit Co., Inc., National Tube Co., Ltd., Page-Hersey Export Co., Ltd., Page-Hersey Trading Co., Inc. The new company is purchasing all the undertaking, property and assets of the old company, except a portion of the surplus represented by bond investments. The original incorporation was in 1902 as Page-Hersey Iron & Tube Co., Ltd., and the company commenced operations on May 14 1903, with a mill of 30,000 tons yearly capacity at Guelph, Ont., making buttwelded steel pipes. In 1906 the name was changed to Page-Hersey Iron Tube & Lead Co., Ltd., and in 1910 a plant of 40,000 tons yearly capacity was erected at Welland, Ont., to make lapwelded pipes, followed in 1911 by another plant at Welland of 25,000 tons yearly capacity of buttwelded pipes. In 1912, another plant of 30,000 tons yearly capacity was erected at Fort William to make buttwelded pipe. (This mill has since been sold and converted to other uses.) In 1917 the Cohoes Rolling Mill Co., which had been in operation since 1854, making wrought-iron skelp and wrought-iron pipe, at Cohoes, N. Y., was purchased to insure a steady supply of skelp for the Canadian plants. In 1920 the name of Page-Hersey Iron Tube & Lead Co., Ltd., was changed to Page-Hersey Tubes, Ltd., and in 1925 a plant was erected at Cohoes, N. Y., to make steel pipe and conduits for electrical wiring, under the name of Mohawk Conduit Co., Inc.

In addition to steel and wrought-iron pipes, and wrought-iron skelp, the plants manufacture tube joints, bends, sockets, and nipples, railway signal tubes, steel tubing for gas wells, including pipe lines for piping oil and gas, clamps, tubular poles and columns, steel conduits and couplings for electrical wiring, coils for heating apparatus, refrigerator plants, drying rooms, soap factories, sugar refineries and general engineering. The company's products, under its own trade-marks, are well and favorably known, business being done throughout the Dominion of Canada and the United States, as well as export business to England, Scotland, Newfoundland, Africa, New Zealand, Australia, China, Japan, Malay States, India and South America, &c.

Earnings.—The net earnings accruing to the benefit of the new company for the 4 months ended April 30 1926 were in excess of $315,628 and as far as the new company is concerned, are subject to deduction of only $208,240 for dividends payable to the shareholders up to June 30 next.

The average annual consolidated net earnings of the Page-Hersey Tubes, Ltd. (old company) and its subsidiaries for the 4 years ended Dec. 31 1925, after depreciation and after making provision for Government taxes and interest on the bonds to be issued, and deduction of interest earned on the bonds not to be acquired by the new company, were in excess of $626,000 which is at the rate of 20.86% per annum on the preference stock.

Consolidated net earnings for the year ended Dec. 31 1925 on the same basis were in excess of $780,000, which is at the rate of 26% per annum on the preference stock. Approximate consolidated net earnings for the 4 months ended April 30 1926 on the same basis, were in excess of $315,628.

Capitalization (After Financing).

	Authorized.	Outstanding.
6% 20-year 1st mtge. sinking fund gold bonds	$2,000,000	$2,000,000
7% cumul. conv. preference stock (this issue)	3,000,000	3,000,000

Pan-American Petroleum & Transport Co.—*Bond Call*

The company has called for redemption on Aug. 1 1926 $508,600 of the 10-year convertible 6% sinking fund gold bonds, due Nov. 1 1934. Payment will be made at the office of the trustee, the Chase National Bank, New York, at 103 and int.

The bonds called for redemption may at any time up to and incl. July 2 be converted at the option of the holders into class B common stock.—V. 122 p. 3353.

Pathe Exchange, Inc.—*Bonds Called.*—

Sixty-six 10-year 8% sinking fund gold bonds of $1,000 each, 23 bonds of $500 each and 27 of $100 (total, $80,200) have been called for payment Sept. 1 at 110 and interest at the Harriman National Bank, trustee, New York City.—V. 122, p. 2511.

Peerless Motor Car Corp.—*Sales Earnings.*—

Period—	Month of May 1926.	Month of April 1926.	5 Mos. End. May 31 26.
Sales of cars	1,582	1,430	5,632
Net profits after deprec. & taxes	$254,000	$235,000	$694,000

—V. 122, p. 3222, 2341.

Penn Seaboard Steel Corp.—*Listing.*—

The New York Stock Exchange has authorized the listing on or after the termination of the voting trust on June 26 1926 of 3,000,000 shares of no par value capital stock on official notice of issuance and exchange for present outstanding voting trust certificates, with authority to add to the list 100,000 additional shares, of no par value capital stock on official notice of issuance and payment in full, making the total amount applied for not exceeding 3,100,000 shares. The purpose of the issue of the increased capital stock is to provide working capital to handle the corporation's increased business, due in great part to the increased facilities of its New Castle plant, resulting from additional plant and equipment acquired subsequent to Dec. 17 1924. The authorized capital was recently increased from 3,000,000 to 3,500,000 shares.

Consolidated Income Account for Three Months Ended March 31 1926.

Postum Cereal Co., Inc.—*Larger Dividend.*—

The directors have declared a quarterly dividend of $1 25 per share, payable Aug. 1 to holders of record July 21. In Feb. and May last quarterly dividends of $1 10 per share were paid.—V. 122, p. 2205.

Pro-phy-lac-tic Brush Co.—*Earnings.*—

The company announced this week that profits for the first 5 months of 1926 nearly amounted to the full year's dividend requirements on the 12,583 shares of 6% preferred stock and the regular $2 rate on the 100,000 shares of common stock. With sales for the past 5 months of 1926 running substantially ahead of those for the corresponding period in 1925, the company expects that, by the close of June, its earnings will have exceeded its regular dividends totaling $275,498 on both classes of stock for the full year.

Net earnings for 1925 amounted to $523,411 or $4 47 per share, as compared with $334,103 or $3 01 per share in 1924. In 1925 the company decided to manufacture in Canada to avoid increasing the retail price there to meet a 33% duty levied on its exports to the Dominion. As a result, it was announced, business in Canada gained about 300% in 1925 over 1924.—V. 122, p. 3353.

(The) Rail Joint Co., New York.—*Tenders.*—

Robert Winthrop & Co., 40 Wall St., New York City, will until July 5 receive bids for the sale to them of 5% serial gold bonds to an amount sufficient to exhaust approximately $350,000, at prices not exceeding par and interest.—V. 121, p. 2649.

Ralston Purina Co.—*Acquisition.*—

This company announces the purchase of the Ry-Krisp Co. of Minneapolis, makers of a Swedish health bread. The company will take over the milling, sales and distribution of Ry-Krisp, including all rights to patented processes of manufacturing and trade marks.—V. 118, p. 441.

Rand Mines, Ltd.—*Interim Dividend of 50%.*—

The Bankers Trust Co. has been advised of the declaration of an interim dividend of 50%, equivalent to 2s. 6d., per ordinary share. The dividend will amount to 6¼s. sterling per "American share" and will be paid in London on or about Aug. 11 1926. A distribution of like amount was made on these shares on or about Feb. 11 1926.—V. 122, p. 3354.

Rand Kardex Bureau, Inc.—*Dividends in Cash.*—

The directors have declared quarterly cash dividend of 75c. per share on the common stock, no par value, payable July 10 to holders of record June 25. In Jan. and April last, quarterly distributions of 1.6% each were made in common stock.

The regular quarterly dividend of $1.75 per share has been declared on the 7% preferred stock, payable July 1 to holders of record June 21.

St. Maurice Valley Corp.—*Bonds Offered.*—Wood, Gundy & Co., Ltd., Toronto, are offering $1,300,000 additional 1st mtge. & collateral trust sinking fund gold bonds, 6% Series "A," at 100 and int. (For description of bonds properties, &c., see V. 121, p. 3016 and V. 122, p. 2667.)

Data from Letter of Sir Herbert S. Holt, President of the Corporation.

Earnings.—Average annual net earnings of the business acquired by the corporation, and of Belgo Canadian Paper Co., Ltd., for the 6 years and 3 months ended Mar. 31 1926, available for interest on the $9,999,833 1st mtge. & coll. trust bonds and registered debenture stock, to be outstanding after the proposed financing, depreciation and income taxes, were $2,261,627, equal to over 3¾ times the annual interest on the bonds and registered debenture stock, including this issue.

The above earnings are after operating expenses, including maintenance and repairs. During the greater part of this period there were installed and in operation only 6 newsprint machines, compared with ten now in operation.

For the 3 months ended Mar. 31 1926 net earnings of the corporation and of Belgo Canadian Paper Co., Ltd., on the above basis, available for interest on $9,999,833 bonds and registered debenture stock, depreciation and income taxes, were $673,738, or at the rate of $2,694,953 per annum, equal to over 4¼ times annual interest requirements.

On completion of the 12th newsprint machine, it is conservatively estimated that annual net earnings on the above basis, available for interest on $9,999,833 bonds and registered debenture stock, depreciation and income taxes, will be $3,918,162, equal to over 6½ times annual interest requirements.

Assets.—There are subjected to the direct specific charge of the trust deed securing the bonds, physical assets, including lands, buildings, plants, machinery, equipment and timber leases, certified to have a book value of $14,991,419, including estimated cost of proposed additions to capital assets. There has also been pledged under the direct specific charge of the trust deed over 98% of the authorized and outstanding common shares of Belgo Canadian Paper Co., Ltd., said pledged shares having a book value of $10,854,735 as at Mar. 31 1926. The combined net current assets of the corporation and Belgo Canadian Paper Co., Ltd., as at Mar. 31 1926, after giving effect to proposed financing and estimated cost of construction, and after deducting all current liabilities, aggregated $3,643,498.

Proposed Financing.—To reimburse the treasuries for recent substantial capital expenditures and to provide in part funds for the proposed construction program, including the two additional newsprint machines, this $1,300,000 1st mtge. & coll. trust bonds of the St. Maurice Valley Corp. is to be issued and it is proposed to issue $800,000 1st mtge. 6% bonds of

Belgo Canadian Paper Co., Ltd. For the same purpose $1,200,000 of 7% sinking fund cumulative preference shares of St. Maurice Valley Corp. has already been issued (V. 122, p. 2667). Upon completion of proposed financing, the capitalization of the corporation will be:

	Authorized.	*Outstanding.*
1st mtge. & collateral trust sinking fund bonds (including registered debenture stock)	$15,000,000	$9,999,833
7% sinking fund cumul. pref. shs. (par $100)	7,000,000	5,500,000
do of a par value of $5 per share	3,000,000	2,500,000
Common shares (no par value)	150,000 shs.	150,000 shs.

Sinking Fund.—Provision will be made for increasing the cumulative sinking fund provided in the trust deed and commencing Dec. 1 1926 to $201,149 for each of the first 5 years and $287,357 annually thereafter, together with interest on bonds and (or) registered debenture stock redeemed through the sinking fund. This sinking fund will be used to purchase bonds and (or) registered debenture stock of Series A in the open market at or below the then redemption price, and failing such purchase, bonds and (or) registered debenture stock will be drawn for redemption as provided in the trust deed.

Bond Issue.—Bonds and registered debenture stock will be secured by first mortgage and charge on all the corporation's assets, specific as to real estate, buildings, plants, machinery, equipment, timber limits and all other fixed assets, and also as to the shares, bonds, debentures and other securities of any subsidiary company, including over 98% of the presently authorized and outstanding $8,500,000 par value common shares of Belgo Canadian Paper Co., Ltd., and by way of floating charge as to all other assets, including the operating lease from Belgo Canadian Paper Co., Ltd. Such charges cover all of the corporation's interest in assets hereafter acquired.

Directors.—M. B. Wallace (Chairman), Sir Herbert S. Holt (President), Hubert Biermans (Vice-Pres.), J. H. Gundy (Vice-Pres.), Geo. M. McKee (Vice-Pres. & Managing Director), T. T. Waller (Vice-Pres.), G. H. Montgomery, K.C., Francois Faure and T. A. Wark.

Southern Dairies, Inc.—*New Directors.*—

George F. Rand, Buffalo, N. Y., Eugene V. R. Thayer and Harry T. Peters, both of New York City, have been elected directors.—V. 122, p. 3355.

Stevens Hotel Co., Chicago.—*Listing.*—

The New York Stock Exchange has authorized the listing of $13,000,000 (total authorized) of first mortgage 20-year sinking fund gold bonds, series "A" (6%), due July 1 1945. These bonds were offered in July 1925 by National City Co. and Harris, Forbes & Co. A description of the issue follows:

Dated July 1 1925, mature July 1 1945. Principal and interest (J. & J.) payable at the National City Bank, New York, or at the Harris Trust & Savings Bank, trustee, Chicago, Ill. Denom. $1,000 and $500 c*. Red. all or part, either at the option of the company or (on or after July 1 1930) through the operation of the sinking fund, on any semi-annual interest date prior to maturity, at 104 before July 1 1930; at 102½ thereafter and before July 1 1935; at 101½ thereafter and before July 1 1940, and at 100½ thereafter upon 30 days' published notice. Any bonds redeemed or acquired by the operation of the sinking fund shall forthwith be cancelled by the trustee and permanently retired.

Sinking Fund.—The company covenants to pay over to the trustee $358,700 on May 15 1930, and a like sum annually thereafter on May 15 in each year, to and incl. May 15 1934; $507,500 on May 15 1935, and a like sum annually thereafter on May 15, in each year, to and incl. May 15 1939; $653,250 on May 15 1940, and a like sum annually thereafter on May 15, in each year, to and incl. May 15 1944.

If, 40 days prior to July 1, in any year, there shall be on deposit with the trustee, for account of the sinking fund for the bonds, a sum in cash sufficient to redeem, at the redemption price payable on that date, bonds of an aggregate principal amount of $10,000, or more, the trustee shall select by lot for redemption on such date, a sufficient number of bonds to exhaust the said cash, as nearly as may be, and shall thereupon cause notice of redemption of the bonds so selected.

Purpose.—These bonds are issued to provide part of the funds required for the construction and equipment of the hotel and service buildings.

Security.—Secured by a first lien on the land, buildings, furniture and furnishings of the new Stevens Hotel which is now in constructon in Chicago, Ill.

Additional Bonds.—In addition to the Series A bonds, the corporation is authorized to issue $3,000,000 1st mtge. 20-year sinking fund gold bonds, Series "B" and $6,000,000 general mortgage 7% gold bonds, which will be junior to the bonds of both Series A and Series B.

Company.—Incorp. in Illinois on Jan. 5 1925, for a period of 99 years, for the purpose of conducting a hotel business.

Capital Stock.—Authorized and outstanding $7,000,000, consisting of 60,000 shares of 8% cumul. preferred stock, par $60 each and 340,000 shares of common stock, par $10 each.

Property.—Company owns, in fee simple, the entire block fronting on the west side of Michigan Boulevard, extending from 7th to 8th Sts., Chicago, Ill., and there is now in construction on this site a large hotel with more than 2,800 outside rooms, each with private bath. The main hotel building will extend approximately 402 feet on Michigan Boulevard and 174 feet on both 7th and 8th Sts. In addition, there is also in construction a 12-story service building, fronting on Wabash Ave., directly back of and connected with the main building and occupying a ground area of approximately 174 x 52 feet. The combined tracts have an area of approximately 79,000 square feet. This land has an improved valuation of $6,275,000.

The main hotel building will be 25-stories in height, with basement and two sub-basements in addition. The entire construction will be of the highest type of fireproof construction, built with steel columns and girders, reinforced concrete floors and roofs.

Earnings.—Estimated earnings available for interest, after property taxes and depreciation, based on 15 years of experience by the same management in the operation of the Hotel La Salle, Chicago, one of the largest properties of this kind in the city, are at the rate of more than 3½ times the maximum annual interest charges on the series "A" bonds. Annual net income in excess of $2,800,000 is estimated.

Balance Sheet as of Dec. 31 1925.

Assets—		*Liabilities*—	
Plant, equip., &c.	$8,093,570	Accounts payable	$24,104

Southern Pipe Line Co.—*Capital Distribution.*—

Stockholders have been informed that the company expects to mail the new $50 par stock certificates, together with checks covering $40 a share capital stock reduction, on or before July 10, nstead of on June 25. See V. 122, p. 2813.

Texon Oil & Land Co.—*Stock Put on 80c. Ann. Div. Basis.*

The directors have declared a quarterly dividend of 20 cents per share, payable July 24, to holders of record July 10. In the previous quarter an extra dividend of 15 cents and a regular quarterly dividend of 5 cents were paid.

The Group No. 1 Oil Corp. declared a dividend of $750 a share, payable Oct. 15 to holders of record Oct. 1. Of this dividend Texon Oil & Land Co. will receive a total of $964,875.—V. 122, p. 2513.

United Cigar Stores Co. of America.—*Listing.*—

The New York Stock Exchange has authorized the listing on or after June 30 of 22,773 additional shares of common stock, par $25, on official notice of issuance as a stock dividend, also of 14,118 shares of common stock on official notice of issuance in exchange for property, making the total amount applied for to date $46,469,863.

The directors on April 30 1926 authorized the issuance of 14,118 additional shares of common stock in exchange for 12,000 shares of class A preferred stock, par $100 and 10 shares of class B preferred stock, par $100, and 5,010 shares of common stock without par value of Charles F. Noyes Co., Inc., a New York corporation, to be acquired as an investment.

Charles F. Noyes & Co., Inc.—This Company was organized on April 28 1926, in New York, with an authorized capital of 12,000 shares of 6% cumul. class A pref. stock, par $100, 12,000 shares of 6% cumul. class B pref. stock, par $100 and 10,000 shares of common stock without par value and acquired all of the assets, including good will, of the business of Charles F. Noyes, trading under the registered trade-names of "Charles F. Noyes Co.," who has been engaged since 1898 in New York City in carrying on a real estate brokerage business. Its gross sales of real estate in the year 1925 have been in excess of $149,000,000. The new company intends to continue the real estate brokerage business formerly conducted by Charles F. Noyes Co., not only in the City of New York and surrounding territory but also in the various States of the United States, either directly or through subsidiary companies to be organized. It also has assumed the entire management of all of the real estate owned by the United Cigar Stores Co. of America in Greater New York. The earnings of Charles F. Noyes Co., the old company, before bonus distributions and taxes, were as follows:

1925.	1924.	1923.	1922.	1921.
$667,626	$271,446	$392,624	$188,280	$148,270

Practically the entire assets of Charles F. Noyes Co., Inc. consist of its good-will and value as a going concern. In order to preserve such goodwill, the new company in addition to having insured the life of Charles F. Noyes, President, for $2,400,000, has under a written contract engaged the services of Charles F. Noyes as President of the Company for a period of 10 years from May 1 1926.—V. 122, p. 2815.

United States Finishing Co.—*Refunds Bonds.*—

The 5% 1st mtge. bonds of the Sterling Dyeing & Finishing Co., dated July 1 1901, assumed by the United States Finishing Co. in 1904, are payable at the Equitable Trust Co. of New York, successor trustee, on July 1 of this year. There were outstanding in the hands of the public $243,000 of Sterling bonds in January last.

The United States Finishing Co. recently offered to holders of Sterling bonds an opportunity to refund them into the company's 5% consolidated gold bonds. For each Sterling bonds of $1,000 turned in with July 1 1926 coupon sttached the company will issue a consolidated bond of $1,000 bearing interest from Jan. 1 1926 at the rate of 5% per annum and will pay a bonus of $15 in cash. The consolidated bonds are secured by a first mortgage on the Norwich, Pawtucket and Providence (Silver Spring) plants, and when the Sterling bonds are retired on July 1, the mortgage will become a first mortgage on the Sterling plant as well.

The "Chronicle" has been informed that "a very considerable proportion of the holders of the bonds have, since Jan. 25, exchanged them for consolidated bonds in accordance with the offer. Bonds not so exchanged will be paid on July 1 and an equivalent amount of consolidated bonds will be issued and sold. This will have the effect of increasing the total amount of consolidated bonds after July 1 1926 from $1,757,000 to $2,000,000, less the bonds redeemed and held in the sinking fund now amounting to $406,000. The sinking fund will be in a position after July 1 to purchase about $60,000 more of consolidated bonds."—V. 122, p. 2514.

United Steel Works Corp. (Germany).—$30,000,000 6½% *Gold Bonds Offered.*—

Dillon, Read & Co. are heading the syndicate which will offer this morning (June 26) $30,000,000 6½% gold bonds, series A. This operation constitutes, it is announced, the largest foreign industrial loan so far arranged in the United States. Associated with Dillon, Read & Co. at the head of the national distributing syndicate are the International Acceptance Bank and the J. Henry Schroder Banking Corp. The bonds mature in 25 years. They are dated June 1 1926 and are offered at 96 and int., to yield about 6.83%. Each bond will bear a non-detachable stock purchase warrant, carrying the right to buy 1,000 reichsmarks of the common stock of the United Steel Works Corp. at $297 50 a share (viz., 125% of par). The bankers state:

These bonds are callable all or part by lot on any interest date, after 30 days notice, at 105 up to and incl. June 1 1931; thereafter to and incl. June 1 1936 at 103; thereafter to and incl. June 1 1941 at 101; thereafter prior to maturity at 100, in every case plus accrued interest.

Sinking Fund.—The corporation agrees to provide a sinking fund sufficient to retire the entire issue of series A bonds by maturity, by semi-annual call by lot (first redemption Dec. 1 1926) at 100 and int. at the annual rate of $600,000 up to and incl. Dec. 1 1938 and at the rate of $1,800,000 annually thereafter to maturity.

Corporation.—Organized in Jan. 1926. Has contracted to acquire the properties and assets, including good will, trade marks, &c. (except certain coal properties) of four of the leading steel, iron and coal companies in Europe, namely Rheinelbe Union, Thyssen, Phoenix and Rheinstahl. In addition to taking over the entire business of these concerns, the corporation is acquiring 56% of the stock of the Alpine Montan Steel Corp., which owns one of the largest deposits of high-grade iron ore in the world. Upon completion of acquisition of these properties, the corporation will rank as the largest industrial unit in Europe and the second largest steel company in the world, ranking next to the United States Steel Corp. The opening balance sheet of the United Steel Works Corp., after giving effect to the acquisition of assets and assumption of liabilities and the issuance of bonds now being offered in the market to the public, shows total assets of over $350,000,000. Current assets are $86,799,000, against current liabilities of $16,629,504.

Security.—The bonds are to be a direct obligation of the company, secured by fixed assets valued at 4 times the sum of all underlying liens, including existing charges under the Dawes Plan, these $30,000,000 series A bonds and all other bonds issuable against the properties presently to be mortgaged. H. A. Brassert, American consulting engineer, who made an investigation of the properties for Dillon, Read & Co., valued the fixed assets of the corporation at $537,671,800, the appraisal being based upon present replacement costs in Germany, and after allowing for depreciation and obsolescence. The opening balance sheet after giving effect to the current financing shows total current assets aggregating $86,299,087, including over $22,000,000 cash. Current liabilities totaled $16,629,504—a current ratio of better than 5 to 1.

Earnings.—Mr. Brassert estimates the corporation's annual net earnings will average $28,311,358 for the 5 years 1927 to 1931, incl., after allowing for depreciation and all other charges, excepting interest, payments under the Dawes Plan and profits taxes. These earnings, which are based upon American accounting methods, approximate 3 times the sum of maximum annual interest charges on $30,000,000 series A bonds, on bonds to the value of about $30,000,000 payable in foreign currency and to be issued abroad, on existing underlying liens and estimated maximum annual payments under the Dawes Plan. In estimating earnings no effect has been given to the benefits which it is expected will accrue to the German iron and steel industry when the currencies of France and Belgium are stabilized In

Mr. Brassert's opinion such stabilization will result in a 20% increase in his estimated net earnings.

Capitalization.—Corporation will have an authorized capital stock consisting of $190,400,000 common stock, $11,900,000 preferred participating certificates, series A, and $17,850,000 participating certificates, series B, or a total of $220,150,000. Of the total $208,845,000 is being issued to acquire the properties to be taken into the consolidated organization.

Listing.—The common stock, it is expected, will be promptly listed on the Berlin Stock Exchange. Application will be made to list the bonds now offered on both the Boston and New York stock exchanges.

Universal Chain Theatres Corp.—*New Theatre.*—

It is announced that the corporation will construct a 3,500 seat motion picture house at 46th St. and New Utrecht Ave. in the Borough Park section of Brooklyn, N. Y. The cost of the project is estimated at more than $1,000,000 and construction will start in July.—V. 122, p. 3096.

Utah Apex Mining Co.—*Smaller Dividend.*—

The directors have declared a quarterly dividend of 25 cents per share payable July 15 to holders of record July 3. Dividends of 35 cents per share were paid quarterly from April 1925 to April 1926, incl.—V. 122, p. 1780.

(V.) Vivaudou, Inc.—*Earnings.*—

The company reports for the 4 months ended April 30 1926 a profit of $608,197 after charges and depreciation, but before Federal taxes.—V. 122, p. 3467, 2669.

Ward Baking Corporation.—*Plans Expansion.*—

Expansion plans of the corporation include the construction of new bakeries at Philadelphia and Baltimore, at a cost of $1,350,000, and additions to present plants in Pittsburgh, Pa., and Columbus, O., increasing the valuation of these by about $1,000,000.

When completed, the Philadelphia plant, costing $350,000, will be used for the present for the manufacture of cake. This plant is now being equipped with a 70-foot traveling cake oven with a capacity of 45,000 lbs. a day. The $1,000,000 Baltimore plant will be used for both bread and cake manufacture and will be equipped with one 100-foot traveling bread oven with a capacity of 75,000 lbs. a day and one 70-foot traveling cake oven with a capacity of 45,000 lbs. a day. The addition to the Pittsburgh bakery, will increase the value of that plant by $650,000 and its facilities will then include two 130-foot traveling bread ovens with a capacity of 200,000 lbs. a day and two 60-foot traveling cake ovens with a capacity of 70,000 lbs. a day. When rebuilding operations are completed at the Columbus bakery its valuation will be increased by $350,000, including equipment capable of baking 70,000 lbs. of bread and 45,000 lbs. of cake daily.

All of the above plants will be automatically operated throughout and their total capacity will exceed 200,000 lbs. of cake and 340,000 lbs. of bread daily.

The volume of business passing through the company's Detroit bakery, which began operations on Aug. 17 last, has reached a point where it is expected to show a profit in the company's five-week period ending July 3, according to the corporation. This bakery, built at a cost in excess of $1,500,000, is equipped to produce 70,000 lbs. of cake and 100,000 lbs. of bread daily.—("Official.")—V. 122, p. 3467.

Willys-Overland Co.—*Earnings—To Retire Pref. Stock.*—

The company reports net profits of $2,531,839 for May 1926, after all charges, but before Federal taxes, as compared with a net profit for $2,112,185 for the month of April, making a net of $4,644,024 for the first two months of the second quarter in the fiscal year. For the first three months of the current year profits amounted to $1,233,826.

It is announced that the new Whippet model, which has just been introduced, has reached a production of 300 cars a day, with plans for gradually increasing output to 500 by the middle of July. Willys-Knight production, it is stated, is still above 550 a day.

A dispatch from Toledo states that the company will retire $745,512 of the outstanding preferred stock by July 1. Terms of retirement provide that 3% of the maximum amount ever outstanding shall be retired by July 1 each year. As of Dec. 31 1925, there was outstanding $22,049,500 of preferred stock (see V. 122, p. 2184).—V. 122, p. 3475, 3096.

CURRENT NOTICE.

—"Practical Suggestions for Travel Abroad" is the title of an attractive hand-book which has just come from the press. It is being published by the Seaboard National Bank of New York for the benefit of the holders of Seaboard checkbook-letters of credit. The book contains some 170 odd pages and deals with 70 different subjects on which the traveler may wish to receive authentic information before or during his journey. The las part of the book is reserved for the traveler's personal memoranda. I contains useful tables and schedules enabling even the novice to plan all the details of the journey and at the same time arrange efficiently his business and personal affairs at home.

—Doremus & Co. announces that James C. Gilruth is now associated with that advertising agency, in charge of its news department in Chicago. Mr. Gilruth is a trained newspaper man, having been City Editor of the Chicago "Daily News" for several years, and has handled news for a number of important institutions. He is an experienced financial news writer and was formerly connected with one of Chicago's larger national banks as Manager of its new business department.

—"Eight Investment Opportunities" is the caption of a large four-page circular which the American Bond & Mortgage Co. is distributing and which illustrates and describes eight first mortgage bond issues, carefully selected to meet the needs of investors at the mid-year reinvestment period. Copies of this circular may be obtained through the main offices in Chicago and New York, or through any of the twenty branch offices throughout the country.

—Eastman, Dillon & Co. announce that George N. Buffington has joined their organization in the buying department, as assistant to M. H. Bent, Chicago partner. Mr. Buffington for the past year was affiliated with Illinois Merchants Trust Co. and previously with Hayden, Miller & Co. of Cleveland. He started his banking career in the credit department of the Central Trust Co. of Chicago.

—Adolphus E. Graupner, formerly Judge of the Superior Court of California, and since its organization a member and Chief of Division No. 3 of the United States Board of Tax Appeals, has become associated with Weill, Wolff, Satterlee & Blakely of Washington, D. C., and will specialize in practice before the Board of Tax Appeals and the United States Courts.

—A. E. Fitkin & Company will open a new office in Chicago on July 1. A suite has been leased in the New York Life Building on South La Salle St. David F. Thomas, the resident manager, was affiliated with Hornblower & Weeks for the last thirteen years. The company specializes in the distribution of public utility securities.

—The New York Trust Co. has been appointed co-trustee under the indenture dated May 1 1926 securing $3,000,000 Mansfeld Mining & Smelting Co. 15-year 7% (closed) mortgage sinking fund gold bonds due May 1 1941.

—Chatham Phenix National Bank & Trust Co. has been appointed trustee under trust mortgage of the S. S. & L. P. Corp., dated June 1 1926, securing an issue of $340,000 first mortgage 6½% gold bond certificates due June 1 1936.

—The Seaboard National Bank of the City of New York has been appointed coupon paying and fiscal agent for Rochester Button Co. first (closed) mortgage 6½% 15-year sinking fund gold bonds.

—Burnham, Herman & Co., members of the New York Stock Exchange, announce that Ernst Oberhumer, formerly of Abraham & Co., is now associated with them in charge of their statistical department.

—The New York Empire Co., Inc., announces the election of Conrad H. Liebenfrost as Vice-President. He will continue as sales manager of the company.

—Guaranty Trust Co. of New York has been appointed transfer agent for the 7% preferred stock of the Industrial Finance Corp. of New York City.

AMERICAN CAR AND FOUNDRY COMPANY

TWENTY-SEVENTH ANNUAL REPORT WITH CONSOLIDATED BALANCE SHEET OF AMERICAN CAR & FOUNDRY COMPANY, AMERICAN CAR AND FOUNDRY SECURITIES CORPORATION, AMERICAN CAR AND FOUNDRY EXPORT COMPANY—FOR THE FISCAL YEAR ENDED APRIL 30 1926.

To the Stockholders:

There is annexed, with Certificate of Audit attached, the Consolidated Balance Sheet and Statement of Net Earnings showing the condition at the close of its twenty-seventh fiscal year, ended April 30 1926, of the Company and its wholly-owned subsidiaries, American Car & Foundry Securities Corporation and American Car & Foundry Export Company.

The formation of the Securities Corporation to serve "as a facility for the convenient handling of some of the Company's activities" was noted in the letter to the Stockholders of June 25 1925. The Export Company serves as a medium for the handling of the Company's business in the foreign field.

The year's earnings have been sufficient for the payment of dividends on the Capital Stock of the Company aggregating $5,700,000—$2,100,000 on the Preferred and $3,600,000 on the Common—and for the transfer of more than $400,000 to surplus.

The sound and liquid condition of the Company's finances is shown by the Balance Sheet—the details of which do not call for any particular comment.

The railroad buying of new equipment during the year has not been in the volume that reasonably might have been expected. It has been done spasmodically and at prices that have made a profit possible only by keeping costs to a minimum—this calling for the practice of the utmost economy and efficiency in all departments of the Company's activities.

The railroads generally are in good financial condition. There is hanging over them no threat of legislation adversely affecting their interests. Undoubtedly there is need of additional equipment if they are to discharge adequately their functions as carriers of the products of the country's industry. These conditions justify the expectation of increased buying activity—and when that comes there is no reason to doubt that the Company will get its fair share of the business.

There has been a very noticeable and progressive lessening of the volume of business done in the rebuilding and repairing of old equipment. This is due, in part, to a more or less insistent demand that the railroads should in their own shops rebuild and repair their worn equipment. Such demand is not justified on the score of cost. Your Management has given this phase of the industry its earnest attention, and is convinced that the cost to the roads of themselves doing such work is substantially in excess of the cost of having it done in the shops and with the trained organizations of concerns such as your Company. It is to be hoped that the roads will give to this subject the further thought and study its importance deserves.

During the year just ended the volume of the Company's export business has been much greater than during the preceding year, and this increase in volume has brought with it a corresponding increase in the profit realized. Close attention is given to the credit risk with respect to all such business offered.

In the manufacture and sale of miscellaneous products, the Company has done a business satisfactory both as to quantity and profit.

The year closed with a fair amount of business booked. Since that date and up to the time of this writing, there has been some renewal of buying—and there is no cause to complain with respect to the share of such business obtained by the Company.

The Management for some time past has been giving careful study to the problems in transportation, both of passengers and of freight, presented by the growing use by the electric and steam railroads of automotive vehicles, including motor buses, motor trucks and motor-driven rail cars. Such vehicles have already demonstrated their value in service supplementary to that of many street and interurban electric railways, and for use by branch lines of steam railways where, under present-day costs, the available traffic has not been sufficient to permit of profitable operation by the older methods—and unquestionably they will play an increasingly important part as factors in the improvement of railway earnings.

Recognizing these conditions, the Management concluded some time ago that in the manufacture and marketing of such automotive equipment there lay a legitimate and profitable field for an extension of the Company's activities—and during the year just closed it has entered that field by the organization of American Car & Foundry Motors Company and the acquisition of a controlling interest in the newly-organized The Brill Corporation. There remain to be worked out many problems in the co-ordination of automotive service with that of steam and electric roads, as well as in the further development of equipment adapted thereto. That they will be worked out satisfactorily, and to a profitable conclusion, the Management has little doubt.

To the members of the Company's organization, without whose loyal and hearty co-operation the satisfactory results of the year could not have been achieved, the Management takes this opportunity of expressing its thanks and appreciation.

By order of the Board,
Respectfully submitted,
W. H. WOODIN, *President.*

COMMERCIAL EPITOME.

The introductory remarks formerly appearing here will now be found in an earlier part of the paper immediately following the editorial matter, in a department headed "INDICATIONS OF BUSINESS ACTIVITY."

Friday Night, June 25 1926.

COFFEE on the spot has been steady with a fair business. Santos 4s, 23 to 23¼c.; Rio 7s, 20¼c. Prompt shipment Bourbon Santos 2-3s here at 23.40c.; 3-4s at 22.45 to 22.95c.; 3-5s at 21.90 to 22.70c.; 4-5s at 21.90 to 22.10c.; 4-6s at 21.95c.; 5-6s at 21.35 to 22c.; 6-7s at 21.60c.; 7s at 21c. Fair to good Cucuta at 25½ to 26c.; washed Caracas, fair, 27 to 27½c.; Porto Cabello, washed, 27¼ to 28c.; Colombian, Ocana, 25 to 25½c.; Bucaramanga, natural, 27 to 27½c.; Honda, Tolima and Giradot, 29¾ to 30¼c.; Medellin, 30¾ to 31¼c.; Manizales, 29¾ to 30¼c. Spot later was dull with Rio 7s 20 to 20¼c. and Santos 4s 22¾ to 23c. Some of the cost-and-freight offers on the 21st were 25 points higher than on the 19th inst. Bourbon Santos 4-5s for prompt shipment were 21.45c.; 4s, good bean, good roast, strictly soft, at 21.80c. Some take the ground that as there is sufficient coffee on hand and afloat to supply the trade's requirements for the summer months, and that the new-crop year is about to open, there is no justification for the present price, and they believe that the usual summer decline will set in at the first sign of weakness in the Brazilian markets. To-day spot trade was dull; Rio 7s 20 to 20¼c. and scarce; Santos 4s, 22¾ to 23c.

A rise in Brazil, with the fact that New York was still below a parity of prices in Brazil, caused buying on the 21st inst., some of which apparently was for Europe. An opening advance reached 20 to 26 points. On the 22d inst. futures closed unchanged to 5 points lower. Rio futures were 150 to 350 reis lower. Rio exchange on London was up 3-32d. at 7 31-32d., while the dollar rate was off 80 reis at 6$200. Santos futures were unchanged to 100 reis lower. Santos exchange was up 3-32d. at 7 31-32d.; the dollar rate dropped 80 reis to 6$200. Some think that the present price means a very attractive return to growers and that the Defense Committee will sell as much of its holdings as possible at around this level. The successful flotation of a loan here and in London has probably encouraged Brazilian coffee interests. In view of the strong appearance of the market, shorts have covered and a new long interest developed, leaving the market, in the opinion of some, in a weaker technical position. Some have been expecting a reaction, which has not occurred. Brazil prices on the contrary recently advanced until they are at a much higher laid-down cost basis than spot prices. Since May 1, strange as it sounds, spot prices have advanced only ½ to ¾c., while offers from Brazil have advanced from 1 to 2c. and futures here advanced from 100 to 130 points. The control of the market rests with Brazil, but the demand was so poor and the deliveries so good that many expected the usual June decline. It may yet occur. First notice day for July deliveries fell to-day, and it was not expected that many notices would be issued. There was a possibility, however, that covering of shorts might cause an advance to a point which would permit some high-grade mild coffees to be delivered. Fluctuations in Brazilian exchange rates have caused higher levels in the cost-and-freight market, but every now and then some shipper makes low offers which are quite readily absorbed by Front Street houses.

It is emphasized in various quarters that New York is at a considerable discount under prices at which coffee can be imported for delivery against exchange contracts. Rio 7s for prompt shipment were quoted at 19.30c.; equal to 20c. for July delivery, when the July option was at 18.13c. Spot Rio 7s were selling at 20c. to 20¼c. less 2% and Robusta coffee at 21 to 21½c. less 2%. When the July shorts cover, differences will probably narrow. It is declared that the future of the market depends on Brazil. The Defense Committee owns a large percentage of the Santos stock. The purchase of this coffee has prevented a decline but the sale of it may prevent a big upward swing. News of the progress of the 1927-28 crop will be awaited with interest and will undoubtedly have an influence on prices. On the 21st inst. foreign buying and local covering steadied prices. With Brazilian exchange rates unsettled, shippers hesitate to make offers. Rio 7s here 20 to 20¼c. and Santos 4s, 22¾ to 23c. Offers included prompt shipment Santos Bourbon 3s at 22¼c.; 4-5s, 21.45c. to 21.70c.; 5-6s at 21½c.; Santos grinders, 7-8s at 19½c.; 8s at 20c.; part Bourbon, 3s at 22½c.; 3-5s at 21.70 to 22c.; 4-5s at 21.60 to 21¾c.; 5-6s at 21½c.; Santos Peaberry, 3-5s at 22.30c.; Rio 7s at 19.10 to 19.30c.; 7-8s at 19c.; Victoria, 7-8s at 18.80 to 19c. Future shipment Santos, June-July Bourbon, 3-5s at 21½c.; July-Sept., 5s at 21¼c.; Aug.-Nov. Bourbon, 4s at 21½c.; 3-5s, part Bourbon, at 21c.; Jan.-March, 3-4s at 20½c. To-day futures closed 3 to 20 points lower with sales of 66,250 bags. No July notices were issued owing to the scarcity of Rio coffee here. Brazil markets were weaker. Santos futures were down 175 to 325 reis. Santos exchange was 1-64d. lower at 7 63-64d. The dollar rate fell 10 reis to 6$170. Rio exchange was 1-32d. lower. Final prices show a rise for the week of 20 to 40 points.

SUGAR.—On the spot sales were made at 2 13-32c. for prompt Cuba for a time and then fell to 2 11-32c., with business to the extent of 250,000 bags at these prices. China, Japan and the United Kingdom bought about 55,000 tons Cuba raw. Far Eastern markets paid about 2.29c. to 2.30c. f. o. b. Cuba. United Kingdom paid 11s. 6d. for July shipment, equal to about 2⅜c. c. & f., New York. Three more Cuban centrals finished grinding during the week, leaving only 6 working. Atlantic port refiners' meltings the past week were 70,000 tons and their stock was 381,027 tons, against 249,528 a year ago and 224,424 tons two years ago. Cubas for July were offered the United Kingdom at 11s. 6¾d. and for August at 11s. 7½d. Cuban cables reported general rains and forecast of more, and that another central, the San German, had finished its crop with outturn of 518,163 bags, against estimates of 600,000 bags. The big event in futures was the sale of 172,050 tons here on the 24th inst., a new high record. The market was short. The shorts got the sugar rather easily. That is one way of looking at it. Another is that that amount could be absorbed so readily. At one time prices on the 24th inst. were 2 to 5 points below the high for the day, but the next change was 2 points lower to 2 higher. Delivery notices for 77,750 tons were issued and were stopped, it is understood, by producing interests. Refined was in fair demand at 5.40 to 5.70c. On the 22d inst. futures closed 4 to 5 points lower. Prompt sugar was rather weaker. About 2,000 tons of Philippines at Baltimore sold at 4.14c. Trade here was quiet with 2 7-16c. bid for Cuba and some Porto Ricos offered at 2 13-32c.

Receipts at Atlantic ports for the week were 54,379 tons, against 46,432 in the previous week, 59,874 last year and 29,874 two years ago; exports for the week were 73,491 tons, against 75,097 in the previous week, 116,464 in the same week last year and 72,684 two years ago; stock 1,361,324, against 1,380,436 in the previous week, 1,152,898 last year and 843,198 two years ago; centrals grinding 8, against 9 in the previous week, 18 in the same week last year and 6 two years ago. Cable advices on the 21st inst. reported the sale to Japan of 7,500 tons of Cuban raws prompt shipment at 2.29c. or 2.30c. f.o.b. basis. There was also a rumor of a sale to China of 20,000 tons of Cubas prompt at the same price but this transaction was not fully confirmed. London closed steady ¾ to 1½d. net higher on the 21st inst. with sales for the week of 29,300 tons. According to some calculations, Cuban weekly figures showed receipts 57,706 tons, exports 93,885 tons and stock 1,335,944 tons. Of the exports, 32,589 were for New York, 12,869 for Philadelphia, 10,074 Boston, 12,729 New Orleans, 5,165 Savannah, 5,572 Galveston, 1,463 interior, 5,818 United Kingdom, 487 France and 7,119 Japan. Seven mills were reported grinding.

The outstanding development according to some is an improved refined situation. Raw sugar became firmer following the absorption of distressed duty-free sugars last week; refiners paid up to 2 13-32c., or an advance of 1-16c. for Cubas, Porto Ricos and Philippines in prompt and early July positions without causing any large offerings. Some look for a gradual rise in price during July and August, in response to the broad demand, unless the weather should remain phenomenally cool throughout the summer. The cheapness of sugar, which undoubtedly has caused consumption to grow enormously in all parts of the world, may, it is contended, have the contrary effect on production. Certainly no commodity will long continue to be produced to sell at a price less than its producing costs, or at prices so low as to afford an unsatisfactory investment. Cuba is forced to legalize stringent restrictions on her output. That is significant.

Java cables reported a stronger tone with sales of 125,000 tons or more of Sept.-Oct. shipment at from 10¼ guilders up to 10¾ guilders on bad crop reports and rebuying of contracts by operators. Consumption of refined in the United States as indicated by refiners' meltings was only about 88,000 tons less than the figures for the same period last year, despite the cool weather. Withdrawal demand is rather good. Stocks of refined throughout the country are evidently not excessive. There will be, it would seem, a smaller exportable surplus in certain countries of Europe. According to latest estimates Czechoslovakia, an important exporting country, shows a decrease of about 10% in beet acreage. For Russia, Licht

recently reported a decrease of about 15% from the original estimates.

Some of the trade think bearish features have been discounted. Also the fact is emphasized that the large stocks will soon begin to decrease because of the normal summer consumption and that prices are at a level to stimulate it. As these stocks decrease, it is argued, the natural tendency will be for prices to grow stronger and even to advance under the spur of a quickened sale. There may be temporary declines, it is added, until stocks have decreased. Even if some distressed sugar appears now and then, it is urged that it will be the exception and that the market has seen its worst. It is further pointed out that a very favorable report has been issued by the Agricultural Department at Washington as to the fruit crop, which is an important factor in consumption for the last six months of the year. With a big fruit crop, cheap sugar and the prices of all other food products at a very high level, the use of sugar in various ways will, it is believed, reach a level perhaps of unusually high proportions. Meantime the fact is not ignored that prompt shipment refined has been rather irregular, but as a rule throughout the country firm at 5.70c. for cane and 5.60c. for beet. Already distribution is increasing and with relatively few exceptions the trade will, it is said, have completed outstanding contracts by July 1. Others argue that the position was braced by an estimated deficiency in supplies of cane sugar the world over of about 1,000,000 tons, compared with the original estimates. Moreover, monthly figures show that consumption in Europe makes a good exhibit, the same as the United States. Refiners, it is not unimportant to consider, have in spite of lulls in trade from time to time increased the margin between raw and refined sugar by about 25 points without any detrimental effect on their trade. As some view the matter the statistical position indicates that at the end of the season stocks in Europe as well as in the United States will be relatively small. And it is expected that in the second half of 1926 the demand will outrun offerings and competition for the remainder of the Cuban crop between the United States, Canada and Europe become keen.

To-day futures ended 3 points lower to 2 points higher, with transactions down to 32,000 tons. Prompt raws were quiet and apparently none too steady. Sales of 10,000 Cuba or Santo Domingo were reported to the Far East or the Continent at equal to 2.27 to 2.30c. f.o.b. Reported business at 2 11-32c. was not confirmed, but that was the nominal quotation to-day, for early delivery a decline for the week of 1-32c. London was dull. Cuba for July shipment was quoted at 2.29c. f.o.b. Floods in Germany are reported. In some other foreign countries crop prospects are said to be less favorable than they were a year ago. Refined sold rather freely here it was stated at 5.45c., ending at 5.60c. for prompt and 30-day contracts. Withdrawals were liberal. Final prices for futures show a decline for the week of 5 to 6 points. Prices were as follows:

Spot unofficial	2 11-32	September	2.49@nom	March	2.68@ ---
July	2.36@nom	December	2.66@ ---	May	2.78@ ---

LARD on the spot was rather weak at one time, with trade quiet and the cables irregular. Prime Western, 16.90 to 17c.; Middle Western, 16.75 to 16.85c.; city in tierces, 16⅝c.; city in tubs, 17½ to 17¾c. Compound car lots in tierces, 17¼c.; refined Continent, 17½c.; South America, 18½c.; Brazil, 19½c. To-day cash demand was only moderate, and prices were rather weaker. Prime Western, 16.95c. Futures advanced slightly at the opening of the week, with hogs firm, but on the same day reacted. Liquidation told. But on the decline some of the large packers bought. That neutralized the effects of "long" selling and hedge sales by warehouse interests. On the 21st inst. the ending was unchanged to 2 points lower, while meats declined 5 to 10 points net. In Liverpool lard was 3d. lower to 3d. higher. To-day futures were slightly lower. The opening was steady with hog prices well maintained, and commission houses buying. Later on the decline in grain made itself felt. Liquidation set in. Profit-taking was quite general. Hogs closed steady, however, at the top of $15. Western hog receipts were 71,000, against 90,000 last year. Cottonseed oil was 4 points lower to 5 higher to-day, with the technical position regarded as better. Final prices for lard show a decline for the week of 10 to 15 points.

DAILY CLOSING, PRICES OF LARD FUTURES IN CHICAGO.

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
July delivery cts.	16.35	16.32	16.52	16.47	16.35	16.30
September delivery	16.57	16.55	16.80	16.72	16.60	16.57
October delivery	16.55	16.55	16.80	16.72	16.57	16.52

PORK weaker; mess, $42; family, $44 to $46; fat back pork, $34 to $35. Ribs lower, cash, $18.50, basis 40 to 60 lbs. average. Cut meats irregular; pickled hams, 10 to 20 lbs., 29¾ to 30c.; pickled bellies, 6 to 12 lbs., 26 to 26½c. Bellies, clear, dry salted, boxed, 18 to 20 lbs., 21¾c.; 14 to 16 lbs., 22½c. Hogs, Chicago receipts 40,000 on the 21st inst., quoted $14 15 to $14 95; Buffalo receipts 4,800, quoted $14.75 to $16. Butter, lower grade to high scoring, 34½ to 42½c. Cheese, flats, 21⅞ to 28c. Eggs, medium to extras, 27¾ to 34c.

OILS.—Linseed has been quiet of late with an easier tendency. Spot August in car lots cooperage basis, 11.5c.; raw tanks, 10.7c.; boiled tanks, 11.1c.; July-August, 11.5c. Cocoanut oil, Ceylon coast tanks, f. o. b., 10¼c.; Manila coast tanks, 10¼c.; spot tanks, 10⅝c.; Cochin, barrels, spot, 12c.; China wood, New York spot, barrels, 13¾c. Corn, crude, tank plant, 13¼c.; Soya bean coast tanks, 10 to 10¼c.; blown, barrels, 14 to 14¼c.; lard, prime, 18⅞c.; extra strained, winter, New York, 15¾c. Cod, domestic, 58 to 60c.; Newfoundland, 60 to 62c. Turpentine, 86½ to 91c. Rosin, $13 to $16 10. Cottonseed oil sales to-day, including switches, 7,700 barrels. Prices closed as follows:

Spot	14.80@ ---	Aug	14.75@15.10	Nov	11.13@11.16
June	14.80@ ---	Sept	13.80@13.86	Dec	10.83@10.86
July	14.75@15.05	Oct	12.60@12.62	Jan	10.70@10.78

PETROLEUM.—Gasoline was in better demand for export with the United Kingdom the chief buyer. Domestic demand has slackened, however, and prices have been easier. Jobbers are inclined to go slow being sceptical as to the outlook. United States motor locally 13¾ to 14c. at refineries; in tank cars delivered to the trade 15c. In the Gulf section, United States motor was 12¼ to 12½c., while 64-66 gravity 375 end point was quoted at 14¼ to 14½c. in bulk. Kerosene has been rather quiet of late. Production has fallen off and stocks are light. Western markets have been easier. There was a good export inquiry for fall shipments but refiners are reluctant to do business at present prices. Locally water white was held at 11c. but there were intimations that this price would be shaded in some instances. Prime white was quoted at 10½c. at refineries. In the Gulf prime white was 8¼c. to 8½c. and water white 9½s. Cased kerosene was moving more freely. Bunker oil was more active at $1 75 f.o.b. New York Harbor refineries for grade C. In the Gulf $1 60 was quoted. Gas oil quiet; 36-40 locally 6¾c.; 28-34, 6c. The Texas Co. announced a new price schedule for Caddo crude oil. This company is now quoting 29-31.9 gravity at $1 70 a barrel, while below 29 gravity is held at $1 40 a barrel. The former price was $1 85 a barrel for 32 gravity and below. Gas oil of late has been in rather better demand mostly from the home trade. Here 36-40 is held at 6¾c. In the Gulf section 26-28 transparent gas oil was steady at 5½c. Kerosene is rather weak at 11c. for water white. New York refined export prices: Gasoline, cases, cargo lots, U. S. motor specifications, deodorzied, 29.40c.; bulk refiner, 13¾c. Kerosene, cargo lots, cases, 19.15c.; W. W. 150 degrees, 20.40c. Petroleum, refined, tanks, wagon to store, 17c. Motor gasoline, garages (steel bbls.), 21c.; up-State, 21c. Naphtha, V.M.P. deodoized in steel bbls., 22c.

RUBBER was quiet but steady on the 22d inst. Trade in new contracts at the Exchange has been introduced. On the 22d the trading amounted to 183 old contracts and 167 new contracts. July new contracts were 41.30 to 42c., closing at 42c.; old, 41.50 to 42c., closing at 42c.; August new and old closed at 42c. Outside prices: First latex crepe, spot, 44 to 45c.; June, 43 to 44c.; July, 42½c.; July-Sept., 42½c.; Oct.-Dec., 43c. Ribbed smoked sheets, spot, 44 to 44½c.; June, 43½ to 44c.; July, 41 to 42c.; July-Sept., 41 to 42c.; Oct.-Dec., 42 to 42½c. Brown crepe, thin clean, 38c.; specky, 34c. London was dull and weak on the 22d inst.; spot, 20½ to 20¾d.; July, 20¾ to 21d.; July-Sept., 20¾ to 21¼d.; Oct.-Dec., 21¼ to 21¾d.; Jan.-March, 21¾ to 22¼d. London rubber stocks increased 382 tons last week. Deliveries during the week were 1,418 tons and imports 1,801 tons. The stock now is 22,664 tons, against 22,282 last week, 19,023 last month and 5,424 last year. Prices later gave way but on the 24th inst. were steady. July new and old was 40.50 to 41c., closing at 41c.; Aug., 41c.; Sept., 40.90 to 41c.; Oct., 41.40c. to 41.60c., closing at 41.60c. Outside prices: First latex crepe, spot, 44 to 45c.; June, 43 to 44c.; July, 42½c.; July-Sept., 42½c., and Oct.-Dec., 43c. Ribbed smoked sheets, spot and June, 43½ to 44c.; July and July-Sept., 41 to 42c.; Oct.-Dec., 42 to 42½c. Brown crepe thin clean, 38c.; specky, 34c.; No. 1 rolled, 36c. London on the 24th was dull and ¼ to ½d. lower on near months; spot, 20¼ to 20½d.; July, 20¼ to 20¾d.; July-Sept., 20½ to 21d.; Oct.-Dec., 21d. to 21¼d.; Jan.-March, 21½d. to 21¾d. Singapore on the 24th declined ⅛d. on spot and nearby deliveries, but futures were steady. Spot, 19½d.; July, 19⅝d.; Oct.-Dec., 20d.; ex-godown Singapore. To-day trading was light and prices irregular, opening higher and reacting later. Dec. at one time was 50 points higher. July new later was 40.70c.; Aug. new, 41c.; Sept. new, 40.90c.; spot, 43c.; sales, 107 lots.

HIDES.—Common dry have been in light demand. River Plate frigorifico have been steadier. Country hides have been slow. Some 2,000 Argentine steers sold at $33 25, or 15c., supposedly to Russia through German agents. Packer hides have been in only moderate d mand. Native steers were 13c., butt 12c., Colorado 11½c., common, Orinoco 19¾c. Savanilla 20c. New York City calfskins quiet at $1 50 to

$1 55 for 5s-7s, $1 90 to $1 92½ for 7s-9s, and $2 52½ for 9s-12s. Later 1,000 Sansinena cows sold at $28 62½, or 13c.

OCEAN FREIGHTS.—Grain and coal tonnage has been the outstanding feature. More than 50 loads of heavy grain were taken on the berth last week. Baltimore to Hamburg-Rotterdam, June, 13c.; New York to London at 1s. 9d. for June; New York to Liverpool at 1s. 9d. for June; New York to Manchester, 1s. 9d. for July; New York to Antwerp at 11c. for July; New York to Antwerp, 10c. for July; New York to Rotterdam, 14c. for July, and Philadelphia and Baltimore to Rotterdam, 12c. for July. Later on the grain demand fell off. Later coal tonnage was in less demand. Grain rates advanced in an active business.

CHARTERS included grain from Montreal to Antwerp or Rotterdam, 15½c.; Hamburg, 16c., one-third barley and (or) oats guaranteed, June 5-25 cancelling; from Gulf to United Kingdom, 3s. 7½d., August; from Gulf to United Kingdom, 3s. 10½d., option Bordeaux-Hamburg, 3s. 7½d., Antwerp or Rotterdam, 3s. 6d., July 1-20 cancelling; from Montreal to Rotterdam, 3s. July 8 cancelling; from Montreal to Rotterdam, 15c., 15 loads of oats at Quebec, 17½c., early July cancelling; from Montreal to Hamburg or Bremen, 17c., option one-third lights, July 5 cancelling; from New Orleans to United Kingdom, 4s., if any other Gulf port, 4s. 1½d., June 27-July 17 cancelling; from Montreal to Antwerp or Rotterdam, 15½c., Hamburg, 16½c., option one-third lights, July 5 cancelling; from Montreal to Antwerp-Hamburg range, 16c. one port, 16½c. two ports, July 5-15 cancelling; from Montreal to Antwerp or Rotterdam, 15½c., Hamburg or Bremen, 16½c., one-half barley and (or) oats guaranteed, July 5-15 cancelling; from Montreal to Havre-Dunkirk, 3s. 6d., one port, 3s. 9d. two ports, July 5 cancelling; 35,000 qrs. from Montreal to Mediterranean, 18c. one port, 18½c. two., 19c. three ports, option Adriatic, 19c. one port, and 19½c. two ports, Oct. 10-25 cancelling; from Montreal to Rotterdam, 15½c., one-third barley and (or) oats guaranteed, July 5 cancelling; from Columbia River to United Kingdom-Continent, 28s. 8d., June-July; from Vancouver to United Kingdom-Continent, 26s. 9d., July 15 cancelling; coal from Hampton Roads to River Plate, $4 65 June; to Bahia, Brazil, $4 10; to United Kingdom, $3 25 June-July; to West Italy, $3 20, option Venice, $3 50 June-July; to United Kingdom, 14s. spot; to United Kingdom, $3 25 June-July; to United Kingdom, $3 50 prompt; to Manchester, $3 30 June; to United Kingdom, $3 20 July 20 cancelling; to United Kingdom, $3 50 end of July cancelling; to Bahia, $4 10 July; to United Kingdom, 13s. 6d. June; to United Kingdom, $3 25 July 10-25 cancelling; to United Kingdom, $3 75 to $4 June; to United Kingdom, $3 25 July; sugar from Cuba to United Kingdom 19s. 6d., first half of July; from Cuba to Japan, $7 one port, $7 25 two ports, July; from Cuba to Hong Kong, 29s., July; linseed oil from Rosario to New York, $4 10, early July.

FURS.—At Montreal raccoon led a $2,500,000 fur sale on the 21st inst. The Canadian Fur Auction Co. sold 10,631 raccoon pelts at prices $6 to $7 for fair qualities. Some 690 white fox sold $50 to $60 for best quality skins and down to $17. Badger brought from $10 to $15 for the better qualities and $5, $6 and $7 for lower grades. Blue fox skins in lots of three, four and five brought $50 and $60. At Montreal on June 23 wolf skins were active at the auction of the Canadian Fur Auction Co. First and second extra large and large wolf skins sold up to $17 50 each and other good lots of large skins at $15 each. Smaller skins sold at from $8 to $10 and a number of third and fourth grades at $1 50 to $4.

TOBACCO.—The trading has been mostly in Sumatra and Java tobacco. The tone has somewhat improved. At least a fair demand has come from manufacturers. They are supposed to be carrying none too abundant supplies. They may have to re-enter the market for larger purchases before long. Such at least is the belief of some of the trade. Good Sumatra tobacco already seems to command more attention.

COAL has been in better demand and firmer. According to the present ideas the British coal strike may not be settled until the middle of July. Meantime our exports are large to Great Britain. They have augmented the larger American demand due to abnormally cool weather. Soft coal output in this country has increased to meet the foreign demand. The British Government, it is estimated, has bought fully 1,000,000 tons up to the close of last week and since then the total has risen. The tidewater movement is noticeably large. The bituminous coal dumpings at Hampton Roads on Friday, June 18 were up to 70,263 tons. Yet the sales to the United Kingdom, it is said, do not exceed 5% of the total normal English output and much of the business has been speculative. Stocks of bituminous coal at New York tidewater have fallen to about the level of a year ago. The demand for soft coal has in general been slow outside of the call from railroads and utility companies. The industrial demand here has increased, but is not pressing. Consumers hope for lower prices. Anthracite has been in fair demand, but nothing very eager. Independents' price lists for small steam coals have been steadier, but some of the regular companies have cut prices 10 to 15c. at wholesale on buckwheat and steam sizes. Connellsville coke was $3 for run of oven furnace and $4 25 for foundry. Trade is not good, but output has been reduced to a point that steadies prices. New York tidewater coke dumpings on June 19-20 totaled 26 cars. There were standing on June 21, 29 cars.

COPPER has been quiet at 13.95 to 14c., delivered Connecticut Valley. Export sales were made at 13.82½c. f. a. s. New York. London on the 23d inst. declined 2s. 6d. on standard copper, and electrolytic for the first time in about a week declined 5s.; standard spot there, £56 17s. 6d.; futures, £57, 15s.; electrolytic, spot, £64, 15s.; futures, £65 5s. Later on prices became weaker. London was down 2s. 6d. on the 24th inst.; electrolytic fell 5s. to £64 10s. spot and £65 for futures; standard spot, £56 15s.; futures, £57 12s. 6d. To-day London standard spot was £56 17s. 6d.; futures, £57 15s.; electrolytic unchanged.

TIN has been in good demand and higher. London on the 23d advanced £2 15s. to £273 15s. fo spot and £273 5s. for futures on sales of 100 tons of spot and 800 tons of futures. Here on that day 200 tons were traded in, with spot and June at 62½c.; July, 61½c.; August, 61¼c., and September-October, 61c. Most of the demand is for Straits. There is little for other descriptions. Latterly prices have reacted somewhat in sympathy with a decline in London of £1 to £1 2s. 6d. New York dopped ⅜ to ½c., with salesr of 200 tons on the 24th inst. here and 900 in London. Spot and June here 61½c.; July, 61¼c.; August, 61 to 61⅛c.; September, 60¾ to 60⅞c. London to-day was £273 15s. for spot and £273 2s. 6d. for futures, showing more firmness.

LEAD was quoted at 8.25c. New York by the leading refiner and in the Middle West 8.10c. East St. Louis. The market was weaker early in the week but on the 23d inst. became steadier owing to an advance in London and a better demand. London on the 23d advanced 7s. 6d. to £30 1s. 3d. for spot and futures rose 8s. 9d. to £30 3s. 9d. on sales of 200 tons of spot and 2,000 tons of futures. Latterly there has been a fair demand and prices were steady at 8.25c. New York or 8.10c. East St. Louis. London on the 24th on the spot was 1s. 3d. higher at £30 2s. 6d. To-day spot £29 17s. 6d. Productin of lead smelters in this country in May totaled 49,853 tons, an increase over April of 3,135 tons. In the first three months of the year the average monthly production was 50,243 tons.

ZINC advanced on a stronger London market and higher ore prices in the Joplin district. The East St. Louis price was 7.17½c. Demand was rather quiet. London on the 23d was 7s. 6d. higher at £33 8s. 9d. for spot and 6s. 3d. higher at £33 10s. for futures on sales of 125 tons of spot and 750 tons of futures. Later prices continued to rise but galvanized sheets declined. Trade in zinc itself is small. It was quoted at 7.20 to 7.22½c. East St. Louis. London has advanced 5s. of late to £33 13s. 9d. on the sopt. To-day London spot £33 7s. 6d.; futures, £33 15s., or some decline.

STEEL has been in somewhat better demand. The industry is said to be operating 80% against 65 a year ago. Output is gradually being reduced. Steel beams are 2 cents a pound Pittsburgh, an advance of $2 a ton. It is said that sales of structural steel in the past week have been 37,000 tons, making 74,000 tons in two weeks. New inquiries call for about 15,000 tons. Two furnaces of steel companies in the Pittsburgh district are about to go out of blast. Export of iron and steel from the United States in May were 173,418 tons and the total for five months was 869,077 tons, which is nearly 25% higher than for the corresponding period of last year. Imports of iron and steel in May were 108,731 tons, the largest since January 1923. At Youngstown, Ohio, hot strip prices are steadier than those for cold rolled strip steel. Hot strip was quoted at 2.30 to 2.50c. for heavy to narrower than 6 inches. Leading independent tin plate concerns there are working up nearly to 100%, but others are not getting much and in some cases are idle. Pittsburgh reports a fair business. Wire prospects are selling for the third quarter at 2.50c. as the base price. Consumers are said to be very well supplied for the time being and therefore are less eager to purchase. Domestic tin plate has been steady at $5 50 a base box. New York was $5 50 nominally.

PIG IRON has sold to a fair extent to New England. German iron sold at $21 to Providence. No. 2 Pennsylvania has been nominally $21 to $21 50; Buffalo, $19 to $20; Virginia, $23 to $24; Birmingham, $21 to $22; Chicago, $21 to $21 50; basic Valley, $18 to $18.50. In general trade is slow. At Pittsburgh trade has been quiet and without interesting features. Here there are rumors that Eastern Pennsylvania has declined to $21. Buffalo is said to be weak at the quoted prices in the competition for New England business. In Youngstown prospects for a decrease in output have imparted a somewhat steadier tone.

WOOL has been steadier with some recent slight improvement in trade. Ohio and Pennsylvania fine delaine, 43 to 44c.; ½-blood, 43 to 44c.; ⅜-blood, 42 to 43c.; ¼-blood, 42c. Territory, clean basis, fine staple, $1 10 to $1 12; medium French combing, $1 to $1 05; medium clothing, 95 to 98c.; ½-blood staple, 95 to $1; ⅜-blood, 85 to 90c.; ¼-blood, 75 to 80c. Texas, clean, fine, 12 months, $1 10 to $1 12; 8 months, 98 to $1 10. Pulled, scoured basis, A super, 90 to 95c.; B, 80 to 85c.; C, 67 to 72c. Domestic, mohair, best combing, 65 to 70c. A Government report says of Boston: "Comment in the trade that stocks of wool in the hands of manufacturers and top makers are light has in some degree been substantiated by recent activities. A slight increase in the volume of knitting yarns moving was promptly reflected in firmer prices in the corresponding grades of top. Further influence was noted in a more active and firmer market for wools of the ¼-blood grade, which can be used in these yarns. It is generally conceded that the sale of yarns thus far has not reached any exceedingly large volume, although the movement in some wuarters is decidedly better.

Australian cables on the 18th inst. reported wool sales fixed at Perth for Sept. 28, with offerings of 15,000 bales; Oct. 19, 20,000; Nov. 9, 20,000, and Dec. 7, 20,000. At Sydney on June 21 a series opened to continue until the 24th inst., 22,000 bales being offered. Attendance was good. Yorkshire bought. Compared with the close of May, good wools were very firm but others irregular. Perth sales have

been arranged for Sept. 28, Oct. 19, Nov. 9 and Dec. 7, with 75,000 bales to be offered before the end of 1926. At Sydney on June 23 at the final sale of the year 22,000 bales of wool were offered in 3 days. Prices have been firm on the basis of the advance of 5% on the opening day over the closing series held in May. Selection poor. Some reoffered top-making 64-70s sold at 21d., or about $1 clean landed Boston in bond, for wool estimated to shrink 52% on current exchange. A few reoffered New Zealand wools 64-70s sold at the equivalent of $1 05 to $1 09 clean basis in bond at Boston. In Sydney on June 24 the wool sale series closed and greasy best lines and also scoured were unchanged; others dull and irregular. At Melbourne of the final offering in two days of 6,500 bales, some 90% sold. America bought little. Prices are reported unchanged there compared with the previous series. Brisbane will offer at her final series, June 29 to July 1, about 37,000 bales, including new wools.

In Boston of late according to a government report domestic fine wools were more active on the local market. Offerings of Texas, 12 months, were made at $1 05 and sales were closed at slightly under for early purchases now arriving. Texas stock recently acquired cannot be offered at this price due to the advancing tendency in the Texas market. There the prices being paid are bringing the estimated cost up to $1 05 clean basis, landed in Boston, for 12 months wool. Limited quantities of territory wool in original bags sell up to $1 08 for lots containing a high percentage of fine strictly combing.

COTTON.

Friday Night, June 25 1926.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 52,469 bales, against 80,676 bales last week and 47,642 bales the previous week, making the total receipts since the 1st of August 1925, 9,403,240 bales, against 9,072,501 bales for the same period of 1924-25, showing an increase since Aug. 1 1925 of 330,739 bales.

The exports for the week ending this evening reach a total of 42,001 bales, of which 4,820 were to Great Britain, 1,353 to France, 3,331 to Germany, 9,816 to Italy, ---- to Russia, 17,236 to Japan and China, and 5,445 to other destinations. In the corresponding week last year total exports were 25,559 bales. For the season to date aggregate exports have been 7,557,673 bales, against 7,832,963 bales in the same period of the previous season. Below are the exports for the week:

Week Ended June 26 1926. Exports from—	*Exported to—*

NOTE.—*Exports to Canada.*—It has never been our practice to include in the above tables exports of cotton to Canada, the reason being that virtually all the cotton destined to the Dominion comes overland and it is impossible to get returns concerning the same from week to week, while reports from the customs districts on the Canadian border are always very slow in coming to hand. In view, however of the numerous inquiries we are receiving regarding the matter, we will say that for the month of May the exports to the Dominion the present season have been 19,399 bales. In the corresponding month of the preceding season the exports were 16,572 bales. For the ten months ended May 31 1926, there were 228,016 bales exported, as against 183,832 bales for the corresponding ten months of 1925.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named:

June 25 at—	*On Shipboard, Not Cleared for—*						*Leaving Stock.*
	Great Britain	*France.*	*Germany.*	*Other Foreign*	*Coastwise.*	*Total.*	
Galveston	4,800	3,300	3,500	11,400	3,500	26,500	262,311

Speculation in cotton for future delivery has been on a fair scale at irregular prices, but with the general trend upward. That was especially the case with July, which has been at a premium of 135 to 145 points over October. October itself at one time reached a premium over December of 22 points. Later it fell to 2 points. One of the outstanding features has been the indifference of the market to favorable crop reports. Some have put the condition at 77.5 to 77.7% and the crop at 15,500,000 to 16,000,000 bales. But the market was short. Contracts became scarce. Shorts were alarmed. They covered freely, partly on stop orders. Liverpool bought the next crop months, if it sold July. The trade has been a steady buyer. Not many notices were expected here to-day, with only 28,158 bales of certificated cotton here, but the whole, it turned out, was tendered. New York stocks are much smaller than in recent years. Little or no cotton, it appears, is en route for New York for delivery on July contracts. Spot markets have latterly advanced and the daily business still very noticeably exceeds that of a year ago. The lower grades have been in better demand. Fall River reported a better inquiry for cloths, but the bids were ⅛ to ¼c. under current quotations and mills refuse to accept such reduced prices. The weather in the Southwest and in parts of the Eastern Gulf States has been rainy and some complaints are heard of the presence of weevil in the Eastern belt. More was said of this matter in the latest weekly report than in any previous one this season. Private wires have latterly reported weevil as more numerous in Texas, Oklahoma and Arkansas. Some private reports have put the condition of the Carolinas and Georgia at a low figure on the basis, however, of advices coming down no later than June 17 and since then those States have admittedly been greatly benefited by copious rains. The trade has been a steady buyer here. Much fixing of prices on July has been done. July has at times dominated the situation or nearly so. Most of the time the paramount factors have been the weather, especially the rains in the Southwest, talk of weevil and proper spreading and finally the oversold condition of a narrow market. On declines the supply of con-

$1 55 for 5s-7s, $1 90 to $1 92½ for 7s-9s, and $2 52½ for 9s-12s. Later 1,000 Sansinena cows sold at $28 62½, or 13c.

OCEAN FREIGHTS.—Grain and coal tonnage has been the outstanding feature. More than 50 loads of heavy grain were taken on the berth last week. Baltimore to Hamburg-Rotterdam, June, 13c.; New York to London at 1s. 9d. for June; New York to Liverpool at 1s. 9d. for June; New York to Manchester, 1s. 9d. for July; New York to Antwerp at 11c. for July; New York to Antwerp, 10c. for July; New York to Rotterdam, 14c. for July, and Philadelphia and Baltimore to Rotterdam, 12c. for July. Later on the grain demand fell off. Later coal tonnage was in less demand. Grain rates advanced in an active business.

CHARTERS included grain from Montreal to Antwerp or Rotterdam, 15½c.; Hamburg, 16c., one-third barley and (or) oats guaranteed, June 5-25 cancelling; from Gulf to United Kingdom, 3s. 7½d., August; from Gulf to United Kingdom, 3s. 10½d., option Bordeaux-Hamburg, 3s. 7½d., Antwerp or Rotterdam, 3s. 6d., July 1-20 cancelling; from Montreal to Rotterdam, 3s., July 8 cancelling; from Montreal to Rotterdam, 15c., 15 loads of oats at Quebec, 17½c., early July cancelling; from Montreal to Hamburg or Bremen, 17c., option one-third lights, July 5 cancelling; from New Orleans to United Kingdom, 4s., if any other Gulf port, 4s. 1½d., June 27-July 17 cancelling; from Montreal to Antwerp or Rotterdam, 15½c., Hamburg, 16½c., option one-third lights, July 5 cancelling; from Montreal to Antwerp-Hamburg range, 16c. one port, 16½c. two ports, July 5-15 cancelling; from Montreal to Antwerp or Rotterdam, 15½c., Hamburg or Bremen, 16½c., one-half barley and (or) oats guaranteed, July 5-15 cancelling; from Montreal to Havre-Dunkirk, 3s. 6d., one port, 3s. 9d. two ports, July 5 cancelling; 35,000 qrs. from Montreal to Mediterranean, 18c. one port, 18½c. two., 19c. three ports, option Adriatic, 19c. one port, and 19½c. two ports, Oct. 10-25 cancelling; from Montreal to Rotterdam, 15½c., one-third barley and (or) oats guaranteed, July 5 cancelling; from Columbia River to United Kingdom-Continent, 28s. 8d., June-July; from Vancouver to United Kingdom-Continent, 26s. 9d., July 15 cancelling; coal from Hampton Roads to River Plate, $4 65 June; to Bahia, Brazil, $4 10; to United Kingdom, $3 25 June-July; to West Italy, $3 20, option Venice, $3 50 June-July; to United Kingdom, 14s. spot; to United Kingdom, $3 25 June-July; to United Kingdom, $3 50 prompt; to Manchester, $3 30 June; to United Kingdom, $3 20 July 20 cancelling; to United Kingdom, $3 50 end of July cancelling; to Bahia, $4 10 July; to United Kingdom, 13s. 6d. June; to United Kingdom, $3 25 July 10-25 cancelling; to United Kingdom, $3 75 to $4 June; to United Kingdom, $3 25 July; sugar from Cuba to United Kingdom 19s. 6d., first half of July; from Cuba to Japan, $7 one port, $7 25 two ports, July; from Cuba to Hong Kong, 29s., July; linseed oil from Rosario to New York, $4 10, early July.

FURS.—At Montreal raccoon led a $2,500,000 fur sale on the 21st inst. The Canadian Fur Auction Co. sold 10,631 raccoon pelts at prices $6 to $7 for fair qualities. Some 690 white fox sold $50 to $60 for best quality skins and down to $17. Badger brought from $10 to $15 for the better qualities and $5, $6 and $7 for lower grades. Blue fox skins in lots of three, four and five brought $50 and $60. At Montreal on June 23 wolf skins were active at the auction of the Canadian Fur Auction Co. First and second extra large and large wolf skins sold up to $17 50 each and other good lots of large skins at $15 each. Smaller skins sold at from $8 to $10 and a number of third and fourth grades at $1 50 to $4.

TOBACCO.—The trading has been mostly in Sumatra and Java tobacco. The tone has somewhat improved. At least a fair demand has come from manufacturers. They are supposed to be carrying none too abundant supplies. They may have to re-enter the market for larger purchases before long. Such at least is the belief of some of the trade. Good Sumatra tobacco already seems to command more attention.

COAL has been in better demand and firmer. According to the present ideas the British coal strike may not be settled until the middle of July. Meantime our exports are large to Great Britain. They have augmented the larger American demand due to abnormally cool weather. Soft coal output in this country has increased to meet the foreign demand. The British Government, it is estimated, has bought fully 1,000,000 tons up to the close of last week and since then the total has risen. The tidewater movement is noticeably large. The bituminous coal dumpings at Hampton Roads on Friday, June 18 were up to 70,263 tons. Yet the sales to the United Kingdom, it is said, do not exceed 5% of the total normal English output and much of the business has been speculative. Stocks of bituminous coal at New York tidewater have fallen to about the level of a year ago. The demand for soft coal has in general been slow outside of the call from railroads and utility companies. The industrial demand here has increased, but is not pressing. Consumers hope for lower prices. Anthracite has been in fair demand, but nothing very eager. Independents' price lists for small steam coals have been steadier, but some of the regular companies have cut prices 10 to 15c. at wholesale on buckwheat and steam sizes. Connellsville coke was $3 for run of oven furnace and $4 25 for foundry. Trade is not good, but output has been reduced to a point that steadies prices. New York tidewater coke dumpings on June 19-20 totaled 26 cars. There were standing on June 21, 29 cars.

COPPER has been quiet at 13.95 to 14c., delivered Connecticut Valley. Export sales were made at 13.82½c. f. a. s. New York. London on the 23d inst. declined 2s. 6d. on standard copper, and electrolytic for the first time in about a week declined 5s.; standard spot there, £56 17s. 6d.; futures, £57, 15s.; electrolytic, spot, £64, 15s.; futures, £65 5s. Later on prices became weaker. London was down 2s. 6d. on the 24th inst.; electrolytic fell 5s. to £64 10s. spot and £65 for futures; standard spot, £56 15s.; futures, £57 12s. 6d. To-day London standard spot was £56 17s. 6d.; futures, £57 15s.; electrolytic unchanged.

TIN has been in good demand and higher. London on the 23d advanced £2 15s. to £273 15s. fo spot and £273 5s. for futures on sales of 100 tons of spot and 800 tons of futures. Here on that day 200 tons were traded in, with spot and June at 62½c.; July, 61½c.; August, 61¼c., and September-October, 61c. Most of the demand is for Straits. There is little for other descriptions. Latterly prices have reacted somewhat in sympathy with a decline in London of £1 to £1 2s. 6d. New York dopped ⅜ to ½c., with salesr of 200 tons on the 24th inst. here and 900 in London. Spot and June here 61½c.; July, 61¼c.; August, 61 to 61½c.; September, 60¾ to 60⅞c. London to-day was £273 15s. for spot and £273 2s. 6d. for futures, showing more firmness.

LEAD was quoted at 8.25c. New York by the leading refiner and in the Middle West 8.10c. East St. Louis. The market was weaker early in the week but on the 23d inst. became steadier owing to an advance in London and a better demand. London on the 23d advanced 7s. 6d. to £30 1s. 3d. for spot and futures rose 8s. 9d. to £30 3s. 9d. on sales of 200 tons of spot and 2,000 tons of futures. Latterly there has been a fair demand and prices were steady at 8.25c. New York or 8.10c. East St. Louis. London on the 24th on the spot was 1s. 3d. higher at £30 2s. 6d. To-day spot £29 17s. 6d. Productin of lead smelters in this country in May totaled 49,853 tons, an increase over April of 3,135 tons. In the first three months of the year the average monthly production was 50,243 tons.

ZINC advanced on a stronger London market and higher ore prices in the Joplin district. The East St. Louis price was 7.17½c. Demand was rather quiet. London on the 23d was 7s. 6d. higher at £33 8s. 9d. for spot and 6s. 3d. higher at £33 10s. for futures on sales of 125 tons of spot and 750 tons of futures. Later prices continued to rise but galvanized sheets declined. Trade in zinc itself is small. It was quoted at 7.20 to 7.22½c. East St. Louis. London has advanced 5s. of late to £33 13s. 9d. on the sopt. To-day London spot £33 7s. 6d.; futures, £33 15s., or some decline.

STEEL has been in somewhat better demand. The industry is said to be operating 80% against 65 a year ago. Output is gradually being reduced. Steel beams are 2 cents a pound Pittsburgh, an advance of $2 a ton. It is said that sales of structural steel in the past week have been 37,000 tons, making 74,000 tons in two weeks. New inquiries call for about 15,000 tons. Two furnaces of steel companies in the Pittsburgh district are about to go out of blast. Export of iron and steel from the United States in May were 173,418 tons and the total for five months was 869,077 tons, which is nearly 25% higher than for the corresponding period of last year. Imports of iron and steel in May were 108,731 tons, the largest since January 1923. At Youngstown, Ohio, hot strip prices are steadier than those for cold rolled strip steel. Hot strip was quoted at 2.30 to 2.50c. for heavy to narrower than 6 inches. Leading independent tin plate concerns there are working up nearly to 100%, but others are not getting much and in some cases are idle. Pittsburgh reports a fair business. Wire prospects are selling for the third quarter at 2.50c. as the base price. Consumers are said to be very well supplied for the time being and therefore are less eager to purchase. Domestic tin plate has been steady at $5 50 a base box. New York was $5 50 nominally.

PIG IRON has sold to a fair extent to New England. German iron sold at $21 to Providence. No. 2 Pennsylvania has been nominally $21 to $21 50; Buffalo, $19 to $20; Virginia, $23 to $24; Birmingham, $21 to $22; Chicago, $21 to $21 50; basic Valley, $18 to $18.50. In general trade is slow. At Pittsburgh trade has been quiet and without interesting features. Here there are rumors that Eastern Pennsylvania has declined to $21. Buffalo is said to be weak at the quoted prices in the competition for New England business. In Youngstown prospects for a decrease in output have imparted a somewhat steadier tone.

WOOL has been steadier with some recent slight improvement in trade. Ohio and Pennsylvania fine delaine, 43 to 44c.; ½-blood, 43 to 44c.; ⅜-blood, 42 to 43c.; ¼-blood, 42c. Territory, clean basis, fine staple, $1 10 to $1 12; medium French combing, $1 to $1 05; medium clothing, 95 to 98c.; ½-blood staple, 95 to $1; ⅜-blood, 85 to 90c.; ¼-blood, 75 to 80c. Texas, clean, fine, 12 months, $1 10 to $1 12; 8 months, 98 to $1 10. Pulled, scoured basis, A super, 90 to 95c.; B, 80 to 85c.; C, 67 to 72c. Domestic, mohair, best combing, 65 to 70c. A Government report says of Boston: "Comment in the trade that stocks of wool in the hands of manufacturers and top makers are light has in some degree been substantiated by recent activities. A slight increase in the volume of knitting yarns moving was promptly reflected in firmer prices in the corresponding grades of top. Further influence was noted in a more active and firmer market for wools of the ¼-blood grade, which can be used in these yarns. It is generally conceded that the sale of yarns thus far has not reached any exceedingly large volume, although the movement in some wuarters is decidedly better.

Australian cables on the 18th inst. reported wool sales fixed at Perth for Sept. 28, with offerings of 15,000 bales; Oct. 19, 20,000; Nov. 9, 20,000, and Dec. 7, 20,000. At Sydney on June 21 a series opened to continue until the 24th inst., 22,000 bales being offered. Attendance was good. Yorkshire bought. Compared with the close of May, good wools were very firm but others irregular. Perth sales have

been arranged for Sept. 28, Oct. 19, Nov. 9 and Dec. 7, with 75,000 bales to be offered before the end of 1926. At Sydney on June 23 at the final sale of the year 22,000 bales of wool were offered in 3 days. Prices have been firm on the basis of the advance of 5% on the opening day over the closing series held in May. Selection poor. Some reoffered top-making 64-70s sold at 21d., or about $1 clean landed Boston in bond, for wool estimated to shrink 52% on current exchange. A few reoffered New Zealand wools 64-70s sold at the equivalent of $1 05 to $1 09 clean basis in bond at Boston. In Sydney on June 24 the wool sale series closed and greasy best lines and also scoured were unchanged; others dull and irregular. At Melbourne of the final offering in two days of 6,500 bales, some 90% sold. America bought little. Prices are reported unchanged there compared with the previous series. Brisbane will offer at her final series, June 29 to July 1, about 37,000 bales, including new wools.

In Boston of late according to a government report domestic fine wools were more active on the local market. Offerings of Texas, 12 months, were made at $1 05 and sales were closed at slightly under for early purchases now arriving. Texas stock recently acquired cannot be offered at this price due to the advancing tendency in the Texas market. There the prices being paid are bringing the estimated cost up to $1 05 clean basis, landed in Boston, for 12 months wool. Limited quantities of territory wool in original bags sell up to $1 08 for lots containing a high percentage of fine strictly combing.

COTTON.

Friday Night, June 25 1926.

THE MOVEMENT OF THE CROP, as indicated by our telegrams from the South to-night, is given below. For the week ending this evening the total receipts have reached 52,469 bales, against 80,676 bales last week and 47,642 bales the previous week, making the total receipts since the 1st of August 1925, 9,403,240 bales, against 9,072,501 bales for the same period of 1924-25, showing an increase since Aug. 1 1925 of 330,739 bales.

The exports for the week ending this evening reach a total of 42,001 bales, of which 4,820 were to Great Britain, 1,353 to France, 3,331 to Germany, 9,816 to Italy, ---- to Russia, 17,236 to Japan and China, and 5,445 to other destinations. In the corresponding week last year total exports were 25,559 bales. For the season to date aggregate exports have been 7,557,673 bales, against 7,832,963 bales in the same period of the previous season. Below are the exports for the week:

NOTE.—*Exports to Canada.*—It has never been our practice to include in the above tables exports of cotton to Canada, the reason being that virtually all the cotton destined to the Dominion comes overland and it is impossible to get returns concerning the same from week to week, while reports from the customs districts on the Canadian border are always very slow in coming to hand. In view, however of the numerous inquiries we are receiving regarding the matter, we will say that for the month of May the exports to the Dominion the present season have been 19,399 bales. In the corresponding month of the preceding season the exports were 16,572 bales. For the ten months ended May 31 1926, there were 228,016 bales exported, as against 183,832 bales for the corresponding ten months of 1925.

In addition to above exports, our telegrams to-night also give us the following amounts of cotton on shipboard, not cleared, at the ports named:

June 25 at —	*On Shipboard, Not Cleared for—*						*Leaving Stock.*
	Great Britain	*France.*	*Germany*	*Other Foreign*	*Coastwise.*	*Total.*	
Galveston	4,800	3,300	3,500	11,400	3,500	26,500	262,311

Total 1924	12,759	9,699	8,716	18,572	1,939	51,685	247,052

Speculation in cotton for future delivery has been on a fair scale at irregular prices, but with the general trend upward. That was especially the case with July, which has been at a premium of 135 to 145 points over October. October itself at one time reached a premium over December of 22 points. Later it fell to 2 points. One of the outstanding features has been the indifference of the market to favorable crop reports. Some have put the condition at 77.5 to 77.7% and the crop at 15,500,000 to 16,000,000 bales. But the market was short. Contracts became scarce. Shorts were alarmed. They covered freely, partly on stop orders. Liverpool bought the next crop months, if it sold July. The trade has been a steady buyer. Not many notices were expected here to-day, with only 28,158 bales of certificated cotton here, but the whole, it turned out, was tendered. New York stocks are much smaller than in recent years. Little or no cotton, it appears, is en route for New York for delivery on July contracts. Spot markets have latterly advanced and the daily business still very noticeably exceeds that of a year ago. The lower grades have been in better demand. Fall River reported a better inquiry for cloths, but the bids were ⅛ to ¼c. under current quotations and mills refuse to accept such reduced prices. The weather in the Southwest and in parts of the Eastern Gulf States has been rainy and some complaints are heard of the presence of weevil in the Eastern belt. More was said of this matter in the latest weekly report than in any previous one this season. Private wires have latterly reported weevil as more numerous in Texas, Oklahoma and Arkansas. Some private reports have put the condition of the Carolinas and Georgia at a low figure on the basis, however, of advices coming down no later than June 17 and since then those States have admittedly been greatly benefited by copious rains. The trade has been a steady buyer here. Much fixing of prices on July has been done. July has at times dominated the situation or nearly so. Most of the time the paramount factors have been the weather, especially the rains in the Southwest, talk of weevil and proper spreading and finally the oversold condition of a narrow market. On declines the supply of con-

tracts would suddenly become exhausted. Oftentimes the selling was confined to traders in the ring.

On the other hand, crop news has been generally good. The last weekly Government report emphasized the improvement in recent weeks. Conditions have been fair to very good over much of the belt. Though weevil has appeared on both sides of the river it has done no serious damage. Nor have other insects like the "hopper" or the flea, for instance, according to most reports. The South and at times Wall Street, the West and Liverpool have sold. The Liverpool market has been dull and has not encouraged an advance on this side. There has been short selling and liquidation there on better weather. Its spot sales have been only 4,000 to 6,000 bales a day. Manchester has been dull and despondent over the continuance of the British coal strike. It is said that curtailment in the Lancashire mills will become far more drastic and some may even close down if the strike is not soon settled. No marked improvement in trade is reported in New England. Where inquiry has increased lower prices are expected by the buyer. Worth Street has been quiet. Expectations of lower prices for raw cotton owing to the better crop outlook tends to restrict trade in goods to a small volume. Speculation has for the most part remained quiet. If the fact that prices are low as compared with former years keeps short selling within bounds the dulness of trade and big crop and acreage estimates is no less restrictive of outside speculation for a rise. Some lines of cotton goods, moreover, have had to be sold at low prices. Exports of raw cotton have been small.

To-day prices at one time were 16 to 22 points lower, the latter on July and December. December was under pressure. Several large blocks were sold out, supposedly for long account. The morning weather reports were in the main favorable. Liverpool was rather sluggish. Manchester was dull. Monsoon reports from East India were unfavorable. Some private crop advices in regard to the American yield were favorable. A New Orleans report put the condition at 75 and the crop anywhere from 14,000,000 to 17,000,000, according to future weather conditions. Texas, to all appearances, had very little rain, judging from the morning weather map. Wall Street, Liverpool and the South as well as the West sold. July notices were larger than expected. Early in the day they were reported as for 3,700 bales. Later it turned out that the total was for some 28,000 bales, or in other words practically the whole certificated stock. For a time July felt this and dropped, as already stated. Dry goods reports, too, were not favorable, except that printers at Fall River were doing a good trade, it was said. The general impression was that the crop in this country was doing very well. Speculation was comparatively small. If many are averse to selling aggressively on June crop condition, they are quite as unwilling, to all appearances, to buy freely with the crop outlook in general so favorable as it is now. But later on there was something of a rally, especially in July. The trade was fixing prices on a liberal scale in that month. It went to 145 points over October, as against 137 the day before. It was 156 points over December, as against 139 on Thursday. October, which had closed only 5 points over December on Thursday ended at 11 points over. Later official reports showed that Texas and Oklahoma had considerable rain. In northwestern Texas it amounted to 1 to over 3 inches. There were reports of boll weevil and hoppers. Concentrated rather heavy liquidation in December on the whole was readily taken. Certainly no marked decline ensued. In spite of the notices for 28,000 bales, July rallied and closed 1 point higher for the day. Spinners' takings showed some increase over last week, and according to some figures an increase over last year also. Exports to Japan of late have somewhat increased. If there is to be a bad monsoon and the East Indian crop of cotton is to decrease, it is intimated that Japanese buying of American cotton will correspondingly increase. Final prices show a rise for the week of 7 to 25 points on July, October and December, while later months are off some 4 to 13 points on January and March, though May ends at the same prices as a week ago. Spot cotton to-day was steady and unchanged at 18.55c., showing an advance for the week of 20 points.

The official quotation for middling upland cotton in the New York market each day for the past week has been:

June 19 to June 25—	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.
Middling upland	18.35	18.30	18.55	18.35	18.55	18.55

THE VISIBLE SUPPLY OF COTTON to-night, as made up by cable and telegraph, is as follows. Foreign stocks, as well as afloat, are this week's returns, and consequently all foreign figures are brought down to Thursday evening. But to make the total the complete figures for to-night (Friday), we add the item of exports from the United States, including in it the exports of Friday only.

June 25—	1926.	1925.	1924.	1923.
Stock at Liverpool ..... bales	847,000	708,000	480,000	478,000

The above total shows that the interior stocks have *decreased* during the week 43,815 bales and are to-night 796,313 bales less than at the same time last year. The receipts at all towns have been 33,346 bales more than the same week last year.

OVERLAND MOVEMENT FOR THE WEEK AND SINCE AUG. 1.—We give below a statement showing the overland movement for the week and since Aug. 1, as made up from telegraphic reports Friday night. The results for the week and since Aug. 1 in the last two years are as follows:

June 25— Shipped	1925-26 Week.	1925-26 Since Aug. 1.	1924-25 Week.	1924-25 Since Aug. 1.
Via St. Louis	6,512	700,575	1,549	711,844
Via Mounds, &c	2,360	303,117	350	256,190
Via Rock Island	268	40,312	----	34,349
Via Louisville	1,049	61,604	----	49,594
Via Virginia points	3,560	235,640	3,205	238,699
Via other routes, &c	5,220	416,456	5,698	491,480
Total gross overland	18,969	1,757,704	10,802	1,782,156
Deduct Shipments—				
Overland to N. Y., Boston, &c	3,417	148,899	531	98,629
Between interior towns	417	25,143	335	26,437
Inland, &c., from South	9,751	814,043	8,099	690,498
Total to be deducted	13,585	988,085	8,965	815,564
Leaving total net overland *	5,384	769,619	1,837	966,592

* Including movement by rail to Canada.

The foregoing shows the week's net overland movement this year has been 5,384 bales, against 1,837 bales for the week last year, and that for the season to date the aggregate net overland exhibits a decrease from a year ago of 196,973 bales.

In Sight and Spinners' Takings.	1925-26 Week.	1925-26 Since Aug. 1.	1924-25 Week.	1924-25 Since Aug. 1.

FIRST BALE OF COTTON FROM 1926 CROP.—The first bale of cotton from the 1926 crop was received at Houston on June 19. This bale weighed 450 lbs. and came from Donna Hidalgo County, Texas, down on the Rio Grande. Receipt of this first bale for the present season was 18 days later than that of last year, which was on June 1 and which also was raised in Hidalgo County but was eight days ahead of the first bale in 1924.

As is the usual custom with the first yield of the season the bale was sold at auction on June 21 on the floor of the Houston Cotton Exchange.

CENSUS REPORT ON COTTONSEED OIL PRODUCTION DURING MAY.—Persons interested in this report will find it in our department headed "Indications of Business Activity" on earlier pages.

ACTIVITY IN THE COTTON SPINNING INDUSTRY FOR MAY.—Persons interested in this report will find it in our department headed "Indications of Business Activity" on earlier pages.

WEATHER REPORTS BY TELEGRAPH.—Reports to us by telegraph this evening denote that the weather during the week has been generally favorable for cotton and the crop has made very good progress except in the northeastern section of the cotton belt, where it has been somewhat too cool. Rains have fallen in nearly all sections of the cotton belt and have been beneficial. They were very helpful in northern Georgia and in North Carolina and South Carolina where drought has prevailed for some time.

Texas.—The weather during the past week has been very good for cotton and the heavy rains in some parts were beneficial, although cotton fleas and lice are making their appearances. Growth has been very good and cotton plants are fruiting well in the south. Chopping and cultivating are well advanced.

Mobile, Ala.—There have been frequent showers with heavy rains at scattered points, supplying ample moisture. Cotton is growing rapidly and squares are forming. Several localities report that weevil are more active. Damage, however, is slight. The general condition of the crop is good.

The following statement we have also received by telegraph, showing the height of rivers at the points named at 8 a. m. of the dates given:

		June 25 1926. Feet.	June 26 1925. Feet.
New Orleans	Above zero of gauge.	2.3	1.5
Memphis	Above zero of gauge.	15.4	14.8
Nashville	Above zero of gauge.	10.6	7.8
Shreveport	Above zero of gauge.	8.7	9.5
Vicksburg	Above zero of gauge.	14.0	15.1

RECEIPTS FROM THE PLANTATIONS.—The following table indicates the actual movement each week from the plantations. The figures do not include overland receipts nor Southern consumption; they are simply a statement of the weekly movement from the plantations of that part of the crop which finally reaches the market through the outports.

Week Ended	Receipts at Ports.			Stocks at Interior Towns.			Receipts from Plantations

The above statement shows: (1) That the total receipts from the plantations since Aug. 1 1925 are 10,304,580 bales; in 1924 were 9,136,683 bales, and in 1923 were 6,522,420 bales. (2) That although the receipts at the outports the past week were 52,469 bales, the actual movement from plantations was 8,654 bales, stocks at interior towns having decreased 43,815 bales during the week. Last year receipts from the plantations for the week were nil bales and for 1924 they were 18,859 bales.

1923-24	----	4,000	----	4,000	128,000	492,000	------	620,000
Total all—								
1925-26	----	16,000	20,000	36,000	154,000	991,000	1,677,000	2,822,000
1924-25	12,000	28,000	90,000	130,000	173,000	1,029,000	1,800,000	3,002,000
1923-24	----	8,000	26,000	34,000	278,000	1,403,000	1,491,000	3,172,000

According to the foregoing, Bombay appears to show a decrease compared with last year in the week's receipts of 11,000 bales. Exports from all India ports record a decrease of 94,000 bales during the week, and since Aug. 1 show an decrease of 180,000 bales.

ALEXANDRIA RECEIPTS AND SHIPMENTS.—We now receive weekly a cable of the movements of cotton at Alexandria, Egypt. The following are the receipts and shipments for the past week and for the corresponding week of the previous two years.

Alexandria, Egypt, June 23.	1925-26.		1924-25.		1923-24.	
Receipts (cantars)—						
This week		70,000		1,200		500
Since Aug. 1		7,833,607		7,121,819		6,392,194
Exports (bales)—	*This Week.*	*Since Aug. 1.*	*This Week.*	*Since Aug. 1.*	*This Week.*	*Since Aug. 1.*
To Liverpool	8,000	189,056	----	191,512	5,750	214,662
To Manchester, &c	----	189,400	3,500	224,460	4,500	208,878
To Continent and India	2,000	332,959	2,500	360,603	1,500	361,876
To America	1,000	150,926	----	124,813	----	106,851
Total exports	11,000	862,341	6,000	901,388	11,750	892,267

Note.—A cantar is 99 lbs. Egyptian bales weigh about 750 lbs.
This statement shows that the receipts for the week ending June 23 were 70,000 cantars and the foreign shipments 11,000 bales.

MANCHESTER MARKET.—Our report received by cable to-night from Manchester states that the market in yarn is easy and in cloths is quiet. Demand for China is poor. We give prices to-day below and leave those for previous weeks of this and last year for comparison.

BREADSTUFFS

Friday Night, June 25 1926.

Flour has been in only moderate demand and without feature of special interest. In other words, the trade has remained in the same old rut. Some recent Kansas City reports have been better. But in general there has been no activity. The export demand for Canadian flour has been sharply watched. And some business has been done with Germany. If this country can sell hard wheat to Europe it seems no great stretch of reasoning to assume that it can do a better business with the manufactured product or flour. But the domestic buyer adheres as tenaciously as ever to the policy of buying only in small, or at best moderate, quantities from time to time as his needs demand. Pennsylvania officials in the State Board of Agriculture told bakers that increased use of bakers' bread has decreased the average consumption of wheat for each person 1.3 bushels.

Wheat declined on the 19th inst., owing to an overbought condition of the market, and indications that the Southwestern crop movement is about to increase. Prices fell 1 to 2¼c. net, or nearly 3c., on July from the early top. The immediate course of prices is likely to hinge very largely on the weather in the Southwest; also on the milling and export demand. June sold at 9c. under July, but June wheat was not much wanted. Primary receipts of wheat on the 19th inst. were 681,000 bushels, against 572,000 on the 12th inst. and 891,000 in 1925; shipments, 490,000, against 738,000 a week previous and 514,000 last year. No. 2 red winter on the 19th inst. was 11c. to 13c. over July and No. 2 hard 20 to 21c. over. There were charters for 100,000 bushels of wheat from Montreal at 10½c. and 100,000 bushels to Buffalo at 3¾c., with 45,000 bushels of corn and 20,000 bushels of rye to Georgian Bay. Speculation was only one-half that of last year. Supplies on ocean passage are much larger than in 1925. European crop conditions are less favorable than in May. Domestic prospects are better than recently. On the 21st inst. prices fell 1½ to 1¾c., owing to clearing weather in the Southwest and prospects of larger receipts, though on that day they were hardly as large as expected. Export sales were 300,000 bushels, largely new winter wheat. Interior Kansas cash markets declined 2 to 4c., and Chicago 1 to 3c. Liverpool was ⅞ to 1⅞d. lower. The Northwest had rains. South Alberta, Canada, had beneficial rains. Rains occurred early in the week in parts of Kansas and Oklahoma, but they awakened no fears of a wet harvest. The world shipments last week were 16,505,000 bushels and the quantity on passage reached 56,184,000 bushels. Italian crop reports were a little more cheerful. One estimate put the yield in Italy at 220,000,000 bushels, or 21,000,000 less than last year, but this is 42,000,000 above the five-year average. Export demand was sluggish. The United States visible supply decreased last week 1,623,000 bushels, against a decrease in the same week last year of 1,787,000 bushels. The total was 12,539,000 bushels, against 31,144,000 a year ago. This had been discounted. Australian wheat exports the past week totaled 1,528,000 bushels, against 1,080,000 in the previous week and 2,440,000 last year. For the season to date 53,196,000 bushels were exported, against 95,812,000 last year and 53,347,000 two years ago. The "Northwestern Miller" said: "Good rains in the Northwest last week greatly helped the outlook for the spring wheat crop in the United States, while reports from Canada indicated that the condition there is well above average. The winter wheat crop is now in the midst of harvest and the preliminary results in the southwest of the United States are good." The 1926 wheat crop of India is reported in a second estimate of 323,605,000 bushels, an increase of 3,397,000 bushels over the first estimatede dated April 22, according to a cablegram received from the Indian Department of Agriculture. This estimate is still about 1,000,000 bushels below the yield last year and some 5,000,000 below the second estimate made of last year's crop. World wheat shipments last week were 16,505,000 bushels. The quantity on passage was 55,184,000 bushels, against 48,976,000 last year. Duluth line house operators who cover a good part of North Dakota and Montana said that general reports were much better since recent rains. Some reports said that there has been enough moisture to carry the crop along for the next couple of weeks. To-day prices ended 1¼ to 3¼c. lower in Chicago and ½c. lower in Winnipeg. Yet early prices were slightly higher, with the Liverpool market firm, reports of floods in Germany and more or less covering. Export sales were 500,000 to 600,000 bushels. Winnipeg acted very well all day. The export business was in Manitoba and new winter. New winter, however, was not really in much demand. Later on the early rise gave place to a sharp break. The defeat of the Haugen bill in the United States Senate by 45 to 39 was undoubtedly a damper. July dropped to 2c. over September. It ended ½c. under December. It was said that a large New York operator was selling freely for long account. Hedge sales contributed to the decline. So did large receipts. And the export demand was nothing remarkable. The weather was favorable for harvesting in the Southwest. In the spring wheat belt the weather was also good. The Canadian crop, it is believed in some quarters, will approximate 500,000,000 bushels if present conditions hold out. The buying was mostly by shorts and against privileges. The world shipments are estimated at about 12,000,000 bushels, including something over 8,000,000 from North America. Sentiment is generally bearish. The tendency of the market is to get short, and strengthen the technical position. Final prices show a decline for the week of 3¼ to 7c., the latter on July.

Indian corn declined at one time ¼ to ⅜c., after an early advance of ¼ to ¾c. Speculation was not confident. Recent fluctuations have not been of a sort to encourage it. The industries attracted by low prices have been buying low grades on a noticeable scale. The primary receipts on the 19th inst. were 615,000 bushels, against 1,078,000 a week previous and 428,000 last year; shipments, 506,000 bushels, against 400,000 a week previous and 487,000 last year. The severe break in cottonseed oil after the recent advance had an effect on prices in Liverpool. The supply of corn there is light owing to small receipts lately and the better spot demand which is going into consumptive channels. There is an absence of re-sellers' offers and nearby positions are firmly held, but the more distant shipment positions are offered at lower prices. World's shipment last week were 6,805,000 bushels, which is much larger than usual at this time of the season, but most of these quanties are destined to the Continent and for "orders." The quantity on passage was 25,633,000 bushels, against 21,760,000 a year ago. The United States visible supply increased last week 1,913,000 bushels, against a decrease in the same week last year of 700,000 bushels. The total is now 31,394,000 bushels, against 17,794,000 last year. Prices on the 21st inst. ended ¼ to ½c. lower. July was down to a new low. The trading was small. Crop prospects are believed to be improving. To-day prices closed ½ to 1c. lower on big trading. One cause of the liquidation was the defeat of the so-called farm relief measure, or the Haugen bill, in the United States Senate on the 24th inst. Selling was general. The weakness in wheat had some effect. The dulness of the cash trade was another depressing factor. And the weather was generally favorable for the crop. Receipts were only moderate, but this was neutralized by the absence of a good cash demand. Buying was mostly by the shorts. It is estimated that the Argentine surplus this year will be 232,000,000 bushels, or about 50,000,000 bushels more than that of last year. Final prices show a decline for the week of 1 to 2c.

Oats advanced ⅛c. and then fell back ¼ to ½c. in a small market. Speculation is not attracted to oats by anything in the present situation. Price changes are too slight and demand too sluggish. There has been some hedging by cash houses and not much interest among commission concerns. Firms with New York connections have in some cases been selling December and buying September at 2c. premium on December. On the 21st inst. prices fell 1 to 1⅛c., the latter on July. It was being liquidated. Crop reports were not altogether favorable. Some of them were rather bad. But on the other hand there was little demand. World shipments last week were 2,850,000 bushels. To-day prices closed ½c. lower, partly in sympathy with a decline in other grains. Some attributed the drop partly to the defeat of the so-called farm relief measures. In addition, however, favorable weather had a weakening effect on prices. Also the dulness of the cash trade. The receipts were moderate, but this was offset by the lack of snap in the cash trade. Final prices show a decline for the week of 1½ to 2c.

Rye fell 1½ to 2c. on the 19th inst. on realizing sales and a certain sympathy as usual with a decline in wheat. But there is an undercurrent of bullish sentiment about

rye. For the crop is smaller in the United States than last year and there seems to be prospects of at least a fair export demand, judging from European reports about its crops of grain. On the 21st inst. prices fell, affected by the depression in other grain. A little, but only a little, export business was done. To-day prices closed 1¼ to 1¾c. lower, owing to good weather, a decline in wheat and the lack of export trade. Added to this were liquidation of tired longs, some general selling for a decline and the absence of aggressive demand from any source. The swing of quotations to-day was 2c. Final prices show a decline for the week of 5 to 6½c.

WEATHER BULLETIN FOR THE WEEK ENDED JUNE 22.—The general summary of the weather bulletin issued by the Department of Agriculture, indicating the influence of the weather for the week ended June 22, follows:

At the beginning of the week much cooler weather prevailed over the interior and Central-Northern States, but there was a gradual, though moderate, reaction to warmer weather during the following day or two, to be followed, however, on the 18th-19th by lower temperatures attending a high pressure area advancing eastward over Central and Northern States. The latter part of the week was warmer quite generally east of the Great Plains.

Chart I shows that the termperature for the week averaged below normal throughout the country, except in the South and over a small area in the central and North Pacific States. It was especially cool from the Missouri Valley eastward, where the weekly mean temperatures ranged from 6 deg. to as much as 9 deg. below normal. Most of the South, except the South Atlantic States, had somewhat more than normal warmth. Maximum temperatures were in the 90s from Virginia, the Ohio River and central Great Plains southward, reaching 100 deg. locally in the Southwest, but they did not go as high as 80 deg. in many Northern States.

Two depressions passed eastward over the northern half of the country during the week and were attended by unsettled and showery weather in most sections east of the Great Plains, the rainfall being rather frequent in the Northern States. In the South rain was widespread on the 18th-19th, with some heavy falls locally in the Southwest. West of the Rocky Mountains generally fair weather prevailed, except for rather frequent showers in the North.

Chart II shows that the total rainfall for the week was moderate to rather heavy throughout the area between the Mississippi River and Rocky Mountains, except locally in west Gulf sections and the central Plains. East of the Mississippi River the amounts were generally light to moderate, being mostly very small in the Middle Atlantic States and Lake region. In the far West the week was practically rainless, except in the more northern districts, where in some sections good showers occurred.

The generous rainfall over the North-Central and Northwestern States, especially in much of the Spring Wheat Belt, was opportune, and as a result growing crops in general show material improvement in those sections. There is now too much moisture for cultivation of row crops, however, in some Central-Northern States, particularly in parts of southern Iowa and northern Illinois, with some complaints of fields becoming grassy, while it was generally too cool for good growth of warm-weather crops quite generally over the northern half of the country. Rainfall was still inadequate locally in the interior, particularly in the immediate lower Ohio Valley and in southeastern Missouri. Elsewhere in the interior States moisture was sufficient for present needs, but warmer weather would be beneficial for corn.

In the Southeast, intermittent showers with occasional good rains have materially relieved the severe droughty conditions in the interior, although locally rainfall was still insufficient in northern Georgia and some adjoining sections. In general, the increased moisture has been of great benefit in this section of the country. Showers in the interior of the Middle Atlantic area were likewise helpful, but in the more eastern districts, includ-

ing easter Virginia, Maryland, easter Pennsylvania, and over the coast sections from New Jersey northeastward, rain is still needed for most crops.

In the Southwest moderately warm weather and occasional showers produced favorable conditions and practically all crops show satisfactory growth. Farm work made good progress, except for some local interruption by showers to threshing in Texas. Wheat harvest had advanced at the end of the week as far north as extreme southern Nebraska. In the more western States moisture is badly needed for the range and dry-land crops in the Great Basin, and there was damage by hail in some central Rocky Mountain districts, but otherwise the weather was favorable for agricultural and grazing interests.

SMALL GRAINS.—The harvest of winter wheat progressed rapidly during the week, under generally favorable weather conditions, and advanced northward to southern Maryland, the southern portions of Indiana and Illinois, and extreme southern Nebraska. There was some local interruption to threshing by showers in the Southwest, but this work made mostly good progress. In the Spring Wheat Belt the generous rains were beneficial, particularly in North Dakota, where the crop made excellent progress. All spring grains show improvement also in South Dakota, but oats and barley are showing better than wheat. Spring wheat is beginning to head in Montana and Minnesota, but much of it on short straw; in the latter State the condition of the crop is generally fair and its color good.

Frequent showers and cool weather favored the growth of oats and they show material improvement in practically all central valley and North-Central States. The crop has been badly damaged, however, by lack of moisture, in lower Ohio Valley districts. Rice shows rapid growth in the lower Mississippi Valley and fair to very good advance in west Gulf sections, but needs warmer nights in California. Flax made fair progress in South Dakota and is in very good condition farther north.

CORN.—Corn needs warmer weather quite generally, especially from the Ohio River northward and eastward. Growth during the week was slow in this area and the crop is late, but is generally well cultivated except in parts of northern Illinois and locally in Ohio, where too wet. West of the Mississippi River growth was also slow in the northern States because of coolness, but the crop is generally in fair to very good condition and it made good progress from Missouri and Kansas southward. Rainfall in the central Great Plains and lower Missouri Valley was very beneficial, and much improvement, by reason of increased moisture, was reported from the Southeast. The best fields are more than knee-high in Iowa and waist-high in southeastern Kansas.

COTTON.—The week was rather too cool for best growth of cotton in the extreme northeastern and over a narrow strip across the northern portion of the belt, and there was some interruption to cultivation locally by heavy rains in the west, but otherwise conditions were generally favorable with the prevailing moderate warmth and mostly light to moderate showers.

The rains in northern Georgia and the interior of the Carolinas were very helpful, though moisture is still needed in a few local areas and in North Carolina the result of increased moisture on ungerminated seed is not yet apparent. The progress of the crop was fair to very good in many central and southern Georgia counties, and mostly so in Alabama, Mississippi and Tennessee, while much bloom and excellent growth were reported from Florida.

Cotton grew well in Louisiana and progress was fair to very good in Arkansas, where the fields are clean and well cultivated, with plants squaring and blooming in central and southern counties. Growth was also fair to very good in Oklahoma, with early plants setting squares and some bloom showing in the Southeast, though there was interruption to cultivation by rainfall. In Texas growth was generally very good, with plants fruiting well in the south, and chopping and cultivating well advanced. There were local reports of insects in all southern States of the belt. Cotton is generally in satisfactory condition in the far Southwestern States.

The Weather Bureau also furnishes the following resume of the conditions in the different States:

Virginia.—Richmond: Cool most of week; moderate showers latter part in central and southwest improved crop conditions and considerable tobacco set out. Corn doing well in most sections. Cotton fair. Harvesting wheat and early potatoes made good progress. Fruit prospects continue good. Droughty conditions continue in east and south-central.

North Carolina.—Raleigh: Drought relieved by generous rain Saturday and Sunday; more needed in some border sections and in mountains. Cotton very late, but improving; stands irregular over large areas and effect upon delayed germination of seed remains to be seen. Crop conditions much more favorable. Tobacco and corn much improved.

South Carolina.—Columbia: Intermittent showers in most sections and some good rains in west and northwest materially improved crops, with good cotton, corn, and truck stands indicated in Piedmont and vigorous growth generally elsewhere. Tobacco poor to fair with poor stands. Potato harvesting results disappointing; sweet potato transplanting progressing.

Georgia.—Atlanta: Generally warm, but cool near close; moderate to good rains over much of State favorable, but some localities still need moisture. Progress and condition of cotton fair to very good in many southern and central counties; late crop improving in many northern sections; well cultivated; blooming in south and central; weevil appearing in some south and central counties. Corn good in south; improving in north where rains occurred.

Florida.—Jacksonville: Cotton progress and conditions excellent; much bloom; weevil general, but inactive. Rains general and caused marked improvement in corn, cane, peanuts, sweet potatoes, and citrus fruits. Melon and cantaloupe shipments increased; also peaches from north. Tomatoes and other truck improved. Harvesting tobacco advanced; crop good. Ranges greatly benefited by rain.

Alabama.—Montgomery: Scattered showers; vegetation in many sections needs rain. Progress and condition of corn, potatoes, oats, truck, pastures, and minor crops mostly fair to good. Progress and condition of cotton mostly fair to very good; color good and well cultivated, but still late; bloom increasing in south and central portions; squaring in north to Lamar County; weevil reported locally in south.

Mississippi.—Vicksburg: Rains generally local, ranging from light to generous. Progress of corn poor to fair. Advance of cotton mostly fair, but some appearance of lice and weevil, mostly in west, but damage probably slight; early crop squaring freely with few blooms throughout. Progress of pastures and truck fair to good.

Louisiana.—New Orleans: Warm week, with well distributed showers latter half, excellent for growth. Fields generally clean. Cotton, corn, and cane still somewhat late, but showing general improvement. Advance of cotton excellent; early blooming; weevil appearing in many sections and rather numerous, considering size of plants. Corn benefited by rains, which were badly needed in north. Cane and rice made rapid growth.

Texas.—Houston: Lignt to generous rains, except in extreme south where dry. Conditions generally favorable for plant growth and outdoor work, except threshing delayed locally by showers in northwest; elsewhere threshing wheat and oats made good progress with large yields. Progress and condition of pastures, corn, rice, cane and minor crops fair to very good. Cotton made very good growth; condition fair to very good; fruiting very well in south, chopping and cultivation well advanced; few complaints of lice, fleas, and weevil, but damage generally slight.

Oklahoma.—Oklahoma City: Cool, with moderate to excessive rains, except dry in parts of southwest. Harvesting wheat and oats practically finished, except in extreme north; threshing under way with yields very good. Progress and condition of corn generally very good; early tasseling in south. Advance and condition of cotton generally fair to very good; chopping and cultivation retarded by rains; early setting squares and some bloom in southeast.

Arkansas.—Little Rock: Advance of cotton very good to excellent due to moderate temperatures and favorable moisture; crop clean and well cultivated; squaring and blooming in central and south; few weevil appearing; general condition very good. Progress of corn very good to excellent; beginning to tassel. Wheat and oat harvest well along with good yields. Rice growing nicely.

Tennessee.—Nashville: Generous rains in central, with moderate temperatures, favorable. Progress of corn excellent; fair cultivation. Cotton somewhat late but progressing very well. Winter wheat most all in shock with heads well filled. Spring oats coming good; straw short but heading heavily. Tobacco somewhat late but growing rapidly and in fine condition.

Kentucky.—Louisville: Cool, but generally favorable; moderate showers in central; more needed in west. Planting tobacco about finished; stands good and starting well; cultivation proceeding normally. Wheat harvest commenced in south; ripening in north. Progress and condition of early corn very good; late fair and some complaint of irregular stands account much replanting; cultivation excellent. Cotton 6 inches high; being worked second time.

THE DRY GOODS TRADE.

Friday Night, June 25 1926.

Textile markets continued more or less irregular the past week. During the early part, prices appeared more stable, which encouraged a certain amount of buying. However, business dropped off the latter half, owing to cool weather and prices again displayed an easier tendency. A feature of the latter was the announcement that rayon prices will be reduced on July 1. Definite figures have been withheld and will not be published until Monday morning. Generally, the trade expects a reduction of 50 cents on the "B" and "C" qualities and from 25 to 35 cents on the "A" grade. Prices for rayon have not been officially cut in more than two years, the postponement of readjustment having been maintained despite the downward tendency of cottons, silks, and worsted yarns. This has been due to the fact that production has been in the hands of a comparative few and that the product is a chemical one. It is expected that the change will have but slight effect in primary markets, coming as it does at the end of the jobbing season and at a time when mills are about to begin preparations for their spring lines. Opinions differ as to the probable effect upon finished goods. While some expressed the belief that the reduction will stimulate new business, others claim that it will result in a restriction of trade. In regard to silks, although the advance in raw prices has hesitated, quotations have been steady around prevailing levels. Demand for finished silks has continued irregular. The current consumer vogue for white in all branches of ready-to-wear has resulted in a good demand for this color in crepe de chine, satins, radiums, georgettes and novelty sport silks. Other items have been comparatively quiet.

DOMESTIC COTTON GOODS: After last week's decline of prices for raw cotton, buyers were got over-anxious to re-enter markets for domestic cotton goods during the week. It was noticeable that confidence was lacking and selling agents are expecting production figures to show a greater decrease for June. Business has been quiet and prices continued to ease in certain directions. For instance, low bids were made for print cloths and some were accepted. Gray cloths have displayed more quietness than in some time. However, a fair movement was reported for certain goods of a seasonal nature, such as cotton dresses, voils and percales. Reports from manufacturers of heavy goods indicate a letting down in demand for cloths from the automobile trade. It was claimed that some mills have been requested to defer deliveries, while others have had their contracts canceled. In regard to the resolution passed at the recent meeting in this city of the American Cotton Manufacturers Asosciation and the National Cotton Manufacturers Association, to appoint a committee to study other industries organized on a national scale and submit a plan applicable to the cotton industry, it was announced that the committee has been appointed and will meet in New York next Tuesday and Wednesday to enter upon its duties. The committee, which comprises five members from each of the above associations, will undoubtedly have frequent meetings during the next few weeks to round out their plans. The committee is desirous of losing no time in working out a comprehensive idea, which will be submitted to the industry for approval. It is generally believed that some plan for co-operation, rather than a central control, will be recommended. However, the committee enters upon its task with no preconceived plan, but will devote its efforts to bring forth as soon as possible the best scheme to combat the problems besetting the industry. Print cloths 28-inch, 64 x 64's construction, are quoted at 5⅜c., and 27-inch, 64 x 60's, at 5⅛c. Gray goods in the 39-inch, 68 x 72's construction, are quoted at 8c., and 39-inch, 80 x 80's at 10c.

WOOLEN GOODS: Little change was noted in markets for woolens and worsteds. Factors have continued to view the future in a more optimistic frame of mind, despite the fact that current business has been limited to small lots. About the only cloud on the horizon is the possibility of a strike among garment workers in this city. Factors are looking forward to the labor meeting to be held in Madison Square Garden next Tuesday, when it is expected that a vote will be taken for either a renewal of the present contract beginning July 1 or order a walkout. It was claimed that stocks in second hands have been pretty well depleted. In view of the fact that the market is on the threshold of a buying period, if the strike is averted and the purchasing movement gets under way, the fall season is expected to turn out much better than generally supposed.

FOREIGN DRY GOODS: Linen markets were less active during the week, although total sales volumes were said to have compared favorably with those of a year ago. Profit margins were still unsatisfactory, but importers continued to put forth their best efforts to push sales. The persistency of cool weather has succeeded in retarding the distribution of dress linens, and, for the same reason, repeat orders on knickers and suiting linens have been backward. Reports from abroad indicate that mills are maintaining a satisfactory rate of operations. It was claimed that new ideas on damasks and luncheon sets will arrive in time to stimulate fall sales. Burlap prices have been firm, with a moderate volume of business transacted. Light weights are quoted at 6.85 to 6.90c., and heavies at 8.95c.

State and City Department

SPECIAL FEATURES
OF OUR
STATE AND MUNICIPAL COMPENDIUM

In the semi-annual number of the above publication, a copy of which goes to every one of our subscribers, there are several special articles which have a wide degree of interest.

(1) Our customary annual analysis of the municipal bond sales for the preceding calendar year, this time 1925.

(2) ***Something never attempted before by any publication,*** a study of the amounts of the municipal bonds redeemed or retired, the totals of which now run up into the hundreds of millions annually.

(3) An elaborate tabular statement, comparing the totals of the municipal sales, under leading heads, for the past 25 years.

NEWS ITEMS.

Montague Irrigation District, Siskiyou County, Calif.—$1,395,000 *Bond Issue Certified by the California Bond Certification Commission.*—It was announced on June 3 that the California Bond Certification Commission had certified a $1,395,000 bond issue of this district, over the protest of many of the ranchers affected. The following is quoted from the San Francisco "Chronicle" of June 4:

The Commission, consisting of Attorney-General U. S. Webb, State Engineer W. F. McClure and Superintendent of Banks J. F. Johnson, found that there is a ample supply of water available for irrigation, that the soil of the district is fertile and susceptible to irrigation, and that the project is feasible and can be carried out from the proceeds of the present bond issue, the announcement states.

The reasonable market value of the water, water rights and irrigation works involved in the project is placed at $1,395,000, while the market value of the lands comprising the irrigation district is given as $2,500,000. The Commission ruled that the bond issue does not exceed 60% of the value of the lands plus the value of the irrigation works.

The bond issue was warmly contested at hearings held before the Commission in the State building. A. J. Treat, San Francisco, attorney representing the contestants, argued that the bonds would mean a pro rata indebtedness of $71 54 for each of the 19,500 acres in the district, a load too heavy for the owners to carry. The district has a relatively short crop season, he pointed out, due to a brief rainy season and the blighting effect of early and late frosts. The high cost of labor is another factor that the ranchers have to contend with, he said.

G. W. Dwinnell is President of the Montague Irrigation District, Alice Simon is Treasurer, Roy E. Swigert Secretary, and John Beemer, Chief Engineer. The directors include Dwinnell, Edward O'Connor and M. L. Prather.

Maine (State of).—*List of Legal Investments for Savings Banks.*—The Bank Commissioner has prepared a new list of securities which he considers legal investments for savings banks in the State of Maine as of May 1 1926.

The following statement made by the Bank Commissioner accompanies the list:

In compliance with Paragraph XVI of Section 27, of Chapter 144 of the Public Laws of 1923, I hereby certify that upon investigation I find the following obligations to be legal investments for Maine savings banks, as of May 1 1926.

It should be noted that the list does not include bonds and stocks of Maine corporations named under paragraphs IX and X, because the statute does not require certification. The necessary qualifying factors in such cases must be ascertained by the purchasing bank. All questions of interpretation of the statute in cases of doubt should be taken up with the department in advance of purchase.

On account of the difficulty in obtaining authentic information from city and town officials the municipal list (IV) is very incomplete. For the same reason a few public utility securities which are probably legal, do, not appear on list VII

The Commissioner does not deem it wise to certify investments of this character except upon the sworn statement of responsible officers of the operating company as to the existence of the qualifying facts.

Dated at Augusta, Maine, this 1st day of May 1926.

JOHN C. SMITH, *Bank Commissioner.*

The list as compiled by the Commissioner is given below. A similar list is prepared every six months—in May and November—and the list for Nov. 1925 was printed in full in the "Chronicle" of Jan. 2 1926, pages 117, 118 and 119. *The bonds added to the new list are italicized, while those bonds which appeared in the Nov. 1925 list and which do not appear in the list now given are placed in black-faced brackets.*

Securities Considered Legal Investments for Savings Banks May 1 1926, under Paragraphs of Section 27 as Numbered.

I. GOVERNMENT OBLIGATIONS.

(a) Bonds and other interest-bearing obligations of the United States, including those for the payment of the principal and interest of which the faith and credit of the United States Government is pledged.

(b) Obligations of the Dominion of Canada as follows: 5% Bond Loan of 1915, due Aug. 1 1935; Public Service Gold Loan 5s of 1916, due April 1 1926-April 1 1931; Third War Loan 5s of 1917, due March 1 1937; External Gold 5½s of 1919, due Aug. 1 1929; External Gold 5s of 1922, due May 1 1952.

II. OBLIGATIONS OF STATES.

Legally issued bonds or other interest-bearing obligations of any State in the United States. (It is the understanding of the Commissioner that no State is disqualified under the default provision.)

III. OBLIGATIONS OF COUNTIES.

(a) Legally issued bonds or other interest-bearing obligations of any county in this State.

(b) Bonds of counties outside Maine considered eligible under this subdivision.

The following are all of Ohio:

Ashtabula	Franklin	Lorain	Mahoning
Cuyahoga	Jefferson	Lucas	Summit

IV. MUNICIPAL OBLIGATIONS.

(a) Legally issued bonds or other interest-bearing obligations of any municipal or quasi-municipal corporation of this State, provided such securities are a direct obligation on all the taxable property thereof.

(b) Bonds of municipalities outside Maine considered eligible under this subdivision follow:

MUNICIPAL BONDS.

Cambridge	Kalamazoo		

(c) Legally issued bonds or other interest-bearing obligations of any quasi-municipal corporation, other than an irrigation or drainage district, within the territorial limits of any city or town whose obligations are eligible under the provisions of sub-section b, of this section, or comprising within its limits one or more such municipalities; provided, however, that the population and valuation of any such quasi-municipal corporation incorporated within a single city or town shall be at least 75% of the population and valuation of the city or town in which it is located; and provided, further, that such obligations shall be enforceable by a direct tax levied on all the taxable property within such corporation.

V. FEDERAL LAND BANKS.

Legally issued bonds or other interest-bearing obligations of any Federal Land bank or Joint Stock Land bank organized under any Act of Congress enacted prior to April 4 1923.

Railroad bonds legal under the terms of Paragraph VI are:

BANGOR & AROOSTOOK SYSTEM.

Bangor & Aroostook RR.—	Equip. trust Series G, 7s, 1927-1936

New Jersey (State of).—*Change in Savings Bank Law.*—Besides the change to Section 33 of the State Savings Bank Law, mention of which was made in last week's edition, page 3486, Section 34 of the same law was also amended. The amendment to both sections was made by Chapter 129, Laws of 1926, and became effective March 23 1926. By the change to Section 34 any savings bank may now loan to any of its depositors, upon notes, bills of exchange, &c., a sum not exceeding the amount of his deposit upon the promissory note of such depositor secured by his deposit. Before it had been provided that such a loan to a depositor could not exceed 90% of his deposit. Section 34 now reads:

34. *Loans on Collateral Security.*—No savings bank shall loan the money on deposit with the same, or any part thereof, upon notes, bills of exchange or drafts, except upon the additional pledge of collateral security, which shall be of the same nature and character as those in which the money deposited may be invested as directed in the preceding section, or the capital stocks of national and State banks, or the capital stock or bonds of other corporations of this State, which have not defaulted in the payment of interest or dividends, upon the collateral loaned upon, within two years next preceding the time of such loan, and then only to the extent of 80% of the market value of such collaterals: provided, the total amount of such loans shall not exceed 15% of the total deposits held by such savings bank: provided, further, that any savings bank may loan to any of its depositors a sum not exceeding the amount of his deposit upon the promissory note of such depositor secured by his deposit.

Additional Investments by Executors, Administrators, &c. Also Permitted.—By an amendment made in 1926 (Chap. 305, Laws of 1926), any executor, administrator, guardian or trustee whose duty it may be to loan moneys entrusted to him is now authorized, in addition to those securities already permitted, to invest in participation certificates or coupon bonds which entitle the holder to a proportionate share in a series or number of mortgages and bonds or extensions or renewals thereof, deposited under a trust agreement with a trust company, bank or title guarantee corporation. The law to which this is an amendment was approved April 19 1920 and amended by Chapter 144, Laws of 1922. As a result of the latest amendment, effective March 29 1926, the law now reads (the new matter added being placed in italics, while the matter dropped is put in bold face brackets):

Any executor, administrator, guardian or trustee whose duty it may b to loan moneys entrusted to him in addition to the securities in which h may invest the same under the provisions of the Act to which this is*

supplement, may invest the same in shares or parts of bonds secureb dy mortgage or bonds secured by trust mortgage, *and in participation certificates or coupon bonds which shall entitle the holder to a proportionate share in a series or number of mortgages and bonds or extensions or renewals thereof, deposited under a trust agreement with a trust company, bank or title guarantee corporation*, which shall be a first lien upon improved real estate, provided the amount of such [mortgage] *mortgages* shall not at the time of the making of such loan exceed sixty per centum of the estimated worth of the real estate covered by such *respective* [mortgage] *mortgages* at a rate of interest not less than three per centum nor greater than six per centum per annum; provided, that any share or part of such [bond] *bonds* and [mortgage] *mortgages* or [bond] *bonds* secured by such trust mortgage so held shall not be subordinate to any other [bond] *bonds* issued thereunder and shall not be subordinate to any prior interest therein: and provided, further, that bonds and mortgages in parts of which any fiduciary may invest trust funds, or, in the case of trust mortgages, the trust mortgage, together with any guarantees of payment, insurance policies and other instruments and evidences of title relating thereto, hall be held for the benefit of such fiduciary and of any other persons interested in such bonds and mortgages by a trust company, bank or title guarantee corporation organized under the laws of this State, or jointly by such a corporation, and an individual who is a citizen and bona fide resident of this State, and in mortgages other than trust mortgages, that a certificate setting forth that such corporation, or such corporation and such individual jointly as the case may be, holds such instruments for the benefit of such fiduciary and of any other persons who may be interested in such bond and mortgage among whom the corporation or the individual jointly holding such instruments may be included, be executed by such corporation and delivered to each person who becomes interested in such bond and mortgage. Every corporation, or corporation and individual jointly, issuing any such [certificate] *certificates*, shall keep a record in proper books of account of all certificates issued pursuant to the foregoing provisions. An executor, administrator, trustee or other person holding trust funds may require such bonds or guarantees of payment to accompany investments as may seem prudent, and all premiums paid on such guarantees may be charged to or paid out of income, providing that such charge or payment be not more than at the rate of one per centum per annum on the par value of such investment. *Any trust company, title company or bank, incorporated under the laws of this State and authorized by its charter to transact the business of loaning money on bond and mortgage upon improved real estate, which are first liens thereon, may issue participation certificates or coupon bonds with a guarantee of payment of principal and interest and secured by a trust mortgage or trust agreement deposited with a trust company, bank or title company organized under the laws of this State, which trust mortgage or agreement may include a number of bonds and mortgages and shall designate them as a series set apart as security for such participation certificates or coupon bonds and refer to them by brief description of dates, parties, amounts, reference to location of property, maturity and rate of interest. Such trust agreement or mortgage shall contain suitable provisions for substitution and extension of mortgages and bonds secured thereby and it shall not be necessary to insert such details in the participation certificates or coupon bonds other than by reference to such trust mortgage or agreement.*

New Orleans, Orleans Parish, La.—*Paving Bill to Raise Limit Passed by House.*—On June 7 the House by a 70 to 6 vote passed the New Orleans paving bill, which authorizes the city to hold an election and submit to the property holders the following proposition:

That the limit of the paving certificates shall be raised from $15,000,000 to $25,000,000.

That the engineering cost of paving up to 3% of total shall be charged against the property holders.

That lettings of paving contracts shall be four times a year instead of twice.

The measure now goes to the Senate.

Texas (State of).—*Attorney-General and Governor Differ on Validation of Road District Bonds.*—Governor Miriam A. Ferguson announced herself in a statement made through her husband on Monday June 21, as opposed to validation by the State Legislature of the millions of road district bonds which it is thought are affected by the decision handed down by the Supreme Court in the Archer County Road District case. Mr. Ferguson wants the people of the road districts affected to vote on validating the bonds, while Attorney-General Dan C. Moody claims there is no need for the people of the road districts affected to vote again on the bonds, as the people of these districts by voting the bonds have already expressed their willingness to incur the indebtedness and pay the same and the only thing for the Governor to do is to call a special session of the Legislature to validate the bonds. We quote from the Dallas "News" of June 22 Mr. Ferguson's statement and Attorney-General Dan C. Moody's reply:

"The bond validation crowd is attempting to misrepresent the Governor's attitude on the issue. The Supreme Court of the United States held that the Archer County bonds were void and unconstitutional. This being so, I was eminently correct when I said that the court had held that the people do not owe these bonds. If the court has not said so then what is the validation crowd kicking about.

"I repeat that these bonds can not be validated without the vote of the people. The bill submitted by the Eastern bond attorneys to the Governor does not provide for a vote of the people who live in the districts where the bonds were issued. What I want and what the Governor wants is to pass a law referring the question of validating these bonds back to the people and if they then vote to validate these bonds, then the objection raised by the Supreme Court of the United States has been met, and the credit of the State has been restored. If Kemp and Moody want to say that the people should not be given a chance to pass on this question, then let them say so and then the people will known where to place them. They propose something that does not meet the objection of the Supreme Court and also seek to deprive the people of each road district of a right which the court says can not be taken away from them.

"The Kemp-Moody crowd proposes no legal validation, while the Governor proposes legal validation. That is the difference. At the proper time the Legislature can take care of this question. If these bond buyers and bond brokers will stop slandering the State by talking about repudiation, nobody else will think about it. But don't forget that Moody brought on all the trouble and he does not know how to cure his mistake."

Mr. Moody's Statement.

Mr. Moody's statement on the bond matter in part follows:

"In the statement which Mr. Ferguson has given out to-day, he but reaffirms the declaration made at Wichita Falls. He repeats and emphasizes the statement that the 'people do not owe' the debt represented by the road district bonds, and leaves no possible inference except that the Governor would not approve legislation designed to effect their immediate validation.

"He declares for a referendum to the people in the road districts affected, ignoring the fact that the people of those districts by voting the bonds have already expressed their willingness to incur the indebtedness and to pay the same. This is another case of Nero fiddling while Rome burns. The bonds were sold with faith in their validity, they were bought with faith in their validity, the money was received and expended for the public good, and the debt at least represents a moral obligation. Of course, Texas wants to pay its debts. It takes no election to determine that fact.

"While Ferguson delays a special session of the Legislature, and would further delay validation of the bonds until an election could be held in the various districts, the credit of the State and its subdivisions is unfairly jeopardized and the public securities of this State have at best only a restricted market. The people are losing untold thousands by the inaction of Jim Ferguson.

"He has sought to make it appear that the bonds are held by foreign concerns. It makes no difference who holds them. When Texas owes a debt it will be paid. As a matter of fact nearly $20,000,000 of these securities are owned by the Woodmen of the World, nearly $4,000,000 are owned by the Maccabees, some are owned by the permanent school fund of Texas, some are held by the S. P. J. S. S., a Bohemian lodge. They constitute the reserve back of thousands of insurance policies held by citizens of this State.

"He wants to know how I stand on the bond question. I can tell him in very few words. I favor their validation, and if I had been Governor of Texas a legislative session would have been called long ago for the purpose of validating these bonds.

"He wants a referendum to the people, and we can give it to him on July 24. I call upon the people of Texas to vindicate the honor of the State by the overwhelming condemnation of Ferguson and his suggestion that the people may not want to pay their honest debts. Let the primary election of July 24 be a referendum upon this question, and let the people of Texas show in overwhelming majorities that they resent the suggestion by one in public life that the public debt be not paid.

"The falsity of Ferguson's statement that I am responsible for the bond situation has been demonstrated so many times that it is unnecessary to repeat the facts. The Archer County case was pending in the Supreme Court of the United States before I became Attorney-General."

United States of Brazil.—$25,000,000 *External Loan Floated in United States.*—A banking syndicate headed by Dillon, Read & Co. of New York offered and quickly sold on June 24 $25,000,000 6½% external sinking fund gold bonds of the United States of Brazil at 90½, to yield over 7.25% to maturity. Date April 1 1926. Bonds are coupon bonds in denominations of $1,000 and $500, registerable as to principal only. Principal and interest A. & O., payable in United States gold coin of the present standard of weight and fineness in New York City at the office of Dillon, Read & Co., or, at the holder's option, in London in sterling at par of exchange at the office of N. M. Rothschild & Sons, free from all Brazilian taxes, present or future. Non-callable except for the sinking fund. Due Oct. 1 1957. Regarding the sinking fund provision the official circular says:

An accumulative sinking fund of 1% per annum, payable semi-annually, will be applied to the redemption of bonds by call by lot at par and accrued interest. The sinking fund will be increased by amounts equal to interest on bonds previously redeemed. This sinking fund is calculated to retire all of the bonds of this issue by maturity.

Further information regarding this loan may be found in our "Department of Current Events and Discussions" on a preceding page.

BOND PROPOSALS AND NEGOTIATIONS

this week have been as follows:

AKRON, Summit County, Ohio.—*BOND OFFERING.*—Sealed bids will be received until 12 m. (eastern standard time) July 19 by B. J. Hill, Director of Finance for the following two issues of 5% coupon or registered assessment bonds, aggregating $459,700:
